"The Criminal Courts of New York County, unlike those of adjoining counties which close during some of the summer months, sit continuously during the entire year, and during the coming months of July, August and September it will be necessary to have at least three Courts in continuous session. As an illustration of this increase in criminal business, I desire to state that formerly one Grand Jury in continuous session and occassionally a special Grand Jury, was sufficient to dispose of the criminal business of this County, but it now necessitates two Grand Juries in continuous session, and even with their aid it is impossible at times to cope with the situation. For instance, there have been months when it was essential to have three or four Grand Juries and on one occasion five Grand Juries in session during the past year."

As the grade of position of Stenographer to the Grand Jury, at $10 per diem, has not been established, pursuant to the provisions of section 56 of the Greater New York Charter, no action can be taken at this time on this item in the request.

It is proposed to appoint the four additional Assistant District Attorneys on September 1, 1911. To provide for their compensation from September 1 to December 31, 1911, the sum of $10,000 will be required. The estimate of $842 for desks and other office furniture makes necessary a total of $10,842.

I recommend adoption of the attached resolutions approving the request to the extent of $10,842, and a schedule for the fund. Respectfully,

WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the expenditure of ten thousand eight hundred and forty-two dollars ($10,842), for the compensation of four additional Assistant District Attorneys, from September 1 to December 31, 1911, and the purchase of desks and other necessary supplies in the office of the District Attorney, New York County, and recommends that payment of the same be made by the Comptroller out of the sale of special revenue bonds of The City of New York, issued pursuant to the provisions of subdivision 7 of section 188 of the Greater New York Charter.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedule for employees paid from other than budgetary funds in the office of the District Attorney, New York County, for the year 1911, to take effect September 1, as follows:

District Attorney, County of New York—

Salaries, Revenue Bond Force:

Assistant District Attorneys, 4 at	$7,500 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Public Service Commission, for the First District, relative to, and report of the Comptroller recommending, that the resolution adopted October 30, 1908, which authorized the issue of $160,000 corporate stock for the purchase of property 239 and 241 Canal street and 157-163 Centre street, Manhattan, and for interest and incidental expenses in connection therewith for the construction and operation of the Brooklyn Loop Lines, be rescinded, and that the Board authorize a new issue of corporate stock in the sum of $160,000 for the acquisition of real estate or interest therein necessary for the construction and operation of the Brooklyn Loop Lines, Borough of Manhattan:

(On June 15, 1911, a communication from the Public Service Commission requesting that the resolution of October 30, 1908, be amended by making the amount authorized available generally for the payment of the expenses of the acquisition of property for the Brooklyn Loop Lines, was referred to the Comptroller.)

State of New York, Public Service Commission for the First District, Tribune Building, 154 Nassau Street, New York, June 12, 1911.

To the Board of Estimate and Apportionment of The City of New York:

The Public Service Commission for the First District on October 16, 1907, made requisition upon the then Board of Estimate and Apportionment of The City of New York for the authorization of corporate stock of The City of New York to be sold by the Comptroller in the amount of one million dollars ($1,000,000), to pay the expense of the acquisition of real estate or of interests therein necessary for the construction and operation of the Rapid Transit Subway Railroad known as the Brooklyn Loop Lines in Manhattan, running under Centre street, with connections to Manhattan Bridge by way of Canal street and to Williamsburg Bridge by way of Delancey street. Pursuant to this requisition your honorable Board and your predecessor have authorized the issue of corporate stock to the amount of four hundred and forty-eight thousand eight hundred and fifty-five dollars ($448,855), to pay the expense of the acquisition of such real estate or interests therein and have also authorized the issue of corporate stock to an additional amount of five hundred and fifty-one thousand one hundred and forty-five dollars ($551,145), for the purchase of specific parcels of property necessary for the purposes of the said Brooklyn Loop Lines or for the payment of interest on the purchase price thereof. On December 23, 1910, this Commission made requisition for a further amount of corporate stock, to wit: The sum of one million eight hundred and fifty thousand dollars ($1,850,000), for the same purposes specified in its requisition of October 16, 1907, and pursuant thereto your honorable Board authorized the issue of corporate stock to the amount of one million two hundred thousand dollars ($1,200,000) for those purposes.

The total amount, therefore, appropriated to pay the expense of the acquisition of any real estate or interests therein necessary for the said Brooklyn Loop Lines, excluding the appropriations above mentioned made for the purchase of specific parcels of property or payment of interest on the purchase price thereof, is one million six hundred and forty-eight thousand eight hundred and fifty-five dollars ($1,648,855). Of this amount the sum of fifty thousand five hundred and seventy-one dollars and fifty-seven cents ($50,571.57) was expended up to May 31, 1911, for general expenses, such as fees of Commissioners of Appraisal, advertising, searches and appraisals, clerical expenses and special services, and the sum of one million five hundred and seventy-one thousand eight hundred and eighty-five dollars and ten cents ($1,571,885.10) was expended up to May 31, 1911, to pay awards for property condemned, with interest, leaving a balance now available of twenty-six thousand three hundred and ninety-eight dollars and thirty-three cents ($26,398.33.) This balance, however, does not include premiums realized from the sale of corporate stock.

An award for the sum of one hundred and sixty-five thousand dollars ($165,000) has been made and confirmed for property at the intersection of Centre and Lafayette streets, acquired by condemnation for the said Brooklyn Loop lines and is now due and payable with interest from July 22, 1908, the date when title vested in the City; but there are not sufficient funds available to pay it. Included in the sum of five hundred and fifty-one thousand one hundred and forty-five dollars ($551,145) appropriated, pursuant to the Commission's requisition of October 16, 1907, for the purchase of specific parcels of property or payment of interest on the purchase price thereof, however, is an item of one hundred and sixty thousand dollars ($160,000), appropriated on October 30, 1908, for the purchase at private sale of the property 239-241 Canal street and 157-163 Centre street. This sum has never been expended as the City did not have funds available to pay the purchase price of this property at the time title was to be closed under the contract and the owners of the property refused to keep the contract open any longer. The Commission, therefore, being unable to complete the purchase of this property was compelled to condemn it, and the voucher sent to the Comptroller for the payment of the purchase price was cancelled and withdrawn. An award was subsequently made for this property, but as the sum appropriated for its purchase was not sufficient to cover the amount of the award, with interest, payment was made out of the funds available generally for the acquisition of real estate for the said Brooklyn Loop Lines. Accordingly there now remains unissued in the account for this property corporate stock to the amount of one hundred and sixty thousand dollars ($160,000), which could be made available for the purpose of paying the award for the property at the intersection of Centre and Lafayette streets, with interest, any balance to be available for paying other expenses connected with the acquisition of real estate or interests therein for the said Brooklyn Loop Lines.

The Public Service Commission for the First District accordingly requests your Honorable Board to modify your resolutions of October 30, 1908, authorizing the issue of corporate stock by the Comptroller to an amount not exceeding one hundred and sixty thousand dollars ($160,000), to provide means for the purchase of the said property 239-241 Canal street and 157-163 Centre street, and of any award which might be made in the proceedings, together with interest thereon and examination of title to the said premises, so as to make the said sum of one hundred and sixty thousand dollars ($160,000) available generally for the payment of the expense of the acquisition of any real estate or interests therein necessary for the construction or operation of the said Brooklyn Loop Lines.

PUBLIC SERVICE COMMISSION FOR THE FIRST DISTRICT, by WM. WILLCOX, Chairman; TRAVIS WHITNEY, Secretary.

[SEAL]

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 12, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 12, 1911, the Public Service Commission for the First District, requested that a resolution adopted by the Board of Estimate and Apportionment October 30, 1908, authorizing $160,000 in corporate stock for the purchase of property 239-241 Canal street and 157-163 Centre street, Manhattan, and for payment of any award which might be made in the proceedings, etc., be amended to make the authorization available generally for the payment of the expense of acquiring any real estate or interest therein necessary for the construction or operation of the Brooklyn loop lines. In connection therewith I report as follows:

The $160,000 was found to be inadequate, and for that reason all expense incurred in acquiring the properties were paid out of the general fund.

The $160,000 authorization, therefore, remains unissued.

The request is made so that the amount may be available generally for the payment of the expenses of the acquisition of any real estate or interests therein, necessary for the construction or operation of the Brooklyn loop lines.

I recommend the adoption of the attached resolutions granting the request by rescindment of the original resolution and a new authorization for the proper purposes.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the resolution adopted by the Board of Estimate and Apportionment October 30, 1908, as follows:

"Resolved, That, pursuant to the provisions of section 10, chapter 4 of the Laws of 1891, as amended, and section 14, chapter 429 of the Laws of 1907, and a requisition of the Public Service Commission for the First District, duly made by the Chairman and Secretary thereof on October 16, 1907, for an appropriation of one million dollars ($1,000,000), for the acquisition of real estate or interest therein, necessary for the construction and operation of the rapid transit railroad known as the Brooklyn Loop Lines, Borough of Manhattan, and a supplemental requisition, under date of October 26, 1908, for an issue of one hundred and fifty-seven thousand seven hundred and ninety dollars ($157,790), for said purposes, the Comptroller be and is hereby authorized to issue corporate stock of The City of New York, on account of said requisitions (and in addition to the amounts heretofore authorized, viz., $40,000 on December 20, 1907; $166,145 on June 5, 1908, and $175,000 on June 12 1908) to an amount not exceeding one hundred and sixty thousand dollars ($160,000), to provide means for the following:

For the purchase of all right, title and interest in and to property known as 239 and 241 Canal street and 157, 159, 161 and 163 Centre street, Manhattan, and to any award which may be made in the proceedings.	$155,000 00
For interest thereon from August 22, 1908, to December 10, 1908......	2,790 00
For examination of title to above premises..........................	2,210 00
	$160,000 00

—be and the same is hereby rescinded.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 37 of chapter 4, Laws of 1891, as amended, and section 14, chapter 429, Laws of 1907, and a requisition of the Public Service Commission for the First District, duly made by the Chairman and Secretary thereof, on June 12, 1911, for an appropriation of one hundred and sixty thousand dollars ($160,000), for the acquisition of real estate or interest therein necessary for the construction and operation of the rapid transit railroad known as the Brooklyn Loop Lines, Borough of Manhattan, the Comptroller be and is hereby authorized to issue corporate stock of The City of New York on account of said requisition to an amount not exceeding one hundred and sixty thousand dollars ($160.000), the proceeds whereof to be applied to the purposes aforesaid.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following resolution of the Board of Aldermen requesting, and report of the Comptroller recommending, an issue of $6,000 special revenue bonds (subdivision 8, section 188 of the Charter) for the purpose of purchasing street flushing machines for the use of the Bureau of Street Cleaning, office of the President of the Borough of Richmond:

(On July 6, 1911, the resolution of the Board of Aldermen requesting the above appropriation was referred to the Comptroller.)

In the Board of Aldermen.

Resolved, That, in pursuance of the provisions of subdivision 8 of section 188 of the Greater New York Charter, the Board of Estimate and Apportionment be and it is hereby requested to authorize the Comptroller to issue special revenue bonds to the amount of six thousand dollars ($6,000), the proceeds whereof to be used by the President, Borough of Richmond, for the purpose of purchasing street flushing machines for use of Bureau of Street Cleaning, Borough of Richmond.

Adopted by the Board of Aldermen June 27, 1911, three-fourths of all the members voting in favor thereof.

Approved by the Mayor July 5, 1911. P. J. SCULLY, Clerk.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 12, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 27, 1911, the Board of Aldermen adopted a resolution requesting special revenue bonds to the amount of $6,000, for the purchase by the President of the Borough of Richmond of flushing machines, for use by the Bureau of Street Cleaning in his office. In connection therewith I report as follows:

The President states that owing to the raising of dust, it has been necessary to dispense with machine street sweeping, and that the hand brooms now being used do not clean the streets as thoroughly as is desired, particularly during the hot weather. It is stated that flushing by machine, following sweeping, will cleanse the streets properly.

The following table shows the areas of pavements in charge of the Street Cleaning Bureau in Richmond:

	Mileage.	Square Yards.
Granite block	5.9	108,465
Medina block	.2	4,524
Sheet asphalt	.5	6,409
Block asphalt	9.5	186,843
Wood block	1.3	27,483
Iron slag block	1.9	40,166
Vitrified brick	4.2	82,087
Bituminous concrete	2.7	53,333
Oil concrete	.1	2,200
Bituminous macadam	5.3	68,305
Macadam	102.9	1,032,190
	134.5	1,612,005

It is stated by the President that the sewers in the Borough are protected with catch basins to permit of street flushing.

I recommend the approval of the request by the adoption of the attached resolution.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the resolution adopted by the Board of Aldermen on June 27, 1911, and approved by the Mayor July 5, 1911, requesting an issue of special revenue bonds in the sum of six thousand dollars ($6,000), the proceeds whereof to be used by the President of the Borough of Richmond for the purpose of purchasing street flushing machines for use of the Bureau of Street Cleaning, Borough of Richmond, be and the same is hereby approved of and concurred in by the Board of Estimate and Apportionment, and for the purpose of providing means therefor the Comptroller be and is hereby authorized, pursuant to the provisions of subdivision 8 of section 188 of the Greater New York Charter, to issue special revenue bonds of The City of New York to an amount not exceeding six thousand dollars ($6,000), redeemable from the tax levy of the year succeeding the year of their issue.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Mayor's office notifying the Secretary of the appointment of the Board of Inebriety (chapter 551, Laws of 1910):

Which was ordered printed in the Minutes and filed.

City of New York, Office of the Mayor, July 13, 1911.

JOSEPH HAAG, Esq., *Secretary of the Board of Estimate and Apportionment:*

Sir—I am directed by the Mayor to inform you that the following have been appointed members of the Board of Inebriety: Dr. William Browning, 54 Lefferts place, Brooklyn; Dr. John Dorning, 124 W. 81st street, Manhattan; Rev. Dr. William

Morrison, Rector of All Saints' Protestant Episcopal Church, Brooklyn; the Very Rev. John J. Hughes, Superior of the Paulist Fathers in Manhattan.

The Mayor also appointed Thomas J. Colton as President of the Board. The Commissioner of Charities and the Commissioner of Correction are also by law members of the Board. Very truly yours,

ROBERT ADAMSON, Secretary.

The Secretary presented a communication from the Secretary of the Board of Education, transmitting certified copy of resolution adopted by said Board relative to awarding contracts for pianos for use in public schools to other than the lowest bidders.

Which was referred to the Comptroller.

The Secretary presented a communication from the Commissioner of Water Supply, Gas and Electricity, submitting for approval proposed form of contract with the Urban Water Supply Company for furnishing a supply of water for the use of the Borough of Queens stating that the contract had been drawn along the lines suggested by the committee, consisting of the Comptroller and Chief Engineer of the Board, which recently reported on the acquisition by the City of private water companies.

Which was referred to the Comptroller and the Chief Engineer of the Board.

The Secretary presented a communication from the Secretary of the Board of Education transmitting certified copy of resolution adopted by said Board relative to fixing the compensation of Janitors of Public School No. 114, Manhattan, and Public School No. 58, Queens.

Which was referred to the Committee on Salaries and Grades, consisting of the Comptroller and the President of the Board of Aldermen.

The Secretary presented communications (2) relative to additional rapid transit railways, as follows:

From C. Augustus Haviland, of No. 902 Fulton street, Brooklyn, favoring the construction and operation of subways by the City.

From the Farmers and Taxpayers' Association of the Third Ward, Borough of Queens, requesting that the contract for the extension of the rapid transit system into Queens on the north side of Long Island be given to the Interborough Rapid Transit Company.

Which was referred to the Committee of the Whole.

The Secretary presented a report of the Comptroller, returning for filing communication from the President of the Borough of The Bronx, requesting that the resolution adopted March 16, 1911, recommending the establishment of the grade of Clerk at $300 per annum, be amended by making the salary effective from February 17, 1911, as said request has been withdrawn.

Which was ordered filed, and the Secretary directed to return the communication referred to therein to the President of the Borough of The Bronx.

(On May 25, 1911, the above request was referred to the Committee on Salaries and Grades.)

The President of the Board of Aldermen offered the following resolution:

Resolved, That all Boards, Departments, Bureaus, Commissions or Offices of the City or County governments, authorized by this Board to incur obligations and execute contracts payable out of corporate stock, be and they hereby are directed to submit to this Board for its approval, plans, specifications and estimates of cost, prior to advertising for bids upon public works, funds for which may be authorized in the Corporate Stock Budget now before this Board, except that during the months of August and September such plans, specifications and estimates shall be submitted to the Comptroller for his approval.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Comptroller, on behalf of the Corporate Stock Budget Committee, consisting of the Comptroller, the President of the Board of Aldermen and the President of the Borough of Manhattan, presented the report of said Committee, as follows:

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 13, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—In connection with our reports upon requests of the various departments and offices for corporate stock to be authorized in the year 1911, we submit the following statement which shows the effect the adoption of our recommendations will have upon the borrowing power of the City, and which also expresses our attitude concerning several improvements which we believe are desirable, but which we have not included in our recommendations for immediate authorizations of corporate stock.

The total of entirely new authorizations and additions to existing authorizations of corporate stock which we have recommended is $45,807,818.23. We have recommended rescindments amounting to $647,272.41, which will make the net amount of new indebtedness $45,160,545.82. Not all of this amount will be an addition to the debt, because items aggregating $7,432,638.29, now recommended for authorization, are to wipe out indebtedness included in the debt statement of December 31, 1910.

When this is subtracted from the net amount of new indebtedness, there is left $37,727,907.53 as an additional charge against the borrowing power of the City.

This amount can be still further reduced by rescindments of existing authorizations against which there is little or no liability. However, we have thought it best to rescind at this time only such authorizations as the work of reconciliation has shown to have no further obligations against them.

Our recommendations for the various departments are shown in the following summary:

Department.	Authorizations.	Rescindments.
President, Borough of Manhattan	$4,590,000 00	$148,125 00
President, Borough of Bronx	1,000,000 00	45,635 00
President, Borough of Brooklyn	835,000 00	18,010 68
President, Borough of Queens	1,014,600 00	2,386 00
President, Borough of Richmond	525,500 00	
Education	10,381,809 00	4,228 01
Docks and Ferries	7,102,901 29	
Bridges	2,315,000 00	
Fire	1,994,225 94	115,420 68
Charities	2,964,000 00	100,334 67
Parks, Manhattan and Richmond	1,694,000 00	100,000 00
Parks, Brooklyn and Queens	1,256,802 00	97,000 00
Parks, Bronx	408,800 00	
Health	1,000,000 00	
Bellevue and Allied Hospitals	2,469,500 00	
Police	600,000 00	
Correction	100,000 00	
Carnegie Library sites	171,000 00	
Normal College	91,380 00	
Brooklyn Disciplinary School	75,000 00	
Street Cleaning	20,000 00	15,632 37
Commissions and Commissioners	27,300 00	500 00
Metropolitan Sewerage Commission	34,000 00	
Commissioner of Records, New York County	25,000 00	
Surrogate and County Clerk, Queens	100,000 00	
Finance and Miscellaneous	5,012,000 00	*
Total authorizations	$45,807,818 23	$647,272 41

*$5,000,000 of the authorization for Finance and Miscellaneous is a release of a part of the previous authorization of $33,000,000 for the funding of uncollectible taxes. However, it is a new addition to the debt.

If all of these recommended authorizations are made, the City will still be able to build rapid transit subways and have ample margin left for other work that may have to be done.

A statement estimating the constitutional borrowing capacity of The City of New York as at July 5, 1911, shows that the margin of legal borrowing capacity is $159,300,978.07. Of this amount, $60,482,725.18 is available for rapid transit purposes only. This sum is made up as follows:

Manhattan-Bronx Rapid Transit bonds, exempted	$43,868,325 18
Brooklyn-Manhattan Rapid Transit bonds, to be exempted	3,614,400 00
Amount set aside by resolution of April 8, 1910, for additional rapid transit railroads	13,000,000 00
	$60,482,725 18

This leaves a margin of $98,818,252.89 for such purposes as the Board of Estimate and Apportionment may determine, including rapid transit railroads, should the Board so desire.

Even if it is assumed that $80,000,000 will be used for subway construction this year, there will be left the sum of $79,300,978.07. After subtracting from this remainder the sum of the new authorizations we have recommended, there will remain a margin of $41,573,070.54.

This margin may be reduced to the extent of approximately $11,000,000 by the necessary provision for extra work on the Manhattan-Bronx division of the existing subway, for which $2,260,000 has been allowed in a tentative agreement, and for four other improvements for which no provision has been recommended, which were alluded to in the first paragraph of this report. Whatever amount is authorized for paying claims for extra work on the Manhattan-Bronx division will be only a temporary charge against the debt margin, and as soon as the bonds for this work can be exempted, the probable additional charge of $11,000,000 will be reduced to approximately $9,000,000.

The four improvements which we believe should be provided for (but not until the City has procured satisfactory data upon which to base its action), are as follows:

First—A site for a new court house, New York County. Your Committee believes that a site should be procured at the earliest possible moment, but it is not able, at this time, to make any definite recommendation.

We recommend that this matter be referred back to the Committee on Court House Site, with instructions that the Committee report to this Board at the meeting July 27, 1911.

Second—Rockaway Park. We are convinced that the City should acquire land for a park at Rockaway at a time when it can be procured at a reasonable figure. We are not yet assured that the property available at Rockaway can be secured at a reasonable figure.

We recommend that this matter be referred back to the Committee on Rockaway Park, consisting of the President of the Board of Aldermen, the Comptroller, President of the Borough of Manhattan and the President of the Borough of Queens, with instructions to report to this Board at the meeting July 27, 1911.

Third—The proposed park at Coney Island, on the area burned over at the time of the Dreamland fire.

Additional park facilities should be provided at Coney Island, and we are of the opinion that the property recently burned over can be obtained now at a lower figure than at any time in the future. However, we believe that the City should have absolute assurance of a fair price before it is committed to the purchase of this property.

We recommend that this matter be referred back to the Committee consisting of the President of the Borough of Brooklyn, the Comptroller and the President of the Board of Aldermen, with instructions to report to this Board at the meeting of July 27, 1911.

Fourth—Proposed terminal of the Manhattan end of the Brooklyn Bridge, in connection with the new Municipal Building.

This matter, we believe, deserves attention. The former Commissioner of Bridges requested $2,500,000 for this work.

We recommend that the Secretary of the Board of Estimate and Apportionment be directed to send a copy of this report to the present Commissioner of Bridges, with the request that he transmit to this Board, before its meeting of July 27, 1911, a complete statement, giving detailed figures of architects and engineers, also opinions of experts on the possibility of any other than all motor car trains to operate on the steep grade that is proposed for the terminal.

Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; GEORGE McANENY, President, Borough of Manhattan; Committee on Corporate Stock Budget.

Summary.

Total authorizations	$45,807,818 23
Rescindments	647,272 41
Net amount of new authorizations	$45,160,545 82
Amount not chargeable against debt margin	7,432,638 29
Total additional charge against borrowing power	$37,727,907 53
Borrowing capacity July 5, 1911	$159,300,978 07
Amount available for rapid transit purposes only	60,482,725 18
Amount available for any purposes	$98,818,252 89
Amount that will be left available if Budget is adopted as recommended, not including $60,482,725.18 available for rapid transit purposes only	$61,090,345 36
Total amount that will be left available, all of which can be used for rapid transit purposes and $61,090,345.36 of which can be used for any purpose	$121,573,070 54
Debt margin left if $80,000,000 is used for subways this year	$41,573,070 54

Pursuant to the recommendations contained in the above report, the matter of the new Court House for New York County was referred to the Committee consisting of the Comptroller, the President of the Board of Aldermen and the President of the Borough of Manhattan, with instructions to report to the Board at the meeting to be held July 27, 1911.

The matter of a Seaside Park at Rockaway Beach was referred to the Committee consisting of the President of the Board of Aldermen, the Comptroller and the Presidents of the Boroughs of Manhattan and Queens, with instructions to report to the Board at the meeting to be held July 27.

The matter of additional park facilities at Coney Island was referred to the Committee consisting of the President of the Board of Aldermen, the Comptroller and the President of the Borough of Brooklyn, with instructions to report to the Board at the meeting to be held July 27; and

The Secretary was directed to tranmit a copy of the report of the Corporate Stock Budget Committee to the Commissioner of Bridges, with the request that said Commissioner transmit to the Board before its meeting on July 27 a complete statement giving detailed figures of architects and engineers, and opinions of experts on the possibility of any other than all motor car trains operating on the steep grade that is proposed for the terminal at the Manhattan end of the Brooklyn Bridge in connection with the new Municipal Building.

The Corporate Stock Budget was then considered in the following order:

THE PRESIDENT OF THE BOROUGH OF MANHATTAN.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 11, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—We transmit herewith our report upon the request made by the President of the Borough of Manhattan for corporate stock to be authorized in 1911.

THE PRESIDENT OF THE BOROUGH OF THE BRONX.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 11, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—We transmit herewith our report upon the requests made by the Department of the President of the Borough of The Bronx for corporate stock to be authorized in 1911.

Our recommendations are embraced in the attached resolutions which are drawn in accordance with the three schedules, "A," "B" and "C," included herein.

Schedule "A" includes our recommendations for all new authorizations of corporate stock.

Schedule "B" includes our recommendations for all additions to existing authorizations of corporate stock.

Schedule "C" includes our recommendations for all rescindments or partial rescindments of existing authorizations of corporate stock.

Schedule "A."

For the improvement of the junction of 3d avenue and Boston road	$4,000 00
Transverse road at 161st street	230,000 00
Planting trees on Grand boulevard and concourse	50,000 00
Regulating, grading and paving 165th street	12,000 00
Public comfort stations	25,000 00
Bridge over New York and Harlem, New York, New Haven and Hartford Railroad, and the Bronx River	30,000 00
	$351,000 00

Schedule "B."

C-PX-48.	Repaving streets	$231,000 00
C-PX-28.	Topographical Bureau	85,000 00
C-PX-25.	Drainage plans	8,000 00
C-PX-16.	Completing Bronx Court House	325,000 00
		$649,000 00

Schedule "C."

C-PX- 2.	Amend resolution of the Board of Estimate and Apportionment adopted March 16, 1906, providing for the construction of the Belmont avenue sewer, to read $10,500, instead of $12,000, thereby rescinding the amount of	$1,500 00
C-PX-24.	Amend resolution of the Board of Estimate and Apportionment adopted June 3, 1910, providing for the construction of the Webster avenue relief sewer, to read $24,500, instead of $42,500, thereby rescinding the amount of	18,000 00
C-PX-25.	Amend resolution of the Board of Estimate and Apportionment adopted December 10, 1909, and finally concurred in by the Board of Aldermen on March 22, 1910, providing funds for the preparation of drainage and sewerage district plans for 1910, to read $11,115, instead of $15,000, thereby rescinding the amount of	3,885 00
C-PX-26.	Rescind resolution of the Board of Estimate and Apportionment adopted November 24, 1905, and finally concurred in by the Board of Aldermen on December 19, 1905, providing for the erection of a drinking fountain at Boston road and Prospect avenue, thereby rescinding the amount of	650 00
C-PX-33.	Rescind resolution of the Board of Estimate and Apportionment adopted June 3, 1910, and finally concurred in by the Board of Aldermen on July 19, 1910, providing for the improvement of the junction of Franklin and 3d avenues, thereby rescinding the amount of	2,000 00
C-PX-19.	Amend resolution adopted by the Board of Estimate and Apportionment adopted March 16, 1905, and finally concurred in by the Board of Aldermen on May 9, 1905, providing for the construction of a highway bridge across the Bronx River, connecting Becker avenue in the Bronx with Wakefield avenue, Yonkers, to read $1,000, instead of $20,000, thereby rescinding the amount of	19,000 00

C-PX-41. Rescind resolution adopted by the Board of Estimate adopted June 3, 1910, and finally concurred in by the Board of Aldermen on July 19, 1910, which provided, by amendment, for funds with which to sod plots on Prospect avenue, thereby rescinding the amount of..................	600 00
	$45,635 00

We recommend the adoption of the attached resolutions. Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; GEORGE McANENY, President, Borough of Manhattan; Corporate Stock Budget Committee.

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 47 of the Greater New York Charter, the Board of Estimate and Apportionment hereby approves of the issue of corporate stock of The City of New York to an amount not exceeding four thousand dollars ($4,000), to provide means for the improvement of the junction of 3d avenue and Boston road, in the Borough of The Bronx , and that when authority therefor shall have been obtained from the Board of Aldermen, the Comptroller be and is hereby authorized to issue said corporate stock of The City of New York in the manner provided by section 169 of the Greater New York Charter, the proceeds thereof to the amount of the par value of the stock to be applied to the purposes aforesaid.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 176 of the Greater New York Charter, the Board of Estimate and Apportionment hereby determines that the whole cost and expense of the construction of transverse road in connection with the Grand boulevard and concourse, in the Borough of The Bronx, to wit, 161st street, shall be borne and paid by The City of New York; and be it further

Resolved, That, pursuant to the provisions of section 169 of the Greater New York Charter, the Comptroller be and hereby is authorized to issue corporate stock of The City of New York to an amount not exceeding two hundred and thirty thousand dollars ($230,000), for the purpose of providing means to meet the cost and expense of the construction of said transverse road as set forth in the foregoing resolution.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 47 of the Greater New York Charter as amended, the Board of Estimate and Apportionment hereby approves of the issue of corporate stock of The City of New York to an amount not exceeding fifty thousand dollars ($50,000), to provide means for purchase of and planting trees on the Grand boulevard and concourse, in the Borough of The Bronx, and that when authority therefor shall have been obtained from the Board of Aldermen, the Comptroller be and is hereby authorized to issue said corporate stock of The City of New York in the manner provided by section 169 of the Greater New York Charter, the proceeds thereof to the amount of the par value of the stock to be applied to the purposes aforesaid.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 176 of the Greater New York Charter, the Board of Estimate and Apportionment hereby determines that the whole cost and expense of regulating and grading the central portion of East 165th street from a point about eighty feet east of Sherman avenue to a point about seventy-seven feet west of Walton avenue, shall be borne and paid by The City of New York; and be it further

Resolved, That, pursuant to the provisions of section 169 of the Greater New York Charter, the Comptroller is authorized to issue corporate stock of The City of New York to an amount not exceeding twelve thousand dollars ($12,000), for the purpose of providing means to meet the cost of regulating and grading said street as set forth in the foregoing resolution.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 47 of the Greater New York Charter as amended, the Board of Estimate and Apportionment hereby approves of the issue of corporate stock of The City of New York to an amount not exceeding twenty-five thousand dollars ($25,000), to provide means for the construction of a public comfort station at 138th street and 3d avenue, in the Borough of The Bronx, and that when authority therefor shall have been obtained from the Board of Aldermen, the Comptroller be and is hereby authorized to issue said corporate stock of The City of New York in the manner provided by section 169 of the Greater New York Charter, the proceeds thereof to the amount of the par value of the stock to be applied to the purposes aforesaid.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 47 of the Greater New York Charter, as amended, the Board of Estimate and Apportionment hereby approves of the issue of corporate stock of The City of New York to an amount not exceeding thirty thousand dollars ($30,000), to provide means for the City's share of the cost of constructing a highway bridge across the Bronx River, over the tracks of the New York and Harlem Railroad and the New York, New Haven and Hartford Railroad at East 241st street, Borough of The Bronx, and that when authority therefor shall have been obtained from the Board of Aldermen, the Comptroller be and is hereby authorized to issue said corporate stock of The City of New York, in the manner provided by section 169 of the Greater New York Charter, the proceeds thereof to the amount of the par value of the stock to be applied to the purposes aforesaid.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 47 of the Greater New York Charter, as amended, the Board of Estimate and Apportionment hereby approves of the issue of corporate stock of The City of New York to an amount not exceeding two hundred and thirty-one thousand dollars ($231,000), for the purpose of providing means for the repaving of streets and avenues in the Borough of The Bronx—provided, however, that no contract shall be made for repaving any street or avenue unless the Borough President having charge thereof submits to the Comptroller with such contract evidence showing that the original pavement on such street or avenue was laid at the expense of the abutting property owners or by local taxation or by bond issues paid by the locality before consolidation, unless the Board of Estimate and Apportionment shall otherwise determine upon presentation of the facts and circumstances affecting such street or avenue, and that when authority therefor shall have been obtained from the Board of Aldermen, the Comptroller is authorized to issue corporate stock of The City of New York, in the manner provided by section 169 of the Greater New York Charter, to an amount not exceeding two hundred and thirty-one thousand dollars ($231,000), the proceeds thereof to the amount of the par value of the stock to be applied to the purpose aforesaid.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 47 of the Greater New York Charter as amended, the Board of Estimate and Apportionment hereby approves of the issue of corporate stock of The City of New York to an amount not exceeding eighty-five thousand dollars ($85,000), in addition to amounts heretofore authorized, to provide means for the use of the Topographical Bureau of the Borough of The Bronx, for the purpose of preparing and completing maps of all territory within said Borough, and that when authority therefor shall have been obtained from the Board of Aldermen, the Comptroller be and is hereby authorized to issue said corporate stock of The City of New York in the manner provided by section 169 of the Greater New York Charter, the proceeds thereof to the amount of the par value of the stock to be applied to the purposes aforesaid.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

—

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 47 of the Greater New York Charter as amended, the Board of Estimate and Apportionment hereby approves of the issue of corporate stock of The City of New York to an amount not exceeding eight thousand dollars ($8,000), in addition to amounts heretofore authorized to provide means for the preparation of drainage and sewerage district plans in the Borough of The Bronx, and that when authority therefor shall have been obtained from the Board of Aldermen, the Comptroller be and is hereby authorized to issue said corporate stock of The City of New York in the manner provided by section 169 of the Greater New York Charter, the proceeds thereof to the amount of the par value of the stock to be applied to the purposes aforesaid.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

—

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 47 of the Greater New York Charter as amended, the Board of Estimate and Apportionment hereby approves of the issue of corporate stock of The City of New York to an amount not exceeding three hundred and twenty-five thousand dollars ($325,000), in addition to amounts heretofore authorized, to provide means for the construction and equipment of a Court House in the Borough of The Bronx, and that when authority therefor shall have been obtained from the Board of Aldermen, the Comptroller be and is hereby authorized to issue said corporate stock of The City of New York in the manner provided by section 169 of the Greater New York Charter, the proceeds thereof to the amount of the par value of the stock to be applied to the purposes aforesaid.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

—

The following resolution was offered:

Resolved, That, the following resolution adopted by the Board of Estimate and Apportionment March 16, 1906:

> "Resolved, That the Board of Estimate and Apportionment hereby determines that the whole cost and expense of extending the existing Belmont avenue sewer north of Pelham avenue to the southerly line of Bronx Park, west of Southern boulevard, and for improving the drainage conditions surrounding the new Fordham Hospital, Borough of The Bronx, shall be borne and paid by The City of New York."
>
> "Resolved, That, in pursuance of the provisions of sections 169 and 176 of the Greater New York Charter, the Comptroller be and hereby is authorized to issue corporate stock of The City of New York to an amount not exceeding twelve thousand dollars ($12,000), for the purpose of providing means for the extension of the existing Belmont avenue sewer north of Pelham avenue to the southerly line

of Bronx Park, west of Southern boulevard, and for improving drainage conditions surrounding the new Fordham Hospital, Borough of The Bronx."

—be amended to make the amount authorized ten thousand five hundred dollars ($10,500).

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That the following resolution of the Board of Estimate and Apportionment, adopted June 3, 1910:

"Resolved, That, pursuant to the provisions of sections 169 and 176 of the Greater New York Charter, the Board of Estimate and Apportionment hereby authorizes the Comptroller to issue corporate stock of The City of New York to an amount not exceeding forty-two thousand five hundred dollars ($42,500), in addition to the amount heretofore authorized, to provide the necessary means for the payment of expenses incurred or to be incurred by reason of the construction of the Webster avenue storm relief sewer, in the Borough of The Bronx."

—be amended to make the amount authorized twenty-four thousand five hundred dollars ($24,500).

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That, subject to the concurrence herewith by the Board of Aldermen, the following resolution adopted by the Board of Estimate and Apportionment on December 10, 1909, and finally concurred in by the Board of Aldermen on March 22, 1910:

"Resolved, That, pursuant to the provisions of section 47 of the Greater New York Charter, as amended, the Board of Estimate and Apportionment hereby approves of the issue of corporate stock of The City of New York, to an amount not exceeding the sum of fifteen thousand dollars ($15,000), to provide means for the preparation of drainage and sewerage district plans for the Borough of The Bronx for the year 1910, and when authority therefor shall have been obtained from the Board of Aldermen, the Comptroller is authorized to issue corporate stock of The City of New York, in the manner provided by section 169 of the Greater New York Charter, to an amount not exceeding fifteen thousand dollars ($15,000), the proceeds whereof to be applied to the purpose aforesaid."

—be amended to make the amount authorized eleven thousand one hundred and fifteen dollars ($11,115).

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16

The following resolution was offered:

Resolved, That, subject to the concurrence herewith by the Board of Aldermen, the following resolution adopted by the Board of Estimate and Apportionment on November 24, 1905, and finally concurred in by the Board of Aldermen on December 19, 1905, be and the same is hereby rescinded:

"Resolved, That, pursuant to the provisions of section 47 of the Greater New York Charter, as amended, the Board of Estimate and Apportionment hereby approves of the issue of corporate stock of The City of New York to an amount not exceeding six hundred and fifty dollars ($650), for the purpose of providing means for the erection of a drinking fountain at the junction of Boston road and Prospect avenue, Borough of The Bronx, and that when authority therefor shall have been obtained from the Board of Aldermen, the Comptroller is authorized to issue corporate stock of The City of New York, in the manner provided by section 169 of the Greater New York Charter, to an amount not exceeding six hundred and fifty dollars ($650), the proceeds whereof to be applied to the purposes aforesaid."

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Alder-

men and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That, subject to the concurrence herewith by the Board of Aldermen, the following resolution adopted by the Board of Estimate and Apportionment on June 3, 1910, and finally concurred in by the Board of Aldermen on July 19, 1910, be and the same is hereby rescinded:

"Resolved, That, pursuant to the provisions of section 47 of the Greater New York Charter, as amended by chapter 409 of the Laws of 1904, the Board of Estimate and Apportionment hereby approves of the issue of corporate stock of The City of New York to an amount not to exceed two thousand dollars ($2,000), (in addition to the amount heretofore authorized), to provide means for improving the junction of Franklin avenue and 3d avenue, Borough of The Bronx, and that when authority therefor shall have been obtained from the Board of Aldermen, the Comptroller is authorized to issue corporate stock of The City of New York, in the manner provided by section 169 of the Greater New York Charter, to an amount not exceeding two thousand dollars ($2,000), the proceeds whereof to be applied to the purpose aforesaid."

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That, subject to concurrence herewith by the Board of Aldermen, the following resolution adopted by the Board of Estimate and Apportionment on March 16, 1905, and finally concurred in by the Board of Aldermen on May 9, 1905:

"Resolved, That, pursuant to the provisions of section 47 of the Greater New York Charter, as amended by chapter 409 of the Laws of 1904, the Board of Estimate and Apportionment hereby approves of the issue of corporate stock of The City of New York, to an amount not exceeding twenty thousand dollars ($20,000), to provide means for the City's share of the cost of constructing a highway bridge across the Bronx River, connecting Becker avenue in The Bronx with Wakefield avenue in Yonkers, and that when authority therefor shall have been obtained from the Board of Aldermen the Comptroller is authorized to issue corporate stock of The City of New York, in the manner provided by section 169 of the Greater New York Charter, to an amount not exceeding twenty thousand dollars ($20,000), the proceeds whereof to be applied to the purpose aforesaid."

—be amended to make the amount authorized one thousand dollars ($1,000).

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That, subject to concurrence herewith by the Board of Aldermen, the following resolution adopted by the Board of Estimate and Apportionment on June 3, 1910, and finally concurred in by the Board of Aldermen on July 19, 1910:

"Resolved, That, pursuant to the provisions of section 47 of the Greater New York Charter, as amended, the Board of Estimate and Apportionment hereby approves of the issue of corporate stock of The City of New York to an amount not exceeding six thousand dollars ($6,000), for the purpose of providing means for top soiling centre plots on Prospect avenue, between East 149th street and Crotona Park, Borough of The Bronx, and that when authority therefor shall have been obtained from the Board of Aldermen, the Comptroller is authorized to issue corporate stock of The City of New York, in the manner provided by section 169 of the Greater New York Charter, to an amount not exceeding six thousand dollars ($6,000), the proceeds whereof to be applied to the purposes aforesaid."

—be amended to make the amount authorized five thousand four hundred dollars ($5,400).

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The President of the Borough of The Bronx urged the necessity of appropriations of corporate stock, as follows:

$25,000 for the preparation of plans for a new Municipal Building in the Borough of The Bronx;

$8,000 for the reconstruction of sewers in Westchester avenue, 3d and Brooke avenues, The Bronx;

$500,000 for a viaduct to connect Central Bridge with the southerly end of the Concourse, The Bronx.

These matters were referred to the Corporate Stock Budget Committee for special report thereon.

THE PRESIDENT OF THE BOROUGH OF BROOKLYN.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 11, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—We transmit herewith our report upon the requests made by the President of the Borough of Brooklyn for corporate stock to be authorized in 1911.

Our recommendations are embraced in the attached resolutions which are drawn in accordance with the three Schedules A, B and C, included herein.

Schedule "A" includes our recommendations for all new authorizations of corporate stock other than additions to existing authorizations.

Schedule "B" includes our recommendations for all additions to existing authorizations of corporate stock.

Schedule "C" includes our recommendations for all rescindments or partial rescindments of existing authorizations of corporate stock.

Schedule "A," New Authorizations.	
Two Public Comfort Stations	$50,000 00
Public Market, Eighth Ward	500,000 00
Schedule "B," Additions to Existing Authorizations.	
Fund for Topographical Bureau	$35.000 00
Repaving streets, Borough of Brooklyn	250,000 00
	$835,000 00
Schedule "C," Rescindments.	
Central Library Building, Erection of	$6,174 18
Central Library Building. Plans and Specifications	11,836 50
	$18,010 68

We recommend the adoption of the attached resolutions. Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; GEORGE McANENY, President, Borough of Manhattan; Corporate Stock Budget Committee.

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 47 of the Greater New York Charter, as amended, the Board of Estimate and Apportionment hereby approves of the issue of corporate stock of The City of New York to an amount not exceeding fifty thousand dollars ($50,000), to provide means for the construction and equipment of new public comfort stations, including architect's fees, in the Borough of Brooklyn, and that when authority therefor shall have been obtained from the Board of Aldermen, the Comptroller be and is hereby authorized to issue said corporate stock of The City of New York in the manner provided by section 169 of the Greater New York Charter, the proceeds thereof to the amount of the par value of the stock to be applied to the purposes aforesaid.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 47 of the Greater New York Charter, as amended, the Board of Estimate and Apportionment hereby approves of the issue of corporate stock of The City of New York to an amount not exceeding

thirty-five thousand dollars ($35,000), to provide means for the "Fund for Topographical Bureau," Borough of Brooklyn, and that when authority therefor shall have been obtained from the Board of Aldermen, the Comptroller be and is hereby authorized to issue said corporate stock of The City of New York in the manner provided by section 169 of the Greater New York Charter, the proceeds thereof to the amount of the par value of the stock to be applied to the purposes aforesaid.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 47 of the Greater New York Charter, as amended, the Board of Estimate and Apportionment hereby approves of the issue of corporate stock of The City of New York to an amount not exceeding two hundred and fifty thousand dollars ($250,000), to provide means for repaving streets, Borough of Brooklyn, and that when authority therefor shall have been obtained from the Board of Aldermen, the Comptroller be and is hereby authorized to issue said corporate stock of The City of New York in the manner provided by section 169 of the Greater New York Charter, the proceeds thereof to the amount of the par value of the stock to be applied to the purposes aforesaid.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The matter of an appropriation of $500,000 corporate stock for the new Municipal Building for the Borough of Brooklyn or for the Eighth Ward Market, Borough of Brooklyn, was referred back to the Corporate Stock Budget Committee.

Central Library Building, Borough of Brooklyn.

Action on the two resolutions, under the heading "Schedule 'C,' Rescindments," in the report of the Corporate Stock Budget Committee, for the President of the Borough of Brooklyn, one amending resolution adopted by the Board May 25, 1906, concurred in by the Board of Aldermen June 8, 1906, authorizing $25,000 corporate stock for preliminary plans, etc., for the erection of a Central Library Building, Brooklyn, by striking therefrom said amount and inserting in lieu thereof the figures $18,825.82; and the other amending resolution adopted by the Board June 3, 1910, and concurred in by the Board of Aldermen June 28, 1910, authorizing $300,000 corporate stock "to enable the President of the Borough of Brooklyn to enter into a contract for final plans and specifications, etc., for a Central Library Building, Brooklyn," by striking therefrom said amount and inserting in lieu thereof the figures $288,163.50, was deferred and the matter referred back to the Committee for its recommendation.

William A. White appeared in opposition to an appropriation being made for the building on its present site, and James W. Devoy appeared in favor.

THE PRESIDENT OF THE BOROUGH OF QUEENS.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 11, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—We transmit herewith our report upon the requests made by the President of the Borough of Queens for corporate stock to be authorized in 1911.

Our recommendations are embraced in the attached resolutions which are drawn in accordance with the three schedules A, B and C included herein.

Schedule "A" includes our recommendations for all new authorizations of corporate stock other than additions to existing authorizations.

Schedule "B" includes our recommendations for all additions to existing authorizations of corporate stock.

Schedule "C" includes our recommendations for all rescindments or partial rescindments of existing authorizations of corporate stock.

Schedule "A"—New Authorizations.

Concrete sea wall, Willetts Point road, Third Ward	$35,000 00
Concrete wing wall, repairing and extending rip-rap on Jackson avenue, between Shell road and Flushing Bridge, Second Ward	5,000 00
Concrete culvert to replace bridge at Norton's Creek, Edgemere, Fifth Ward	30,000 00
Concrete retaining wall, Shore road, between Hoyt and Woolsey avenues, First Ward	20,000 00
Bureau of Street Cleaning, new stock or plant, Rockaway, Fifth Ward, and Ridgewood, Second Ward ($101,600 for Rockaway; $202,000 for Ridgewood)	303,600 00
For interior public bath, Ridgewood, Second Ward	25,000 00
For public comfort station, Ridgewood, Second Ward	9,000 00

Schedule "B"—Additions to Existing Authorizations.

Fund for Topographical Bureau	184,000 00
Repairing streets	400,000 00
Public comfort station, Bridge Plaza	3,000 00

Schedule "C"—Rescindments.

C-PQ-12. Bureau of Street Cleaning, new stock or plant	2,386 00

We recommend the adoption of the attached resolutions.

Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; GEORGE McANENY, President, Borough of Manhattan; Corporate Stock Budget Committee.

The following resolution was offered:

Resolved, That, pursuant to the provisions of Section 47 of the Greater New York Charter, as amended, the Board of Estimate and Apportionment hereby approves of the issue of corporate stock of The City of New York to an amount not exceeding thirty-five thousand dollars ($35,000), to provide means for the construction of a concrete sea wall on the Willetts Point road, Third Ward, Borough of Queens, beginning at a point 650 feet west of Bell avenue, and extending to a point 2,050 feet westerly therefrom, and that when authority therefor shall have been obtained from the Board of Aldermen, the Comptroller be and is hereby authorized to issue said corporate stock of The City of New York in the manner provided by Section 169 of the Greater New York Charter, the proceeds thereof to the amount of the par value of the stock to be applied to the purposes aforesaid.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

—

The following resolution was offered:

Resolved, That, pursuant to the provisions of Section 47 of the Greater New York Charter, as amended, the Board of Estimate and Apportionment hereby approves of the issue of corporate stock of The City of New York to an amount not exceeding five thousand dollars ($5,000), to provide means for the construction of a concrete wing wall along culverts and repairing and extending the rip-rap on Jackson avenue, between Shell road and the Flushing Bridge, Second Ward, Borough of Queens, and that when authority therefor shall have been obtained from the Board of Aldermen, the Comptroller be and is hereby authorized to issue said corporate stock of The City of New York in the manner provided by Section 169 of the Greater New York Charter, the proceeds thereof to the amount of the par value of the stock to be applied to the purposes aforesaid.

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 546 of the Greater New York Charter, as amended, the Board of Estimate and Apportionment hereby approves of the issue of corporate stock of The City of New York to an amount not exceeding fifteen thousand five hundred dollars ($15,500), to provide means for the construction of a stable for the Bureau of Street Cleaning at Clifton, in the Borough of Richmond, and the Comptroller be and is hereby authorized to issue said corporate stock of The City of New York in the manner provided by section 169 of the Greater New York Charter, the proceeds thereof to the amount of the par value of the stock to be applied to the purposes aforesaid.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 47 of the Greater New York Charter, as amended, the Board of Estimate and Apportionment hereby approves of the issue of corporate stock of The City of New York to an amount not exceeding nine thousand dollars ($9,000), to provide means for the acquisition of land and the construction of buildings for storage purposes in the Second and Fourth Wards, in the Borough of Richmond, and that when authority therefor shall have been obtained from the Board of Aldermen, the Comptroller be and is hereby authorized to issue said corporate stock of The City of New York in the manner provided by section 169 of the Greater New York Charter, the proceeds thereof to the amount of the par value of the stock to be applied to the purposes aforesaid.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That pursuant to the provisions of section 47 of the Greater New York Charter as amended, the Board of Estimate and Apportionment hereby approves of the issue of corporate stock of The City of New York to an amount not exceeding thirty thousand dollars ($30,000), to provide means for the construction and maintenance of an experimental Sewerage Disposal Plant at West New Brighton, in the Borough of Richmond, and that when authority therefor shall have been obtained from the Board of Aldermen, the Comptroller be and is hereby authorized to issue said corporate stock of The City of New York in the manner provided by section 169 of the Greater New York Charter, the proceeds thereof to the amount of the par value of the stock to be applied to the purposes aforesaid.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 47 of the Greater New York Charter, as amended, the Board of Estimate and Apportionment hereby approves

of the issue of corporate stock of The City of New York to an amount not exceeding two thousand five hundred dollars ($2,500), to provide means for acquiring an easement in connection with the construction of a sanitary sewer at the Sea View Hospital in the Borough of Richmond, under the jurisdiction of the President of the Borough of Richmond, and that when authority therefor shall have been obtained from the Board of Aldermen, the Comptroller be and is hereby authorized to issue said corporate stock of The City of New York in the manner provided by section 169 of the Greater New York Charter, the proceeds thereof to the amount of the par value of the stock to be applied to the purposes aforesaid.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 47 of the Greater New York Charter, as amended, the Board of Estimate and Apportionment hereby approves of the issue of corporate stock of The City of New York to an amount not exceeding two hundred and fifty thousand dollars ($250,000), to provide means for the acquisition of a site and the construction of a new County Court House at New Brighton, in the Borough of Richmond, and that when authority therefor shall have been obtained from the Board of Aldermen, the Comptroller be and is hereby authorized to issue said corporate stock of The City of New York in the manner provided by section 169 of the Greater New York Charter, the proceeds thereof to the amount of the par value of the stock to be applied to the purposes aforesaid.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 47 of the Greater New York Charter, as amended, the Board of Estimate and Apportionment hereby approves of the issue of corporate stock of The City of New York to an amount not exceeding ten thousand dollars ($10,000), to provide means for the construction of a wall or fence around the County Jail at Richmond, in the Borough of Richmond, under the supervision of the President of the Borough of Richmond, and that when authority therefor shall have been obtained from the Board of Aldermen, the Comptroller be and is hereby authorized to issue said corporate stock of The City of New York in the manner provided by section 169 of the Greater New York Charter, the proceeds thereof to the amount of the par value of the stock to be applied to the purposes aforesaid.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 47 of the Greater New York Charter, as amended, the Board of Estimate and Apportionment hereby approves of the issue of corporate stock of The City of New York to an amount not exceeding fifteen thousand dollars ($15,000), in addition to amounts heretofore authorized, to provide means for the Bureau of Street Cleaning, C-PR-7, new stock and plant, and the Comptroller be and is hereby authorized to issue said corporate stock of The City of New York in the manner provided by section 169 of the Greater New York Charter, the proceeds thereof to the amount of the par value of the stock to be applied to the purposes aforesaid.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 47 of the Greater New York York Charter, as amended, the Board of Estimate and Apportionment hereby ap-

proves of the issue of corporate stock of The City of New York to an amount not exceeding one hundred and fifty-five thousand dollars ($155,000), in addition to amounts heretofore authorized, to provide means for the use of the Topographical Bureau of the Borough of Richmond in preparing and completing maps and monumenting all territory within said Borough, and that when authority therefor shall have been obtained from the Board of Aldermen, the Comptroller be and is hereby authorized to issue said corporate stock of The City of New York in the manner provided by section 169 of the Greater New York Charter, the proceeds thereof to the amount of the par value of the stock to be applied to the purposes aforesaid.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The President of the Borough of Richmond requested an appropriation of $5,000 corporate stock for the completion of the work in connection with the elimination of grade crossings in that Borough, and the matter was referred to the Corporate Stock Budget Committee for a special report.

DEPARTMENT OF EDUCATION.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 11, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—We transmit herewith our report upon the requests made by the Department of Education for corporate stock to be authorized in 1911.

Our recommendations are embraced in the attached resolutions which are drawn in accordance with the four schedules A, B, C and D included herein.

Schedule "A" includes our recommendations for new authorizations of corporate stock other than additions to existing authorizations and the lump sum reserved for sundry items, allowances for which have not yet been fixed.

Schedule "B" includes our recommendations for all additions to existing authorizations of corporate stock.

Schedule "C" includes our recommendations for all rescindments of existing authorizations of corporate stock.

Schedule "D" includes our recommendation for the aforementioned lump sum appropriation aggregating $2,512,740 for the acquisition of sites and the construction and equipment of buildings, the amount to be expended for each item to be determined and fixed by this Board at a subsequent date.

Summary.

Schedule A.	New authorizations	$7,033,810 00
Schedule B.	Additions to existing authorizations	835,259 00

Rescind resolutions of the Board of Estimate and Apportionment adopted June 3, 1910, and concurred in by the Board of Aldermen June 14, 1910, providing $100,000 for the construction and equipping of playground in Central Park, Borough of Manhattan.

We recommend the adoption of the attached resolutions. Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; GEORGE McANENY, President, Borough of Manhattan; Corporate Stock Budget Committee.

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 47 of the Greater New York Charter, as amended, the Board of Estimate and Apportionment hereby approves of the issue of corporate stock of The City of New York to an amount not exceeding fifteen thousand dollars ($15,000), to provide means for the alteration and improvement of comfort station near ball ground in Central Park, under the jurisdiction of the Department of Parks, Boroughs of Manhattan and Richmond, and that when authority therefor shall have been obtained from the Board of Aldermen, the Comptroller be and is hereby authorized to issue said corporate stock of The City of New York in the manner provided by section 169 of the Greater New York Charter, the proceeds thereof to the amount of the par value of the stock to be applied to the purposes aforesaid.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 47 of the Greater New York Charter, as amended, the Board of Estimate and Apportionment hereby approves of the issue of corporate stock of The City of New York to an amount not exceeding five thousand dollars ($5,000), to provide means for preliminary work necessary in preparation of plans and specifications for improvements requiring corporate stock authorizations, under the jurisdiction of the Department of Parks, Boroughs of Manhattan and Richmond, and that when authority therefor shall have been obtained from the Board of Aldermen, the Comptroller be and is hereby authorized to issue said corporate stock of The City of New York in the manner provided by section 169 of the Greater New York Charter, the proceeds thereof to the amount of the par value of the stock to be applied to the purposes aforesaid.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

C-DS-2b.—Construction of dumping boards in the Borough of Brooklyn.	2,930 37
C-DS-7.—Installing elevator at Stable "A"	2,914 00
	$15,632 37

We recommend the adoption of the attached resolutions.

Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; GEORGE McANENY, President, Borough of Manhattan; Corporate Stock Budget Committee.

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 546 of the Greater New York Charter, the Board of Estimate and Apportionment hereby approves of the issue of corporate stock of The City of New York to an amount not exceeding thirteen thousand dollars ($13,000), to provide means for the construction of a covered dumping board at the foot of Clinton street and East River, Manhattan, under the jurisdiction of the Department of Street Cleaning, and that when authority therefor shall have been obtained from the Board of Aldermen, the Comptroller be and is hereby authorized to issue said corporate stock of The City of New York in the manner provided by section 169 of the Greater New York Charter, the proceeds thereof to the amount of the par value of the stock to be applied to the purposes aforesaid.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 546 of the Greater New York Charter, the Board of Estimate and Apportionment hereby approves of the issue of corporate stock of The City of New York to an amount not exceeding seven thousand dollars ($7,000), to provide means for the construction of a covered dumping board at the foot of Lincoln avenue and Harlem river, The Bronx, under the jurisdiction of the Department of Street Cleaning, and that when authority therefor shall have been obtained from the Board of Aldermen, the Comptroller be and is hereby authorized to issue said corporate stock of The City of New York in the manner provided by section 169 of the Greater New York Charter, the proceeds thereof to the amount of the par value of the stock to be applied to the purposes aforesaid.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That, subject to the concurrence herewith by the Board of Aldermen, the resolution adopted by the Board of Estimate and Apportionment June 3, 1910, and approved by the Board of Aldermen on June 21, 1910, which reads as follows:

"Resolved, That, subject to the concurrence herewith by the Board of Aldermen, the resolution adopted by the Board of Estimate and Apportionment at a meeting held February 19, 1904, and deemed to be passed by the Board of Aldermen, pursuant to the provisions of section 48 of the Greater New York Charter, as amended, on April 2, 1904, which reads as follows:

"'Whereas, The Board of Estimate and Apportionment, on June 5, 1903, adopted a resolution, subject to the concurrence of the Board of Aldermen, authorizing the issue of corporate stock to an amount not exceeding three hundred and seventy thousand dollars ($370,000), to provide means for the construction of a stable on the block bounded by Flushing avenue, Graham street, Kent avenue and Little Nassau street, Borough of Brooklyn;

"'Whereas, The Board of Aldermen failed to take action thereon before the expiration of the term of office of the old Board of Aldermen; and

"'Whereas, The Commissioner of the Department of Street Cleaning, in a communication to the Board of Estimate and Apportionment, dated February 16, 1904, has made requisition for the issue of bonds to the amount of three hundred and seventy thousand dollars ($370,000), to provide for the construction of a stable on the block bounded by Flushing avenue, Graham street, Kent avenue and Little Nassau street, Borough of Brooklyn, as provided by section 546 of the Greater New York Charter; therefore be it

"'Resolved, That, subject to the concurrence herewith by the Board of Aldermen, the Comptroller is authorized to issue corporate stock of The City of New York, in the manner provided by section 169 of the Greater New York Charter, to the amount of three hundred and seventy thousand dollars ($370,000), the proceeds whereof to be expended for the purposes aforesaid,'

"—be and the same is hereby amended to read as follows:

"Whereas, The Board of Estimate and Apportionment, on June 5, 1903, adopted a resolution, subject to the concurrence of the Board of Aldermen, authorizing the issue of corporate stock to an amount not exceeding three hundred and sixty-four thousand three hundred and thirty-eight dollars ($364,338), to provide means for the construction of a stable on the block bounded by Flushing avenue, Graham street, Kent avenue and Little Nassau street, Borough of Brooklyn;

"Whereas, The Board of Aldermen failed to take action thereon before the expiration of the term of office of the old Board of Aldermen; and

"Whereas, the Commissioner of the Department of Street Cleaning, in a communication to the Board of Estimate and Apportionment, dated February 16, 1904, has made requisition for the issue of bonds to the amount of three hundred and sixty-four thousand three hundred and thirty-eight dollars ($364,338), to provide for the construction of a stable on the block bounded by Flushing avenue, Graham street, Kent avenue and Little Nassau street, Borough of Brooklyn, as provided by section 546 of the Greater New York Charter; therefore be it

"Resolved, That, subject to the concurrence herewith by the Board of Aldermen, the Comptroller is authorized to issue corporate stock of The City of New York, in the manner provided by section 169 of the Greater New York Charter, to the amount of three hundred and sixty-four thousand three hundred and thirty-eight dollars ($364,338), the proceeds whereof to be expended for the purposes aforesaid."

—be further amended to make amount read "three hundred and fifty-eight thousand dollars ($358,000), for acquisition of site and construction of a stable, Borough of Brooklyn."

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That, subject to the concurrence of the Board of Aldermen, the resolution adopted by the Board of Estimate and Apportionment on July 1, 1910, and approved by the Board of Aldermen on July 19, 1910, which reads as follows:

"Resolved, That the Board of Aldermen hereby approves of and concurs in the following amended resolution adopted by the Board of Estimate and Apportionment July 1, 1910:

"'Resolved, That the resolution adopted by the Board of Estimate and Apportionment June 25, 1909, which reads as follows:

"'Resolved, That the resolution adopted by the Board of Estimate and Apportionment June 11, 1909, which reads as follows:

"'Whereas, The Commissioner of the Department of Street Cleaning in a communication dated May 14, 1909, has made requisition for an issue of bonds to the amount of thirty thousand dollars ($30,000), for new stock or plant for said Department, as provided by section 546 of the Greater New York Charter; therefore be it

"'Resolved, That, subject to the concurrence herewith by the Board of Aldermen, the Comptroller is authorized to issue corporate stock of The City of New York, in the manner provided by section 169 of the Greater New York Charter, to an amount not exceeding twenty thousand dollars ($20,000), to provide means for the following purposes:

"'For the construction of a dumping board at the foot of 158th street, North River, Borough of Manhattan, $4,000.

"'For the construction of a dumping board at the foot of 134th street, North River, Borough of Manhattan, $4,000.

"'For the construction of a dumping board at the foot of 97th street, North River, Borough of Manhattan, $12,000.

"'—be and the same is hereby amended by including therein the item: For the construction of a dumping board at the foot of Clinton avenue, Borough of Brooklyn, $7,000, and by striking out the words and figures, wherever they appear, "twenty thousand dollars ($20,000)," and inserting in place thereof the words and figures "twenty-seven thousand dollars ($27,000),"'

"—be and the same is hereby amended by striking therefrom the words 'at foot of Clinton avenue,' and inserting in place thereof the words 'on Pier No. 1, Wallabout Basin,'"

—be amended to make the amounts read "fifteen thousand seven hundred and forty-nine dollars and fifty cents ($15,749.50)," for the construction of dumping boards at the following locations:

At the foot of 158th street and North River, Borough of Manhattan.

At the foot of 134th street and North River, Borough of Manhattan.

At the foot of 97th street and North River, Borough of Manhattan.

And four thousand and sixty-nine dollars and sixty-three cents ($4,069.63) for the construction of a dumping board on Pier No. 1, Wallabout Basin, Borough of Brooklyn.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That, subject to the concurrence of the Board of Aldermen, the resolution adopted by the Board of Estimate and Apportionment on June 3, 1910, and approved by the Board of Aldermen June 28, 1910, which reads as follows:

"Resolved, That, pursuant to the provisions of section 546 of the Greater New York Charter, the Board of Estimate and Apportionment hereby approves of the issue of corporate stock of The City of New York to an amount not exceeding five thousand dollars ($5,000), to provide means for installing an elevator in Stable 'A' of the Department of Street Cleaning, located at 17th street and Avenue C, Borough of Manhattan, under the jurisdiction of the Department of Street Cleaning, and that when authority therefor shall have been obtained from the Board of Aldermen, the Comptroller be and is hereby authorized to issue said corporate stock of The City of New

York, in the manner provided by section 169 of the Greater New York Charter, the troller be and is hereby authorized to issue said corporate stock of The City of New proceeds thereof to the amount of the par value of the stock to be applied to the purposes aforesaid,"

—be amended to make the amount read "two thousand and eighty-six dollars ($2,086), for installing an elevator at Stable 'A,' Manhattan."

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

COMMISSIONS AND COMMISSIONERS.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 11, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—We transmit herewith our report upon the requests made by the Department of Commissions and Commissioners for corporate stock to be authorized in 1911.

Our recommendations are embraced in the attached resolutions which are drawn in accordance with the three Schedules A, B and C included herein.

Schedule "A" includes our recommendations for all new authorizations of corporate stock other than additions to existing authorizations.

Schedule "B" includes our recommendations for all additions to existing authorizations of corporate stock.

Schedule "C" includes our recommendations for all rescindments or partial rescindments of existing authorizations of corporate stock.

Schedule "A," New Authorizations of Corporate Stock.

Change of Grade Damage Commission, Twenty-third and Twenty-fourth Wards, for expenses year 1912, nine thousand three hundred dollars... $9,300 00

Schedule "B," Additions to Existing Authorizations of Corporate Stock.

C-CM-6. Change of Grade Damage Commission, Twenty-third and Twenty-fourth Wards for expert witness fees, ten thousand dollars.. $10,000 00

C-CM-9a. Amend resolution of the Board of Estimate and Apportionment and the Board of Aldermen, adopted respectively June 3 and June 21, 1910, to provide for the general improvement and development of Jamaica Bay, in the Boroughs of Brooklyn and Queens, and the general condition of the waterfront of the Boroughs of The Bronx, Brooklyn, Queens and Richmond, as follows: For hydrographic surveys, along and adjacent to the bulkhead line already tentatively adopted, nine thousand five hundred dollars ($9,500).

For topographical surveys to determine the amount of filling needed, four thousand dollars ($4,000).

For precisely establishing the bulkhead line and connecting it with the street system of the City, two thousand five hundred dollars ($2,500).

For the preparation of plans showing types of bulkheads, general treatment of the shore front, provision for railway connections and terminals, for office expenses, and for past and subsequent compensation and disbursements of the Commission, twenty-eight thousand one hundred dollars ($28,100).

—to read

For hydrographic surveys along and adjacent to the bulkhead line already tentatively adopted, eleven thousand dollars ($11,000).

For topographical surveys to determine the amount of filling needed, four thousand dollars ($4,000).

For precisely establishing the bulkhead line and connecting it with the street system of the City, two thousand five hundred dollars ($2,500).

For the preparation of plans showing types of bulkhead, general treatment of the shore front, provision for railway connections and terminals, for office expenses, and for past and subsequent compensation and disbursements of the Commission, thirty-four thousand six hundred dollars ($34,600).

—thereby increasing the amount eight thousand dollars.............. $8,000 00

$18,000 00

Schedule "C," Rescindments or Partial Rescindments of Existing Corporate Stock Authorizations.

C-CM-5a. Amend resolution of the Board of Estimate and Apportionment adopted November 19, 1909, to provide for the payment of the expenses of the Change of Grade Damage Commission for the year 1910, to read eighteeen thousand three hundred and fifty ($18,350) dollars instead of eighteen thousand eight hundred and fifty ($18,850) dollars, thereby rescinding an amount of five hundred dollars.........	$500 00

We recommend the adoption of the attached resolutions.

Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; GEORGE McANENY, President, Borough of Manhattan; Corporate Stock Budget Committee.

The following resolution was offered:

Resolved, That, pursuant to the provisions of chapter 537, Laws of 1893, as amended by chapter 567, Laws of 1894; chapter 205, Laws of 1898; chapters 707, 708 and 709, Laws of 1899; chapter 729, Laws of 1900; chapter 747, Laws of 1905, and pursuant to section 170 of the Greater New York Charter, the Board of Estimate and Apportionment, hereby authorizes the Comptroller to issue corporate stock of The City of New York, from time to time, as may be required, in the manner provided by section 169 of the Greater New York Charter, to an amount not exceeding nine thousand three hundred dollars ($9,300), the proceeds whereof to be applied for the purpose of defraying the cost of the expenses of the Change of Grade Damage Commission, Twenty-third and Twenty-fourth Wards, for the year 1912.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That, pursuant to the provisions of chapter 567 of the Laws of 1894, and chapter 747 of the Laws of 1905, and the provisions of sections 169 and 170 of the Greater New York Charter, the Comptroller be and is hereby authorized to issue corporate stock of The City of New York in the manner provided by section 169 of the Greater New York Charter, to the amount of ten thousand dollars ($10,000), to provide for the payment of the fees of expert witnesses employed by the Corporation Counsel to testify in the proceedings before the Change of Grade Damage Commission authorized by said acts.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That, subject to the concurrence herewith by the Board of Aldermen, the resolution adopted by the Board of Estimate and Apportionment, at a meeting held June 3, 1910, and adopted by the Board of Aldermen June 21, 1910, which reads as follows:

Resolved, That, pursuant to the provisions of section 47 of the Greater New York Charter, as amended, the Board of Estimate and Apportionment hereby approves of the issue of corporate stock of the City of New York to an amount not exceeding seventy-five thousand dollars ($75,000), to provide means for the necessary expenses of the Commission appointed by the Mayor, pursuant to a resolution of the Board of Estimate and Apportionment adopted June 7, 1907, in connection with the general improvement and development of Jamaica Bay, in the Boroughs of Brooklyn and Queens, and the general condition of the water-front of the Boroughs of The Bronx, Brooklyn, Queens and Richmond, to be expended as follows:

For hydrographic surveys along and adjacent to the bulkhead line already tentatively adopted	$30,000 00
For topographical surveys to determine the amount of filling needed......	5,000 00
For precisely establishing the bulkhead line and connecting it with the street system of the City..	2,500 00

For the preparation of plans showing types of bulkhead, general treatment of the shore front, provision for railway connections and terminals, for office expenses, and for past and subsequent compensation and disbursements of the Commission	37,500 00
	$75,000 00

—and when authority therefor shall have been obtained from the Board of Aldermen, the Comptroller is authorized to issue corporate stock of The City of New York in the manner provided by section 169 of the Greater New York Charter, to an amount not exceeding seventy-five thousand dollars ($75,000), the proceeds whereof to be applied to the purposes aforesaid.

—be amended to read as follows:

Resolved, That, pursuant to the provision of section 47 of the Greater New York Charter, as amended, the Board of Estimate and Apportionment hereby approves of the issue of corporate stock of The City of New York to an amount not exceeding forty-four thousand one hundred dollars ($44,100), to provide means for the necessary expenses of the Commission appointed by the Mayor, pursuant to a resolution of the Board of Estimate and Apportionment adopted June 7, 1907, in connection with the general improvement and development of Jamaica Bay, in the Boroughs of Brooklyn and Queens, and the general condition of the waterfront of the Boroughs of The Bronx, Brooklyn, Queens and Richmond, to be expended as follows:

For hydrographic surveys along and adjacent to the bulkhead line already tentatively adopted	$9,500 00
For topographical surveys to determine the amount of filling needed	4,000 00
For precisely establishing the bulkhead line and connecting it with the street system of the City	2,500 00
For the preparation of plans showing types of bulkhead, general treatment of the shore front, provision for railway connections and terminals, for office expenses and the past and subsequent compensation and disbursements of the Commission	28,100 00
	$44,100 00

and when authority therefor shall have been obtained from the Board of Aldermen, the Comptroller is authorized to issue corporate stock of The City of New York, in the manner provided by section 169 of the Greater New York Charter, to an amount not exceeding forty-four thousand one hundred dollars ($44,100), the proceeds whereof to be applied to the purposes aforesaid.

—be further amended to make the amounts read as follows:

For hydrographic surveys along and adjacent to the bulkhead line already tentatively adopted, eleven thousand dollars	11,000 00
For topographical surveys to determine the amount of filling needed, four thousand dollars	4,000 00
For precisely establishing the bulkhead line and connecting it with the street system of the City, twenty-five hundred dollars	2,500 00
For the preparation of plans showing types of bulkhead, general treatment of the shore front, provision for railway connections and terminals, for office expenses and the past and subsequent compensation and disbursements of the Commission, thirty-four thousand six hundred dollars	$34,600 00
	$52,100 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That, the resolution adopted by the Board of Estimate and Apportionment, at a meeting held November 19, 1909, which reads as follows:

"Resolved, That, pursuant to the provisions of chapter 837 of the Laws of 1893, as amended, by chapter 567 of the Laws of 1894; chapter 747, Laws of 1908, and sections 169 and 170 of the Greater New York Charter, the Comptroller be and is hereby authorized to issue corporate stock of The City of New York from time to time, as may be required, in the manner provided by section 169 of the Greater New York Charter, to the amount of eighteen thousand eight hundred and fifty dollars

($18,850), to provide for the payment of the expenses of the Change of Grade Damage Commission for the year 1910 authorized by said act."
—be amended to make the amount read eighteen thousand three hundred and fifty dollars ($18,350).

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

METROPOLITAN SEWERAGE COMMISSION.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 11, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—We transmit herewith our report upon the requests made by the Metropolitan Sewerage Commission for corporate stock to be authorized in 1911.

Our recommendations are embraced in the attached resolution, which is drawn in accordance with the following schedule, which includes our recommendation for all new authorizations of corporate stock other than additions to existing authorizations.

Metropolitan Sewerage Commission, salaries and other expenses........	$34,000 00

We recommend the adoption of the attached resolution. Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President of the Board of Aldermen; GEORGE McANENY, President of the Borough of Manhattan; Corporate Stock Budget Committee.

The following resolution was offered:

Resolved, That, pursuant to the provisions of chapter 639 of the Laws of 1906, as amended by chapter 422 of the Laws of 1908 and chapter 200 of the Laws of 1910, the Board of Estimate and Apportionment hereby appropriates the sum of thirty-four thousand dollars ($34,000), to pay salaries and other expenses of the Commission known as the Metropolitan Sewerage Commission of New York, appointed to investigate and consider means for protecting the waters of New York Bay and vicinity against pollution, and that for the purpose of providing means therefor the Comptroller be and is hereby authorized to issue said corporate stock of The City of New York in the manner provided by section 169 of the Greater New York Charter, the proceeds thereof to the amount of the par value of the stock to be applied to the purposes aforesaid.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

COMMISSIONER OF RECORDS, NEW YORK COUNTY.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 11, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—We transmit our report on the request of the Commissioner of Records, New York County, for corporate stock to be issued in 1911.

Our recommendations are embraced in the attached resolution in accordance with schedule.

Schedule "A" includes our recommendations for all new authorizations of corporate stock other than additions to existing authorizations.

Schedule "A"—New Authorizations.

Purchase of steel filing cases and furnishings for the office of the County Clerk, New York County, under the jurisdiction of the Commissioner of Records, New York County..	$25,000 00

We recommend the adoption of the attached resolution. Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; GEORGE McANENY, President, Borough of Manhattan; Corporate Stock Budget Committee.

The following resolution was offered:

Resolved, That, pursuant to the provisions of chapter 291, Laws of 1911, the Board of Estimate and Apportionment hereby approves of the issue of corporate stock of The City of New York to an amount not exceeding twenty-five thousand dollars ($25,000), to provide means for the purchase of steel filing cases and furnishings for the office of the County Clerk, New York County, under the jurisdiction of the Commissioner of Records, New York County, and the Comptroller be and is hereby authorized to issue said corporate stock of The City of New York in the manner provided by section 169 of the Greater New York Charter, the proceeds thereof to the amount of the par value of the stock to be applied to the purposes aforesaid.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

SURROGATE AND COUNTY CLERK, QUEENS COUNTY.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 11, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—We transmit herewith our report upon the request made by the Surrogate and County Clerk, of Queens County, for corporate stock to be authorized in 1911.

Our recommendations are embraced in the attached resolution in accordance with schedule.

Schedule "A" includes our recommendations for all new authorizations of corporate stock other than additions to existing authorizations.

Schedule "A"—New Authorizations.

Construction of a fireproof building and purchase of steel filing cases for Queens County records for the use of the Surrogate and County Clerk of Queens County, under the jurisdiction of the President of the Borough of Queens	$100,000 00

We recommend the adoption of the attached resolution. Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; GEORGE McANENY, President, Borough of Manhattan; Committee on Corporate Stock Budget.

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 47 of the Greater New York Charter, as amended by chapter 409 of the Laws of 1904, the Board of Estimate and Apportionment hereby approves of the issue of corporate stock of The City of New York to an amount not exceeding one hundred thousand dollars ($100,000), to provide means for the construction of a fireproof building and purchase of steel filing cases for Queens County records for the use of the Surrogate and County Clerk of Queens County, under the jurisdiction of the President of the Borough of Queens, and that when authority therefor shall have been obtained from the Board of Aldermen, the Comptroller be and is hereby authorized to issue said corporate stock of The City of New York in the manner provided by section 169 of the Greater New York Charter, the proceeds thereof to the amount of the par value of the stock to be applied to the purposes aforesaid.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

FINANCE AND MISCELLANEOUS.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 11, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—We transmit herewith our report upon the requests made by the Department of Finance and Miscellaneous for corporate stock to be authorized in 1911.

Our recommendations are embraced in the attached resolutions, which are drawn in accordance with Schedule "B," included herein.

Schedule "B" includes our recommendations for all additions to existing authorizations of corporate stock.

Schedule "B"—Additions to Existing Authorizations of Corporate Stock.

C-BD-21. Bridge over Gowanus Canal at Hamilton avenue, Borough of Brooklyn—Damage from change of grade of streets and avenues, twelve thousand dollars	$12,000 00
C-FM-4. Corporate stock fund to provide for deficiencies in tax levies of 1904, and prior, demand uncollectible at January 1, 1905 (chapter 208, Laws of 1906), five million dollars	5,000,000 00
	$5,012,000 00

We recommend the adoption of the attached resolutions. Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; GEORGE McANENY, President, Borough of Manhattan; Corporate Stock Budget Committee.

The following resolution was offered:

Resolved, That, pursuant to the provisions of chapter 224 of the Laws of 1905, the Comptroller be and hereby is authorized to issue corporate stock of The City of York to an amount not exceeding one hundred thousand dollars ($100,000), to provide New York, in the manner provided by section 169 of the revised Greater New York Charter, to the amount of twelve thousand dollars ($12,000), for the purpose of providing means to pay awards made by the Board of Assessors for damages arising from the change of grade of streets or avenues because of the construction of a bridge over the Gowanus canal at Hamilton avenue, in the Borough of Brooklyn, City of New York.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That the following authorization of corporate stock be released from the provisions of a resolution adopted by the Board of Estimate and Apportionment on January 14, 1910, which resolution directed the heads of the various City Departments to incur no further obligations against existing corporate stock authorizations (except for salaries, wages and supplies) without the express authorization of the Board of Estimate and Apportionment, the said release to be in sums not exceeding the amount set opposite the items herein scheduled and for the purposes herein specified:

C-FM-4. Corporate stock fund to provide for deficiencies in tax levies of 1904, and prior, deemed uncollectible at January 1, 1905, chapter 208, Laws of 1906, to provide for the amount of deficiencies in tax levies of 1904, and prior, not otherwise provided for, five million dollars.....$5,000,000 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

DEPARTMENT OF WATER SUPPLY, GAS AND ELECTRICITY.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 11, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—We transmit herewith our report upon the requests made by the Department of Water Supply, Gas and Electricity for corporate stock to be authorized in 1911.

Our recommendations are embraced in the attached resolutions which are drawn in accordance with the schedule included herein.

Since authorizations of corporate stock for improving the water supply systems in the several Boroughs do not affect the borrowing capacity of the City, as determined by the debt limit, only such authorizations as are required to provide for improvements to be contracted for during 1911, and for the estimated annual cost of salaries and wages of the engineering and labor construction force of the Department; for the contingent expenses of this force, and for the purchase of supplies and materials for construction work performed by departmental labor, are herein recommended.

For the reason that when the authorizations previously noted are available, no further expenditures for salaries and wages, or for contingent expenses, will be charged against present authorizations of corporate stock, it has been considered advisable to recommend new authorizations for the specific improvements required; and later, when the amounts of the present authorizations which can be rescinded are definitely determined, to recommend such rescindments. At that time such further authorizations as may be required for improvements to be contracted for prior to July 1, 1912, will be recommended.

New Authorizations of Corporate Stock.

For furnishing and laying additional small distribution mains, Boroughs of Manhattan and The Bronx	$180,000 00
For purchase of supplies and materials for use of the labor construction force, Boroughs of Manhattan and The Bronx	110,000 00
For construction of a chlorination plant at Dunwoodie, Westchester County, New York State	15,000 00
For construction of four small chlorination plants on streams in the Croton watershed	20,000 00
For payment of salaries and wages of the labor construction force, Boroughs of Manhattan and The Bronx	76,500 00
For furnishing and laying additional small distribution mains, Borough of Brooklyn	70,000 00
For cross-connecting old distribution mains, Borough of Brooklyn	25,000 00

Resolved, That, pursuant to the provisions of section 178 of the Greater New York Charter, as amended, the Board of Estimate and Apportionment hereby approves of the issue of corporate stock of The City of New York, to an amount not exceeding fourteen thousand five hundred dollars ($14,500), to provide means for extending the present building at the West New Brighton Pumping Station, erecting an additional pump thereat, including transportation of said pump, and for furnishing and installing additional boilers at the Clove Pumping Station, Borough of Richmond, in connection with improving the water supply system of said Borough, and that the Comptroller be and is hereby authorized to issue said corporate stock of The City of New York, in the manner provided by section 169 of the Greater New York Charter, the proceeds thereof to the amount of the par value of the stock to be applied to the purposes aforesaid.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

—

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 178 of the Greater New York Charter, as amended, the Board of Estimate and Apportionment hereby approves of the issue of corporate stock of The City of New York, to an amount not exceeding one hundred thousand dollars ($100,000), to provide means for furnishing and installing necessary engines, boilers and appurtenances and electrical equipment at the new Grant City Pumping Station, Borough of Richmond, in connection with improving the water supply system of said Borough, and that the Comptroller be and is hereby authorized to issue said corporate stock of The City of New York, in the manner provided by section 169 of the Greater New York Charter, the proceeds thereof to the amount of the par value of the stock to be applied to the purposes aforesaid.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

—

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 178 of the Greater New York Charter, as amended, the Board of Estimate and Apportionment hereby approves of the issue of corporate stock of The City of New York, to an amount not exexceeding forty-eight thousand dollars ($48,000), to provide means for the payment of salaries and wages of the Labor Construction Force of the Department of Water Supply, Gas and Electricity employed in connection with improving the water supply system of the Borough of Richmond, and that the Comptroller be and is hereby authorized to issue said corporate stock of The City of New York, in the manner provided by section 169 of the Greater New York Charter, the proceeds thereof to the amount of the par value of the stock to be applied to the purposes aforesaid.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

—

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 178 of the Greater New York Charter, as amended, the Board of Estimate and Apportionment hereby approves of the issue of corporate stock of The City of New York, to an amount not exceeding five hundred thousand dollars ($500,000), to provide means for the payment of salaries and wages of the Engineering Construction Force of the Department of Water Supply, Gas and Electricity employed in connection with improving the water supply systems of the Boroughs of Manhattan, The Bronx, Brooklyn, Queens and Richmond, and that the Comptroller be and is hereby authorized to issue said corporate stock of The City of New York, in the manner provided by section 169 of the Greater New York Charter, the proceeds thereof to the amount of the par value of the stock to be applied to the purposes aforesaid.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 178 of the Greater New York Charter, as amended, the Board of Estimate and Apportionment hereby approves of the issue of corporate stock of The City of New York, to an amount not exceeding forty thousand dollars ($40,000), to provide means for the contingent expenses of the Engineering and Labor Construction Force of the Department of Water Supply, Gas and Electricity, in connection with improving the water supply systems of the Boroughs of Manhattan, The Bronx, Brooklyn, Queens and Richmond, and that the Comptroller be and is hereby authorized to issue said corporate stock of The City of New York, in the manner provided by section 169 of the Greater New York Charter, the proceeds thereof to the amount of the par value of the stock to be applied to the purposes aforesaid.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The President of the Board of Aldermen moved that when the Board adjourns, it adjourn to meet Tuesday, July 18, 1911, at 10.30 o'clock a. m., which motion was adopted.

On motion of the Comptroller, the Board adjourned to meet Tuesday, July 18, 1911, at 10.30 o'clock a. m. JOSEPH HAAG, Secretary.

BOARD OF ESTIMATE AND APPORTIONMENT.

Minutes of Meeting of Board of Estimate and Apportionment, Held in Room 16, City Hall, Tuesday, July 18, 1911, at 10.30 a. m.

FRANCHISE MATTERS.

The Board met in pursuance of an adjournment.

Present—John Purroy Mitchel, President, Board of Aldermen; William A. Prendergast, Comptroller; George McAneny, President, Borough of Manhattan; Alfred E. Steers, President, Borough of Brooklyn; Cyrus C. Miller, President, Borough of The Bronx; Lawrence Gresser, President, Borough of Queens, and George Cromwell, President, Borough of Richmond.

The President of the Board of Aldermen, Hon. John Purroy Mitchel, presided.

Rapid Transit Railway—Battery-East River-Atlantic Avenue Route.

In the matter of the communication dated June 30, 1911, from the Public Service Commission for the First District, transmitting resolutions adopted by said Commission as to route and general plan of construction for a proposed rapid transit railway beginning at a point under Battery Park, Borough of Manhattan, and extending under the park and ferry or waterfront property to the East River; thence under the East River to a point at or near Atlantic avenue, Borough of Brooklyn, extended with the pierhead line; thence under and along Atlantic avenue to a point in said avenue about 150 feet east of the easterly line of Court street, Borough of Brooklyn, where a connection can be made with Section 11-D of the Fourth avenue subway, and requesting the approval and consent of this Board thereto.

This communication was presented to the Board at the meeting of July 6, 1911, when, by resolution duly adopted, July 13, 1911, was fixed as the date for consideration and the communication was referred to the Franchise Committee.

At the meeting of July 13, 1911, the consideration was concluded and the matter was laid over until July 17, 1911, when it was laid over until this day.

The matter was laid over until July 20, 1911.

Rapid Transit Railways—Extensions to the Existing System; also Third Tracking and Constructing Additions to the Second, Third and Ninth Avenue Elevated Railroads; and the Completion and Putting in Operation of the Steinway Tunnel.

In the matter of the communication from the Public Service Commission for the First District, relative to the construction, maintenance and operation of additional rapid transit railways; and requesting a statement of the position of this Board on the subject.

At the meeting of July 17, 1911, the President of the Board of Aldermen served notice on the Board that unless a decision was reached in this matter on or before the next meeting of the Board, he would, at that time, offer for adoption a resolution providing for the award of the extended rapid transit system pursuant to the recommendations of the Conference Committee.

The President of the Board of Aldermen stated he was prepared to offer a resolution awarding the extended rapid transit system pursuant to recommendations of the Conference Committee, unless the Committee had a report prepared.

The President of the Borough of Manhattan, Chairman of the Committee, stated the Committee was formulating a report and would be prepared to submit its recommendations to the Board at three o'clock p. m. this day.

On motion of the Comptroller, the Board adjourned to meet at three o'clock p. m. this day.

JOSEPH HAAG, Secretary.

BOARD OF ESTIMATE AND APPORTIONMENT.

Minutes of Meeting of Board of Estimate and Apportionment Called for Tuesday, July 18, 1911, at Room 16, City Hall, at 3 o'clock p. m.

FINANCIAL AND FRANCHISE MATTERS.

At the meeting of the Board held this day at 10.30 o'clock a. m. an adjournment was taken until 3 o'clock p. m.

Owing to the absence of a quorum no meeting was held.

JOSEPH HAAG, Secretary.

1501 G-300-11-(L)

BOARD OF ESTIMATE AND APPORTIONMENT.

Minutes of Meeting of Board of Estimate and Apportionment Held in Room 16, City Hall, Thursday, July 20, 1911, at 10.30 a. m.

FINANCIAL AND FRANCHISE MATTERS.

The Board met in pursuance of the following call:

City of New York, Office of the Mayor, July 19, 1911.

In pursuance of the provisions of section 226 of the Greater New York Charter, the Board of Estimate and Apportionment requests the Mayor to call a meeting of said Board on Tuesday, July 20, 1911, at 10.30 o'clock a. m.

W. J. GAYNOR, Mayor; WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; GEORGE McANENY, President, Borough of Manhattan; ALFRED E. STEERS, President, Borough of Brooklyn; CYRUS C. MILLER, President, Borough of The Bronx; LAWRENCE GRESSER, President, Borough of Queens; GEORGE CROMWELL, President, Borough of Richmond.

Present—William J. Gaynor, Mayor; William A. Prendergast, Comptroller; John Purroy Mitchel, President, Board of Aldermen; George McAneny, President, Borough of Manhattan; Alfred E. Steers, President, Borough of Brooklyn; Cyrus C. Miller, President, Borough of The Bronx; Lawrence Gresser, President, Borough of Queens, and George Cromwell, President, Borough of Richmond.

The Mayor, Hon. William J. Gaynor, presided.

FRANCHISE MATTERS.

Rapid Transit Railway—Battery-East River-Atlantic Avenue Route.

In the matter of the communication from the Public Service Commission for the First District, transmitting resolutions adopted by said Commission as to route and general plan of construction for a proposed rapid transit railway beginning at a point under Battery Park, Borough of Manhattan, and extending under the park and ferry or waterfront property to the East River; thence under the East River to a point at or near Atlantic avenue, Borough of Brooklyn, extended with the pierhead line; thence under and along Atlantic avenue to a point in said avenue about 150 feet east of the easterly line of Court street, Borough of Brooklyn, where a connection can be made with Section 11-D of the Fourth Avenue Subway, and requesting the approval and consent of this Board thereto.

This communication was presented to the Board at the meeting of July 6, 1911, and by resolution duly adopted, July 13, 1911, was fixed as the date for consideration and the communication was referred to the Franchise Committee.

At the meeting of July 13, 1911, the consideration was concluded and the matter was laid over until July 17, 1911, when it was laid over until July 18, 1911, and was then laid over until this day.

The matter was laid over.

Rapid Transit Railways—Extensions to the Existing System; Also Third Tracking and Constructing Additions to the Second, Third and Ninth Avenue Elevated Railroads, and the Completion and Putting in Operation of the Steinway Tunnel.

In the matter of the communication from the Public Service Commission for the First District, relative to the construction, maintenance and operation of additional rapid transit railways, and requesting a statement of the position of this Board on the subject.

The President of the Borough of Manhattan, Chairman of the Conference Committee, presented the following:

July 20, 1911.

To the Honorable Board of Estimate and Apportionment:

Gentlemen—The Public Service Commission for the First District and your Special Committee upon pending proposals for the construction, equipment and operation of new rapid transit lines submitted to your honorable body under date of June 13, 1911, a joint report embodying recommendations with relation to the terms upon which, in the judgment of the transit conferees, contracts for such construction, equipment and operation might properly be made between the City and the Interborough Rapid Transit Company and the Brooklyn Rapid Transit Company respectively.

These recommendations, together with certain modifications thereof, were approved by your honorable Board under the resolution adopted under date of June 21, 1911 and June 29, 1911, and the respective operating companies were subsequently advised of the action so taken.

The general plan upon which the Public Service Commission and the Board of Estimate and Apportionment agreed contemplated:

1. The laying out of a transit system that would serve as a basis for a logical and well-ordered future City plan.
2. Provision, as rapidly as the means at the City's command permitted, not only for the relief of congested areas, but for the operation of lines through those sections that, though relatively undeveloped, offer promising opportunity for the better distribution of population.
3. Automatic provision for the inclusion in either operating system of such future extensions as the City may from time to time decide to build.
4. The utilization and extension, so far as possible, of the facilities offered by existing rapid transit lines already at the service of the City, rather than to reduce the uses of such lines through competition of a wasteful nature.
5. The separation of particular routes, or combinations of routes in such manner as to secure control on the part of the City of future transit development, and the right of the City to recapture a system of lines capable of independent operation, if it so elects, at any time after ten years.
6. The release of the moneys invested by the City in new transit lines at the earliest practicable time from the restrictions placed by the constitution upon municipal indebtedness; and
7. The subjection of the operating companies to strict public regulation as a condition precedent to the granting of the new franchises or other rights.

It is not necessary at this moment to rehearse in detail the terms of the Report of the Conferees, which have been carefully considered by your Board, and which have been the subject of much general discussion. The fact should be emphasized, however, that the primary purpose of the plan proposed by the Conferees was to secure the advantages of a transit system based upon the principles we have stated, and not to put the City in a position of sacrificing any part of its own logical development for the sake of securing the sort of returns that would accrue to a partner in a commercial railroading enterprise. The Interborough Company, which holds the City's subways under leases that secure it in possession for approximately seventy years, has informed the Conferees that it could not accept the terms proposed by the City for the operation of extensions of its system, for the reason that the private capital required to carry out its part of the plan could not be enlisted upon such terms. In order to examine the figures and data, and to hear the arguments upon which the Company's conclusion was based, the Conferees have held several further conferences with the representatives of the Company and with their bankers. As a result of these conferences the Company now submits a supplementary offer to operate all of the routes laid down in the Conferees' report, and to accept all the terms and conditions proposed by the report, with the exception of those establishing the basis of compensation to the Company. The recommendations of the Conferees under this head were:

1. That if a contract were made with the Interborough Company, the Company be permitted to retain all of the net earnings upon the lines it now operates, which for the year ending June 30, 1910, amounted to 17.3 per cent. upon its invested capital.
2. That the net profits of the new lines be estimated upon a separate accounting system based on a per passenger method of ascertaining the cost of operation.
3. That the receipts of the new lines above operation be proportioned as follows:

(a) The carrying charges upon the new capital invested by the Company and the City respectively;

(b) Each party be permitted therafter to retain three per cent. in excess of such carrying charges;

(c) All receipts in excess of such three per cent. to be applied toward the carrying of deficits, if any, upon the cost of operating extensions; and

(d) That all profits remaining after the operation of such extensions be divided evenly between the two parties.

The Company now proposes that the gross receipts of all the lines, both new and old, be pooled, and that after the payment of operating expenses they be distributed as follows:

(a) The interest and sinking fund charges upon the bonds of the City issued for the construction of rapid transit lines under the present rapid transit contracts.

(b) An amount to be retained by the Company during the entire period of the contract equivalent to five per cent. interest and one per cent. sinking fund charges upon the capital contributed by the Company for either construction or equipment of the proposed and existing subways, with three per cent. additional as compensation to the Company for the pooling of the receipts of the existing lines with those of the new lines, the levelling of the leases upon the old and new lines, the exchange of leases upon the east and west side lines in Manhattan, and for services in connection with the operation of the property, it being understood that the amount of capital contributed by the Company to the existing subway system for construction and equipment as of June 30, 1911, amounts to the sum of $48,029,688, the basis for the allowance in question to be, nevertheless, the exact sum expended upon construction and equipment. These allowances, which are not to exceed nine per cent. in all, to be upon all capital furnished by the Interborough Company during the period of the contract, and to be cumulative; the deficits, if any, to be adjusted on a yearly basis out of a fund to be provided therefor by the Company as part of its capital investment; the allowance made to the Company upon the bonds or notes issued for this purpose not to exceed interest charges thereon.

(c) A sum representing the interest and sinking fund charges upon the capital invested by the City in the said new lines; deficiencies in the amount required to meet such charges from the date of the operation of said new lines to be treated as cumulative and to be met from the receipts of the system before further distribution of profit proceeds.

(d) A sum representing the difference between the interest and sinking fund charges of the City upon its investment in the said new lines, up to and including an aggregate of nine per cent. upon the investment of the City in the new lines. before the further distribution of profit proceeds; and

(e) An even distribution between the City and the Company of all profit after the foregoing charges have been met; such division to proceed throughout the remainder of the term of the lease from the City to the Company.

The proposition of the Company, read in conjunction with the general terms of the report, which it has accepted, also covers the following points:

1. That, as set forth in the Report of the Conferees, dated June 5, 1911, the sinking fund set aside by the Company upon its investment in equipment shall meet and cover all charges for obsolescence incidental to the maintenance of such equipment.

2. That all future extensions agreed upon by the City and the Company shall be governed by and included in the general provisions herein set forth as to receipts and deductions therefrom, and that all extensions required by the City and not agreed to by the Company shall be equipped and operated as part of the entire plan upon the general lines set forth in the offers of the Interborough Company of December 5, 1910 and May 9, 1911; the operating expenses of such extensions, in that case, to be upon the cost-per-passenger basis, to be determined according to unit costs on the entire system.

3. That upon the completion of any substantial portion of the new lines the receipts of the existing subways shall be immediately pooled therewith, and such pooled receipts divided in the manner hereinbefore provided, in the proportion which such new lines bear to the whole system, as the same may be placed in operation from time to time.

4. That the Company will commence at once the construction of all of the lines embraced in this plan that are contiguous to any of its existing lines, either subway or elevated, and that it will press the work upon all other lines with the greatest possible dispatch.

5. That the Interborough Company and the Manhattan Elevated Company will construct and operate the third track lines and extensions to the existing subway system of the Manhattan Company upon the terms proposed in the resolutions of

, as modified on , with the exception that the City, in lieu of the proposed provision for examination of the lines to determine what deferred depreciation, if any, would be required to be met, will accept a clause prohibiting excessive renewal charges on the part of the Company during any one year following the new operation.

6. That the Company will accept in every other particular the terms and conditions for the construction, equipment and operation of the lines for which it has applied, or which have been assigned to it, as laid down in the resolutions of June 21, 1911, as amended on June 30, 1911.

The Conferees, having in view the pre-eminent desirability of extending under a logical plan the City lines now under lease to the Interborough Company as part of the more comprehensive system proposed in the report of June 13, 1911, and being convinced that the revised terms that they have negotiated with the Interborough Company offer the best practicable basis of settlement, do not hesitate to recommend that the substitute proposition as to financial basis be accepted.

The advantages to the City would be manifold. The Company, in return for the pooling of its revenues, for the virtual merging of the new and old leases for the reduced period of forty-nine years, the exchange of leases upon its east and west side lines, and for its services as operator of the compounded system, would receive three per cent. above the carrying charges upon its investment. It is estimated that by the first year of operation of the new lines the Company's total investment upon the old lines for construction and equipment will be $50,000,000, and that its contribution for construction and equipment of the new lines will be $75,000,000—a total of $125,000,000. The three per cent. allowed upon this sum would amount to $3,750,000 annually. This would be the maximum sum allowed throughout the entire operation of the lease until the City also receives nine per cent. upon its investment. The Company's net profit from the subways for the year ending June 30, 1910 was $4,650,000. For the year ending June 30, 1911, figures for which are not yet in hand, the amount will be somewhat less. During this year, however, expenditures for equipment replacements have been abnormal and the net figures of the year are not to be taken as typical. It is estimated that the increase of traffic between now and the year 1915, the last year preceding the operation of the new lines, will bring the profit for that year to approximately $7,000,000. The present proposition is, therefore, in a word, that the Company will operate an expanded system, doubling the mileage of its present lines, for a profit of $1,000,000 less than it is receiving today upon its smaller system, and more than $3,000,000 less than the profit it would receive in the last year of the present operation.

It may be said that when the settlement of terms upon this principle was first proposed the Company suggested that it be given a reservation of ten per cent. upon its investment, old and new; a figure that would have more nearly approximated its present receipts, and that, although provision for the City's carrying charges should come next in order, all profit earned over the City's carrying charges should be divided evenly. This proposition the Conferees declined to accept. It was then proposed that the basis be made nine per cent., the even division to proced immediately following the payment of the City's carrying charges. This, also, the Conferees declined to accept. As a counter proposition, they proposed that the City receive an amount above its carrying charges up to nine per cent., and upon this basis a final agreement was reached.

The Company figures, upon estimates that are considered by the Conferees to be very conservative, that any cumulative deficits in its preferred allowance would be discharged within eight years from the beginning of operation, and that the cumulative deficiencies in the City's carrying account would be discharged in five years more, thus bringing the City within thirteen years to the point at which it would derive an annual profit.

It would be difficult to indicate accurately the exact year at which this point would be reached; but it could hardly be more than one or two years beyond the date the company anticipates. If it is assumed that the new and old lines, at such a date, would have reached the maximum of their carrying capacity—estimated at 800,000,000 passengers per year—the following operating results would have been secured:

Gross operating revenue (on the basis of 800,000,000 passengers per year)	$40,000,000
Less 45 per cent. allowance for operating expenses	18,000,000
	$22,000,000
Less carrying charges upon the City's present bonds	2,700,000
	19,300,000
Less taxes (city, state and federal)	600,000
	18,700,000
Add non-operating revenues	300,000
Gross income	$19,000,000

If there be deducted from this sum the proposed preferred allowance of $11,250,000 on the old and new investment of the company, plus an additional allowance of $1,000,000 on new equipment the company will be obliged to purchase in order to meet the expected growth of travel, and plus $4,950,000 representing nine per cent. to go to the City upon its new investment of $55,000,000, there would stilll remain a balance of $1,800,000 available for equal division between the parties within fifteen or sixteen years from the beginning of operation.

The release of the City's investment from the restrictions of the debt limit would occur as soon as its carrying charges have been met. It is to be considered, further, that the allowance to the Company of $3,750,000 annually as a preferred profit, is to be treated as preferential only during the thirteen or fourteen years prior to the payment of the City's full nine per cent. The City can borrow money more cheaply than the Company. Its bonds are apt to be sold at a rate of 4¼. It would be entitled, therefore, to 3¾ per cent. upon its proposed investment of $55,000,000, which would amount to $2,100,000 annually. From the first year of the realization of this full sum, the preferred allowance to the Company would be reduced, therefore, to $1,650,000. Throughout the remaining years of the lease, this reduced amount would stand for all that the Company surrenders in the way of its present earnings and the readjustment of its existing leases.

At the end of the leases, it would, moreover, turn over to the City a property valued at $125,000,000 and would have paid to the City during the same period an increase in taxes aggregating $20,000,000.

The Conferees, in recommending that the proposed revised basis for settlement with the Interborough Company be accepted, have in mind also the fact that the indirect benefits to the City would be vastly in excess of the direct return from its share in the revenues of operation. The President of the Department of Taxes and Assessments informs the Committee that within five or ten years following the opening of the new transit lines to operation, taxable values will increase fully $500,000,000 beyond the estimates the department has previously furnished. At the rate of the present annual tax, this would net more than $8,000,000 annually in taxation. This consideration alone, in the judgment of the Conferees, justifies any risk that the City proposes to take in its part of the construction of any of the lines embraced in the comprehensive plan the Conferees' report proposed.

The Conferees recommend, also, that the franchises sought by the Interborough and Manhattan companies for the third tracking and extension of the Manhattan elevated lines be also granted upon the terms set forth in the report, as subsequently amended. Under this plan, the City will receive half of the increase in net operation of the elevated roads, above an average of the profits of the two years ending June 30, 1911, instead of two per cent. of the increase in the gross receipts at express stations, as the Company had first proposed. The City will also undertake to treat as cumulative any losses of income on the part of the Company below the average aforesaid, and to discharge this before the even division of profits proceeds. There can be no doubt, however, that any loss of income due to the opening of the new subways will be quickly overcome, and the advantages of an even division in all of the increase of the future, estimated roughly at forty per cent. of the present traffic, is manifest.

The resolutions herewith submitted by the Special Committee of the Board of Estimate, if adopted, will not only determine the disposition of the several routes to be embraced within the system to be operated by the Interborough Company; but will reaffirm the action previously taken by the Board with relation to the award to the Brooklyn Company of the routes assigned to it in the Conferees' report of June 5, 1911.

The Public Service Commission is already proceeding with the preparation of formal contracts upon which the operation of the new system of the Brooklyn Company will be based. The Commission is proceeding, also, with all steps necessary to the legalization of routes embraced in any part of the City's plan that have not yet been established. The Commission will proceed with actual construction of the lines embraced in the plan to be built wholly by the City, for which bids are in hand, and with the advertisement of bids for the construction of all other such lines that have been legalized, as soon as the final action of the Board of Estimate and Apportionment is taken.

All of which is respectfully submitted.

Special Committee of the Board of Estimate and Apportionment: GEORGE McANENY, President, Borough of Manhattan; CYRUS C. MILLER, President, Borough of The Bronx; GEORGE CROMWELL, President, Borough of Richmond.

For the Public Service Commission for the First District: W. R. WILLCOX, Chairman; WM. McCARROLL, J. E. EUSTIS.

The President of the Borough of Manhattan offered the following:

Whereas, The Special Committee of the Board of Estimate and Apportionment appointed to consider pending transit proposals, and the Public Service Commission for the First District, made a joint report to this Board bearing date of June 5, 1911, and transmitted under date of June 13, 1911, with relation to the construction, equipment and operation of additional lines of rapid transit railway within The City of New York; and

Whereas, This Board, at a meeting held on June 21, 1911, concurred unanimously in the findings and recommendations of said joint report, with certain modifications set forth in the resolutions adopted upon such date applying to the respective proposals of the Interborough Rapid Transit Company and the Brooklyn Rapid Transit Company; and

Whereas, The Interborough Company, through informal communication to the Board, has represented that it would be unable to secure the investment of private capital in the lines assigned to it upon the terms proposed by the Board and the Public Service Commission unlesss the said terms and conditions be modified; and

Whereas, As a result of further conferences between the representatives of the company and the Special Committee of the Board and the Public Service Commission, the Conferees have been informed by the company, in a letter dated July 19, 1911, that it will accept the part allotted to it by the Board subject to the terms and conditions contained in the report of the Conferees dated June 5, 1911, as amended June 21, 1911, if certain modifications with relation to the financial terms be made therein; and

Whereas, The Board is convinced, for the reasons submitted by the Conferees, that the said modifications may properly be accepted; therefore be it

Resolved, That the Board hereby approves the recommendations of its Special Committee and the Public Service Commission that the Commission prepare and submit to the Board contracts for the construction, equipment and operation of the lines assigned to the Interborough Company, as set forth in the Conferees' report dated June 5, 1911, as amended June 21, 1911, and upon the general and specific terms prescribed by said report, excepting in the following particulars:

I. That the Interborough Company, in consideration of the grant of the new franchises and operating rights for the new lines it seeks, and for the new lines assigned to it under the said report of June 5, 1911, be required to pool the gross receipts of all the said lines, old and new; and that its revenues from such gross receipts, after the payment of operating expenses upon the basis set forth in the said report of June 5, 1911, shall be apportioned in the following order:

(a) The interest and sinking fund charges upon the bonds of the City issued for the construction of rapid transit lines under the present rapid transit contracts;

(b) An amount to be retained by the company during the entire period of the contract equivalent to five per cent. interest and one per cent. sinking fund charges upon the capital contributed by the company for either construction or equipment of the proposed and existing subways, with three per cent. additional as compensation to the company for the pooling of the receipts of the existing lines with those of the new lines, the leveling of the leases upon the old and new lines, the exchange of leases upon the east and west side lines in Manhattan, and for services in connection with the operation of the property; it being understood that the amount of capital contributed by the company to the existing subway system for construction and equipment as of June 30, 1911, amounts to the sum of $48,029,668; the basis for the allowance in question to be, nevertheless, the exact sum expended upon construction and equipment. These allowances, which are not to exceed nine per cent. in all, to be upon all capital furnished by the Interborough Company during the period of the contract, and to be cumulative; the deficits, if any, to be adjusted on a yearly basis out of a fund to be provided therefor by the company as part of its capital investment; the allowance made to the company upon the bonds or notes issued for this purpose not to exceed interest charges thereon.

(c) A sum representing the interest and sinking fund charges upon the capital invested by the City in the said new lines; deficiences in the amount required to meet such charges from the date of the operation of said new lines to be treated as cumulative and to be met from the receipts of the system before further distribution of profit proceeds.

(d) A sum representing the difference between the interest and sinking fund charges of the City upon its investment in the said new lines, up to and including an aggregate of nine per cent. upon the investment of the City in the new lines, before the further distribution of profit proceeds; and

(c) An even distribution between the City and the company of all profit after the foregoing charges have been met; such division to proceed throughout the remainder of the term of the leases from the City to the company.

II. That, as set forth in the report of the Conferees dated June 5, 1911, the sinking fund set, aside by the company upon its investment in equipment shall meet and cover all charges for obsolescense incidental to the maintainance of such eqiupmenr.

III. That all future extensions agreed upon by the City and the company shall be governed by and included in the general provisions herein set forth as to receipts and deductions therefrom, and that all extensions required by the City and not agreeed to by the company shall be equipped and operated as part of the entire plan upon the general lines set forth in the offers of the Interborough Company of December 5, 1910 and May 9, 1911; the operating expenses of such extensions, in that case, to be upon the cost-per-passenger basis, to be determined according to unit costs on the entire system.

IV. That upon the completion of any substantial portion of the new lines, the receipts of the existing subway shall be immediately pooled therewith, and such pooled receipts divided in the manner hereinbefore provided, in the proportion which such new lines shall bear to the whole system as the same may be placed in operation from time to time.

V. That the company will commence at once the construction of all the lines embraced in this plan that are contiguous to any of its existing lines, either subway or elevated, and that it will press the work upon all other lines with the greatest possible despatch.

VI. That the Interborough Company and the Manhattan Elevated Company will construct and operate the third track lines and extensions to the existing system of the Manhattan Company, upon the terms proposed in the resolutions of June 21, 1911 as modified on June 30, 1911 with the exception that the City, in lieu of the proposed provision for examination of the lines to determine what deferred depreciation, if any, would be required to be met, will accept a clause prohibiting excessive renewal charges on the part of the company during any one year following the new operation.

VII. That the company will accept in every other particular the terms and conditions for the construction, equipment and operation of the lines for which it has applied, or which have been assigned to it, as laid down in the resolutions of June 21, 1911, as amended on June 30, 1911; and be it further

Resolved, That, in pursuance of the joint recommendations of the Special Committee of the Board and the Public Service Commission, as heretofore ratified and confirmed, the Board approves the proposed immediate preparation of contracts, under the general provisions of the Rapid Transit Act, for the construction, equipment and operation of the lines assigned to the Brooklyn Rapid Transit Company—through the instrumentality of such new railroad company as may be organized for the purpose, or through the Brooklyn Union Elevated Railroad Company, or through both such companies, as may be deemed advisable—along the lines proposed to the Brooklyn Company in the resolutions of June 21, 1911, with the modifications and exceptions further provided in the resolutions adopted on June 30, 1911; and be it further

Resolved, That the Public Service Commission be respectfully requested to submit to this Board at the earliest date practicable the forms of the contracts to be entered into for the equipment, operation and maintenance of the lines of rapid transit railway proposed for operation aforesaid, either by the Interborough Company or by the Brooklyn Company, in order that all of the rapid transit lines proposed for construction, either by the City or by the respective companies, or now under construction by the City, may be promptly utilized; and be it further

Resolved, That the Public Service Commission be and it is hereby respectfully requested, at the earliest date or dates practicable, to submit from time to time for the further approval of this Board the contract or contracts to be entered into for the construction, at the expense of the City, of such portions of the said lines as are intended for operation by either of the contracting companies, or by any company, and to acquaint the Board, so far as practicable, in anticipation of such submission with the necessary plans, specifications and estimates for such construction, in order that the Board may proceed to appropriate the City funds to be expended in accordance therewith; and be it further

Resolved, That the Special Committee of this Board, consisting of the President of the Borough of Manhattan, the President of the Borough of The Bronx and the President of the Borough of Richmond, be hereby continued for the purpose of conferring and co-operating with the Public Service Commission in the carrying out of these recommendations and in the determination of such questions of detail with relation to contracts to be entered into with either company as were left undetermined in the joint report of the conferees, as modified by the resolutions subsequently adopted, including the resolutions of this date.

The following discussion ensued:

PRESIDENT MITCHEL: Mr. Mayor, this matter is now officially before the Board for action. I have waited during the past four days—that is, since the matter was first outlined, to express my full views concerning it and now, in expressing those views and stating the reasons why I vote as I shall upon this proposition, I ask that what I say be made a part of the record of the Board.

While I am keenly alive to the advantages of the Interborough operation of the lines alloted to that Company in the report of the conferees, and would be glad to vote for a contract of operation by that Company on any terms equitable to the City, I regret to find myself in a position where I must vote against the proposition which is now put forth.

I do so only because I believe it would work most disadvantageously to the City and would be almost as unfavorable in its operation as are the terms of the present contract No. 1, under which the Interborough now operates the present subway. My reasons for objecting to the present proposal are as follows:

(1) The preferential payment to the Company of 9 per cent. on old and 9 per cent. on new capital is tantamount to insuring the Company throughout the life of the proposed contract, the full amount of the net profits which the Company is now receiving from the present subway.

The Company claims an investment of $48,029,668; 9 per cent. on $48,029,668 equals $4,322,670. The Company proposes to invest $76,970,332 of new capital on which the carrying charges will be 6 per cent. The difference between the carrying charges 6 per cent. and 9 per cent. is 3 per cent. This 3 per cent. represents net profits. Three per cent. on $76,970,332 equals $2,309,110. The $4,322,670 being the 9 per cent. on old capital, and the $2,309,110 being the 3 per cent. net profit on new capital, together amount to $6,631,780. This sum equals 13.81 per cent. on $48,029,668

Last year the Company's net profit from the subway was $6,769,572. This equals 14.09 per cent. on the Company's alleged investment of $48,029,668. Therefore, the proposed plan of making a preferential payment to the Company of 9 per cent. on old and 9 per cent. on new capital is tantamount to paying to the Company all of its present net profits, and assuring to it carrying charges and sinking fund on the new capital invested, and this before the City gets one cent either in the way of carrying charges or profits upon the capital which it invests in the enterprise.

It is stated that the Company is constrained to make this demand for a preferential payment of $11,250,000, namely, 9 per cent. on old and 9 per cent. on new capital, because of its obligations, and I believe this to be, in a sense, quite true. In fact, in discussing this matter with the representative of the Company, I have been informed that the Company is not in a position to discuss with the City the equitable or inequitable character of the demand, or the adequacy of the compensation proposed for the Company, but must ask this whole amount because of the obligations which it is compelled to carry. These obligations are represented by the 9 per cent. dividend which the Company is now paying on its stock.

As we all know, that stock is owned by the Interborough-Metropolitan Company, and the proceeds of this dividend, when put into the treasury of the Interborough-Metropolitan Company, are immediately paid out again by that Company as a 4½ per cent. interest payment on the $70,000,000 of collateral trust bonds which the Interborough-Metropolitan Company has issued and outstanding.

The plea of the Interborough is that unless it continues to pay the 9 per cent. on its capital stock, and thus enable the Interborough-Metropolitan Company to continue to pay the interest on its bonds, the latter Company will go into bankruptcy. Perhaps this is true, but it offers no good reason to my mind why the City should be asked to finance, for the period of the next forty-nine years, the Interborough-Metropolitan bond and stock operations.

I am fully in accord with Mr. McAneny when he says that it makes no difference to him what the Company does with the money once the City has paid it over, and that he is concerned only with the adequacy of the amount paid by the City. I am not in accord as to the fairness to the City of the price proposed. Nor do I believe that adequate relief can be had only from the Interborough Company.

(2) The Company's offer in Subdivision A, last sentence, reads:

"This return not exceeding 9 per cent. is to be upon all capital furnished by the Interborough during the entire period of the contract and is to be cumulative and the deficits, if any, shall be adjusted on a yearly basis out of a fund to be provided therefor by the Company as a part of its capital investment."

This can mean only one thing, that the Company is to provide a fund through the issue of its bonds out of which it will meet the cumulative deficit occasioned by this preferential payment of $11,250,000 annually, as such deficit may occur. The City will then pay 9 per cent. for interest and sinking fund, plus 3 per cent. profits upon a fund which is created and used for the purpose of making good to the Company—that same interest, sinking fund and 3 per cent. profit upon the bonds issued in part to create this very fund. In other words, the City will be paying interest and profit upon interest and profit to the Interborough Company. This, it seems to me, is an unconscionable compounding of profit on profit.

I understand from the report read that it is proposed by the Committee that the offer of the Interborough Company will be modified so that only interest will be paid and not interest and profit upon the bonds issued to create this fund. That will change the situation only to this extent, that the City would then be paying compound interest on interest and profit.

PRESIDENT McANENY: That is to be accomplished through modication. It is already in the proposition, and is covered in the resolutions submitted to the Board. That is for short term notes and bonds, to cover these contingencies if they occur, the interest only on such notes shall be paid.

PRESIDENT MITCHEL: The offer as now offered by the Committee contemplates only compound interest.

PRESIDENT McANENY: Not the proposition of the Committee.

PRESIDENT MITCHEL: But it does not read so in the offer.

PRESIDENT McANENY: I have explained that; it does in the resolutions.

PRESIDENT MITCHEL: (3) The Company's alleged investment of $48,029,668 includes $11,000,000 for the construction cost of the present Brooklyn division south of City Hall. As everybody recollects, the Company was merely a constructing contractor in building that section, and bid $3,000,000 as the price of construction. The fact that it spent $11,000,000 in building the tunnel is no justification for a demand that the City now carry that investment for it. This arrangement will be tantamount to making the Brooklyn section cost the City $14,000,000 in place of $3,000,000, the price that it was supposed to cost. The Company is now asking the City to give up the advantages of that contract.

(4) On the Company's statement of its expectations of traffic, the cumulative deficit of the Company which must be discharged before the City gets a cent in the way of carrying charges and interest, will not be wiped out until the year 1924. The City's cumulative deficit for interest and carrying charges on its bonds will not be wiped out until the year 1929. It would not be until that year that the City would begin to get the 3¾ per cent. net profit, and it would not be until the year 1930 that the City and the Company would divide any surplus between them.

All of this is predicated upon the assumption that from 1924 on traffic will increase at the rate of 5½ per cent. a year, but, in point of fact, in the year 1924, in order to produce the gross income upon which these calculations have been based, the subway must be carrying 707,000,000, and in 1930 it would have to carry 974,600,000. The present subway, according to the figures of the Public Service Commission, is carrying 3,315,360 passengers per mile of single track per year. The present subway has 81 miles of single track. The proposed subway to be operated by the Interborough, old and new, would contain 212.8 miles of single track.

To produce the same congestion of traffic in the amalgamated subway which is now experienced in the present subway, it would have to carry only 705,508,608 passengers. In other words, in the year 1924, long before the City's cumulative deficit had been wiped out, and, in fact, while it still remained at $20,015,000, the new amalgamated subway system would have reached a point of congestion greater than that experienced in the present subway. The Public Service Commission estimates that the present subway will have reached a point of complete saturation beyond which it cannot expand, when it is carrying 25 per cent. more passengers than it is carrying at the present time. Assuming that the new amalgamated system be expanded by the same 25 per cent., this point of saturation would be reached in carrying 881,885,760 passengers. That is to say, the point of saturation would be reached in the year 1928, or one year before the cumulative deficit of the City had been wiped out. In other words, the new subways will have reached a condition of congestion far worse than the present crowding in the present subway before the City gets a cent of profit on its investment.

The first thing we have to consider is whether we want our new subway to be as crowded as is the present subway. If that question be answered in the negative, then we would not wish the traffic of the new subway to increase in volume over the year 1924 before building new subways to relieve it. If that question be answered in the negative, we certainly reach the conclusion that we would not wish the traffic of the new subway to expand to the point of 881,000,000, the number necessary to carry the net return calculated for the year 1928. In other words, to produce the results on which these calculations have been based and under which the cumulative deficit of the City upon its $50,000,000 expended in construction would be wiped out in the year 1929, the new subways would have to carry more passengers than they will be physically capable of carrying, and certainly far more passengers than they could be expected decently to carry.

(5) The Company's offer at page 4, under the title of "Extensions," reads:

"Extensions required by the City and not agreed to by the Company are to be equipped and operated as part of the entire plan upon the general line set forth in the offer of the Interborough Company of December 5, 1910, and May 9, 1911."

So we are not to have a real pooling of the entire system after all! The City is required by this offer to consent to a separate accounting basis for such future extensions and a separate method of determining revenue and operating expenses and also to guarantee the Company against loss in the operation of those extensions. The guaranty is illegal. We have, first, a guaranty against loss in the operation of these extensions and then a preferential payment of $11,250,000 on the rest of the system. In short, a guaranty piled upon a preferential payment.

It is pertinent to point out that all the Company would have to do in order to bring an extension under these terms of its offer would be to refuse to operate that extension.

To sum up, I am opposed to the present offer:

Because it guarantees to the Company 100 per cent. of its present net earnings throughout the term of the contract, which is more than the Company's present lease is reasonably worth today, in view of the competition which the Company would have to face provided that it did not obtain a franchise for any of the new subways;

Because it guarantees to the Company a compound interest—that is to say, interest on a fund created to make good interest and profit under the plan for preferential payment;

Because even that excessive net profit of the Company, assured under this plan, will be reckoned upon an inflated statement of the Company's investment in construction, due to the inclusion of $11,000,000 for the Brooklyn extension and other lesser items;

Because under the plan proposed it would require congestion greater than that in the present subway in order that the City might ever get a profit upon its share of the investment, and even then would not receive such profit until a remote period of time, 1934, if we assume a congestion only slightly greater than that in the present subway, and 1929, if we assume complete saturation, which would represent crowding 25 per cent. greater than exists today;

Because this offer requires a separate accounting basis and separate method of determining revenue and operating expenses, together with a separate guaranty by the City against loss in the case of all future extensions constructed by the City, but not accepted by the Company. The Company will be able to bring all future extensions within the operation of this guaranty by the simple expedient of refusing to operate them;

Because the City has the opportunity to get transit relief without making so improvident a contract, either by awarding an operating contract to the Brooklyn Rapid Transit Company or by proceeding with the construction of the modified Triborough system.

PRESIDENT McANENY: May I say, speaking of course to the point, that the proposition that is now submitted to the Board was framed essentially in pursuance of an agreement reached by a majority of this Board in executive conference, and, although I am more than willing to allow for changes of opinion, it must be kept in mind that the committee would not have submitted an alternative plan, dealing with these points in the Interborough Company's case, had it not proceeded upon the understanding that it was acting in accord with the wishes of the majority of the Board of Estimate; nor, do I believe, would the Interborough Company have submitted a further proposition except upon such an understanding. The company was prepared to present a second proposition wholly rejecting the offer of the City up to the time that these later negotiations commenced. Now, as to its merits—

COMPTROLLER PRENDERGAST: Mr. McAneny has just made a statement and I think he has only done himself and his associates upon the Conference Committee full justice in making it. It is true, and I wish to publicly acknowledge it, that, in the deliberations of the Board of Estimate, in its executive sessions, it was the feeling of a majority of the members of that Board expressed at that time that an arrangement somewhat in accordance with the lines of the proposal submitted yesterday would be satisfactory to that majority; but I do not wish (because I have never run away from an issue yet) to relinquish one iota of my responsibility for having led the committee to believe that a proposition such as this would be approved, and if any embarrassment which my action has caused the committee, if it has been placed in a position that it does not relish, I certainly am very sorry, not only because I do not want them to be placed in that position officially but because I have a very warm personal regard for the members of the committee and especially for Mr. McAneny.

PRESIDENT McANENY: I did not wish to intimate that the committee would not have agreed upon the merits of this plan, because they are agreed. I meant merely to say that they would not have presented such a plan, taking further time and occupying further discussion here, had it not been with the feeling, the understanding, in fact, that it was to meet the express view of the majority. I appreciate, of course, what Mr. Prendergast says, and let it stand so upon the record.

When we come to the merits of the case, let me say this, that the special committee of the Board, acting in conjunction with the Public Service Commission, has for some four or five months been at work upon this problem. I may say also that this has not been a usurpation of the functions of the Public Service Commission to any degree, but an acceptance of an invitation from the Commission that your committee should meet with it and talk these matters over with the object of avoiding the hitherto endless chain of reports, letters and public discussions and actually get together upon a solution of this tremendous problem upon which the future development of the city might be based. In a sense, it may be said that the plan presented here is the plan of both bodies, sitting side by side, and just as original to one as to the other. The Public Service Commission appreciated, of course, that without concurrent action, when it came to the approval of contract and the appropriation of money, it would itself be powerless. I regard Chairman Willcox's action in inviting this conference as a very great public service, and the conduct of the Public Service Commission to have been such as to merit the approval of the entire community. I believe, also, that when the joint report was submitted that for the first time a substantial agreement upon which contracts might be made had been arrived at.

The report proposes that certain lines be so constructed that they will incidentally extend the area of the present service of the Brooklyn company, with additions in Manhattan. I won't rehearse these, of course. That other lines be reserved as logical extensions and expansions for the Interborough system. This being concluded, the members of the two bodies having placed these two systems in conjunction, partly in competition, through the short haul through the heart of the city, with existing lines, and through their various branches but with the intention of extending a five cent fare to perhaps 98 or 99 per cent. of the traveling public; that is to say, the plan would take the passenger for a five cent fare to districts that are now absolutely inaccessible, and incidentally open Brooklyn to the heart of Manhattan as no other method possibly could.

Let it be said, also, that we did not present merely a proposition from the Interborough Company, or from the Brooklyn Rapid Transit Company, in our report. We presented a proposition that had been worked up in a conference between the two bodies having official authority and the two applicant companies, to which the companies originally had been strenuously opposed, and in the development of which concession after concession had been made; and we reached the point where we had finally brought both to what we considered bargain terms.

The Brooklyn Rapid Transit Company after certain modifications accepted the terms imposed by the city and it is prepared to proceed when the Public Service Commission can draw the contracts. There remains the signing of these formal contracts, the negotiations of subsidiary terms, but I have regarded and still regard the action of this Board as constituting a moral contract by which the Brooklyn plan should and must be consummated.

The Interborough Company notified us that they could not accept our terms and at the same time enlist private capital to the degree we proposed.

In laying out the Brooklyn plan, we virtually created, first, a new city subway along the lines in large part of the old Triborough route. We propose to build that with city money and to link that with existing lines of the Brooklyn system under contracts that would give access to those lines and would compel them to reserve for even distribution with the city all profits of joint operation over those they are earning today.

In the case of the Interborough Company, having provided for the strategic disposition of the moneys of the city between the two systems in the way we believe would do the greatest good, we allowed $55,000,000 to $60,000,000 of city money for construction against a like sum to be provided by the company; $21,000,000 to $25,000,000 for equipment by the Interborough alone in order that this comprehensive plan, reaching everywhere, might be carried out, and in order that the city in aiding itself would not be compelled to starve itself at every other point and be compelled to deny to every neighborhood advantages which such neighborhoods require and to every locality the benefits that should flow to such localities through school buildings, the development of territory generally and all those other expenses that must come within our Corporate Stock Budget. In order to secure this benefit we have agreed to certain modified terms in connection with the Interborough Company. The Interborough Company informed us at the conference the other day, in considering their case that they could not get private capital on the terms originally proposed. Their officers were invited in, not by us, but by common agreement, I forget just where. We went over with them these conditions, and a great deal of data, and were satisfied that in order to allow that margin of safety that they required that some altered plan should be adopted.

In the plan on June 5 we proposed that the Interborough should keep unto itself all earnings of its present lines whatever they might be, and they earned 17 per cent. last year, and they will be earning 23 in 1915. There will be some drop, of course, when the new lines are opened. But whatever was earned under the present system was to be theirs and a new and involved system of accounting was to be provided to take care of our share in the operation of the new lines. They argued that beyond the border line they could not figure out to the satisfaction of their bankers a sufficient margin of profit in the first three or four years of operation to bring the bankers in. Then we reached this plan by which nothing is reserved in the income of the old lines but all the income of the old lines and all the income of the new lines is merged in the new; the old leases virtually merged in the new leases.

For the moment, brushing aside the question of relative percentages, and just what that means, it seems to me that a phrase of the report just read sums up the whole situation, that the Interborough Company undertakes to operate a system comprehending more than double the mileage of the present line, for an assured income of $1,000,000 less than it is receiving today for its operation of the present contracted system, and that it cannot get one cent more than that allowance until the city has reached the point where it earns more than $2,000,000 above its carrying charges.

But I submit, gentlemen, that in this issue it is not directly a matter of dollars and cents. I believe, and my committee believes, and the Public Service Commission believes, that we have adequately cared for that, that no possible plan could be reached, acceptable to the two parties, that would better this. Beyond all that, however, the importance to the City of New York of a logical and comprehensive plan of transportation upon which not only will all the people be enabled to ride, and to ride with greater comfort and at less cost, but by reason of which the taxable values of the entire city will be developed enormously and by reason of which the city itself will develop along lines proper to the city to develop along—this I consider to be of paramount importance to The City of New York and to overweigh all other considerations and that is what will be the result of the comprehensive scheme we give you.

Why, Mr. Mitchel, every principle you have professed to favor and for which you have striven in this Board is recognized in this plan—every principle. Short term leases—the right of the city to take over anything after ten years upon satisfactory, equitable payment; the swapping of leases upon the east and west legs of the present Manhattan lines. The right of the city to transfer to a second operator—the substitution of the passenger basis for car mileage basis, in the operation of extensions, which sounds technical but means a great deal in computing operating expense. Every principle you have contended for is contained in the report of this committee. The only issue left is the question of dollars and cents, whether or not we are allowing the Interborough more than it is entitled to earn as a reward for the operation of this line. Upon that point alone, pitched against all other consideration for the natural development of this city, we are at issue here this morning; and upon that point alone it appears to be clear that the company is to make less than it is making today upon a system twice as great.

Mr. Mitchel has gone deeply into an analysis of what the company would do with the money that it would earn under this plan. I repeat, as I have previously said, that that is not the direct concern of the city. It may spend the money it earns for dividends, and if it does spend it for dividends it is entitled to spend it for dividends. It does not matter whether this proceeds through the indirection of a holding company or directly from the company to its stockholders. If they are entitled to it, they are entitled to it. And that is the whole question before this Board.

As to the basis of the plans that we propose, it is suggested that the amount of money we reserve out of the first income for the protection of the operator would create a profit of between 13 and 14 per cent. upon money invested. Gentlemen, it is not a fair proposition to apply all of that reservation to the present money of the operator. That reservation represents not only what he is earning today, but it represents his services in getting in new capital, it represents his services in handling this road for years to come, it represents, in short, a return upon actual investment, new and old, in the aggregate and a return for services rendered that in an ordinary business enterprise would be considered modest. And upon such terms the city is able to proceed with the building of the comprehensive system of subways we have proposed.

When it comes to the question of the ability of these lines to carry the citizens of this city in the future I stick confidently to the figures provided by the statisticians of the Public Service Commission. I do not understand Mr. Mitchel's 950,000,000 passengers. I am willing to take the 800,000,000 passengers which the Public Service Commission has estimated will be the carrying power of these roads and the requirement placed upon them.

You cannot say that that capacity will be the exact number reached by merely multiplying the present basis of mileage, because as the development of the roads continues and as the city's population develops there will be developed many new short haul districts, there will be many new short haul districts in The Bronx, in Queens, in Brooklyn, in Manhattan. The new short haul traffic cannot be based on a limited system, but that it will be enormous must be conceded. It is conceded that 800,000,000 is a fair allowance for comfortable traffic, as New York understands comfortable traffic, in the years of the future, so that we would not only take care of our own carrying charges and realize our own investment but, from the added margin, we would cover over into our treasury more than $2,000,000 a year and still leave a profit to be divided between the two parties.

Now, gentlemen, as I have said, the conferees, when they presented that report, proposed a programme they intended should be carried out and that they believed this Board of Estimate desired should be carried out in the way they had presented it, and they were obliged in the course of that procedure to carefully examine into the facts with relation to the questions presented by the Interborough Company. They have presented a report and subscribed to their own belief that this is not only eminently fair to the city as a business proposition but that its rejection at this time would be little short of calamitous. They are perfectly willing to stand on that report.

And I urge the adoption of the resolutions supporting it.

PRESIDENT MITCHEL: Mr. McAneny has said that every principle that I have contended for is satisfied by this plan proposed. There is one principal, I think, that he has overlooked which I understand we were all in favor of, and that is that the city should be assured at least of a moderate return upon its own investment. I cannot perceive that this city is assured of even that moderate return by the proposed plan.

I agree with Mr. McAneny that it makes not the slightest difference what the company does with the money, once it gets it, but in considering the reasons for the company's demand for a certain sum of money it is in point to know what are the company's necessities and what prompts the company to make a demand for more than what I consider, at least, to be a just allowance, and I wish to remind Mr. McAneny in this connection of one thing—I wish first to say that Mr. McAneny first stated that this 9 and 9 per cent. on old and new capital is necessary in order to permit the company to enlist new capital.

PRESIDENT McANENY: Not all of it.

PRESIDENT MITCHEL (continuing): Now, I wish to remind him that in the course of these conferences I asked the representatives of the company, believing as I do that the City is financially able to carry this on for itself if it so elects, whether, if the City invested all of the construction money necessary to build the subway and thereby reduced the contribution of the Interborough Company from $75,000,000 to $25,000,000, whether that company would then be satisfied to take 9 per cent. on its old capital and 9 per cent. on its new capital. I was informed, no; that in that event the company would find it necessary to demand more than 9 per cent. upon its old capital in order to bring the total amount up to $11,250,000, because that sum it must have, and must have it simply because it has got to meet the overhead obligations of the Interborough-Metropolitan Company.

Now, when we come to that point where one of the parties to the negotiations insists he must have a certain sum of money, whether adequate and fair or not, then I think we have come to a point where negotiation must end, because there is nothing more to negotiate when it is a demand which cannot be waived, and for that reason I think the statement that this so-called compromise was necessary to enlist private capital is not quite accurate, since even if we relieved the company of the necessity of subscribing private capital for construction it still must stand upon its demand for $11,250,000.

PRESIDENT McANENY: One further word, Mr. Mayor. The point I made was not that this advance was necessary in its entirety to enlist private capital, but partly to enlist private capital. The sum that would be reserved to the company would represent the value of its existing leases, or at least about three-quarters of the value of its existing leases, and incidentally would take care of that margin of safety upon new investment that private capital demands, and that the company demands as a reward for services. I repeat, that so long as conditions are as they are, many other considerations enter, than those mentioned by Mr. Mitchel.

PRESIDENT MILLER: Mr. Mayor, perhaps I look at this matter from a different point of view. The direct profit which the City gets from the subways out of the rentals is its smallest profit. To me it is of very little importance whether the City gets one-half of one per cent. more or whether the City gets less or whether the company does likewise. It is, in my mind, the duty of the City to build the best subways, to give the people the best transit. No plan for the whole City, in my judgment, will be adequate unless it includes the present Interborough system. Whether the City has to meet a deficit or whether it has not to meet a deficit, the subways are essential. If the proposition as submitted by the Interborough Railroad is one that should be accepted, the best course for the City would be to take it. The only question is one of price, so that from my point of view throughout this whole transaction the only question has been whether the City could afford to pay the price. I think that the proposition we advocate in the report is a fair one. I think the City will gain in increased benefits a thousand times more than it ever could hope to gain by any other plan or direct income from the leases. Therefore, I think that we should adopt the report as suggested.

The resolution was then lost by the following vote:

Affirmative—The Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx and Richmond—6.

Negative—The Mayor, the Comptroller, President of the Board of Aldermen and the President of the Borough of Queens—10.

The President of the Borough of Manhattan offered the following:

Whereas, The Special Committee of the Board of Estimate and Apportionment appointed to consider pending transit proposals and the Public Service Commission for the First District, made a joint report to this Board bearing date of June 5, 1911, and transmitted under date of June 13, 1911, with relation to the construction, equipment and operation of additional lines of rapid transit railway within the City of New York; and

Whereas, This Board at a meeting held on June 21, 1911, concurred unanimously in the findings and recommendations of said joint report, with certain modifications set forth in the resolutions adopted upon such date applying to the respective proposals of the Interborough Rapid Transit Company and the Brooklyn Rapid Transit Company; and

Whereas, The recommendations of the Special Committee of the Board and the Public Service Commission, which were approved by the Board, provided that if the Interborough Company failed to accept the terms and conditions prescribed for the operation of the new lines of rapid transit railway allotted to it, certain said lines to be added to the system to be operated by the Brooklyn Company upon the general terms prescribed for the operation of the lines originally allotted to the said Company; and

Whereas, The Brooklyn Company, in a communication to the Conferees dated July 5, 1911, expressed its willingness to operate the additional lines upon the terms proposed, if so requested by the City; and

Whereas, The Interborough Company has failed to accept the terms originally proposed to it, and the Board has rejected the propostion of the Conferees to amend the said terms upon a basis that the Interborough Company has stated would be acceptable to it; therefore, be it

Resolved, That, in pursuance of the joint recommendations of the Special Committee of the Board of Estimate and Apportionment and the Public Service Commission for the First District as subsequently amended, the Board will approve contracts to be prepared by Public Service Commission under the general provisions of the Rapid Transit Act for the construction, equipment and operation of rapid transit railways along the lines now proposed for operation by the Brooklyn Rapid Transit Company—either through instrumentality of such new railroad company as may be organized for the purpose, or through its present agencies—and for the extension and third tracking of the existing elevated lines of the Brooklyn Rapid Transit Company; and be it further

Resolved, That the Public Service Commission be and it hereby is respectfully requested to submit to this Board at the earliest date practicable the forms of the contracts to be entered into for the equipment, operation and maintenance of the lines of rapid transit railway proposed for operation as aforesaid; and be it further

Resolved, That the Public Service Commission be and it hereby is respectfully requested to submit at the earliest date or dates practicable, for the further approval of the Board, the contract or contracts to be entered into for such portions of the said lines as are to be constructed at the expense of the City, and to acquaint the Board so far as practicable in advance of such submission with the incidental plans, specifications and estimates for such construction, in order that the Board may properly allow the appropriation of City funds to be expended in accordance therewith; and be it further

Resolved, That the Special Committee of the Board, consisting of the President of the Borough of Manhattan, the President of the Borough of The Bronx and the President of the Borough of Richmond, be hereby continued for the purpose of conferring and co-operating with the Public Service Commission in the carrying out of these recommendations, and in the determination of such questions of detail as were left undetermined in the joint report of the Conferees, including the resolutions of this date.

The following discussion ensued:

PRESIDENT McANENY: As I have said, the adoption of the Committee's plan involved automatically the adoption of a definite line of procedure. It was laid down that if the Interborough Company failed to accept the offer of the City on the lines laid down in the Committee's report, that the Public Service Commission should then be placed in such a position that the proposition might go to the Brooklyn Rapid Transit or to its successor in operation. We have proposed what in our judgment is a proper plan for bringing in the Interborough Company upon terms fair to the City and to the Company alike, and that plan is rejected. I do not believe that this matter should be left in the air for one day longer. The conferees have worked long and hard to bring about the result that is now before you for your determination. I believe that inasmuch as a majority of the Board has rejected the pending plan, that the only course for the conferees is now to proceed to take up the alternative, whether or not it incidentally does injury to the City, to The Bronx, Queens, or the west side of Manhattan.

I move the adoption of that part of the resolution now before the Board that relates to the contracts to be granted to the Brooklyn Rapid Transit Company or, as I have said, its successor in the public bidding. It is the purpose of that Company to organize a new company to take over the lines that are under discussion. In so doing, I also move that we approve the offer of the Brooklyn Rapid Transit Company to operate these lines upon the basis the conferees have proposed. I so move.

COMPTROLLER PRENDERGAST: I second the motion.

PRESIDENT MITCHEL: This is what we voted that we would do in case the Interborough Rapid Transit Company did not meet the City's demands. We are now called upon to do it. I believe that we should do it for practically the same reasons that I believe we should not have done the other thing.

The routes which will be operated by this Company, under the contract proposed, will be to all intents and purposes the same trunk lines and extensions as the Triborough route which I for one have always believed in, modified by the Broadway loop.

The outlined system will be practically the same. It means digging subways; it means action; it means the settlement of this difficulty. It differs in every essential from the proposition that we have just rejected. In distinction from the preferential of $11,250,000, a preferential is allowed here of only $3,500,000, and that upon an investment in the Company's own plant, built with its own money upon its own initiative, and not upon a plant built with City money and upon the City's initiative. That preferential represents about 8¾ per cent. upon the old capital stock of the old Brooklyn Company and 6 per cent. on the new, as against 9 per cent. on the old capital stock and 9 per cent. on the new capital stock of the Interborough. For these reasons I think that these resolutions offered by the Committee should be adopted.

PRESIDENT MILLER: I voted for the plan to give the Brooklyn Rapid Transit the entire contract on the theory that we would do it if we could not get a reasonable contract from the Interborough Rapid Transit Company. I think we have a reasonable proposal from the Interborough Rapid Transit Company and, therefore, I am opposed to this proposition.

THE MAYOR: May I inquire with what corporation this contract is to be made?

PRESIDENT McANENY: The lines now under operation by the Brooklyn Rapid Transit Railway Company are owned by the Brooklyn Union Elevated Railroad Company. Some of them are leased from the Canarsie Company, which would be merged with the other under that corporate control. The new lines would be advertised at public letting under terms which would permit the City, if the authorities so decide, to link them with the old lines.

There would be three separate contracts at least, possibly four. One for operation of the Broadway, Manhattan, and Fourth Avenue, Brooklyn, system with their extensions; one for the proposed line from Union square to the Eastern District of Brooklyn, each of these two to be wholly separable and recapturable; and one for the operation of the existing Brooklyn elevated lines with the Centre street loop as their connecting link.

The contracts will be so drawn, if this plan is to be carried out——

THE MAYOR: Contracts with whom?

PRESIDENT McANENY: Contracts with the successful bidder; contracts as advertised. They will be so drawn that they will link these systems.

There are, of course, items of legal procedure, items that belong to the requirements of the Rapid Transit Act, that remain to be worked out.

The conferees who proposed this plan have no doubt of the legal ability of the City to enter into it and no doubt whatever of its economic desirability; nor have they any doubt of the fitness of the present plant of the Brooklyn Rapid Transit Company, nor any doubt of the financial ability of the Brooklyn Company to carry out what it undertakes. I trust this resolution will be adopted and that the City will proceed with actual construction as fast as it can.

THE MAYOR: The so-called offer of the Brooklyn Rapid Transit Company says that the contract is to be made with some corporation hereafter to be formed. I cannot vote to make a contract with any corporation that does not exist and may never exist, and when it does exist, may be some stock jobbing corporation that we would not have anything to do with whatever. This is a very grave matter. In my judgment, we will get into a lawsuit that may tie up this matter for a year or two or three years, and I suggest that this matter lie over until we can think it over. Until we can think it over for twenty-four hours or even for a few days. I did not know that any such resolution as this was going to be offered.

PRESIDENT McANENY: It was proposed in a report some weeks ago.

THE MAYOR: I have very often expressed my views to the Board, and while I always am willing to submit my judgment to better judgments, I give it to you as my opinion that such a resolution, if now passed, would lead to nothing but a lawsuit. The form also of the substance that you want to put into that contract would lead to another lawsuit under the Constitution of this State. I do most sincerely hope that we avoid a lawsuit that will tie us up for two or three years. I think we may well take two or three days to consider this matter. I hope we will do so today—at least without taking action one way or another at this time.

PRESIDENT McANENY: May I say one word in regard to your suggestion. In the first place, as to your query as to how we can make a contract with a company not named. We are not proposing to make a contract but to co-operate with the Public Service Commission in enabling that Commission to prepare the forms of contracts for public advertisement, along such lines as we permit. A company, to do this work, must bid for it successfully, and it must be assumed that that company, whether now in existence or hereafter, organized, will be organized under circumstances that will vouch for its reliability. If it is not a proper company, it will not make a contract with The City of New York.

Also, that if there be danger of a lawsuit based on any terms now proposed, that that lawsuit could not possibly restrain the City from building its own lines so to be built by City money.

PRESIDENT MITCHEL: By separate contracts for construction.

PRESIDENT McANENY: There are to be three separate operating contracts. The lines that are to be built by the City may proceed at any moment and might have been commenced a year ago if we had seen our way clear at that time. By the time that those lines are completed and ready for operation in conjunction with the Brooklyn system, any questions of law, in my judgment, may readily be threshed out in the courts, upon agreed cases, and I have no doubt that the courts will gladly co-operate with the City in hurrying those cases, as they will readily recognize that they are matters of great public emergency.

I wish we could meet your Honor's suggestion for further delay, even if for a few days, but it seems to me this is the moment to act. In view of the long delay that has already been occasioned, by reason of the numerous conferences necessary to bring about this plan, I feel that, even if I violate courtesy to you, that it is my duty to move the adoption of this resolution.

PRESIDENT MILLER: I voted for the Brooklyn Rapid Transit proposition to come up to 59th street because I thought it proper. I still stand by that. The main reason I advocated the Interborough plan was because I thought it had the best present physical layout and it cannot be exceeded in efficiency by any other plan. It should be taken not for the benefit of the Company but for the benefit of the City.

THE MAYOR: We will regret it very much, and I predict now that it is a very easy prediction to make, that it will come absolutely to naught. I wanted to say that my understanding is—of course, I have not given as much attention to this, for many reasons, as the Committee has given it—but my understanding is that no investor will invest one dollar in any bonds issued by this company or any company until the question of this guaranty is passed upon by the highest court in this State, and at the same time, I am advised further, that bankers would hesitate to buy City bonds issued for that purpose until the question has been passed upon by the highest courts in this State.

I therefore say, let us get our bearings, now that the matter has assumed a new aspect, before we do anything else. That has been my attitude from the beginning, and though I well know that my judgment may be inferior to that of other members of the Board who know more about it than I do, I still adhere to my opinion that the matter should not be passed upon at the present moment.

PRESIDENT McANENY: I feel bound, Mr. Mayor, to press my motion for the adoption of this resolution.

THE MAYOR: Of course, I have delicacy about voting on that question at all. It seems to be overlooked that these routes which are made up for the Brooklyn Rapid Transit Railway Company can never be established until approved by the Mayor, acting independently. The City has seen fit to place that safeguard over such matters as that. It is a power which I do not seek to exercise, and I would be very glad if I did not have it to exercise. Nevertheless, if that be put up to me I will exercise it as Mayor according to my best judgment for the whole City. I therefore ask that this thing stand until we confer together and with wise men of the City and with our neighbors; until we see just what we are about to do. That is all now that I wish to say on the subject.

COMPTROLLER PRENDERGAST: I think the members of the Board are prepared to assume their responsibility for whatever action they may take this morning. I wish to say that I am. I assume, Mr. Mayor, that when the time for your responsibility to be exercised comes that you will be prepared to exercise it. It is simply a question of each man standing up to his own responsibility when the time comes and assuming it. I hope the resolution will now be put to the Board so that we will have a chance to vote on it.

Mr. Charles L. Craig, representing the West End Association, addressed the Board in opposition to the proposed resolution. The resolution was then lost by the following vote:

Affirmative—The Comptroller, President of the Board of Aldermen, and the Presidents of the Boroughs of Manhattan, Brooklyn and Richmond—11.

Negative—The Mayor and the Presidents of the Boroughs of The Bronx and Queens—5.

(Note—Under section 226 of the Greater New York Charter no resolution or amendment of any resolution shall be passed at the same meeting at which it is originally presented unless twelve votes shall be cast for its adoption.)

—

The President of the Borough of Manhattan moved that when the Board adjourns it adjourn to meet Friday, July 21, 1911, at 10.30 o'clock a. m., and the resolution which had just failed of adoption be ordered on the calendar for said date.

Which motion was adopted by the following vote:

Affirmative, The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following matter not on the calendar for this day was considered by unanimous consent:

Rapid Transit Railway, 59th Street, Queensboro Bridge Route.

The Secretary presented the following:

To the Board of Estimate and Apportionment of The City of New York:

The Public Service Commission for the First District herewith transmits to you for your approval and the approval of the Mayor of the City as required by law certified copies of resolutions adopted by it on the 14th day of July, 1911, determining and establishing a route and general plan of construction for an additional rapid transit railroad to be known as the 59th Street, Queensboro Bridge Route, or Route No. 36.

This route is among those recommeneded for construction in the report dated June 5, 1911, of the Select Committee of the Board of Estimate and Apportionment and of the members of the Commission, which report was later approved by the Board of Estimate and Apportionment.

The route now adopted will connect the line under Broadway, 7th avenue and other streets in Manhattan by means of the Queensboro Bridge with the Borough of Queens, and besides meeting the all-important need of putting Queens on an all-rail connection with Manhattan will furnish needed crosstown facilities for the district in and around 59th street.

Dated July 17, 1911.

[SEAL]

PUBLIC SERVICE COMMISSION FOR THE FIRST DISTRICT,
By W. R. WILLCOX, Chairman.

Attest: TRAVIS H. WHITNEY, Secretary.

The following was offered:

Resolved, That the communication be received, and in pursuance of law this Board hereby appoints Thursday, the 27th day of July, 1911, at 10.30 o'clock in the forenoon as the time and Room 16, City Hall, Borough of Manhattan, as the place when and where such plans and conclusions will be considered; and be it further

Resolved, That the Secretary be and he hereby is directed to cause notice of such consideration to be published in the CITY RECORD.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

FINANCIAL MATTERS.

The Secretary presented a resolution of the Board of Aldermen requesting an issue of $600 special revenue bonds (subdivision 8, section 188 of the Charter) to provide for the salary of an Automobile Engineman for the remainder of the year 1911, Office of the Chief of the Bureau of Licenses, Mayor's Office;

And communications as follows:

From the Commissioner of Water Supply, Gas and Electricity, requesting that the additional sum of $8,500 be appropriated from the water revenues of Brooklyn to provide for the equipment of new quarters for the Water Register's force:

From the Commissioner of Parks, Borough of The Bronx, withdrawing his request, presented to the Board at the meeting of June 29, 1911, and referred to the Comptroller for authority to award the contract for furnishing labor and materials for reconstructing and resurfacing the Bronx and Pelham parkway, from the Southern boulevard to the Butler street road, to other than the lowest bidder.

Which were referred to the Comptroller.

The Secretary presented a communication from the Acting President of the Borough of Queens, transmitting report of the Engineer in charge of Highways containing a list of streets, which it is requested that the Board adopt as City Highways to be repaved and maintained as such until officially mapped, physically opened and a complete paving authorized as an assessment matter, and submitting for adoption resolutions in each case authorizing the Borough President to charge the cost of repaving to the corporate stock account for repaving streets in the Borough of Queens.

Which was referred to the Chief Engineer of the Board and the Consulting Engineers of the various Boroughs.

The Secretary presented communications (3) relative to additional rapid transit railways, as follows:

From John Claflin, of New York, advocating the acceptance by The City of New York of the offer of the Interborough Rapid Transit Company;

From Henry S. Wood relative to his application for the construction of new subways, etc.;

From the Brooklyn League and Brooklyn Transit Conference, urging the adoption of the 'McAneny report," etc.

Which were referred to the Committee of the Whole.

The Secretary presented the following communication from the Comptroller submitting resolution requesting the Board of Aldermen to adopt a resolution requesting the Board of Estimate to authorize the issue of special revenue bonds to the amount of $14,972.25 for the purpose of expediting the work of repairing and resurfacing Thompson avenue and Hoffman boulevard, from Queens Bridge to Hillside avenue, in the Borough of Queens:

City of New York, Department of Finance, Comptroller's Office, July 20, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—For several months there has been an increasing clamor of protest from all parts of the City and from outlying sections regarding the bad condition of the thoroughfare in the Borough of Queens, known as Hoffman boulevard, which appears on the City maps as 'Thompson avenue and the Hoffman boulevard." This street runs from the Queensboro Bridge Plaza directly through the center of the Borough of Queens to Hillside avenue and Jamaica avenue, forming with these streets the central and principal avenue of street communication between the Borough of Manhattan and the outlying section of the Borough of Queens and Central Long Island. It is the only direct route for automobiles and vehicles of all sorts from the Borough of Manhattan to Long Island.

Its present condition is such as to make it almost impassable to automobiles, and extremely difficult of transit for other vehicles. So dangerous has its condition become during the past few months, that the Automobile Club of America has found it necessary to issue a special bulletin warning automobilists to avoid it, even at the extreme inconvenience of finding access from Manhattan Island to the main thoroughfares of Long Island by the devious routes through the Borough of Brooklyn.

The Long Island Real Estate Exchange, representing many of the principal property owners in Queens and suburban Long Island, as well as other organizations with similar interests, have made the intolerable condition of this avenue a subject for special meetings, have adopted resolutions calling upon the Borough and City authorities to remedy the evil, and are constantly appealing in every possible way for relief.

The Borough President of the Borough of Queens and the Commissioner of Public Works assert that they are now doing everything in their power within the limits of their appropriation to repair the street. Their reports show that they have now at work on Thompson avenue and Hoffman boulevard a force of 48 men. In the past six weeks, since they began the repair and resurfacing of this avenue, they have renovated nearly two miles from the Queensboro Bridge Plaza. At the present rate of progress they will be unable to complete the entire length of about eight and one-half miles from the Bridge Plaza to Jamaica avenue before the middle of November or the first of December.

It is clear that the loss to The City of New York in depreciation of real estate values, both in the Borough of Queens and suburban Long Island, and the wear and tear on automobiles and other vehicles which find it necessary to pass over this road, is very great. In my opinion it is the plain duty of the City to come to the relief of the Borough authorities of Queens in their effort to put the road in proper condition.

After consulting with the Borough President and the Commissioner of Public Works, in the Borough of Queens, I am of the opinion that the present force employed on this work should be augmented by three additional gangs of laborers, and that these additional gangs should work at separate points along Thompson avenue and Hoffman boulevard. The Commissioner of Public Works states that a gang consisting of 25 laborers, 1 foreman and 1 assistant foreman, together with teams, carts, utensils and materials, is the best working unit for this character of work. He estimates that such a gang or working unit should be able to complete at least one mile of resurfacing in a working month of twenty-eight days.

After careful examination of the estimates of the Commissioner of Public Works, I believe that the repair of the entire avenue can be completed in the manner which I have outlined within a period of thirty-nine working days.

In view of the urgent necessity of completing this work of repair as soon as possible, and in view of the character of Thompson avenue and Hoffman boulevard as the principal avenue of vehicular traffic between the Island of Manhattan and Central Long Island, I believe that it is just and reasonable that the City at large should bear the burden of the extra expense involved in repairing this avenue within the time mentioned, which is estimated at $14,972.25.

I, therefore, offer the following resolution for adoption. Respectfully,

WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby requests the Board of Aldermen at its next regular meeting to adopt the following resolution:

Resolved, That, in pursuance of the provisions of subdivision 8 of section 188 of the Greater New York Charter, the Board of Estimate and Apportionment be and it is hereby requested to authorize the Comptroller to issue special revenue bonds to an amount not to exceed fourteen thousand nine hundred and seventy-two dollars and twenty-five cents ($14,972.25), the proceeds whereof to be used by the Borough President of Queens, under the appended schedules of Time, Material and Labor, for the purpose of expediting and completing the work of repairing and resurfacing the streets in the Borough of Queens known as Thompson avenue and Hoffman boulevard, from the Queensboro Bridge plaza to Jamaica avenue.

Schedules.

Time—	
39 working days.	
Materials—	
6 tar kettles, at $225 each	$1,350 00
3 steam rollers (rental), at $10 per day	1,170 00
1,200 cubic yards broken stone, at $2.65 per cubic yard	3,180 00
Labor—	
3 Foremen, at $4 per day	468 00
3 Assistant Foremen, at $3.25 per day	380 25
75 Laborers, at $2.50 per day	7,312 50
3 teams, at $6 per day	702 00
3 horses and carts, at $3.50 per day	409 50
	$14,972 25

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from Mr. Daniel F. Kiely offering to sell to the City the plants and franchise of the South Shore Water Works Company of Staten Island, together with a report of the Comptroller and the Chief Engineer of the Board, two of the Committee to whom this matter was referred April 27, 1911, stating that this Company has a small plant on the easterly side of Staten Island with a daily estimated supply of 100,000 gallons. The Commissioner of Water Supply, Gas and Electricity has stated, in response to an inquiry, that the City does not need this plant. Two members of the Committee, namely, the Comptroller and the Chief Engineer of the Board, are on this date submitting a general report on the subject of the appraisal of private water companies, and have pointed out that the most advantageous policy for the City to follow will be to abandon, at least temporarily, the sources of ground water supply upon the introduction of the Catskill supply. That it is believed to be unwise for the City to purchase the South Shore Company, except possibly to take over a portion of its distribution system, consisting of 6-inch pipe, the value of which has been estimated at $4,284:

(On April 27, 1911, the communication of Daniel F. Kiely as above, was referred to a Committee, consisting of the Comptroller, the President of the Borough of Richmond and the Chief Engineer of the Board.)

(On July 6 and again on July 13, 1911, the above matter was laid over for one week.)

Daniel F. Kiely, Counsellor-at-Law, 220 Broadway, St. Paul Building, New York, April 18, 1911.

Board of Estimate and Apportionment, City of New York:

Gentlemen—On behalf of the parties in interest, I beg to offer for sale to The City of New York, if it, or your Board on its behalf, is desirous of acquiring same by private purchase at a moderate price, the franchise, pumping plant, wells, standpipe, mains and complete distributing system and good will of the South Shore Water Works Company of Staten Island; this offer to include such real estate as is now used by said Company in conducting its business.

As this Company is the only private water company left on Staten Island, whose plant, etc., has not been acquired by The City of New York, and as it appears that the ultimate plans of the Department of Water Supply are intended to cover all Staten Island the Directors of this Company do not feel justified in making further expensive extensions of its service to new consumers, or to put additional capital into a business that will necessarily have to come into competition with a municipal plant in the near future. The municipal distributing system has already been brought into this Company's territory at Richmond and elsewhere.

Certainly the City can in consummation of its plan avail itself of such a plant as this Company's and just as certainly it can acquire it by purchase more cheaply than it can build its own. Respectfully yours, DANIEL F. KIELY.

Board of Estimate and Apportionment, City of New York, June 28, 1911.

To the Honorable, the Board of Estimate and Apportionment:

Gentlemen—At the meeting of the Board of Estimate and Apportionment held on April 27, 1911, a communication was presented from Mr. Daniel F. Kiely, offering on behalf of the parties in interest to sell to the City "by private purchase, at a moderate price, the franchise, pumping plant, wells, standpipe, mains and complete distribution system and good will of the South Shore Water Works Company of Staten Island, this offer to include such real estate as is now used by said Company in conducting its business," which communication was referred to the Comptroller, the President of the Borough of Richmond, and the Chief Engineer of the Board.

The South Shore Water Works Company is a small plant on the easterly side of Staten Island, and the daily amount of water supplied by it is estimated to be about 100,000 gallons. In 1906 a Commission appointed by the Board of Estimate and Apportionment to investigate and report upon the value of the plants of the existing water works on Staten Island included in its report a description and inventory of the South Shore Water Company. From this report it appears that a franchise was granted to this Company by the town of Southfield on July 5, 1889; that the plant of the Company consisted of a standpipe 20 feet by 60 feet, about 14,850 feet of pipe, of which 8,550 feet was 4 inches or less in diameter; 18 hydrants, 16 gates and 4 meters, in addition to its wells and pumping plant. The value of its distribution system, including land at New Dorp, was given as $12,672, while the wells and pumping plant were estimated to have a value of $6,710. In describing the plant the Commission stated that it was "so small that it would not pay to operate it in connection with a general supply for the island." We have asked the Commissioner of Water Supply whether the Company has made any additions to its plant since the time of this report, and asked for an expression of his views as to the desirability of its purchase by the City, and he has stated in response to this inquiry that "the City does not need this Company's plant. New sources of supply are being developed by the Department in the Borough of Richmond, and at the present time there is an ample supply of water available in that Borough."

Two members of this Committee, namely, the Comptroller and the Chief Engineer of the Board, are submitting a report upon the general question of the appraisal of the value of the private water companies now doing business in the City, with a view to their possible purchase, and have pointed out that the most advantageous policy for the City to follow will be to abandon, at least temporarily, the sources of ground water supplies upon the introduction of the Catskill water in order to find a market for its new gravity supply. We believe that it would be unwise for the City to purchase the South Shore Water Company, except possibly to take over a portion of its distribution system, consisting of 6-inch pipe, the value of which is given in the report of 1906, made by the Commission already referred to, as $4,284.

Respectfully,

WM. A. PRENDERGAST, Comptroller; NELSON P. LEWIS, Chief Engineer; Board of Estimate and Apportionment.

The report of the Committee was approved by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented reports as follows:

Report of the Comptroller and the Chief Engineer of the Board, to whom were referred on June 15, 1911, specifications submitted by the Commissioner of Water Supply, Gas and Electricity for flaming arc lamps to be installed where deemed advisable in public buildings of the City.

(On July 6 and again on July 13, 1911, the above matter was laid over for one week.)

Report of the Comptroller and the Chief Engineer of the Board, to whom were referred on October 21, 1910, a communication from the Commissioner of Water Supply, Gas and Electricity relative to the acquisition of private water companies, in which he recommended that a special appropriation be made to conduct an investigation to determine the value of these private companies, etc.

(On July 6 and again on July 13, 1911 the above matter was laid over for one week.)

Which were laid over one week.

The Secretary presented the following communication from the Captain, 2d Battery, 1st Battalion, F. A., N. G., N. Y., requesting, and report of the Comptroller recommending, that the Board approve of the expenditure of $1,284 for the purpose of paying the compensation, at the rate of $3 per diem, of two Hostlers employed in the 2d Battery Armory, from June 1 to December 31, 1911, and that payment of same be made by the Comptroller from the proceeds of special revenue bonds issued pursuant to subdivision 7, section 188 of the Charter; also recommending approval of a schedule for said fund:

(On June 29, 1911, the request of the Captain, 2d Battery, First Battalion, F. A., N. G., N. Y., for the above appropriation was referred to the Comptroller.)

Second Battery, First Battalion, F. A., N. G., N. Y., Franklin Avenue and 166th Street, Bronx, New York, June 20, 1911.

Secretary, Board of Estimate and Apportionment, City of New York:

Sir—I have the honor to report that pursuant to par. 188-189, Military Laws, S. N. Y., I have appointed as hostlers (original) for the care of twenty (20) horses, the property of and for the use of the battery for military purposes, the following at a salary of three dollars ($3) per day each, from June 1, 1911.

Louis Meyer, of 406 East 176th street, New York.

Arthur F. Hirt, of 1053 Forrest avenue, New York.

The certificate from the Major-General Commanding Division N. G., N. Y., is on file in the office of the Comptroller, City of New York.

Will you kindly have the necessary funds provided to meet the expenses for the current year. Very respectfully, L. F. SHERRY, Captain.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 13, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 20, 1911, the Commanding Officer of the Second Battery, First Battalion, F. A., N. G., N. Y., requested the necessary funds to provide for the payment of two Hostlers appointed on June 1, 1911. In connection therewith I report as follows:

In June, 1911, the Major-General, Commanding Division N. G., N. Y., filed a certificate in the Department of Finance that there were twenty horses stabled in the Armory of the Second Battery. Under section 188 of the Military Law an armory is allowed one Hostler for the care of each ten horses stabled therein. The Second Battery is, therefore, entitled to two Hostlers. The law fixes the rate of compensation for Hostlers at $3 per diem.

It will require $1,284 for the payment of the incumbents from June 1, 1911, to the end of the year.

I recommend the adoption of the attached resolution approving of Special Revenue Bonds in the necessary amount, and a schedule for the fund.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the expenditure of a sum not to exceed one thousand two hundred and eighty-four dollars ($1,284) for the purpose of paying the compensation, at the rate of $3 per diem, of two Hostlers employed in the Second Battery Armory, from June 1, 1911, to December 31, 1911, and recommends that payment of the same be made by the Comptroller out of the sale of special revenue bonds of the City of New York, issued pursuant to the provisions of subdivision 7 of section 188 of the Greater New York Charter.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen, and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedule of wages paid from other than budget funds in the National Guard and Naval Militia, County of New York, to take effect June 1, 1911, as follows:

The National Guard and Naval Militia, County of New York.

Wages, Regular Employees—

Revenue Bond Force, Second Battery:

Hostlers (365 days), 2 at, per day....................................	$3 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen, and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented a report of the Commissioner of Parks, Borough of The Bronx, relative to a communication from the residents of Riverdale on the Hudson with regard to the conditions of the swamp areas in Van Cortlandt Park, and stating that an application for an issue of $6,000 to remedy said conditions was made in the corporate stock estimate for the year 1911, and as soon as funds are available the Department will proceed to improve the swamp lands.

Which was ordered filed and the Secretary directed to transmit a copy thereof to the Riverdale Health League.

(On July 13, 1911, the above communication was referred to the Commissioner of Parks, Borough of The Bronx.)

The Secretary presented the following communication from the Department of Water Supply, Gas and Electricity requesting, and report of the Comptroller recommending, the modification of Salary Schedule No. 621, supporting the appropriation made in the Budget for the year 1911, for said Department, providing for the substitution of a Clerk, at $1,050 per annum, for one at $1,200 per annum, to be effective as of May 1, 1911:

Department of Water Supply, Gas and Electricity, Commissioner's Office, 13-21 Park Row, City of New York, July 10, 1911.

Hon. William A. Prendergast, *Comptroller:*

Dear Sir—A Clerk, whose salary is $1,050, was transferred in the month of May from the Borough of Manhattan to the Borough of Richmond, Bureau of Water Register. His salary has not been paid for the reason that the schedule line for $1,050 Clerks had its full quota. The vacancy existing in that schedule is for $1,200, and I request that you recommend to the Board of Estimate and Apportionment a modification of the salary schedule for the appropriation entitled, "Water Supply, Borough of Richmond, Distribution, Water Registration, Permits and Revenue Collections, Salaries" (Code 621 of 1911), in order that this Clerk may be paid. A copy of the schedule so modified is attached. Yours truly,

HENRY S. THOMPSON, Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 17, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On July 10, 1911, the Commissioner of Water Supply, Gas and Electricity requested modification of the 1911 salary schedule entitled "Water Supply, Borough of Richmond, Distribution, Water Registration, Permits and Revenue Collections, No. 621, Salaries." In connection therewith I report as follows:

It is proposed to add a Clerk at $1,050 per annum, and drop one at $1,200, the balance of $150 to be scheduled as unassigned.

The Commissioner states that a Clerk at the $1,050 rate was transferred in May from the Bureau of Water Registration, Manhattan, to the Bureau of Water Registration, Richmond, and that modification as of May 1, 1911, is necessary for payment of the incumbent.

The following table shows the line item changes in detail:

Account No.	Schedule Line.	Schedule Transfer. Decrease.	Schedule Transfer. Increase.	Cash Transfer. Decrease.	Cash Transfer. Increase.
621.	Clerk	$1,200 00	....	$600 00	....
	Clerk	....	$1,050 00	....	$525 00
	Unassigned balance	....	150 00	....	75 00
		$1,200 00	$1,200 00	$600 00	$600 00

I recommend the adoption of the attached resolution granting the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedule, as revised, for the Department of Water Supply, Gas and Electricity for the year 1911, to be effective as of May 1, 1911, as follows:

Department of Water Supply, Gas and Electricity.

Distribution, Water Registration, Permits and Revenue Collections, Borough of Richmond—

621. Salaries:

Cashier	$1,500 00
Clerk	1,650 00
Clerks, 2 at $1,500	3,000 00
Clerks, 10 at $1,050	10,500 00
Stenographer and Typewriter	1,050 00
Bookkeeper	1,350 00
Chief Inspector	1,500 00
Inspectors, 2 at $1,200	2,400 00
Inspectors, 12 at $1,100	13,200 00
Unassigned balance	150 00
	$36,300 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen, and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

—

The Secretary presented the following communication from the Department of Water Supply, Gas and Electricity requesting, and report of the Comptroller, recommending the modification of Salary Schedule No. 584, supporting the appropriation made in the Budget for the year 1911, for said Department, providing for the appointment of two Clerks, one at $1,050 and one at $300 per annum, and the elimination of a Clerk at $1,350 per annum, to be effective as of July 1, 1911:

Department of Water Supply, Gas and Electricity, Commissioner's Office, 13-21 Park Row, City of New York, July 7, 1911.

Hon. William A. Prendergast, *Comptroller:*

Dear Sir—I wish to fill a vacancy at $1,350, in the Borough of Queens, by the appointment of one Clerk at $1,050 and one at $300. To do so a modification of the present schedule is necessary.

I enclose a copy of the schedule so amended, and request that you recommend its approval by the Board of Estimate and Apportionment. Yours truly,

HENRY S. THOMPSON, Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 17, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—In reference to a request of the Commissioner of Water Supply, Gas and Electricity on July 7, 1911, Salary Schedule, Water Supply, Borough of Queens. Distribution, Water Registration, Permits and Revenue Collections, No. 584, Salaries, Regular Employees, I report as follows:

It is proposed to appoint a Clerk at $1,050 and one at $300 per annum, the funds to be provided by dropping a Clerk at $1,350 per annum.

The following table shows the line item changes in detail:

Account No.	Schedule Line.	Schedule Transfer. Decrease.	Schedule Transfer. Increase.	Cash Transfer. Decrease.	Cash Transfer. Increase.
584.	Clerk	$1,350 00	......	$675 00	......
	Clerk	......	$1,050 00	......	$525 00
	Clerk	......	300 00	......	150 00
		$1,350 00	$1,350 00	$675 00	$675 00

I recommend the adoption of the attached resolution granting the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedule, as revised, for the Department of Water Supply, Gas and Electricity for the year 1911, to be effective as of July 1, 1911, as follows:

Department of Water Supply, Gas and Electricity.

Water Supply, Borough of Queens, Distribution, Water Registration, Permits and Revenue Collection—

584. Salaries, Regular Employees:

Cashier	$1,500 00
Financial Clerk	1,500 00
Clerk	1,650 00
Clerk	1,500 00
Clerk	1,350 00
Clerk	1,050 00
Clerks, 4 at $900	3,600 00
Clerk	300 00
Stenographer and Typewriter	900 00
Inspectors, 12 at $1,100	13,200 00
Foreman	900 00
	$27,450 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen, and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Department of Water Supply, Gas and Electricity requesting, and report of the Comptroller, relative to the modification of Salary Schedules Nos. 627, 630, 631, 646, 654, 668, 686 and 692 supporting the appropriation made in the Budget for the year 1911, for said Department, providing for an increase of $150 per annum each in the salaries of nine incumbents, involving a transfer of $525, said modification to be effective as of July 1, 1911:

Department of Water Supply, Gas and Electricity, Commissioner's Office, 13-21 Park row, City of New York, July 7, 1911.

The Honorable, the Board of Estimate and Apportionment, 277 Broadway, City of New York:

Gentlemen—In order to meet the requirements of this Department, I would respectfully request a further revision and modification of the schedules of Salaries and Wages supporting the appropriations made for this Department for the year 1911, as follows:

—the lines which read:

Inspectors, 4 at $1,350	$5,400 00
Inspectors, 4 at $1,200	4,800 00
Clerk	750 00

—to read:

Inspectors, 5 at $1,350	$6,750 00
Inspectors, 3 at $1,200	3,600 00
Clerk	900 00

Heat, Light and Power, Borough of Richmond, Bureau of Lamps and Lighting, Administration—

692. Salaries, 1911:

—the lines which read:

Clerk	$1,050 00
Unassigned	510 00

—to read:

Clerk	$1,200 00
Unassigned	60 00

If the requested modifications receive the approval of your honorable Board, it will necessitate transfers to and from the above noted appropriation accounts, dating as of July 1, 1911, pro rated for the succeeding six months, as follows:

From

Code No.	
630	$30 00
632	180 00
646	101 00
668	64 00
692	150 00
	$525 00

To

Code No.	
627	$225 00
631	75 00
654	75 00
686	150 00
	$525 00

Very truly yours,

J. W. F. BENNETT, Deputy and Acting Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 17, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On July 7 and July 12, 1911, the Commissioner of Water Supply, Gas and Electricity requested modification of eight salary schedules in his Department for the year 1911, involving cash transfers aggregating $525. In connection therewith I report as follows:

It is proposed to increase nine incumbents $150 per annum each. The $1,350 necessary for the increases is available in the unassigned balances in four of the accounts.

The proposed increases are for the following employees:

William T. Blackwell, from $1,500 to $1,650 per annum. Mr. Blackwell is an Inspector in Bureau of Lamps and Lighting, Manhattan. He was appointed on October 26, 1906, at $1,200; and promoted on July 1, 1908, to the present rate.

Frank R. Nugent, from $1,200 to $1,350 per annum. He was appointed as an Inspector, Division of Public Buildings, Manhattan, on October 30, 1908, at the present rate.

William S. Keenan, from $1,350 to $1,500 per annum. He was appointed as an Inspector, Division of Street Lighting, Manhattan, on October 26, 1906, at $1,200, and promoted on July 1, 1908, to the present rate.

John F. Bergen, from $1,200 to $1,350 per annum. He was appointed as an Inspector, Division of Construction and Maintenance, Manhattan, on January 17, 1910, at the present rate.

John J. McHugh, from $900 to $1,050 per annum. He was appointed as a Clerk in the Auditing Division, Manhattan, on July 25, 1910, at the present rate.

Joseph T. Brennan, from $750 to $900 per annum. He was appointed as a Clerk in the Bureau of Electrical Inspection, Queens, on December 31, 1909, at $600, and promoted in 1910 to the present rate.

Miss Grace Brickwedel, from $1,200 to $1,350 per annum. Miss Brickwedel was appointed as a Stenographer in the Bureau of Electrical Inspection, Manhattan, at the present rate.

Thomas W. Rochester, Inspector, Bureau of Lamps and Lighting, Bookkeeper, from $1,350 to $1,500. He was appointed on November 1, 1906, at $1,200, and promoted on August 1, 1908, to the present rate.

Herbert W. Andem, Inspector, Electrical Bureau, Manhattan, from $1,200 to $1,500 per annum. He was appointed on December 10, 1909, at the present rate.

The following table shows the schedule changes in detail:

Account No.	Title.	Schedule Transfer.		Cash Transfer.	
		Decrease.	Increase.	Decrease.	Increase.
627.	Clerks, 2 at $900	$900 00		$450 00	
	Clerk at $1,050		$1,050 00		$525 00
	Inspector, 1 at $1,650		1,650 00		825 00
	Inspectors, 2 at $1,500	1,500 00		750 00	
	Inspectors, 3 at $1,350		1,350 00		675 00
	Inspectors, 2 at $1,200	1,200 00		600 00	
	Stenographer and Typewriter at $1,350		1,350 00		675 00
	Stenographers and Typewriters, 3 at $1,200	2,400 00		1,200 00	
	Stenographer and Typewriter, 1 at $1,050		1,050 00		525 00
630.	Inspectors, 4 at $1,500		1,500 00		750 00
	Inspectors, 14 at $1,350	1,350 00		675 00	
	Unassigned balance, $210	210 00		105 00	
631.	Inspectors, 1 at $1,350		1,350 00		675 00
	Inspectors, 6 at $1,200	1,200 00		600 00	
646.	Unassigned balance, $300	300 00		150 00	
654.	Inspector, 1 at $1,350	1,350 00		675 00	
	Inspector at $1,500		1,500 00		750 00
668.	Unassigned balance, $254	240 00		120 00	
686.	Inspectors, 4 at $1,350		1,350 00		675 00
	Inspectors, 3 at $1,200	1,200 00		600 00	
	Clerk, 1 at $750	750 00		375 00	
	Clerk at $900		900 00		450 00
692.	Unassigned balance, $510	450 00		225 00	
		$13,050	$13,050 00	$6,525 00	$6,525 00

The attached resolutions, if adopted, will grant the request.

Respectfully,

WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedules as revised for the Department of Water Supply, Gas and Electricity, for the year 1911, to become effective as of July 1, 1911, as follows:

Department of Water Supply, Gas and Electricity.

Heat, Light and Power, Borough of Brooklyn—	
Bureau of Lamps and Lighting:	
654. Lighting Public Buildings, Salaries	75 00
Heat, Light and Power, Borough of Queens—	
Bureau of Electrical Inspection:	
686. Administration, Salaries	150 00
	$525 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communications from the Department of Health requesting, and report of the Comptroller relative to, the modification of Salary Schedules Nos. 333 and 345, supporting the appropriation made in the Budget for the year 1911, for said Department, providing for the transfer of a Medical Inspector at $2,550 per annum to fill a vacancy in the same position at $3,000 per annum, for an increase in the salary of a Medical Inspector from $1,200 to $1,500 per annum, and for the substitution of a Medical Inspector at $1,500 per annum for a Bacteriologist at the same rate, said modification to be effective as of July 1, 1911:

Department of Health, City of New York, Southwest Corner 55th street and 6th avenue, Borough of Manhattan, Office of the Secretary, New York, July 7, 1911.

Hon. JOSEPH HAAG, *Secretary, Board of Estimate and Apportionment,* 277 Broadway:

Sir—At a meeting of the Board of Health of the Department of Health, held July 6, 1911, the following resolution was adopted:

Resolved, That the Board of Estimate and Apportionment be and it is hereby respectfully requested to approve of the following further changes and modifications in the schedules supporting the appropriations made to the Department of Health for salaries for the year 1911:

Supporting Schedule to No. 345, Administration, Division of Communicable Diseases, Salaries:

Change item "Bacteriologists, 2 at $1,500, $3,000," to read "Bacteriologist, $1,500."

Change item "Medical Inspectors, 29 at $1,500, $43,500," to read "Medical Inspectors, 30 at $1,500, $45,000."

A true copy, EUGENE W. SCHEFFER, Secretary.

Department of Health, City of New York, Southwest Corner 55th street and 6th avenue, Borough of Manhattan, Office of the Secretary, New York, July 7, 1911.

Hon. JOSEPH HAAG, *Secretary, Board of Estimate and Apportionment,* 277 Broadway:

Sir—At a meeting of the Board of Health of the Department of Health, held July 6, 1911, the following resolution was adopted:

Resolved, That the Board of Estimate and Apportionment be and it is hereby respectfully requested to approve of the following further changes and modifications in the schedules supporting the appropriations made to the Department of Health for salaries for the year 1911:

Supporting Schedule to No. 333, Administration, Division of Contagious Diseases, Salaries:

Strike out item "Medical Inspector, $3,000."

Change item "Medical Inspectors, $2,550," to read "Medical Inspectors, 2 at $2,550, $5,100."

Change item "Medical Inspectors, 11 at $1,500, $16,500," to read "Medical Inspectors, 12 at $1,500, $18,000."

Change item "Medical Inspectors, 46 at $1,200, $55,200," to read "Medical Inspectors, 45 at $1,200, $54,000."

Insert item "Unassigned balance, $150."

A true copy, EUGENE W. SCHEFFER, Secretary.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 17, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—In reference to requests from the Board of Health on July 6, 1911, for modification of two schedules of salaries in the Department of Health for the year 1911, I report as follows:

In No. 333, Division of Contagious Diseases, it is proposed to fill a vacancy caused by the death of the Medical Inspector in charge, at $3,000 per annum, by the transfer from Brooklyn of Dr. S. Dana Hubbard, Medical Inspector, at $2,550. An increase in salary of $300 is requested for Dr. J. Franklin Dunkeith, Medical Inspector, at $1,200. Dr. Dunkeith was appointed on March 16, 1897. He was in charge of the Division of Contagious Diseases during the illness of the Medical Inspector in charge.

In No. 345, Division of Communicable Diseases, a Medical Inspector, at $1,500 per annum, is to be substituted for a Bacteriologist at the same rate.

The following table shows the line item changes in detail:

Account No.	Schedule Line.	Schedule Transfer.		Cash Transfer.	
		Decrease.	Increase.	Decrease.	Increase.
333.	Medical Inspector, at $3,000..	$3,000 00	......	$1,500 00	......
	Medical Inspector, at $2,550..	......	$2,550 00	......	$1,275 00
	Medical Inspectors, 11 at $1,500	......	1,500 00	......	750 00
	Medical Inspectors, 46 at $1,200	1,200 00	......	600 00	......
	Unassigned balance	......	150 00	......	75 00
345.	Bacteriologists, 2 at $1,500....	1,500 00	......	750 00	......
	Medical Inspectors, 29 at $1,500	......	1,500 00	......	750 00
		$5,700 00	$5,700 00	$2,850 00	$2,850 00

The attached resolution, if adopted, will grant the requests.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of schedules, as revised, for the Department of Health for the year 1911, to take effect July 1, as follows:

Administration, Division of Contagious Diseases—

333. Salaries:

Medical Inspectors, 2 at $2,550..................................	$5,100 00
Medical Inspectors, 7 at $1,800..................................	12,600 00
Medical Inspectors, 12 at $1,500..................................	18,000 00
Medical Inspectors, 45 at $1,200..................................	54,000 00
Sanitary Inspector	1,500 00
Veterinarian	1,800 00
Veterinarians, 7 at $1,200..	8,400 00
Clerk	2,550 00
Clerk	1,800 00

Clerk	1,500 00
Clerk	1,200 00
Clerks, 7 at $900	6,300 00
Clerk	750 00
Clerks, 4 at $480	1,920 00
Clerks, 3 at $300	900 00
Stenographer and Typewriter	900 00
Stenographers and Typewriters, 2 at $600	1,200 00
Typewriting Copyists, 6 at $600	3,600 00
Telephone Switchboard Operators, 2 at $900	1,800 00

Hospital Clerks, 3 at $750	2,250 00
Hospital Clerks, 4 at $600	2,400 00
Stenographers and Typewriters, 2 at $750	1,500 00
Stenographers and Typewriters, 2 at $600	1,200 00
Typewriting Copyist	900 00
Typewriting Copyist	750 00
Assistant Director, Bacteriological Laboratory	1,800 00
	$133,020 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Department of Taxes and Assessments requesting, and report of the Comptroller recommending, the modification of Salary Schedule No. 1342 supporting the appropriation made in the Budget for the year 1911, for said Department, providing for the elimination of two Clerks, at $750 per annum each, and one at $600 per annum, and for the addition of a Clerk, at $540, and a Searcher, at $1,500 per annum:

Department of Taxes and Assessments of The City of New York, Borough of Manhattan, Hall of Records, July 10, 1911.

To the Honorable, the Board of Estimate and Apportionment of The City of New York:

Gentlemen—Application is hereby made to readjust the schedule supporting Appropriation Account 1342, Salaries and Wages, made in the Budget for 1911 for this Department to read as follows:

Schedule as passed by Board of Estimate and Apportionment on July 6, 1911:

28 Clerks, at $750	$21,000 00
4 Clerks, at $600	2,400 00
3 Clerks, at $540	1,620 00
2 Searchers, at $1,500	3,000 00
Unassigned balance	100 00

Proposed change in schedule:

		Increase.	Decrease.
26 Clerks, at $750	$19,500 00	....	$1,500 00
3 Clerks, at $600	1,800 00	....	600 00
4 Clerks, at $540	2,160 00	$540 00	....
3 Clerks, at $1,500	4,500 00	1,500 00	....
Unassigned balance	160 00	....	....
		$2,040 00	$2,100 00

The necessity for this request arises from the fact that one Clerk, to whom it was proposed to pay a salary of $600, is found not to be eligible for such salary, and also to provide for one additional Searcher, at $1,500 per annum.

Respectfully, LAWSON PURDY, President.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 17, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On July 10, 1911, the President of the Department of Taxes and Assessments requested modification of the schedule of salaries supporting the Budget appropriation for the Department for the year 1911. In connection therewith I report as follows:

It is proposed to drop two Clerks at $750 per annum each and one at $600, and add a Clerk at $540 and a Searcher at $1,500 per annum, the balance of $60 to be scheduled as unassigned. The President states that a Clerk is not eligible for the $600 grade, and that the including of the Searcher in the schedule is necessary to meet payroll conditions.

The following table shows the line item changes in detail:

Account No.		Schedule Transfer.		Cash Transfer.	
		Increase.	Decrease.	Increase.	Decrease.
1342.	Clerks, 28 at $750	......	$1,500 00	......	$750 00
	Clerks, 4 at $600	......	600 00	......	300 00
	Clerks, 3 at $540	$540 00	......	$270 00	......
	Searchers, 2 at $1,500	1,500 00	......	750 00	......
	Unassigned balance	60 00	......	30 00	......
		$2,100 00	$2,100 00	$1,050 00	$1,050 00

I recommend the approval of the request by the adoption of the attached resolution. Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedule, as revised for the Department of Taxes and Assessments for the year 1911, as follows:

Department of Taxes and Assessments.

1342. Salaries:

President	$8,000 00
Commissioners, 6 at $7,000	42,000 00
Secretary	4,500 00

	$581,120 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communications from the Department of Parks, Borough of The Bronx requesting, and report of the Comptroller recommending, approval of the revised schedules of wages for the Corporate Stock Accounts Nos. 304-C and 304-D, Department of Parks, The Bronx, for the year 1911, to provide for temporary employees:

The City of New York, Department of Parks, Office of Commissioner for the Borough of The Bronx, Zbrowski Mansion, Claremont Park, July 10, 1911.
Hon. William A. Prendergast, *Comptroller*, 280 Broadway, New York City:

Sir—Kindly submit to the Board of Estimate and Apportionment for their approval the following schedule of salaries and wages on corporate stock funds:

Department of Parks, Borough of The Bronx.

Code 304-C, Construction of Manure Pits Adjacent to Park Station—

Foreman, 2 months, at	$1,200 00
Laborers, 900 days, at	2 50
Carpenters, 4, 120 days, 30 days each, at	5 00
Bricklayer, 60 days, at	5 60
Blaster, 7 days, at	4 00
Plumbers, 2, 30 days, 15 days each, at	5 50
Double teams, 2, 60 days, 30 days each, at	4 50

Very truly yours,
T. J. HIGGINS, Commissioner of Parks, Borough of The Bronx.

The City of New York, Department of Parks, Office of Commissioner for the Borough of The Bronx, Zbrowski Mansion, Claremont Park, July 10, 1911.

Hon. William A. Prendergast, *Comptroller*, 280 Broadway, New York City:

Sir—Kindly submit to the Board of Estimate and Apportionment for their approval, the following schedule of salaries and wages on corporate stock funds:

Department of Parks, Borough of The Bronx.

Code 304-D, Construction of Drinking Fountains in Various Parks—

Foreman, ½ month, at	$1,200 00
Laborers, 90 days, at	2 50
Plumbers, 2, 14 days, 7 days each, at	5 50
Bricklayer, 14 days, at	5 60
Double team, 7 days, at	4 50

Very truly yours,

T. J. HIGGINS, Commissioner of Parks, Borough of The Bronx.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 14, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—In reference to two communications from the Commissioner of Parks, Borough of The Bronx, under date of July 10, 1911, requesting approval of schedules of wages for the Corporate Stock Accounts, No. 304-C, Construction of Manure Pits Adjacent to Park Stations, and No. 304-D, Construction of Drinking Fountains in Various Parks, I report as follows:

The Commissioner states that it is planned to complete the improvements during the summer, and that the force requested is based upon an estimate of the Chief Engineer. The schedules are for temporary employees now on the payroll.

I recommend the adoption of the attached resolution granting the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedules paid from other than budgetary funds for the Department of Parks, Borough of The Bronx, for the year 1911, as follows:

Parks, Borough of The Bronx.

C-DP-304C—Construction of Manure Pits Adjacent to Park Stations:

Foreman (2 months), at, per annum	$1,200 00
Laborers (900 days), at, per day	2 50
Carpenters (120 days), at, per day	5 00
Bricklayers (60 days), at, per day	5 60
Blaster (7 days), at, per day	4 00
Plumbers (30 days), at, per day	5 50
Double teams (60 days), at, per day	4 50

C-DP-304D, Construction of Drinking Fountains in Various Parks:

Foreman (1½ months), at, per annum	$1,200 00
Laborers (90 days), at, per day	2 50
Plumbers (14 days), at, per day	5 50
Bricklayers (14 days), at, per day	5 60
Double team (7 days), at, per day	4 50

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented a communication from the Commissioner of Parks, Borough of The Bronx, requesting the additional issue of $4,345.90 corporate stock for reconstructing and resurfacing the roadway of the Bronx and Pelham parkway, from Williamsbridge road to the White Plains road, Borough of The Bronx.

Which was referred to the Corporate Stock Budget Committee consisting of the Comptroller, the President of the Board of Aldermen and the President of the Borough of Manhattan.

The following matters, not upon the Calendar for this day, were considered by unanimous consent:

The Comptroller presented a communication from the President of the Borough of Queens requesting the establishment of the position of Consulting Engineer in the office of said Borough President, at the rate of $6,000 per annum.

Which was referred to the Committee on Salaries and Grades, consisting of the Comptroller and the President of the Board of Aldermen.

The Comptroller presented the following communication from the Commissioner of Water Supply, Gas and Electricity requesting, and report of the Corporate Stock Budget Committee recommending an issue of $107,713.04 corporate stock to provide means for replenishing the account C-CM-2, Additional Water Fund, for the payment of obligations incurred by the Aqueduct Commission or by said Commissioner, as successor to said Commission, for the completed cost of the Croton Falls Reservoir, including engineering and contingent expenses:

Department of Water Supply, Gas and Electricity, Commissioner's Office, 13-21 Park Row, City of New York, June 29, 1911.

Hon. William A. Prendergast, *Comptroller:*

Dear Sir—In my letter to you of November 9, 1910, referring to the cost of the contract made with James Molloy, later assigned to the Croton Falls Construction Company, for the construction of the Croton Falls Reservoir, it was estimated that the total amount would be $4,211,443.95. The contract is now completed and it has been determined that the total expense is $4,319,156.99.

It will be necessary to provide for the difference, $117,713.04, by the issue of corporate stock, and I request that in conformity with the provisions of section 32, chapter 490, of the Laws of 1883, you make such provision. Yours truly,

HENRY S. THOMPSON, Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 12, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 29, 1911, the Commissioner of Water Supply, Gas and Electricity requested a further authorization of corporate stock to provide for the difference between the estimated and actual cost for the completion of the Croton Falls Reservoir.

The account entitled "C-CM-2, Additional Water Fund," was originally established to meet the expense of constructing aqueducts and reservoirs, under the jurisdiction of the Aqueduct Commission, as provided by section 32, chapter 490 of the Laws of 1883. Chapter 220 of the Laws of 1910, provided that the term of office of the Aqueduct Commission should expire on June 1, 1910; that all powers formerly vested in that Commission should devolve upon the Commissioner of Water Supply, Gas and Electricity, and that all other provisions of section 32, chapter 490 of the Laws of 1883 and its subsequent amendments, should remain in full force and effect.

The Commissioner states that the contract is now completed at a total cost of $4,319,156.99. On November 9, 1910, in a communication to the Board of Estimate and Apportionment, the Commissioners estimated the cost of completion at $4,211,443.95. The sum of $107,713.04 is required to liquidate the account.

We recommend, therefore, a further authorization of corporate stock to the amount of $107,713.04 by the adoption of the attached resolution.

Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; GEORGE McANENY, President, Borough of Manhattan; Corporate Stock Budget Committee.

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 32, chapter 490 of the Laws of 1883, and sections 169, 170 and 518 of the Greater New York Charter, as amended by chapter 220 of the Laws of 1910, the Board of Estimate and Apportionment hereby authorizes the Comptroller to issue corporate stock of The City of New York, in the manner provided by section 169 of the Greater New York Charter, to an amount not exceeding one hundred and seven thousand seven hundred and thirteen dollars and four cents ($107,713.04), to provide means for replenishing the account entitled "C-CM-2, Additional Water Fund," for the payment of obligations, properly chargeable to said account, already incurred by the Aqueduct Commission or by the Commissioner of Water Supply, Gas and Electricity as successor to said Commission, and for the completed cost of the Croton Falls Reservoir, including the engineering and contingent expenses incidential thereto, under the jurisdiction of the Commissioner of Water Supply, Gas and Electricity.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Comptroller presented the following communication from the Commissioner of Water Supply, Gas and Electricity requesting, and report of the Comptroller and the Chief Engineer of the Board recommending, that the Board approve of the proposed contract submitted by the Commissioner of Water Supply, Gas and Electricity with the Urban Water Supply Company, for furnishing and delivering into the existing mains of the City in the vicinity of the City's station No. 1, in the Borough of Queens, not less than 1,000,000 nor more than 3,000,000 gallons of water per diem, for a period of one year, at the rate of $55 per million gallons:

(On July 17, 1911, the communication from the Commissioner of Water Supply, Gas and Electricity, submitting the above contract, was referred to said Committee.)

Department of Water Supply, Gas and Electricity, Commissioner's Office, 13-21 Park Row, City of New York, July 12, 1911.

Board of Estimate and Apportionment, Mr. Joseph Haag, *Secretary,* 277 Broadway, Manhattan:

Dear Sir—I am transmitting herewith a proposed form of contract with the Urban Water Supply Company for the furnishing of a minimum supply of one million gallons of water daily and a maximum supply not to exceed three million gallons, for use in the Borough of Queens.

This contract has been drawn along the lines suggested by the committee which recently reported on the acquisition by the City of the private water companies.

The price to be paid for the water under this agreement is $55 per million gallons. The City is now paying at the rate of $65 for the same quantity. The contract is for a period of one year, with the privilege of renewal.

The Chief Engineer has certified that the rapid development of the Borough of Queens makes it imperative that the Department secure an additional supply of water.

I would, therefore, recommend that this contract be given early consideration and approval by the Board of Estimate and Apportionment. Yours truly,

HENRY S. THOMPSON, Commissioner.

Agreement, Made this day of , 1911, by and between The City of New York, hereinafter called "The City," a municipal corporation acting by and through the Commissioner of Water Supply, Gas and Electricity, hereinafter called "The Commissioner," duly authorized so to do by the Board of Estimate and Apportionment of the said City, and with the consent and approval in writing of both the Mayor and the Comptroller of said City, party of the first part, and the Urban Water Supply Company, a domestic corporation hereinafter called "The Company," party of the second part, witnesseth:

That the parties hereto mutually covenant and agree as follows:

First—The Company hereby agrees to deliver into the existing mains of the City in the vicinity of the City's Station No. 1, in the Borough of Queens, at such point as the Commissioner may select, not less than one million (1,000,000) gallons of pure and wholesome water pier diem, and as much more as may be agreed between the parties hereto, provided, however, that the total amount thus delivered shall not exceed three million (3,000,000) gallons per diem, and to begin the delivery of same within twenty (20) calendar days from ten (10) calendar days after the day the Mayor gives his separate written consent and approval of said contract.

Second—The Company hereby agrees that all pipes, etc., laid and used in order to make all necessary connection or connections for the supply of said water by the Company, are to be furnished by and laid at the expense of the said Company; and all work necessary to be performed in the laying of said pipes, etc., is to be paid for by the said Company.

Third—All such water to be taken from wells penetrating the water-bearing strata beneath the clay beds found on the north shore of Long Island, below the normal water table.

Fourth—These walls are located upon that portion of the premises shown on the diagram hereto attached, inserted in red, which diagram is made a part hereof.

Fifth—The City agrees to accept from the Company the water so to be supplied under this contract, and to pay therefor at the rate of fifty-five dollars ($55) per million gallons, and to pay for same as hereinafter set forth. The City will at all times, upon request of the Company, furnish or cause to be furnished to the said Company, a permit or permits for opening streets for the purpose of making repairs, laying mains, or shutting off the water in case of necessity, to enable the Company to comply with its obligations under this contract. All such permits shall be issued by the officer of the City having jurisdiction, and shall include such requirements as shall be fixed by said officer. The permits shall be furnished without expense to the Company for the issuing of such permits, but the Company shall pay all expenses incidental to the restoration of pavements, etc., including the cost of the inspection.

Sixth—It is mutually agreed that this contract shall continue for a period of one year, from ten (10) calendar days after the date of the Mayor giving his separate written consent and approval of this contract, that the Commissioner shall have, at the termination of the year, the option to renew it for either one or two years more as he may elect, upon thirty (30) days' notice in writing before the termination of the first year, so that the maximum termination of the contract shall not exceed three years from ten (10) calendar days after the date the Mayor gives his separate written consent and approval to this contract.

Seventh—The Company agrees that all water so delivered shall be practically odorless, tasteless, clear and colorless; shall be reasonably free from organic matter, and show no indication of sewage pollution. The amount of chlorine shall average for a period of two weeks not more than fifty parts per million (1,000,000) and shall at no time exceed seventy-five (75) parts per million; and the amount of iron shall average for a period of two weeks not more than five-tenths (5/10) part per million (1,000,000), and shall at no time exceed seven-tenths (7/10) part per million as a maximum. Samples shall be taken by the Commissioner at or near the point of delivery into the City's mains at such points and at such time as he may direct, and the taking and testing of the samples shall be entirely under his control and direction.

Eighth—Should the quality of water fall below the requirements of this contract and the standards as shown by analyses, and said water falling below the standards is pumped into the City's mains, it is expressly agreed that the City shall not pay any sum whatever for said water, even though it has been pumped into the City's mains and the City has received the use of same and has or will be paid for same from the householders or other persons or corporations using said water.

Ninth—In case the Company fails to pump into the City's mains the minimum amount of one million (1,000,000) gallons per diem for any day during the period of this contract, the Company agrees to pay the City ten dollars ($10) per million gallons, or fraction thereof, per diem, for the shortage from contract requirements, in any one day, which said sum of $10 per million gallons, or fraction thereof, per day, is hereby agreed upon, fixed and determined by the parties hereto as the damage which the party of the first part will suffer by reason of said default and not by way of penalty; and the said party of the first part, as may be determined in writing by the Commissioner of Water Supply, Gas and Electricity, may deduct and retain the said sum out of any moneys that may be due or become due under this agreement.

Tenth—The Company hereby agrees that they will not assign by power of attorney or otherwise any of the moneys payable under this agreement, unless by and with the consent signified in like manner, that no right under this agreement nor to any moneys due or to become due thereunder shall be asserted against The City of New York, or any Department, Bureau, officer or officers thereof, by reason of any so-called assignment in law or equity of this agreement, or any part thereof, or of any moneys due or to grow due thereunder, unless such assignment shall be authorized by written consent of the Commissioner of the Department of Water Supply, Gas and Electricity of The City of New York endorsed on this agreement.

Eleventh—In order to reasonably safeguard against interruption of the supply, the Company shall provide a reserve pumping unit which shall at all times be connected up and of sufficient capacity to substitute for any unit that may be temporarily disabled from any cause; and the Commissioner (except in case of accident not due, in his opinion, to any fault or neglect of the Company, its agents or servants or employees), shall have the right to abrogate this contract if the supply falls below the amount agreed to be furnished under this contract.

Twelfth—The Company agrees that all water supplied under this contract shall be delivered into the City's mains against the pressure that may be in the mains, but this pressure shall not be more than seventy (70) pounds per square inch at the point of delivery. Upon the termination of this contract, either party shall have the right to disconnect the Company's delivery pipe from the City's mains, but such disconnection shall be made in such a manner as not to cause unnecessary injury or inconvenience to either party hereto or to its property.

Thirteenth—On or before the fifth day of each and every month, or as soon thereafter as possible during the continuance of this agreement, the Company shall send to the Commissioner a written statement of the amount of water furnished during the preceding month, whereupon the Commissioner shall certify the amount of money to which the Company shall be entitled hereunder and shall annex to his certificate a requisition upon the Comptroller of the City to pay the Company the amount to which it shall be entitled as shown by said statement. On the requisition above provided for being presented to said Comptroller, he shall, within thirty days thereafter, pay to the Company the amount thereof.

Fourteenth—The quantity of water supplied by the Company shall be measured and ascertained by meter measurements. For this purpose the Company shall set on their delivery main near the point or points of connection to the City's mains, service and test meters of a size and type to be approved by the Commissioner. The connections to the meters must be so arranged that the flow will ordinarily pass through one or more service meters, but may be made to pass through one or more test meters after passing through the service meters. Provision must also be made for removing any meter for repairs without interrupting the supply. These connections, as well as the connections to the City's mains, shall be subject to the approval of the Commissioner. All meters used shall be tested by the Company at their expense to the satisfaction of the Commissioner, who shall have a representative present at such test to supervise the same and ascertain results. At the expiration of every three months from the commencement of the contract, and oftener if so determined by the Commissioner, the service meter or meters shall be compared by the test meter, and if a discrepancy be shown equal to or greater than five per cent. (5%), a correction equivalent to the full amount of the discrepancy shown at the time of test shall be made for one-half of the water delivered during the interval between such test and the preceding test. No correction shall be made, however, for any water delivered if the discrepancy shown be less than five per cent. (5%). Whenever, in comparing the service meter used to measure the flow with the test meter, the discrepancy equals or exceeds five per cent. (5%), the gearing on the former must at once be changed to agree with the readings of the latter. Either meter shall be removed and calibrated at the expense of the Company and in the presence of the Commissioner or his representative, whenever ordered by the Commissioner. The meters and connections shall be installed in a suitable chamber giving easy access for observation. In the same chamber, the Company shall install on the delivery main, at a point on the down-stream side of the meters to be approved by the Commissioner, a self-recording pressure gauge of approved make. The records of this gauge shall be the property of the City, but the Company shall be entitled to a copy thereof upon demand.

Fifteenth—This contract shall not confer any exclusive franchise upon the Company and is not to bar or in any manner affect any right The City of New York has to acquire the rights, privileges, franchises and property of the Company by condemnation proceedings or by agreement at any time; and in any such condemnation proceedings by or on behalf of the said City, or in any such agreement in estimating and determining the value of such property, rights, privileges and franchises, the value of the unexpired portion of the term of this contract shall not be considered in making the award; but nothing herein contained shall be construed to affect, lessen or impair any right, claim or demand upon the part of the Company for compensation for the value of the Company's property, rights, privileges and franchises to furnish and supply water to The City of New York and the inhabitants thereof, and to any other locality or its inhabitants. In case any such condemnation proceedings shall be taken, the term of this contract shall cease upon the payment of the award therefor, if such payment be made prior to the expiration of the contract as above provided.

It is hereby further agreed that if The City of New York acquires the plant and property of the Company by condemnation proceedings or by agreement, the going-concern value thereof shall not be enhanced, fixed or affected by the fact that the Company is furnishing water to the City, either under the terms of this contract or without a contract, nor by any payments made or being made by the City for water so furnished.

Sixteenth—The Company will execute and deliver to the City its bond, with sureties to be approved by the Comptroller of The City of New York, in the penal sum of thirty thousand dollars ($30,000), conditioned to save and hold the City, its officers, agents or employees harmless from all suits and actions of every description, and from all damages and costs by reason of injury to person or property, including streets, roads, highways and pavements on account of, or arising out of the acts or omissions of the Company, or its officers, agents or employees, or by reason of breaks or failures in the pumps, pipes or other apparatus of the Company; provided, however, that in the event of suit being brought, a notice thereof shall be given to the Company, either by mailing same or delivering same at the office of the Company at the address given at the time of the making of this agreement, or by leaving said notice at the residence of any officer of the Company, or any agent or employee of said Company, which shall have the right to employ counsel at its own expense to defend the same, and that it will pay each and every judgment recovered in the said suit. Said bond shall be further conditioned for the faithful performance by the Company of each and every condition, covenant and obligation imposed upon the Company by this agreement.

Seventeenth—It is hereby expressly agreed by and between the parties hereto that the said Commissioner of Water Supply, Gas and Electricity, or his succssor or successors, shall not nor shall any department or officer of said City be precluded or estopped by any return or certificate made or given by any Engineer, Inspector or other officer of The City of New York under or in pursuance of anything in this contract contained, from at any time showing the true and correct amounts of water furnished, the character and quality of said water, or from showing that the amount claimed to be due is not due under said certificates, or the true facts in relation to any matter contained in this contract; and any officer of any of the departments of The City of New York shall not be precluded by said certificate or certificates from showing any failure on the part of the said Company to carry out any of the terms of said agreement.

Eighteenth—This agreement shall not be binding or of any force unless the Comptroller of the City shall endorse hereon his certificate that there remains unexpended and unapplied, as provided in the Greater New York Charter, a balance of appropriation or fund applicable thereto sufficient to pay the estimated expense of executing this agreement, as certified by the officers making the same.

Nineteenth—This agreement, preliminary to its execution, has been submitted in all its details to the Board of Estimate and Apportionment, and after such submission the consent of the Board of Estimate and Apportionment has been given to the execution of this agreement, as submitted by a resolution passed on the 20th day of July, 1911, and this agreement has also received the separate written consents and approvals of both the Mayor and the Comptroller of The City of New York.

Twentieth—This agreement shall respectively bind and run in favor of the respective parties hereto and their respective successors and assigns.

In witness whereof, the Commissioner for and in behalf of the City, has hereunto set his hand and seal, and the Company has caused its corporate seal to be hereto affixed and these presents to be subscribed in its name by its President the day and year first above written; and the parties hereto have executed this agreement in triplicate, one part of which is to remain with the Commissioner of Water Supply, Gas and Electricity, one other to be filed with the Comptroller of The City of New York, and the third to be delivered to the said party hereto of the second part.

[L. S.]
As Commissioner of Water Supply, Gas and Electricity of The City of New York.

URBAN WATER SUPPLY COMPANY.
[SEAL] By........................
As President.

Approved as to form: JOHN L. O'BRIEN, Assistant Corporation Counsel.

State of New York, County of New York, ss.:

On this day of , 1911, before me personally came , to me personally known and known to me to be the Commissioner of Water Supply, Gas and Electricity and the person described in and who executed the foregoing instrument as such Commissioner, and he acknowledged to me that he executed the same as such Commissioner for the purposes therein mentioned.

State of New York, County of New York, ss.:

On this day of , 1911, before me personally came , to me known and known to me to be the President of the Urban Water Supply Company, who, being by me duly sworn, did say that he was the President of said Company and knew the seal of said Company; that the seal affixed to the foregoing instrument was such corporate seal; that it was thereto affixed by order of the Board of Directors of said Company, and that by like order he thereto signed his name and official designation.

In pursuance of section 471 of the Greater New York Charter, I do hereby give my consent to and approval of the foregoing proposed agreement in all its details, with the Urban Water Supply Company for supplying water in the Borough of Queens, to The City of New York.

Dated, New York, , 1911.

As Mayor of The City of New York.

In pursuance of section 471 of the Greater New York Charter, I do hereby give my consent to and approval of the foregoing proposed agreement in all its details, with the Urban Water Supply Company for supplying water in the Borough of Queens, to The City of New York.

Dated, New York, , 1911.

As Comptroller of The City of New York.

Know all men by these presents, That we, the Urban Water Supply Company, a domestic water works corporation of the State of New York, as principal, and the as surety, are held and firmly bound unto The City of New York in the sum of thirty thousand dollars ($30,000), lawful money of the United States, to be paid to The City of New York or its certain attorney, successors or assigns, for which payment, well and truly to be made, we bind ourselves, our successors and assigns, jointly and severally, firmly by these presents.

Sealed with our seals and dated the day of , 1911.

Whereas, The said Urban Water Supply Company has entered or is about to enter into a certain agreement with The City of New York, a municipal corporation acting by and through the Commissioner of Water Supply, Gas and Electricity of The City of New York, bearing date the day of , 1911, which agreement is hereto annexed and made a part hereof:

Now, therefore, the condition of this obligation is such that if the said Urban Water Supply Company shall save and hold The City of New York, its officers, agents and employees harmless from all suits and actions of every description, and from all damages and costs by reason of injury to person or property, including streets, roads, highways and pavements, on account of or arising out of the acts or omissions of the said Urban Water Supply Company or its officers, agents, or employees, or by reason of breaks or failures in the pumps, pipes or other apparatus of said Company, provided, however, that in the event of suit being brought immediate notice thereof shall be given to the said Company, which shall have the right to employ counsel at its own expense to defend the same; and that if said Company shall pay each and every judgment recovered in such suit; and that if said Company shall well and truly perform all and singular the terms, conditions, covenants and obligations imposed upon the said Urban Water Supply Company by said agreement; then this obligation to be void, otherwise to remain in full force and effect.

Sealed and delivered in presence of [SEAL]

Board of Estimate and Apportionment, New York, July 18, 1911.

To the Honorable, the Board of Estimate and Apportionment:

Gentlemen—At the meeting of the Board of Estimate and Apportionment held on July 13, there was submitted by the Commissioner of Water Supply, Gas and Electricity a proposed form of contract with the Urban Water Supply Company for furnishing a minimum supply of 1,000,000 gallons daily and a maximum supply not to exceed 3,000,000 gallons, for use in the Borough of Queens, at a rate of $55 per million gallons. The form of contract was referred to the Comptroller and the Chief Engineer of the Board for consideration.

This proposed contract with the Urban Water Supply Company has been the subject of two reports from the Committee. The first of these reports was on April 27, 1911, when we advised the Board that the contract as originally drawn had been changed in a number of particulars, but pointed out the fact that there might be a question as to the expediency of entering into a contract with a company operating under an old franchise, but not being in business at the present time, and creating thereby a going concern value which the City might be obliged at some time in the future to pay for if it attempted to extinguish the various private water companies in The City of New York. The Committee therefore recommended that the matter be referred back to the Commissioner for a distinct recommendation as to whether, in view of these facts, he believed that a contract should be made.

Again, on July 6, the Committee reported upon a communication from Mr. Reon Barnes requesting the Board to take action on the proposed contract, and stated that this contract was not now before the Board, but had been referred to the Commissioner of Water Supply, and advising that the Committee believed that the contract as now drawn properly protected the interests of the City, there having in addition to the changes referred to in the first report been introduced another section in which the Company stipulated that in case the City should desire at any time in the future to acquire the property, right, privileges and franchises of this company, the compensation to be paid should not be increased by reason of the proposed contract.

The Commissioner of Water Supply, Gas and Electricity has again submitted the contract in its revised form, with a statement "that the rapid development of the Borough of Queens makes it imperative that the Department secure an additional suuply of water," and recommending that the contract be given early consideration and approval.

We believe that the Commissioner's statement of the situation in the Borough of Queens should be conclusive, and as we consider that the contract is now in proper form, it is recommended that it be approved and that its execution be authorized.

Respectfully,

WM. A. PRENDERGAST, Comptroller; NELSON P. LEWIS, Chief Engineer, Board of Estimate and Apportionment.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby assents to and approves of, in all its details, the proposed contract or agreement submitted by the Commissioner of Water Supply, Gas and Electricity under date of July 12, 1911, between The City of New York, by the Commissioner of Water Supply, Gas and Electricity, and the Urban Water Supply Company, for furnishing and delivering into the existing mains of the City in the vicinity of the City's Station No. 1 in the Borough of Queens, not less than one million (1,000,000) gallons, nor more than three million (3,000,000) gallons of water per diem for a period of one (1) year beginning at a date ten (10) days after the approval thereof by the Mayor, with an option for renewal of either one (1) or two (2) years, at the rate of Fifty-five dollars ($55.00) per million gallons.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Commissioner of Records of New York County, requesting approval of the purchase at a price not exceeding $10,000, of newspaper files from the New York Press Club, together with a report of the Comptroller recommending the approval of said request:

(On June 15, 1911, a communication from the Commissioner of Records, New York County, relative to the above purchase, was referred to the Comptroller.)

Commissioner of Records of the County of New York, Hall of Records, Borough of Manhattan, New York City, June 12, 1911.

Hon. William J. Gaynor, *Mayor, Chairman, Board of Estimate and Apportionment:*

Dear Sir—Under the authorization contained in chapter 292, Laws of 1911, and subject to the approval of the Board of Estimate and Apportionment, as the act provides, I desire to purchase from the New York Press Club, "for the County of New York, to be preserved as a part of the public records in the office of the Clerk of said County," files of newspapers published in the City and County of New York, beginning with the "Weekly Herald," from 1837 to 1855, and including the New York "Tribune," from January, 1846, the New York "Herald," from July, 1847, the "Times," from July, 1850, the "World," from January, 1863, and the "Sun," from January, 1870, up to this date.

Of these there are, in all, more than one thousand volumes.

The Press Club offers to sell these files to the County of New York, to be preserved as the law provides, for the sum of ten thousand dollars.

These papers are all in excellent condition, having been cared for and guarded as a valued asset of the Press Club during all the years of its existence. Taken together they constitute a record of the history of the City, of the Nation and the World for more than seventy years past. Their value for reference must become greater as time advances.

These newspaper files are included in the published assets of the club at a valuation of $25,000, that amount having been offered for them, as I am informed, several years ago. At that time the club, by a vote of its Board of Directors, decided not to part with them.

Since then the club has built a new clubhouse where, because of increased membership and room required for social purposes, it has not been possible to afford the space necessary to keep these newspaper files accessible for reference, and they are stored in the basement of the Press Club building.

For that reason they may now be purchased for a sum which I believe to be far below their real value, if that can be computed in dollars. It is in fact difficult to fix a money value for them, as it would not be possible to replace them if they were destroyed.

The club has offered to sell these newspaper files to the County of New York, with the assurance the law gives that they will be kept as a part of the public records, where they will be accessible for public reference.

If I am autthorized to purchase them to be kept as a part of the records of the County of New York, they can be preserved in the office of the Clerk of the County of New York in the Hall of Records, under conditions that will safeguard them against loss or injury.

I believe they should be made a part of the public records, and preserved for public reference.

I, therefore, ask the Board of Estimate and Apportionment to approve of the purchase of these newspaper files by the Commissioner of Records of the County of New York for the sum of $10,000. Very respectfully submitted,

WILLIAM S. ANDREWS, Commissioner of Records, County of New York.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 19, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 12, 1911, the Commissioner of Records, New York County, pursuant to the provisions of chapter 292 of the Laws of 1911, requested the Board of Estimate and Apportionment to approve of the purchase of certain files of newspapers from the New York Press Club at a cost of $10,000. In connection therewith I report as follows:

The files are of the following newspapers, published in the City and County of New York:

"Weekly Herald," 1837 to 1855; New York "Tribune," 1846 to date; New York "Herald," 1847 to date; New York "Times," 1850 to date; New York "World," 1863 to date; New York "Sun," 1870 to date. There are 1,030 bound volumes of the newspapers, all in a good state of preservation.

It is stated that the increased membership in the Press Club has made it necessary to provide more room for social purposes. The files have been stored in the basement of the clubhouse because of lack of room.

Inquiry in the different City libraries shows that no library has complete files of these newspapers. The New York Public Library has only complete files of the New York "Sun" and the New York "World." The files of the "Weekly Herald" are missing from 1837 to 1841, and of the New York "Times" for 1850 and to 1851. The files of the "Herald" for 1854 and 1855 are also missing.

The Commissioner states that if the purchase is approved the files will be preserved as a part of the records of the County of New York in the office of the County Clerk, where they will be accessible to the public.

Chapter 292 of the Laws of 1911 provides in part as follows:

"Said Commissioner is hereby authorized to purchase for the County of New York, to be preserved as a part of the public records in the office of the Clerk of said County, such books, papers, newspaper files or manuscripts, printed in or pertaining to said County and having in his judgment historic value or containing information of public interest, and to provide for the care and preservation thereof, in the manner directed for the care and preservation of the public records in the office of the Clerk of the County of New York, by section two of this act, provided, that there shall not be expended for such purchase or purchases an amount to exceed fifteen thousand dollars, and that no such purchase shall be made unless approved by the Board of Estimate and Apportionment of The City of New York; and the Comptroller of The City of New York is hereby authorized and directed to issue and sell revenue bonds to such amount as may be necessary to provide for the payment of such salary, compensations and expenses, and for such purchases, during the year 1911, in addition to the sum now appropriated for such purposes during that year."

The files constitute a valuable record of the history of the City, of the nation and of the world for more than seventy years, and their value for reference must become greater from year to year.

It is my opinion that these files would be out of place in the office of the County Clerk, and that their proper place is in the New York Public Library. However, it appears that this special act does not provide for the purchase of these files by any other person than the Commissioner of Records, and therefore the act cannot be made the basis for provision to have the files purchased for the Public Library.

I submit without recommendation a resolution, which, if adopted, will approve of the purchase of these files by the Commissioner of Records for the County Clerk's office. Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That, pursuant to the provisions of chapter 292, Laws of 1911, the Board of Estimate and Apportionment hereby approves of the purchase by the Commissioner of Records of the County of New York, at a price not to exceed ten thousand dollars ($10,000.), of newspaper files, as follows: "Weekly Herald," 1837 to 1855; "New York Tribune," 1846 to date; "New York Herald," 1847 to date; "New York Times," 1850 to date; "New York World," 1863 to date; "New York Sun," 1870 to date.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

On motion of the Comptroller, the Board adjourned to meet Friday, July 21, 1911, at 10.30 o'clock a. m. JOSEPH HAAG, Secretary.

BOARD OF ESTIMATE AND APPORTIONMENT.

Minutes of Special Meeting of Board of Estimate and Apportionment, Held in Room 16, City Hall, Friday, July 21, 1911, at 10.30 a. m.

FINANCIAL AND FRANCHISE MATTERS.

The Board met in pursuance of an adjournment.

Present—Hon John Purroy Mitchel, Acting Mayor; William A. Prendergast, Comptroller; Francis P. Bent, Acting President, Board of Aldermen; George McAneny, President, Borough of Manhattan; Alfred E. Steers, President, Borough of Brooklyn; Cyrus C. Miller, President, Borough of The Bronx; Lawrence Gresser, President, Borough of Queens, and George Cromwell, President, Borough of Richmond.

The Acting Mayor, Hon. John Purroy Mitchel, presided.

FRANCHISE MATTERS.

Rapid Transit Railways—Extensions to the Existing System, also Third Tracking and Constructing Additions to the Second, Third and Ninth Avenue Elevated Railroads and the Completion and Putting in Operation of the Steinway Tunnel.

In the matter of the communication from the Public Service Commission for the First District relative to the construction, maintenance and operation of additional rapid transit railways and requesting a statement of the position of this Board on the subject.

At the meeting of July 20, 1911, by motion duly adopted, this day was fixed for consideration of a resolution offered by the President of the Borough of Manhattan relative to additional rapid transit railways which failed of adoption on that date, not having received twelve votes on its original presentation, as required by section 226 of the Greater New York Charter.

The President of the Borough of Manhattan again offered the resolution, which is as follows:

Whereas, The Special Committee of the Board of Estimate and Apportionment, appointed to consider pending transit proposals, and the Public Service Commission for the First District, made a joint report to this Board, bearing date of June 5, 1911, and transmitted under date of June 13, 1911, with relation to the construction, equipment and operation of additional lines of rapid transit railway within The City of New York; and

Whereas, This Board, at a meeting held on June 21, 1911, concurred unanimously in the findings and recommendations of said joint report, with certain modifications set forth in the resolutions adopted upon such date applying to the respective proposals of the Interborough Rapid Transit Company and the Brooklyn Rapid Transit Company; and

Whereas, The recommendations of the Special Committee of the Board and the Public Service Commission, which were approved by the Board, provided that if the Interborough Company failed to accept the terms and conditions prescribed for the operation of the new lines of rapid transit railway allotted to it, certain said lines be added to the system to be operated by the Brooklyn Company upon the general terms prescribed for the operation of the lines originally allotted to the said Company; and

Whereas, The Brooklyn Company, in a communication to the conferees dated July, 1911, expressed its willingness to operate the additional lines upon the terms proposed, if so requested by the City; and

Whereas, The Interborough Company has failed to accept the terms originally proposed to it, and the Board has rejected the proposition of the conferees to amend the said terms upon a basis that the Interborough Company has stated would be acceptable to it; therefore be it

Resolved, That, in pursuance of the joint recommendations of the Special Committee of the Board of Estimate and Apportionment and the Public Service Commission for the First District, as subsequently amended, the Board will approve contracts to be prepared by the Public Service Commission under the general provisions of the Rapid Transit Act for the construction, equipment and operation of rapid transit railways along the lines now proposed for operation by the Brooklyn Rapid Transit Company, either through the instrumentality of such new railroad company as may be organized for the purpose, or through its present agencies, and for the extension and third tracking of the existing elevated lines of the Brooklyn Rapid Transit Company; and be it further

Resolved, That the Public Service Commission be and it hereby is respectfully requested to submit to this Board at the earliest date practicable the forms of the contracts to be entered into for the equipment, operation and maintenance of the lines of rapid transit railway proposed for operation as aforesaid; and be it further

Resolved, That the Public Service Commission be and it hereby is respectfully requested to submit at the earliest date or dates practicable, for the further approval of the Board, the contract or contracts to be entered into for such portions of the said lines as are to be constructed at the expense of the City, and to acquaint the Board, so far as practicable, in advance of such submission with the incidental plans, specifications and estimates for such construction, in order that the Board may properly allow the appropriation of City funds to be expended in accordance therewith; and be it further

Resolved, That the Special Committee of the Board, consisting of the President of the Borough of Manhattan, the President of the Borough of The Bronx and the President of the Borough of Richmond be hereby continued for the purpose of conferring and co-operating with the Public Service Commission in the carrying out of these recommendations, and in the determination of such questions of detail as were left undetermined in the joint report of the conferees, including the resolutions of this date.

Which was adopted by the following vote:

Affirmative—The Acting Mayor, the Comptroller, the Acting President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn and Richmond—14.

Negative—The Presidents of the Boroughs of The Bronx and Queens—2.

FINANCIAL MATTERS.

The following matters, not upon the Calendar for this day, were considered by unanimous consent:

The Comptroller presented five communications from the Public Service Commission for the First District, submitting forms of contract for the construction of the Lexington Avenue Subway, Borough of Manhattan, showing bidders to whom contracts have been awarded, requesting the consent thereto of the Board of Estimate and Apportionment, pursuant to section 37 of the Rapid Transit Act, as amended, and further requesting the Board to prescribe a limit to the amount of bonds available for said purposes, and to authorize the issue of corporate stock, as follows:

Contract Awarded.	Corporate Stock Requested.
Section No. 6, from East 26th street, under Lexington avenue to East 40th street; contractor, the Bradley Contracting Company; amount	$3,634,213 50
Section No. 7, from East 40th street, under Lexington avenue, to East 53d street; contractor, Charles H. Peckworth; amount............	2,750,463 40
Section No. 8, from East 53d street, under Lexington avenue, to East 67th street; contractor, the Bradley Contracting Company; amount.	3,369,484 20
Section No. 10, from East 79th street, under Lexington avenue, to East 93d street; contractor, the Bradley Contracting Company; amount.	3,253,072 80
Section No. 11, from East 93d street, under Lexington avenue, to East 106th street; contractor, the Bradley Contracting Company; amount.	3,132,195 05
Aggregate amount	$16,139,428 95

—together with a report recommending the approval of said request.

(On July 6, 1911, the above communications were referred to the Comptroller.)

State of New York, Public Service Commission for the First District, Tribune Building, 154 Nassau Street, July 5, 1911.

To the Board of Estimate and Apportionment of The City of New York:

The Public Service Commission for the First District herewith transmits to you, for your consent and for the appropriation of the necessary moneys, as provided by the Rapid Transit Act, contracts for the construction at municipal expense of five sections of the Lexington Avenue Subway, viz.: Sections Nos. 6, 7, 8, 10 and 11.

The important developments in the transit situation which have occurred since the Triborough contracts were advertised for bids have necessitated changes in the Triborough plans. Whatever changes may finally be determined upon, the sections referred to will be constructed practically as planned. It is therefore considered desirable that the contracts for these sections be awarded, so that construction work can be got under way as quickly as possible.

Important changes in other sections may be necessary to conform to the new layout and contracts for their construction can be advertised for bids from time to time as the changed plans and contracts reach completion.

Since the receipt of bids the Commission has considered with extreme care the question of the cross-section of the new subways. The Triborough plans as advertised for bids called for a normal cross-section with a clear width inside of 57 feet, and with a height from the base of the rail of 15 feet. The Commission believes that, considering the subject broadly and considering, also, the capacity which will be required of these railroads in the future, that a type of subway as called for by these plans would best serve the traveling public, but when the matter was first considered it did not have before it the exact cost data which was furnished by the contractors' bids. After the receipt of such bids, and in the light of the debt margin of the City, the Commission thoroughly re-studied the entire question, with the result that it determined that the size of subway which will give the maximum of efficiency with the minimum of expenditure is one that will have a normal four-track cross-section with a clear inside width of 55 feet 6 inches and a height of 13 feet 2 inches from the base of the rail.

The Triborough forms of contracts contain provisions giving the Commission the right to make changes in plans, and under them the Commission has the right to order these changes, which are within the contract cost. Respectfully,

PUBLIC SERVICE COMMISSION FOR THE FIRST DISTRICT, by W. R. WILLCOX, Chairman.

Attest: TRAVIS H. WHITNEY, Secretary.

SECTION NO. 6, FROM EAST 26TH STREET, UNDER LEXINGTON AVENUE, TO EAST 40TH STREET; CONTRACTOR, THE BRADLEY CONTRACTING COMPANY; AMOUNT, $3,634,213.50.

State of New York, Public Service Commission for the First District, Tribune Building, 154 Nassau Street, New York, July 5, 1911.

To the Board of Estimate and Apportionment of The City of New York:

The Public Service Commission for the First District herewith transmits to you for your consent, as required by law, a proposed contract between The City of New York and Bradley Contracting Company for the construction at the public expense of Section No. 6 of Route No. 5, being that portion of the proposed Lexington Avenue Rapid Transit Railroad which extends under Lexington avenue, from East 26th street to East 40th street, in the Borough of Manhattan.

The Public Service Commission for the First District further requests your honorable Board to consent to the said contract herewith transmitted, and to prescribe a limit to the amount of bonds available to meet the requirements of the said contract, to wit, the sum of three million six hundred and thirty-four thousand two hundred and thirteen dollars and fifty cents ($3,634,213.50), and also to direct the Comptroller of The City of New York to issue the bonds of said City at such a rate of interest as the Commissioners of the Sinking Fund of said City may prescribe for the purpose of providing the necessaary means for construction at the public expense of the said portion of such railroad.

And the Public Service Commission for the First District does hereby, pursuant to section 45 of the Greater New York Charter, make request for the authorization of such corporate stock for the full amount sufficient to pay the entire estimated expense of executing such contract, to wit, the sum of three million six hundred and thirty-four thousand two hundred and thirteen dollars and fifty cents ($3,634,213.50).

In witness whereof the Public Service Commission for the First District has

caused its official seal to be hereto affixed and attested by its Secretary and these presents to be signed by its Chairman this 5th day of July, 1911.

PUBLIC SERVICE COMMISSION FOR THE FIRST DISTRICT, by W. R. Willcox, Chairman.

Attest: Travis H. Whitney, Secretary.

After consideration of the bids on Section No. 6 of Route No. 5, the following resolution was duly moved and seconded:

Resolved, That this Commission hereby accepts the proposal of Bradley Contracting Company, dated October 27, 1910, for the construction of Section No. 6 of Route No. 5, being that portion of the proposed Lexington Avenue Rapid Transit Railroad which extends under Lexington avenue, from East 26th street to East 40th street, in the Borough of Manhattan, the aggregate of the unit prices in the proposal amounting to three million six hundred and thirty-four thousand two hundred and thirteen dollars and fifty cents ($3,634,213.50).

Resolved, That the Chairman and Secretary be and they hereby are authorized on behalf of the Commission to execute a contract in the form attached to the said proposal and to deliver the same if and when consented to by the Board of Estimate and Apportionment and upon compliance by the said Bradley Contracting Company with the requirements of the Invitation to Bidders attached to the said proposal.

Resolved, That the Chairman and the Secretary be and they hereby are authorized and directed to request the Board of Estimate and Apportionment to consent to the said contract and to prescribe a limit to the amount of bonds available to meet the requirements of the said contract, to wit, the sum of three million six hundred and thirty-four thousand two hundred and thirteen dollars and fifty cents ($3,634,213.50), and also to request the said Board of Estimate and Apportionment to direct the Comptroller of The City of New York to issue the bonds of said City at sucha rate of interest as the Board of Commissioners of the Sinking Fund of said City may prescribe for the purpose of providing the necessary means for construction at the public expense of the said portion of such railroad; and also to make request for the authorization of bonds for the full amount sufficient to pay the entire estimated expense of executing such contract, to wit, the sum of three million six hundred and thirty-four thousand two hundred and thirteen dollars and fifty cents ($3,634,213.50).

Resolved, That the Secretary give notice to the said Bradley Contracting Company that its proposal has been accepted and the contract awarded to it by this Commission, subject to its being consented to by the Board of Estimate and Apportionment, as required by law.

Resolved, That it be referred to counsel to the Commission to inquire into the sufficiency of the sureties proposed to be given by the said Bradley Contracting Company, and in case the sureties named in the proposal of the said Bradley Contracting Company, or any of them, are not approved by the Commission, then to inquire into the sufficiency of any other or substitute sureties and in behalf of the Commission to do any such act as may be necessary and incidental to the furnishing of a proper bond.

Ayes—Commissioners Willcox, McCarroll, Maltbie, Eustis, Cram.

Nays—None.

Carried.

State of New York, County of New York, ss.:

I, Travis H. Whitney, Secretary of the Public Service Commission for the First District, do hereby certify that I have compared the above with the original adopted by said Commission on July 5, 1911, and that it is a correct transcript therefrom and of the whole of the original.

In testimony whereof I have hereunto subscribed my hand and affixed the seal of the Commission this 5th day of July, 1911.

[seal.] TRAVIS H. WHITNEY, Secretary.

Invitation to Contractors.

Parts of Lexington Avenue Route.

The City of New York, acting by the Public Service Commission for the First District (hereinafter called "the Commission") invites proposals to construct portions of a proposed rapid transit railroad in the Boroughs of Manhattan and The Bronx in The City of New York. Proposals may be submitted separately for any one or more of the separate sections of which such railroad consists as hereinafter stated.

The points within the City between which the said several parts are to run and the route or routes to be followed are briefly as follows:

Lexington Avenue Route.

(Route No. 5.)

Section 1 begins under Battery Park and extends thence under Battery place, Greenwich street, Trinity place and Church street to a point about 80 feet north of the centre line of Dey street; with a station in Battery Park, a station at Rector street and a station at Cortlandt and Dey streets.

Section 2 begins at the end of Section 1 and extends thence under Church street, private property, Vesey street, private property, and Broadway to a point under Broadway about 110 feet north of the centre line of Walker street; with a station at Murray and Warren streets.

Section 2-A begins at the end of Section 2 and extends thence under Broadway to a point about on the northerly building line of Howard street. This section includes the Canal street station and also the portion of the Canal street subway lying thereunder.

Section 3 begins at the end of Section 2-A and extends thence under Broadway to a point about midway between Houston and Bleecker streets; with a station at Prince street.

Section 4 begins at the end of Section 3 and extends thence under Broadway, private property and the several cross streets to a point under private property at the southerly line of East 14th street and Irving place; with a station at Astor place and East 8th street.

Section 5 begins at the end of Section 4 and extends thence under Irving place, Gramercy Park and Lexington avenue to a point about 140 feet north of the centre line of East 26th street; with a station at East 14th and East 15th streets and a station at East 23d street.

Section 6 begins at the end of Section 5 and extends thence under Lexington avenue to about the centre line of East 40th street; with a station at East 27th and East 28th streets and a station at East 34th street.

Section 7 begins at the end of Section 6 and extends thence under Lexington avenue to a point about 50 feet north of the centre line of East 53d street; with a station at East 42d and 43d streets and a station at East 51st street.

Section 8 begins at the end of Section 7 and extends thence under Lexington avenue to a point about 50 feet north of the centre line of East 67th street; with a station at East 58th and East 59th streets.

Section 9 begins at the end of Section 8 and extends thence under Lexington avenue to a point about 70 feet south of the centre line of East 79th street; with a station at East 68th and East 69th streets and a station at East 77th street.

Section 10 begins at the end of Section 9 and extends thence under Lexington avenue to a point about 50 feet south of the centre line of East 93d street; with a station at East 86th street.

Section 11 begins at the end of Section 10 and extends thence under Lexington avenue to a point about 70 feet south of the centre line of East 106th street; with a station at East 96th street and a station at East 102d and East 103d streets.

Section 12 begins at the end of Section 11 and extends thence under Lexington avenue to a point about 115 feet south of the centre line of East 118th street; with a station at East 110th and East 111th streets and a station at East 116th street.

Section 13 begins at the end of Section 12 and extends thence under Lexington avenue to a point about 120 feet south of the centre line of East 129th street; with a station at East 125th street.

Section 14 begins at the end of Section 13 and extends thence under Lexington avenue, private property and the Harlem River to a point in private property in the Borough of The Bronx, thence under private property and Park avenue to East 135th street. Here the line divides into two branches. The west branch begins at about the centre line of East 135th street and extends thence under private property to a point in private property a distance of about 655 feet from the centre line of East 135th street and about 50 feet west of the centre line of Mott avenue. The east branch extends under Park avenue and partly under private property to about the intersection of the easterly line of Mott avenue with the westerly line of Park avenue.

Section 15. This section consists of two branches. The west branch begins at the end of the west branch of Section 14 and extends thence under East 138th street, private property and Mott avenue, Franz Sigel Park, private property and the several cross streets to a point in private property on the easterly side of River avenue about 120 feet south of the south line of East 157th street; with a station at East 138th street and East 149th street. (The portion of this section north of East 151st street is part of the River Avenue Route adopted by the Commission

on the 16th day of June, 1908.) The east branch begins at the end of the east branch of Section 14 and extends thence under Park avenue, private property, Canal Street West and East 138th street to a point in East 138th street about 150 feet easterly of the centre line of Alexander avenue, with a station between 3d and Alexander avenues.

The general plan of construction calls for a subsurface railroad having two tracks between Battery Park and Chambers street in Manhattan, and four tracks from Chambers street, in Manhattan, to 135th street and Park avenue in The Bronx, with the branches in The Bronx having in the main three tracks each. Turnouts, cross-overs, connections, sidings, loops, etc., will be constructed, all of which are more particularly indicated on the contract drawings.

For Section 14 two plans, designated Type H and Type K, respectively, have been prepared. The bidders for such section may submit a proposal for either or both of such types. After a comparison of the bids the Commission will determine which of such plans shall be adopted.

Bidders for the several sections will not be required to do the station finish work, nor to provide or lay tracks, ties or ballast.

The work of construction under the contract shall include the construction of all necessary sewers and connections, along the route of the railroad; also the necessary support, maintenance, readjustment and reconstruction of vaults adjacent to buildings, pipes, tubes, conduits, subways or other subsurface structures; the support and care, including underpinning where necessary, of all buildings, monuments, surface, subsurface and elevated railroads and other structures, etc., affected by or interfered with during the construction of the work; also the restoration of the sidewalks and the temporary paving and maintenance of roadways.

The method of construction will be partly by trench excavation (under cover, unless otherwise specified in the form of contract or permitted by the Commission), and partly by tunnel, as set forth in the forms of contract.

Bidders must examine the form of contract, specifications, maps and plans; must visit the location of the work and inform themselves of the present conditions along the line thereof and make their own estimates of the facilities and difficulties attending the execution of the proposed work.

A fuller description of the work to be done is set forth, and other requirements, provisions, details and specifications are stated, in the printed form of contract and in the contract drawings therein referred to. Printed copies of the forms of contract, bond and contractor's proposal, may be had on application at the office of the Commission, 154 Nassau street, Borough of Manhattan, City of New York. The contract drawings may be inspected at the same office, and copies thereof may be purchased by prospective bidders by payment of five dollars ($5) for the contract drawings for each section. The printed form of contract and the contract drawings are to be deemed a part of this invitation.

The Commission is informed by the Department of Docks and Ferries that docks and bulkheads along the East River may be available for dumping purposes. Information in regard thereto may be obtained by any intending bidder upon inquiry at the office of the Commission.

Partial payments to the Contractor will be made monthly as the work proceeds, as provided in the form of contract.

The Contractor for any section or sections will be required to complete the work as soon as practicable and within the time hereinafter prescribed for such completion.

Sealed bids or proposals will be received at the office of the Commission at 154 Nassau street, Borough of Manhattan, City of New York, until the 27th day of October, 1910, at twelve (12) o'clock noon, at which time, or at a later date to be fixed by the Commission, the proposals will be publicly opened.

Proposals must be in the form prescribed by the Commission, copies of which may be obtained at the office of the Commission.

A statement, based upon the estimate of the Engineer, of the quantities of the various classes of the work and of the nature and extent as near as practicable of the work required for each section, is to be found in the schedules forming a part of the form of Contractor's Proposal. The quantities given in such schedules are approximate only, being given as a basis for the uniform comparison of bids and no claim is to be made against the City on account of any excess or deficiency, absolute or relative, in the same, except as provided in the specifications and form of contract.

All proposals must, when submitted, be enclosed in a sealed envelope endorsed: "*Proposal for Constructing Rapid Transit Railroad—Route* 5, *Section* —*," and must be delivered to the Commission or its Secretary; and in the presence of the person submitting the proposal, it will be deposited in a sealed box in which all proposals will be deposited. No proposal will be received or deposited unless accompanied by a separate certified check for each section bid upon, drawn upon a national or state bank or trust company having its principal office in The City of New York, satisfactory to the Commission and payable to the order of the Comptroller of The City of New York for the amount herein specified for the section for which a proposal is made. Such check must not be enclosed in the envelope containing the proposal.

The Unit Prices must not be improperly balanced, and any bid which the Commission considers detrimental to the City's interests may be rejected.

No proposal, after it shall have been deposited with the Commission, will be allowed to be withdrawn for any reason whatever.

The award of the contract or contracts will be made by the Commission as soon as practicable after the opening of the proposals.

Bidders whose proposals are otherwise satisfactory, in case the sureties named by them are not approved by the Commission, may substitute in their proposals the names of other sureties approved by the Commission, but such substitution must be made within five days after notice of disapproval, unless this period is extended by the Commission.

A bidder whose proposal shall be accepted shall, in person or by duly authorized representative, attend at the said office of the Commission within ten days after the delivery of a notice by the Commission that his proposal is accepted and that the contract is consented to by the Board of Estimate and Apportionment, and such bidder shall then deliver a contract in the form referred to, duly executed and with its execution duly proved.

At the time of the delivery of the contract, the Contractor will be required to furnish security to the City by giving a bond for the amount hereinafter stated. The Contractor's bond must be in the form annexed to the form of contract.

In addition and as further security to the City, ten (10) per cent. of the amount certified from time to time to be due to the Contractor will be retained until the work is fully completed and accepted.

Schedule Indicating Time Allowed for Completion, the Amount of Bond and the Amount of Certified Check for Each of the Several Sections.

Route 5.	Time for Completion, Months.	Amount of Bond.	Amount of Certified Check.
Section 1	42	$500,000 00	$15,000 00
Section 2	42	600,000 00	15,000 00
Section 2A	42	250,000 00	10,000 00
Section 3	42	300,000 00	10,000 00
Section 4	36	300,000 00	10,000 00
Section 5	42	300,000 00	10,000 00
Section 6	42	350,000 00	10,000 00
Section 7	42	350,000 00	10,000 00
Section 8	42	300,000 00	10,000 00
Section 9	42	300,000 00	10,000 00
Section 10	42	300,000 00	10,000 00
Section 11	42	300,000 00	10,000 00
Section 12	42	400,000 00	12,500 00
Section 13	42	400,000 00	12,500 00
Section 14	42	500,000 00	15,000 00
Section 15	42	500,000 00	15,000 00

In case of failure or neglect to execute and deliver the contract or to execute and deliver the required bond, such bidder will, at the option of the Commission, be deemed either to have made the contract or to have abandoned the contract. In the latter case, the Commission will give notice thereof to such defaulting bidder, and the Commission may thereupon proceed to make another contract with such, if any, of the original bidders, as, in the opinion of the Commission, it will be to the best interests of the City to contract with, or may by new advertisement invite further

proposals. The defaulting bidder shall thereupon be liable to the City for all loss and damage by it sustained, including the excess, if any, of the amount it shall pay any other Contractor over the amount of the bid of such defaulting bidder.

---

*To be filled in with the Section number for which the proposal is made.

If the Commission shall give notice to any bidder that his or its proposal is accepted and that the contract is consented to by the Board of Estimate and Apportionment, and if the bidder shall fail within ten days thereafter or within such further period, if any, as may be prescribed by the Commission, to execute and deliver the contract and to execute and deliver the bond with sureties, then this Invitation to Contractors and proposal accepted as aforesaid shall be a contract binding the bidder to pay to the City the damage by it sustained by reason of such failure, and in such case the bidder shall, by the terms of the proposal, absolutely assign to the City the ownership of the check accompanying his or its proposal as a payment on account of such damages.

All such deposits made by bidders whose proposals shall not be accepted by the Commission will be returned to the person or persons making the same within five days after the contract shall be executed and delivered. The deposit of the successful bidder will be returned when the contract is executed and its provisions as to security are complied with.

The right to reject any and all bids is reserved.

New York, September 1, 1910.

PUBLIC SERVICE COMMISSION FOR THE FIRST DISTRICT, by William R. Willcox, Chairman; Travis H. Whitney, Secretary.

Rapid Transit Railroad.

Contract—Route No. 5. Section No. 6.

Agreement, made this............day of.................., 1910, between The City of New York, hereinafter called the City, acting by the Public Service Commission for the First District, hereinafter called the Commission, party of the first part, and Bradley Contracting Co., hereinafter called the Contractor, party of the second part.

Whereas, The Commission in behalf of the City by due advertisement, pursuant to law, has invited contractors to submit to the Commission proposals for making this contract; and

Whereas, The Contractor has thereupon duly submitted to the Commission a proposal, which has been accepted; and

Whereas, The Board of Estimate and Apportionment of The City of New York has consented to this contract;

Now, therefore, in consideration of the mutual covenants and agreements hereinafter contained, and under the authority of chapter 4 of the Laws of 1891, entitled, "An Act to provide for Rapid Transit Railways in Cities of over One Million Inhabitants," and of the various acts amending the same, the parties do hereby, the City for itself and its successors and the Contractor for itself, its successors and assigns, agree each with the other as follows:

I.—General Provisions and Definitions.

Outline of Contract.

Article 1. The Contractor agrees to construct the part hereinafter described of a Rapid Transit Railroad, with its appurtenances. The City agrees to pay to the Contractor the sums of money hereinafter mentioned at the times and in the manner and upon the terms and conditions hereinafter set forth.

Brief Description of Works.

Article 2. The Railroad to be constructed under this contract forms a part of a certain route adopted by the Board of Rapid Transit Railroad Commissioners for The City of New York on May 12, 1905, and which, as modified, is known as the Lexington Avenue Route—or Route No. 5. The part to be constructed under this contract consists of Section No. 6.

Section No. 6—26th Street to 40th Street.

Beginning at a point about 140 feet north of the centre line of 26th street; thence under Lexington avenue to the centre line of 40th street; with stations at East 27th and 28th streets, and East 34th street.

The precise location of the tracks, and the dimensions and other characteristics of the Railroad are more fully stated in the specifications forming a part of this contract, and in the detailed drawings and plans hereinafter mentioned.

Statutes Incorporated Herein.

Article 3. This contract is made pursuant to the Rapid Transit Act, which is to be deemed a part hereof as if it were incorporated herein.

Marginal Notes, etc.

Article 4. Titles, headings, running headlines and marginal notes are printed hereon merely for convenience and shall not be deemed to be any part of this contract for any purpose whatever.

Definitions of Words.

Article 5. The following words and expressions used in this contract shall, except where by the context it is clear that another meaning is intended, be construed as follows:

"City."

(1) The word "City" to mean The City of New York, and any other corporation or division of government to which the ownership, rights, powers and privileges of The City of New York, under the Rapid Transit Act, shall hereafter come, belong or appertain.

"Commission."

(2) The word "Commission" to mean the Public Service Commission for the First District, and any other board, body, commission, official or officials, to which or to whom the powers now belonging to the said Commission in respect to the location, construction, equipment, maintenance and operation of Rapid Transit Railroads under the provisions of the Rapid Transit Act shall, by virtue of any act or acts, hereafter pass or be held to appertain.

"Contractor."

(3) The word "Contractor" to mean the party of the second part to this contract, and its successors, and any and every person or corporation who or which shall at any time be liable in the place or for the party of the second part to perform any obligations under this contract assumed by the said party of the second part. For convenience the Contractor is hereinafter referred to as if the Contractor were an individual. The word "he" shall, as the sense may require, include "it," "she" and "they;" the word "him" shall include "her," "it" and "them;" and the word "his" shall include "its," "her" and "their."

"Comptroller."

(4) The word "Comptroller" to mean the Comptroller of The City of New York, and the officer or board to whom or to which his powers now existing under the Rapid Transit Act shall come to appertain.

"Engineer."

(5) The word "Engineer" to mean the Chief Engineer of the Commission or his duly authorized representative and any successor or successors duly appointed or any deputy or substitute for him who shall be appointed by the Commission or by its authority.

"Rapid Transit Act."

(6) The words "Rapid Transit Act" to mean chapter 4 of the Laws of 1891 as amended by chapters 102 and 556 of the Laws of 1892, chapters 528 and 752 of the Laws of 1894, chapter 519 of the Laws of 1895, chapter 729 of the Laws of 1896, chapter 616 of the Laws of 1900, chapter 587 of the Laws of 1901, chapters 533, 542, 544 and 584 of the Laws of 1902, chapters 562 and 564 of the Laws of 1904, chapters 599 and 631 of the Laws of 1905, chapters 472, 606 and 607 of the Laws of 1906, chapter 429 of the Laws of 1907, chapter 498 of the Laws of 1909, and chapters 205, 504, 505 and 506 of the Laws of 1910, or as heretofore otherwise amended.

"Railroad."

(7) The word "Railroad" to mean the part which the Contractor agrees by this contract to build, together with the station or stations to be built in conjunction therewith, and all appurtenances thereto which are to be constructed or provided by the Contractor.

"The Works."

(8) The words "the Works" to mean all of the matters and things herein agreed to be furnished or done by or on the part of the Contractor.

"New York."

(9) The words "New York" to mean The City of New York according to its boundaries at the date of this contract.

"Daily Newspaper."

(10) The words "daily newspaper" to mean any paper regularly published in New York on every day or every day except Sundays and holidays.

"Notice." "Direction."

(11) The word "notice" to mean a written notice. The word "direction" to mean a written direction.

Wherever in the specifications or upon the drawings the words "directed," "required," "permitted," "ordered," "designated," "prescribed" or words of like import are used, it shall be understood that the direction, requirement, permission, order, designation or prescription of the Engineer is intended, and similarly the words "approved," "acceptable," "satisfactory" or words of like import shall mean approved by or acceptable or satisfactory to the Engineer.

Legal Address of Contractor. Address May be Changed. Service Upon Contractor Personally.

Article 6. The address given in the bid or proposal, upon which this contract is founded, is hereby designated as the place where all notices, directions and other communications to the Contractor shall be certified, mailed or delivered. The delivering at the above-named place or depositing in a post-paid wrapper directed to the above place, in any post office box regularly maintained by the Post Office Department, of any notice, letter or other communication to the Contractor, shall be deemed sufficient service thereof upon the Contractor. Such address may be changed at any time by an instrument in writing executed and acknowledged by the Contractor and delivered to the Commission. Nothing herein contained shall be deemed to preclude or render inoperative the service of any notice, direction or other communication upon the Contractor personally.

Contractor Responsible for Acts of Subcontractor's Employees.

Article 7. If the Contractor shall cause any part of this contract to be performed by a subcontractor, the provisions of this contract shall apply to such subcontractor and his officers, agents and employees in all respects, as if he and they were employees of the Contractor; and the Contractor shall not be in any manner thereby discharged from his obligations and liabilities hereunder, but shall be liable hereunder for all acts and negligence of the subcontractor, his officers, agents and employees as if they were employees of the Contractor. The employees of the subcontractor shall be subject to the same provisions hereof as employees of the Contractor; and the work or materials furnished by the subcontractor shall be subject to the provisions hereof, as if furnished directly by the Contractor.

Commission May Disapprove Subcontractors.

Article 8. The Contractor, before making any subcontract of the work, shall state in writing to the Commission the name of the proposed subcontractor, the portion of the work which such subcontractor is to do or the materials which such subcontractor is to furnish, the place of business of such subcontractor and such other information as the Commission may require. The Commission shall have the right to require the Contractor not to award any subcontract to a person, firm or corporation disapproved of by the Commission.

II.—Work to be Done, Price, Etc.

Work to be Done.

Article 9. The Contractor shall do all the work and furnish all the materials, plant, tools and appliances necessary or proper for performing and completing the work of constructing the railroad in the manner and within the time hereinafter specified. He shall complete the railroad and do all the work and furnish all labor and materials in and about the construction of the railroad to the satisfaction of the Commission and in accordance with this contract and the specifications and drawings herein mentioned at the prices herein agreed upon and fixed therefor; provided, however, the said contract drawings may from time to time be altered or modified as hereinafter provided.

Construction Includes Sewer and Other Incidentals.

Article 10. In order to construct the railroad it will be necessary to take up and relay the sidewalk pavement or other surface material, and to lay and maintain a temporary pavement in the roadway, to protect, support and maintain during construction all buildings and other structures, including their foundations, and all elevated and surface and subsurface railroads, water mains, gas pipes, electric subways, poles and wires, pneumatic tubes, steam pipes, vaults, including vaults of abutting property, and other surface, subsurface and overhead structures, together with their necessary connections, as the same may be met with along the route; to build sewers both along the route and other streets; to make or remake the necessary manholes, catch basins

and other sewer connections therewith; to move, alter, readjust or rebuild water mains, gas pipes, electric subways, pneumatic tubes, steam pipes, vaults, including vaults of abutting property, and other subsurface structures, together with their necessary connections; and to do all such additional and incidental work as may be necessary for the completion of the railroad and the reconstruction and restoration of the street pavements or other surfaces (except as herein provided in respect of temporary pavements for roadways), adjacent to the route of the railroad and which may have been directly or indirectly disturbed or injured by the Contractor in the progress of the work of construction, to as useful and good a condition as existed before construction shall have been begun. All such work of every description, including underpinning wherever necessary, of all buildings or structures of whatsoever nature, monuments, elevated railroads and surface and subsurface railroads affected by or interfered with during the construction of the railroad, is part of the work which is included in this contract and which the Contractor agrees to perform for the prices herein agreed upon.

Prices.

Article 11. The City will pay and the Contractor shall receive in full compensation for furnishing the necessary plant and all the materials and labor, and for performing and completing all the work which is necessary or proper to be furnished or performed in order to complete the railroad (including all incidental work) and also for all loss or damage arising out of the nature of the work aforesaid, or from the action of the elements or from any unforeseen obstruction or difficulty encountered in the prosecution of the work, and for all risks of any description connected with the work, and for all expenses incurred by or in consequence of the suspension or discontinuance of the work as herein specified, the following prices, to wit:

Schedule of Unit Prices.

Item 1. For earth excavation above mean high water (except excavation for sewers and pipes), including the disposal of it, etc., the sum of three dollars and fifty cents ($3.50) per cubic yard.

Item 2. For earth excavation below mean high water (except excavation for sewers and pipes), including the disposal of it, etc., the sum of seven dollars and fifty cents ($7.50) per cubic yard.

Item 2-A. For earth excavation, both above and below mean high water, for sewers and pipes, including the disposal of it, etc., the sum of five dollars ($5.00) per cubic yard.

Item 3. For rock excavation (except excavation for sewers and pipes), including the disposal of it, etc., the sum of five dollars ($5) per cubic yard.

Item 3-A. For rock excavation for sewers and pipes, including the disposal of it, etc., the sum of six dollars ($6) per cubic yard.

Item 4. For underpinning buildings, including all incidental work and material, as follows:

(a) For buildings less than seven (7) stories in height the sum of one hundred and fifty dollars ($150) per linear front foot of building underpinned.

(b) For buildings from seven (7) to twelve (12) stories in height the sum of two hundred dollars ($200) per linear front foot of building underpinned.

Item 5. For tunnel excavation (except tunneling for sewers), including the disposal of material, timbering, etc., the sum of nine dollars ($9) per cubic yard.

Item 5-A. For tunnel excavation for sewers, including the disposal of material, timbering, etc., the sum of twenty dollars ($20) per cubic yard.

Item 6. For concrete masonry, in place, the sum of ten dollars ($10) per cubic yard.

Item 7. For protective concrete masonry, in place, outside of waterproofing, the sum of eight dollars ($8) per cubic yard.

Item 8. For rubble stone masonry, in place, the sum of eight dollars ($8) per cubic yard.

Item 9. For brick masonry, in place, the sum of fifteen dollars ($15) per cubic yard.

Item 10. For hollow terra cotta brick masonry, in place, the sum of fifteen dollars ($15) per cubic yard.

Item 11. For grout of Portland cement, the sum of four dollars and fifty cents ($4.50) per barrel of Portland cement used.

Item 13. For timber foundations, placed and fastened, the sum of seventy-five dollars ($75) per thousand feet, board measure.

Item 14. For broken stone or gravel, in place, other than that used in concrete, the sum of two dollars and fifty cents ($2.50) per cubic yard.

Item 15. For waterproofing, treated woven fabric, laid with pitch or asphaltum, in place, as follows:

(a) For one-ply, the sum of seventy-five cents ($0.75) per square yard.

(b) For two-ply, the sum of one dollar ($1) per square yard.

(c) For three-ply, the sum of one dollar and fifty cents ($1.50) per square yard.

(d) For four-ply, the sum of one dollar and seventy-five cents ($1.75) per square yard.

(e) For five-ply, the sum of two dollars ($2) per square yard.

(f) For six-ply, the sum of two dollars and fifty cents ($2.50) per square yard.

Item 16. For waterproofing, brick laid in asphalt mastic, in place, the sum of thirty dollars ($30) per cubic yard.

Item 17. For vitrified or cast iron drain pipe, in place, as follows:

(a) For twelve (12) inch vitrified pipe, the sum of one dollar and seventy-five cents ($1.75) per linear foot.

(b) For ten (10) inch vitrified pipe, the sum of one dollar and fifty cents ($1.50) per linear foot.

(c) For eight (8) inch vitrified pipe, the sum of one dollar and twenty-five cents ($1.25) per linear foot.

(d) For six (6) inch vitrified pipe, the sum of one dollar ($1) per linear foot.

(e) For four (4) inch vitrified pipe, the sum of seventy-five cents ($0.75) per linear foot.

(g) For six (6) inch cast iron pipe, the sum of one dollar and fifty cents ($1.50) per linear foot.

(h) For four (4) inch cast iron pipe, the sum of one dollar ($1) per linear foot.

Item 18. For tunnel ducts in place as required by section 305 of the specifications, the sum of fifteen cents ($0.15) per duct foot.

Item 19—For riveted steel, painted and erected, the sum of ninety dollars ($90) per ton of two thousand pounds.

Item 20. For steel beams and shapes with connections, painted and erected, the sum of eighty dollars ($80) per ton of two thousand pounds.

Item 21. For steel rods and bars built in concrete, the sum of sixty-five dollars ($65) per ton of two thousand pounds.

Item 24. For cast iron columns, erected and painted, the sum of seventy-five dollars ($75) per ton of two thousand pounds.

Item 25. For miscellaneous iron castings, other than tunnel lining, such as manhole heads and covers, gratings, etc., but not including castings for sewer work or pipes, in place, the sum of seventy-five dollars ($75) per ton of two thousand pounds.

Item 26. For wire mesh, in place, the sum of ten cents ($0.10) per pound.

Item 27. For one and one-half (1½) inch galvanized iron pipe hand-rail, in place, including expansion bolts, etc., the sum of one dollar and twenty-five cents ($1.25) per linear foot.

Item 28. For steel gratings, for ventilation, in place, including frames, etc., the sum of two dollars and fifty cents ($2.50) per square foot.

Item 29. For vault light, in place, the sum of two dollars ($2) per square foot.

Item 30. For street surface restored:

(a) For street surface, except roadways, the sum of three dollars ($3) per square yard.

(b) For temporary restoration and maintenance of roadways, the sum of three dollars ($3) per square yard.

Item 32. For wrought-iron or fibre electric conduits, in place, in stations as follows:

(a) For three-fourths (¾) inch wrought-iron conduits, the sum of thirty cents ($0.30) per linear foot.

(b) For one and one-half (1½) inch wrought-iron conduits the sum of forty-five cents ($0.45) per linear foot.

(c) For two (2) inch wrought-iron conduits the sum of sixty cents ($0.60) per linear foot.

(d) For two (2) inch fibre conduit the sum of fifteen cents ($0.15) per linear foot.

Item 33. For cast-iron outlet boxes, in place, in stations, the sum of one dollar ($1) each.

Item 34. For six (6) inch cast-iron pipe and fittings including specials "extra heavy" in place, in stations, the sum of two dollars and fifty cents ($2.50) per linear foot.

SEWERS—ITEMS 38, 39, 42, 45, 57, 58, 60, 64, 66.

Vitrified and Cast-Iron Pipe.

Items 38, 39, 42.

Item 38. For fifteen (15) inch vitrified pipe sewer, the sum of six dollars ($6) per linear foot.

Item 39. For eighteen (18) inch vitrified pipe sewer, the sum of seven dollars ($7) per linear foot.

Item 42. For cast-iron sewer pipe (straight pipe) in place in the work, the sum of fifty dollars ($50) per ton of two thousand pounds.

Egg-Shaped Brick or Concrete Sewers.

Item 45.

Item 45. For 3 feet 6 inch by 2 feet 4 inch, the sum of fifteen dollars ($15) per linear foot.

Circular Sewers—Brick or Concrete or Reinforced Concrete.

Items 57, 58, 60, 64, 66.

Item 57. For 5-foot 6-inch, the sum of twenty-two dollars ($22) per linear foot.

Item 58. For 5-foot 6-inch, in tunnel, the sum of forty dollars ($40) per linear foot.

Item 60. For 6-foot, the sum of twenty-five dollars ($25) per linear foot.

Item 64. For 8-foot, the sum of thirty-five dollars ($35) per linear foot.

Item 66. For 9-foot 6-inch, the sum of forty dollars ($40) per linear foot.

Sewers of Special Forms.

Items 71 *to* 72.

Item 71. For triple section, the sum of one hundred dollars ($100) per linear foot.

Item 72. For 4-foot wooden barrel, the sum of seventy-five dollars ($75) per linear foot.

Surface and Subsurface Structures.

Item 75.

Item 75. For street surface railroads, including the support, reconstruction, rebuilding, etc., where necessary (but not including permanent masonry supports, if required and added, and not including additional vaults, if required and constructed, in excess of the number existing), as follows:

(a) For electric railroads, the sum of eighteen dollars ($18) per linear foot of single track.

(b) For horse railroads, the sum of five dollars ($5) per linear foot of single track.

PIPES IN STREETS—ITEMS 78 TO 122.

For Work and Material as Called for by Section 71 *of the Specifications.*

Water and Gas Pipes.

Items 78 *to* 96.

Water Pipes.

Items 78 *and* 79.

For water pipes in place, as follows:

Item 78. For 4-inch water pipe, the sum of one dollars and twenty-five cents ($1.25) per linear foot.

Item 79. For 6-inch water pipe, the sum of one dollar and fifty cents ($1.50) per linear foot.

GAS PIPES.

Items 90 *to* 96.

For gas pipes in place, as follows:

Item 90. For 4-inch gas pipe, the sum of one dollar ($1) per linear foot.

Item 91. For 6-inch gas pipe, the sum of one dollar and twenty-five cents ($1.25) per linear foot.

Item 92. For 8-inch gas pipe, the sum of one dollar and fifty cents ($1.50) per linear foot.

Item 94. For 12-inch gas pipe, the sum of two dollars ($2) per linear foot.

Item 95. For 16-inch gas pipe, the sum of two dollars and twenty-five cents ($2.25) per linear foot.

Item 96. For 20-inch gas pipe, the sum of two dollars and fifty cents ($2.50) per linear foot.

New Cast-Iron Hub and Spigot Water and Gas Pipe.

Items 100 *and* 101.

Item 100. For new cast-iron hub and spigot straight pipe delivered on the work, the sum of forty dollars ($40) per ton of 2,000 pounds.

Item 101. For new cast-iron hub and spigot pipe, special castings, delivered on the work the sum of seventy dollars ($70) per ton of two thousand pounds.

AIR PIPES.

Item 122.

For air pipe in place, as follows:

Item 122. For 8-inch air pipe, the sum of two dollars ($2) per linear foot.

ELECTRIC DUCTS AND CONDUITS IN STREETS.

(Other than tunnel ducts and street railroad ducts which are provided for in Items 18 and 75-a.)

Item 127. For electric ducts and conduits in place, as provided in section 71-a of the Specifications, the sum of twenty-five cents ($0.25) per duct foot.

Work Not Susceptible of Classification.

Article 12. In case any work or materials shall be required to be done or furnished in or about the works—whether specified herein or indicated on the plans or not—which are not susceptible of classification under the Schedule of Unit Prices, the Contractor shall and will if ordered by the Engineer do and perform such work and furnish such materials at and for the actual and necessary net cost in money to the Contractor for labor and for material, where new material is used, and in addition thereto ten per centum (10%) of such net cost for the use of tools and plant, superintendence and all other expenses incidental to the performance of such work and the furnishing of such material, and the Contractor shall have no further claim in excess of the above, but this method of payment shall not apply to the performance of any work or the furnishing of any material which in part or in whole is susceptible of classification under such schedule, which work or material shall be paid for in part or in whole, as the case may be, at the unit price given in such schedule, except as otherwise herein expressly provided.

In case any work or material shall be required to be done or furnished under the provisions of this article, for cost plus ten per centum (10%), the Contractor shall at the end of each day during the progress thereof furnish to the Engineer daily time slips showing the name and number of each workman employed thereon, the number of hours employed thereon, the character of work he is doing and the wages paid or to be paid to him and also a daily memorandum of the material delivered on the work showing the amount and character of such material, from whom purchased and the amount paid or to be paid therefor. If required, the Contractor shall produce any books, vouchers, records or memorandum showing the work and materials actually paid for and the actual prices therefor.

Quantities Approximate Only.

Article 13. It is expressly understood and agreed that the quantities of the various classes of work to be done and materials to be furnished under this contract, specified in the Contractor's Proposal, are approximate and only for the purpose of comparing, on a uniform basis, the bids offered for the works under this contract; and neither the City, nor the Commission, nor any member of the Commission, is to be held responsible that any of the said estimated quantities shall, by reason of inaccuracies, or changes in the works, be found even approximately correct in the construction of the works; and the Contractor shall make no claim for anticipated profit, or for loss of profit, because of a difference between the quantities of the various classes of work actually done or materials actually delivered, and the estimated quantities stated in the Contractor's Proposal.

Right of Commission to Amplify Plans.

Article 14. The Commission shall have the right, during the progress of the work, to amplify the plans, to add explanatory specifications and to furnish additional specifications and drawings.

Plans May be Modified.

Article 15. The Commission further reserves the right to change the location and to alter, in any way it may deem necessary for the public interest, the drawings aforesaid, in part or altogether, at any time during the progress of the work, without constituting grounds for any claim by the Contractor for payment or allowance for damages

or extra service other than is provided for items of the different classes of construction shown in the schedule, or where not susceptible of classification, then as otherwise provided herein.

Contractor Bound to Complete in Best Manner.

Article 16. The Contractor shall complete the entire work in accordance with the specifications and contract drawings and according to the other provisions of this contract and within the times specified in this contract, in the most workmanlike manner and with the highest regard to the safety of life and property and according to the lines, levels and directions given by the Engineer, for the prices herein agreed upon.

Best Materials, Machinery, Tools, etc., to be Used.

Article 17. The Contractor shall furnish of the best description all materials, machinery, implements, tools and labor necessary to construct and put in complete working order all work covered by the specifications, contract drawings and provisions of this contract, including all additional specifications, drawings and details issued or required as herein provided for the prices hereinbefore agreed upon.

Contractor Has Examined Location, Plans, etc.

Article 18. The Contractor hereby represents that prior to the execution of this contract he has examined in detail on the ground the location mentioned herein and indicated on the plans, and that he has fully examined the plans and has read each and every clause and section of this contract and the specifications and has had full opportunity to consider the same and make necessary investigations relating thereto; and he agrees that he will not make any claim for, or have any right to, damages or an extension of time for completion of the works, or any other concession, because of any misinterpretation or misunderstanding of this contract or the specifications or of the plans, or because of any lack of information.

No Acceptance to Obviate the Necessity for Sound Work, etc.

Article 19. No acceptance of any part of the works or of materials therefor shall relieve the Contractor of his obligation to furnish sound material and perform sound work, whether with respect to such part or to any part of the works.

Inspection.

Article 20. The Commission contemplates, and the Contractor hereby approves, the most thorough and minute inspection by the Commission and its Engineer, and by their representatives or subordinates of all work and materials and of the manufacture or preparation of such materials from the beginning of construction to the final completion of the works. It is the intention of the Commission that its Engineer shall draw the attention of the Contractor to all errors or variations from the requirements of this contract or other defects in workmanship or materials. But it is expressly agreed that no omission on the part of the Commission or its Engineer or any officer, member or subordinate of the Commission to point out such errors, variations or defects shall give the Contractor any right or claim against the City or shall in any way relieve the Contractor from his obligations according to the terms of this contract.

Contractor to Afford Facilities for Inspection.

Article 21. The Contractor shall at all times give to the Commission and its members, to the Engineer and his assistants and subordinates, and any person designated by the Commission or its Chairman, all facilities, whether necessary or convenient, for inspecting the materials to be furnished and the work to be done under this contract. The members of the Commission, the Engineer and all employees of the Commission bearing his authorization or the authorization of the Commission or its Chairman, shall be admitted at any time summarily and without delay to any part of the works or to inspection of materials at any place or stage of their manufacture, preparation, shipment or delivery.

Engineer to be Furnished Facilities.

Article 22. The Engineer shall be furnished with every reasonable facility for ascertaining whether the work is in accordance with the requirements and intention of this contract, even to the extent of uncovering or taking down portions of finished work. Should the work thus exposed or examined prove satisfactory, the uncovering or taking down and the replacing of the covering or the making good of the parts removed shall be paid for at the contract prices for the class of work done; but should the work exposed or examined prove unsatisfactory, such uncovering, taking down, replacing and making good shall be at the expense of the Contractor.

Inspection Not to Relieve Contractor of Obligations.

Article 23. The inspection of the work shall not relieve the Contractor of any of his obligations to fulfill his contract as herein prescribed, and defective work shall be made good and unsuitable materials will be rejected, nothwithstanding that such work and materials have been previously overlooked by the Engineer and accepted or estimated for payment. If the work, or any part thereof, shall be found defective before the final acceptance of the whole work, the Contractor shall forthwith make good such defect, in a manner satisfactory to the Engineer, and if any material brought upon the ground for use in the work, or selected for the same, shall be condemned by the Engineer as unsuitable or not in conformity with the specifications, the Contractor shall forthwith remove such materials.

Engineer's Determination to be Final and Conclusive Upon Contractor.

Article 24. To prevent disputes and litigations, the Engineer shall in all cases determine the amount, quality, acceptability and fitness of the several kinds of work and materials which are to be paid for under this contract; shall determine all questions in relation to the works and the construction thereof, and shall in all cases determine every question which may arise relative to the fulfillment of this contract on the part of the Contractor. His determination and estimate shall be final and conclusive upon the Contractor, and in case any question shall arise between the parties hereto, touching this contract, such determination and estimate shall be a condition precedent to the right of the Contractor to receive any money under this contract.

Engineer to Explain.

Article 25. The Engineer shall make all necessary explanations as to the meaning and intention of the specifications, shall give all orders and directions contemplated therein or thereby and in every case in which a difficult or unforeseen condition shall arise in the performance of the work required by this contract.

Other Contractors.

During the progress of the work it will be necessary for other contractors and persons to do work in or about the construction or equipment of the railroad. The Contractor shall afford to such other contractors or persons such facilities as the Engineer may require.

Differences Between Contractor and Other Contractors.

Any differences or conflicts which may arise between the Contractor and other contractors of the Commission in regard to their work shall be adjusted and determined by the Engineer.

Substitute for Chief Engineer.

Article 26. Any engineer substituted by the Commission in place of the Chief Engineer during his absence, illness or inability or when the Commission shall so determine, shall, during his official connection, have all the power and authority of the Chief Engineer, and in all respects be recognized as such Chief Engineer.

III.—SPECIFICATIONS.

Specifications and Drawings Subject to Requirement of Railroad of Highest Class. Where Text of Contract Doubtful, Best Materials and Workmanship Required.

Section 1. The specifications and contract drawings hereinafter mentioned and taken in connection with the other provisions of this contract. are intended by the Commission to be full and comprehensive, and to show all the work required to be done. But in a work of this magnitude it is impossible either in advance to show all details, or precisely to forecast all exigencies The specifications and contract drawings are to be taken, therefore, as indicating the amount of work, its nature and the method of construction so far as the same are now distinctly apprehended. The Railroad is intended to be constructed for actual use and operation as an interurban railroad of the highest class, adapted to the necessities of the people of New York, in the best manner, according to the best rules and usages of railroad construction, and in the event of any doubt as to the meaning of any portion or portions of the specifications or contract drawings, or of the text of the contract, the same shall be interpreted as calling for the best construction, both as to materials and workmanship, capable of being supplied or applied under the then existing local conditions. All the clauses of the specifications, and all the parts of the contract drawings, are, therefore, to be understood, construed and interpreted as intending to produce the results hereinbefore stated.

To Construct in Accordance With Specifications.

Section 2. The Contractor shall construct and complete the Railroad strictly in accordance with the requirements of these specifications; if, in the specifications or contract, any detail or other matter or thing requisite be not mentioned, nevertheless the same is deemed to be included and the Contractor hereby undertakes to do the same as part of the work hereunder, at the unit prices for each class ofwork where applicable or as provided in Article XII. of the contract.

Maps and Drawings.

Section 3. The contract plans referred to in the contract and specifications bear date June 15, 1910, are each countersigned by the Engineer, are stamped with the seal of the Commission, bear the general title:

Route No. 5.

Contract Drawing No.

and are designated or numbered as follows:

For Section 6. Route No. 5.

Drawings as follows:

General Notes; Maps and Profile; Nos. A8; B13, B14, B15, B101, B102; C1 to C18 inclusive, C401, C1001, C1002, C1003, C1010, C1011, C1013, C1014, C1015, C1032.

Plans and Contract Drawings.

Section 4. The sections and dimensions shown on the contract drawings are typical sections and dimensions which should be applicable to the greater part of the work. Where, however, changes are deemed necessary they may be ordered under Article XV. of the contract and the Engineer shall issue such plans and specifications as may be necessary.

Supplementary Drawings.

Section 5. In addition to the contract drawings already mentioned, the Commission has had prepared a set of maps and plans, bearing the same seal and general title as the contract drawings, but designated as supplementary drawings. These supplementary drawings exhibit certain information which the Commission has received from its Engineer of the nature of the soil underlying portions of the route, the nature and position of elevated and surface railways, water mains, gas and other pipes, sewers, electric subways, manholes, hydrants, catch basins and other surface and subsurface structures.

Supplementary Drawings May be Examined.

Section 6. These supplementary drawings, for each section of the work, can be seen at the office of the Engineer, also samples of material taken in connection with test borings. They are exhibited to the Contractor without any guarantee on the part of the Commission as to their completeness or correctness. The Contractor may have copies (blue prints) of these drawings for one or more of the sections, for such aid, if any, as may be derived from them, on the payment of the cost of printing.

In Case of Difficulties Not Indicated on Supplementary Drawings.

Section 7. If, upon opening the streets, by tunneling or otherwise, difficulties of any nature be encountered which are not indicated or suggested by the supplementary drawings, or by the samples of the test borings, or if additional surface or subsurface structures or obstructions be discovered or found of different size or in different positions or of different nature from those shown on the supplementary drawings, or if any way such supplementary drawings be found erroneous, the Contractor shall take every necessary or proper precaution to overcome the unforeseen difficulty, and is to support, maintain, protect, remove, adjust or readjust, as the case may be, the additional or different surface or subsurface structures according to the direction of the Engineer, and as provided in this contract and these specifications.

Specifications Not Exclusive.

Section 8. It is expressly understood that the specifications do not include all requirements, but are requirements in addition to those heretofore or elsewhere given or provided in this contract. The specifications and other provisions of this contract, and the contract drawings, are intended to be explanatory of each other. Should, however, any discrepancy appear or any misunderstanding arise as to the import of anything contained in either, the explanation of the Engineer shall be final and conclusive.

Section 9. These specifications are grouped in subdivisions as follows:

1. Description of the Work. 2. General Clauses. 3. Manner of Prosecution and Maintenance of Traffic. 4. Street Railroad Tracks, Mains and other Surface or Subsurface Structures. 5. Excavation. 6. Tunneling. 7. Backfilling. 8. Piling and Timbering. 9. Cement. 10. Mortar. 11. Masonry. 12. Concrete. 13. Brick Masonry. 14. Stone Masonry. 15. Waterproofing. 16. Steel and Iron. 17. Painting. 18. Ducts and Conduits. 19. Drains and Pumps. 20. Sewers. 21. Requirements for Pipes. 22. Street Surface and Park Surface Restored. 23. Vault Lights, Gratings and Hand-rails.

1—Brief Description of the Work.

General Nature.

Section 10. The Rapid Transit Railroad which is hereinbefore described is to be an underground railroad or subway, the general details of construction and the location of the various tracks, junctions, grades, etc., being indicated more particularly on the contract drawings.

Stations to be Constructed.

Section 11. Stations are to be constructed at such places as are indicated on the plans, but station finish work is not included in the work to be done under this contract. Station construction must, however, be kept so advanced that station finish contractors can complete their work coincidently with the completion of the Railroad.

Surface and Subsurface Structures.

Section 12. In addition to the construction of the Railroad, it will be necessary to do various incidental work which is generally referred to in Article X hereof.

Ventilating Chambers and Gratings.

Section 13. In order to provide for a frequent renewal of air in the Railroad, chambers for the installation of necessary ventilating devices shall be built at the sides of the Railroad and in connection therewith. These chambers shall be generally of the form and dimensions as shown on the plans, varying somewhat with the requirements of local conditions. They will be so arranged that the air will discharge through gratings placed generally in the sidewalks in the roofs of the chambers. If, owing to local conditions, it becomes necessary to lead the air to gratings or other outlets away from the chambers, suitable air-ways, ducts or flues shall be constructed.

The chambers will be built at the places and as indicated on the plans.

Section 14. Other openings with gratings will be built at or over the stations, for the purpose of admitting air to the Railroad.

Section 15. The chambers will be provided with suitable doors or openings, and with ladders reaching to the street for use as exits in case of emergency.

2—General Clauses.

Prevention of Water Percolation.

Section 16. It is the very essence of these specifications to secure a railroad structure underground which shall be free from the percolation of ground or outside water. The mixing and placing of the concrete and the placing and protection of the waterproofing shall be with this end in view.

Best Quality of Work.

Section 17. All materials and workmanship must be of the best class in every respect, and the Engineer is to be the sole judge of their quality and efficiency.

Rapidity and Safety.

Section 18. All the work shall be prosecuted in the manner, according to local conditions, best calculated to promote rapidity in construction, to secure safety to life and property and to reduce to the minimum any interference with abutting property and the public travel. Decking of the streets, paving, or other surface work affecting, or affected by, street traffic shall be prosecuted during such hours as will reduce such interference to a minimum. Night work shall be conducted, in accordance with the directions of the Engineer, so that annoyances to occupants of abutting property shall be reduced to a minimum, and the Engineer may, if in his judgment conditions so require, direct that night work be omitted.

Contract Section Part of System.

Section 19. The contract section embraced in this contract is one of a number of contract sections forming part of an extensive rapid transit railroad system,

which the interests of the City imperatively require should be completed and put in operation without delay. If the Contractor shall fail so to prosecute his work that, in the judgment of the Engineer, it shall not be reasonablly probable that the work will be completed within the time limited, the Contractor, if directed by the Commission, shall increase the number of shifts and the number of men in each shift as may be necessary to insure the completion of the work within the time required by this contract, or within the shortest possible time thereafter.

Emergencies.

Section 20. In case of emergencies involving danger to life or property, continuous work with an increased force may be ordered by the Engineer for such time as may be necessary.

Permits.

Section 21. No work shall be begun until the Commission shall issue to the Contractor a permit authorizing him to proceed. No permits for excavation will be issued until the Contractor has given satisfactory assurance to the Engineer that the material needed for construction has been acquired and is available. Such permits are to be in such form and to cover such portions of the work as the Commission shall prescribe.

When to be Filed with Borough President.

Section 22. Before any opening is made in the surface of a street. a copy of the permit issued by the Commission shall have been filed with the Borough President not less than five days, unless the Engineer shall expressly direct work to begin within a less period.

Notice Regarding Commencement of Work.

Section 23. Before commencing work on any part of the route, whether on the Railroad or on the sewers lying off the line of the Railroad, the Contractor shall give notice in writing to the Engineer at least one (1) week in advance of his intention to commence such operations; and before commencing manufacture, or resuming manufacture, if the same has been suspended, of any article called for by these specifications, notice shall be given to the Engineer in writing at least one (1) week in advance, with the name and address of the maker and the amount and description of the material to be manufactured.

Shafts and Dumping Platforms.

Section 24. Plans showing the proposed location, and proposed methods of construction, of shafts, dumping platforms, etc., shall be submitted to the Engineer and receive his approval before permits will be granted for such plant and appliances to be constructed and put in operation.

Ordinances and Regulation.

Section 25. In all operations connected with the Works, all ordinances of the City, and of the Board of Health. so far as they may be valid and operative with respect thereto, and all laws of this State which are now applicable to and control or limit in any way the actions of those engaged in the work or affecting the materials belonging to them, shall be respected and strictly complied with, and the Contractor shall further strictly comply with all applicable Federal, State and Municipal regulations regarding the transportation in and around the City and Harbor of materials used in, or in connection with, the work.

Requirements of Borough President, etc., to be Observed.

Section 26. Whenever the construction of the Works under the provisions of this contract shall interfere with, disturb or endanger any sewer, water pipe, gas pipe, or other duly authorized subsurface structure, the work of construction at such points shall be conducted in accordance with the reasonable requirements of the Borough President or the Commissioner of Water Supply, Gas and Electricity or other officer or local authority having the care of and the jurisdiction or control over such subsurface structures so interfered with, disturbed or endangered.

Building and Water Permits; Shut-offs for Water Pipes, etc.

Section 27. The Contractor shall procure all permits necessary or requisite for the underpinning of buildings and the reconstruction thereof; he shall, at his own cost, provide for the water supply necessary for his work and he shalll bear the cost of the service of inspectors required by any municipal department or other public authority in or about the execution of the work other than the inspectors or the employees of the Commission. He shall bear the expense absolutely necessary in the bagging of gas pipes where it is necessary to cut off the supply of same and

of the shutting off and restoration of the flow in water mains where such work applies to the maintenance and support thereof as provided in section 70 of the specifications.

Storage on Cross Streets.

Section 29. No material of any nature shall be stored along the streets occupied by the Railroad in Manhattan or on 138th street, in The Bronx. On cross streets adjacent to the work, only such material may be stored as may be necessary, in case of an emergency, to sheet or to support the excavation; or a reasonable amount of such structural material as may be absolutely necessary to avoid delay in construction may be stored; such material must not be allowed to accumulate, but must be replenished from day to day. The amount to be so allowed shall be determined by the Engineer.

Material Stored.

Section 30. Excavated sand, gravel or stone that in the judgment of the Engineer is suitable for use in mortar, concrete, or masonry, also structural and other material to be used in the work, may be stored in such locations and for such periods as are approved by the Engineer.

Approval of Engineer Revocable.

Section 31. In any case material may only be so stored with the approval of the Engineer, revocable at any time; and if so ordered, such material shall be removed immediately on receipt of the order, or within a period of time to be therein stated.

Access to Fire Hydrants.

Section 32. Wherever the work is being carried on, free access must be given to every fire hydrant and fire alarm box, and when required hydrants shall be extended by suitable tube or piping to an accessible point as approved by the Engineer, and to the satisfaction of the Chief of the Fire Department. Materials must not be piled at any time or place within ten (10) feet of any fire hydrant or fire alarm box; and where materials are unavoidably piled or placed in the vicinity of a fire hydrant or fire alarm box, and to such height as to obscure a sight of the same, the position of such hydrant or fire alarm box shall be indicated by suitable signals, both day and night.

Work to be Cleared.

Section 33. At his own expense and as directed from time to time by the Engineer, the Contractor is to clear the work, streets and all public places occupied by him of all refuse and rubbish that may accumulate from any source whatever and leave them in a neat condition.

Assistance to be Rendered to Owners of Buildings.

Section 34. Where access to any adjacent property is temporary cut off, owing to the occupancy of the street by the Contractor, he must, at his own cost. tender every assistance to the owner or occupant in handling such materials of any description, including all material to be removed by the Department of Street Cleaning, that has to be taken to or removed from such property; such material shall be taken to or from the nearest accessible point that in the opinion of the Engineer is convenient for handling.

Waste Material.

Section 35. Waste material of any character will under no conditions be permitted to remain on the streets, but must immediately on its becoming unfit for use in the work be carted away and disposed of by the Contractor as hereinbefore provided; nor shall such materials be allowed to accumulate in the trenches.

Conveniences for Men.

Section 36. Necessary conveniences, properly secluded from public observation, shall be constructed and maintained by the Contractor at his own expense, wherever needed for the use of the Contractor's employees, to the satisfaction of the Engineer and the sanitary authorities.

Fences.

Section 37. Wherever necessary the Contractor shall erect and maintain at his own expense fences for the protection of adjoining property and of the adjoining public places.

Advertisements Forbidden.

Section 38. The using of fences and buildings during construction for advertising purposes, other than the name and address of the Contractor, is forbidden; all temporary buildings and fences erected by the Contractor shall be neat in appearance and shall be painted as directed by the Engineer.

Barricades.

Section 39. Barricades and bridges shall be erected by the Contractor at his own cost, for the protection of the work or use of the public; they shall be substantial in character and neat in appearance.

Detailed Drawings.

Section 40. The Engineer will prepare and furnish to the Contractor, from time to time as required, drawings and plans amplifying such details of the contract drawings as may be necessary, and drawings and plans necessary to show the adjustment and reconstruction of all surface and subsurface structures wherever the reconstruction of the same is necessitated by the construction of the railroad. These plans must be strictly followed, unless local conditions should develop, during construction, suggesting changes, when, with the approval of the Engineer, such changes may be permitted.

Working and Shop Drawings.

Section 41. The Contractor shall make all working or shop drawings which may be required in addition to the contract drawings, or in addition to such other drawings as the Commission may issue in amplification of such contract drawings. as explained above. All working or shop drawings shall be submitted in duplicate to the Engineer for his approval, which approval shall be indicated by his countersigning one set of such working or shop drawings and returning the same to the Contractor. Should the working or shop drawings be not approved by the Engineer, then the Engineer shall return one set of such working or shop drawings, with the necessary corrections and changes indicated thereon; and the Contractor must make such corrections and changes, and again submit plans in duplicate for the approval of the Engineer; and no work called for by said working or shop drawings shall be done until the approval of the Engineer be obtained, which must be given or refused within ten (10) working days after delivery to him at his office of such plans in duplicate.

Lines and Grades.

Section 42. During the progress of the work the Commission will give, through the Engineer, to the Contractor, suitable points, marks or benches, indicating the line and grade of the Railroad and of the sewers; such points or bench marks to be established at such intervals as the Engineer deems necessary for the Contractor to be able to perform his work. The principal lines and grades are to be given by the Engineer, who may change them from time to time as may be authorized and directed by the Commission. The stakes and marks given by the Engineer shall be carefully preserved by the Contractor, who shall give to the Engineer all necessary assistance and facilities for establishing benches and plugs for making measurements.

Notice, How Given.

Section 43. When the Contractor is absent from any part of the work where it may be necessary to give instructions, orders will be given by the Engineer to, and shall be received and promptly obeyed by, the superintendent or overseer of the Contractor, who may have charge of the particular work in relation to which the orders are given, and a confirmation in writing of such orders will be given to the Contractor by the Engineer if so requested.

Imperfect Work.

Section 44. Any imperfect construction which may be discovered before the final acceptance of the work, shall be corrected immediately on the requirement of the Engineer and at the Contractor's expense, notwithstanding that it may have been overlooked by the proper inspector.

Damaged Work to be Replaced.

Section 45. All work of whatever kind which during its progress and before its final acceptance shall become damaged from any cause, so much of it as may be objectionable shall be broken up or removed and be replaced by good and sound work at the Contractor's expense.

Condemned Materials to be Removed.

Section 46. If any material brought on the ground for use in the work or selected for the same shall be condemned by the Engineer as unsuitable or not in conformity with the specifications, the Contractor shall forthwith remove such materials as may be directed by the Engineer.

Competent Men.

Section 47. The Contractor shall employ only competent, skillful and faithful men to do the work. Whenever the Engineer shall notify the Contractor in writing that in his opinion any man on the work is incompetent, unfaithful or disorderly, such man shall be discharged from the work and shall not again be employed on it.

3—MANNER OF PROSECUTION AND MAINTENANCE OF TRAFFIC.

Access to Buildings, etc.

Section 48. No building shall, without the consent of the occupant, and after notice to the Engineer, be deprived of means of access thereto; and, where streets are open suitable bridges shall be built and maintained, at the Contractor's expense, to permit owners and occupants to reach their premises. Where necessary, proper and easy means for passengers to reach or leave street cars shall be maintained.

Wharves and Docks.

Section 50. For that portion of the route adjoining wharves and docks the work must be so prosecuted as to permit free access to neighboring wharves and docks.

Contiguous Contract Sections.

Section 50-a. On the division line of contiguous contract sections, the Engineer will decide any matters in the details of construction within a limit of ten feet on either side of the line where the work of contractors may be in conflict, and direct which of the contractors shall complete the details of construction within such limits.

Other Portions of the Route.

Section 51. Generally the Contractor will be permitted to conduct its work in the most expeditious manner possible, having due regard for the safety of persons and property and facilities for traffic and under such instructions as the Engineer may give from time to time.

Facilities for Travel.

Section 52. All necessary facilities are to be furnished by the Contractor for the benefit of street travel, both in longitudinal and cross streets.

Decking of Streets and Sidewalks.

Section 53. In order to provide the minimum interference with traffic and the minimum inconvenience to abutting property owners, during the construction of the Railroad, on all parts of the work when the excavation is in trench the streets and sidewalks shall, except as hereinafter specifically provided, be substantially decked or covered over, and every precaution must be taken to keep traffic free from interruption.

Street Intersections.

Section 61. The street intersections, except in cases where open trench excavation without cover is permitted, shall be kept at all times open for traffic for their full width. The street intersections in cases where open trench excavation without cover is permitted must be kept at all times open to traffic for at least one-half the width of the cross roadway, except that cross roadways in which surface railroads are located shall be kept at all times open to traffic for their full width.

Where portions of a street intersection are opened the same shall be substantially and neatly bridged for foot traffic. In all cases the Contractor shall at all times keep all the street crossings on the lines of the sidewalks in a clean and neat condition, bridging gutters and low places where water might collect.

Close Observance of Above Requirements.

Section 62. The Commission will insist upon the close observance of the above requirements, and no departure therefrom will be allowed, excepting upon the written permission of the Commission.

Openings for Ventilation.

Section 63. Wherever the excavations are decked, where gas pipes are maintained in service or where gases are liable to accumulate, suitable openings shall be provided for proper ventilation, or the Contractor may maintain services by temporary mains above the street decking.

Temporary Pipes, etc.

Section 64. Temporary pipes, if laid above the street or sidewalk surfaces, shall be neatly and substantially placed, and in a manner to cause the minimum of inconvenience to the abutting property owners and to the public.

In General.

Section 65. In general, work will, as provided herein, be carried on under covered roadways. In exceptional cases, however, where rock is within a few feet of the street or sidewalk surface, it may be impracticable to operate drills while the street is covered, until a sufficient depth of excavation has been obtained. In such cases such latitude will be allowed the Contractor as may prove absolutely necessary for the execution of its contract, and as the Engineer with the approval of the Commission may deem advisable, after a thorough understanding of the exact conditions and necessities has been determined.

4—STREET RAILROAD TRACKS, MAINS AND OTHER SURFACE OR SUBSURFACE STRUCTURES.

Notice to be Given.

Section 66. Notice is to be given by the Contractor to all companies and the proper City officials, owning or having charge of surface or subsurface structures along any part of the work. of his intention to commence operations along such part of the route, at least one (1) week in advance, and the Contractor shall file with the Engineer at the same time a copy of said notice; and he shall co-operate with the proper officers or officials in charge of such structures and shall furnish them with all reasonable facilities to inspect the methods of caring for their property.

Plans Furnished.

Section 67. In the rearrangement of subsurface structures requiring removal and relaying or reconstruction due to interference with the railroad structure a tentative plan will be made by the Engineer, which will be submitted to the parties interested; if any reasonable changes are then requested by any of the said parties within ten days after the submission of the tentative plan, such changes will then be made, if, in the judgment of the Engineer they will best conserve the interest of all parties concerned; a further plan will then be made which, on the approval of the Engineer, will be final.

Reconstruction or Relaying, etc.

Section 68. Whenever it becomes necessary to cut, move, change, or reconstruct any surface or subsurface structures, or connections therewith, such work shall be done according to the reasonable satisfaction of the owners of such pipes or other structures.

Reasonable Dispatch.

Section 69. All work of reconstruction or alteration shall be done with reasonable dispatch, and facilities are to be provided so that said work will interfere as little as possible with the practical working and use of such structures.

Maintenance, Support, etc.

Section 70. The Contractor shall at all times, by suitable bridging or other supports, maintain and support in an entirely safe condition for the usual service and to the reasonable satisfaction of the owners, all surface and subsurface structures encountered during the prosecution of his work. All surface and subsurface structures and surfaces of whatever character along the line of the work shall be protected from injury, but should any injury occur the Contractor shall fully restore such surface or subsurface structures or surfaces to as good a condition as existed before the injury was done. All the above, including also all changes of surface or subsurface structures made by the Contractor for his own convenience in executing his work, shall be done at the Contractor's own expense and included in the prices stipulated in the schedule for excavation except as otherwise herein specifically provided.

Necessary Permanent Changes of Pipes.

Section 71. Changes of water, gas, steam or other pipes made necessary because of physical interference with the railroad structure, and requiring the removal, relaying or reconstruction of such pipes and their appurtenances in other than the original position, will be paid for at the prices stipulated in Schedule Items 77 to 99, Items 102 to 106, Items 109 to 114, Items 121 to 122, and Item 125. These prices are per linear foot of pipe laid including all work, labor and material incidental to such laying, excepting that:

(1) If new pipes have to be provided and are ordered by the Engineer, such new pipes will be paid for in addition to the price paid for laying, etc., at the prices stipulated in Schedule Items 100 and 101, Items 107 and 108, Items 115 to 120, Items 123 and 124, and Item 126, which prices are to cover the cost of the new pipes delivered on the work.

(2) If the pipes in their new locations are outside of the ordered net lines for excavation for the railroad structure, necessitating additional excavation and restora-

tion of street surface, such excavation will be paid for at the prices stipulated in Schedule Items 2-A and 3-A (which prices shall include all the matters referred to in Section 107), and for restoration of street surface, Item 30-A and B, but only to the net lines ordered by the Engineer for excavation for such pipe work.

Necessary Permanent Changes of Electric Conduits and Ducts.

Section 71-a. Changes of electric conduits or ducts and their appurtenances found in the streets (other than street railway ducts, payment for which is provided for in Schedule Item 75-A), made necessary because of physical interference with the railroad structure, and requiring the removal, relaying or reconstruction in other than the original position, will be paid for at the price stipulated in Schedule Item 127. The price per duct foot as provided in Schedule Item 127 is to include the cost of all ducts in place; of all manholes, vaults, service boxes and their appurtenances; of drawing cables and providing new cables where necessary; of the proper restoration of all services that may be affected by the changes in the duct lines; of such excavation and restoration of street surface as may be necessitated by the changes in the duct lines, and all other work and material incidental to and necessary for the completed duct lines.

Surface and Elevated Railroads.

Section 72. The Contractor shall maintain and support, in a manner that will cause the minimum interference with traffic, all surface, subsurface and elevated railroads along the line of or crossing the line of the work.

Surface Railroads.

Section 73. The Contractor shall maintain and support, both temporarily and permanently, in a safe condition all street surface railroads (including steam railroads), including ducts, cables and all other appurtenances of such railroads; he shall rebuild either in their original or in new locations all parts of such surface railroads, including ducts, cables and all other appurtenances of such railroads, whose reconstruction or rebuilding may be necessitated by the construction of the work. Payment therefor will be at the rates specified in the Schedule for electric railroad, Item 75-A, or for horse railroad, Item 75-B, which prices will include the cost of all work incidental thereto. Where permanent masonry supports are required and added, and where additional vaults in excess of the number existing are required and constructed to give equivalent facilities, they will be paid for at the prices given in the Schedule for the several classes of work or material applicable thereto.

Elevated Railroads.

Section 74. The Contractor shall maintain and support both temporarily and permanently in a safe condition all elevated railroad structures. Payment therefor will be at the rate specified in Schedule Item 76, which price will include the cost of all incidental work, including the reconstruction and building where necessary of all column foundations and parts of column foundations lying without the net lines of the subway structure.

Subsurface Railroads.

Section 75. The Contractor shall support and maintain both temporarily and permanently in a safe condition all subsurface railroads and their appurtenances. Payment therefor shall be deemed included in the prices for excavation, Schedule Items 1, 2 and 3.

Facilities to be Given to Make Extensions.

Section 76. In the event of the owners or the City desiring to make any alteration or extension to their structures, or do any work to or in connection with surface or subsurface structures owned by them or it, at the time the work under this contract is in progress, the Contractor shall give said owners or the City all reasonable opportunity to perform such work; provided such work or alteration for the benefit solely of the owners of subsurface structures does not cause the Contractor any serious loss or delay, as shall be determined by the Commission.

Parks and Parkways, Trees, etc.

Section 77. In any park or parkway, or where any grass plots or trees exist along any street occupied by the Contractor, proper precautions must be taken to protect from injury all such trees or grass plots. For every tree removed, injured or destroyed, the Contractor shall set out a new thrifty tree of the same kind as the tree removed, injured or destroyed, and not less than fifteen (15) feet in height and not less than three and one-half (3½) inches in diameter measured two feet above the surface of the ground, and in such position as the Commissioner of Parks shall indicate. All roads, cross-paths, grass plots, shrubbery and other plants

removed or affected by the construction of the railroad, shall be restored as soon as possible to as good a condition as existed before the commencement of the work.

Replanting Under Direction of Park Commissioner.

Section 78. In replanting trees and the replanting of grass plots the Contractor must be governed by the reasonable requirement of the Commissioner of Parks or by other authorities specially charged with the care of these trees or grass plots, and the nature and depth of the soil to be placed therein must be approved by such authorities and by the Commission.

Payments, How Made.

Section 79. Payment for all work covered by Sections 77 and 78 shall be included in the prices paid for Park or Street Surface Restored, Schedule Items 31 or 30.

5—EXCAVATION.

Width of Excavation.

Section 80. Special care must be taken to avoid damage wherever excavation under cover is being done or where open excavation is permitted. The width of such excavation shall not exceed the width actually necessary, in the opinion of the Engineer, for the proper prosecution of the work. All excavations shall be of such width, in addition to that of the railroad, as shall be necessary in the opinion of the Engineer for the proper and expeditious progress of the work, and to permit the laying and readjusting of all sewers, mains, subways and other subsurface structures encountered along the route and contiguous to the railroad.

Depth of Trenches.

Section 81. Trenches shall be excavated to such depth, both in soft ground and in rock, as may be necessary to permit the laying of such concrete bed or special foundation as may be deemed necessary by the Engineer.

Sides to be Secured.

Section 82. The sides of the excavations shall be secured against slips by suitable sheet piling or sheeting, held in place by braces, shores or walling timbers, special precautions being taken where there is additional pressure, due to the presence of buildings or other structures. Where a movement of the ground might cause the settlement of an adjacent building, the sheeting must be started, if near the building, before the elevation of the bottom of the foundation of the building is reached; if away from the building, at such depth of the excavation as the Engineer may permit; and the excavation must not be made in advance of or below the bottom of the sheeting.

Filling Back of Sheeting.

Section 83. Sheeting shall be driven wherever possible, but when it is placed against the sides of the excavation, the spaces or voids back of the sheeting must be immediately and carefully filled with suitable material to prevent as far as possible the natural ground back of the sheeting from moving.

Buildings Underpinned.

Section 84. To secure adjacent ground or the buildings thereon, or to prevent bringing an unusual pressure on the structure when completed, the Contractor shall secure the sides of the excavation by suitable timbering, and shall safely and permanently underpin adjacent buildings. As part of this obligation the Contractor shall use such methods of construction or underpinning, pneumatic or otherwise, as special conditions may require and the Engineer shall approve.

Payment For.

Section 86. Where underpinning of a building is necessary and the work is done as provided in Section 84, payment will be made to the Contractor as, and at the price, provided in Schedule Item 4. The classification as to the number of stories has reference to the number of stories above the surface of the street.

Sheeting.

Section 87. No payment shall be made to the Contractor for sheeting left in the ground or in the work, unless the Engineer shall in writing require it to be left in, in which case payment shall be made to the Contractor for the sheeting so left in as measured by the Engineer, and at one-half the current market price for new material of the same grade, character and dimensions, and without any allowance or payment for placing the same or the expense thereof. This section applies only to the sheeting in trench work.

Timber for Temporary Purposes.

Section 88. All timber used for sheeting, shoring, bracing, decking or other temporary purposes, shall be sound and free from any defects that may impair its strength. It shall be provided, placed and removed at the Contractor's own cost and expense. The top or wearing surface of all decking used for carriageways shall be of hard yellow pine, sound, straight and free from all shakes, and large loose knots. All sheeting and timber used temporarily shall be put in place by skilled mechanics, keyed tight by wedges where necessary, and so arranged as to be withdrawn readily without endangering the adjoining soil.

Vaults of Abutting Property.

Section 89. The cost of the removal, where necessary, of all walls or other parts of vaults of abutting property along the line of the railroad that are within the ordered net lines of excavation is to be included in earth excavation as provided in Section 102, but the restoration of all such walls or other parts of vaults within the ordered net lines of excavation will be paid for at the unit prices specified in the Schedule applicable to the several classes of work and material involved in such restoration.

The above is not to be construed, however, as applicable to any work beyond the ordered net lines of excavation, which shall be at the Contractor's own cost and expense.

Vaults Disturbed.

Section 90. Wherever vaults are broken through or otherwise disturbed, the Contractor shall, at his own cost and expense, erect a temporary partition on or about the building line, or as directed, that will afford proper protection to the owner or occupant of the adjoining premises.

Rock.

Section 91. Ledge rock in place, and boulders within the ordered line of excavation requiring blasting, will be considered as rock excavation.

Preparations for Rock Measurement.

Section 92. Whenever rock is encountered in the trench, it shall be stripped of earth in sections of not less than 20 feet; and the engineer in charge shall be duly notified, in order that he may measure or cross-section the same.

Blasting.

Section 93. Whenever rock or material requiring blasting is encountered in any trench or tunnel, all necessary precautions must be exercised by the Contractor, as required by the ordinances of the City relative to blasting. Explosives shall be used only of such character and strength as may be permitted by the Commission, and the right is reserved for the Engineer to direct that in special cases ordinary blasting powder only, in small charges, shall be used. Blasting shall not be done between the hours of 11 p. m. and 7 a. m. without the express permission of the Engineer, and under such restrictions as he may impose.

Storage of Explosives.

Section 94. No larger quantity of explosives shall be kept on the line of the work than will be actually required for the twelve (12) hours of work next ensuing, and it shall be kept under lock, the key to which is to be only in the hands of the foreman or other equally trustworthy person. The amount of explosives kept in any one place shall not exceed the limit permitted by any ordinance of the City, or as may be determined by the Commission. Caps and exploders shall not be kept in the same place with dynamite and other explosives. During freezing weather, special precautions shall be taken as to the care and manipulation of dynamite.

Near Pipes and Mains.

Section 95. Whenever any pipe or main is encountered in or alongside of the trench, right is reserved to direct that all rock within five (5) feet of the same shall be removed by means other than blasting.

General Precautions in Blasting.

Section 96. In rock excavation in the trenches for the railroad the work must be so regulated as to avoid, as far as possible, shattering the rock beyond the established line for excavation.

Blasting.

Section 97. Generally the central portion of the excavation must, when directed by the Engineer, be kept some distance in advance of the excavation near the sides,

and if the rock, owing to its general character and structure, has a tendency to break large, or the strike and dip of the stratification indicate a liability to slip or slide into the excavation, the Contractor must place the drill holes at close intervals on the established lines for excavation, in order to avoid excessive excavation and to preserve the established lines thereof.

Pumping.

Section 98. Whenever water is encountered in trenches, the same shall be removed by bailing or pumping, great care being taken when pumping that the surrounding particles of soil be not disturbed or removed. If necessary to prevent such disturbance, the pumping must be done by a series of driven wells whose points are protected by fine wire cloths, the rate of flow at each well being made so slow as not to remove the particles of soil; or the pumping must be done by other means approved by the Engineer. The delivery from all pumps shall be conducted into the adjacent sewers, and the delivery pipes shall be so arranged as to be readily inspected at all times to ascertain if the water is free from particles of soil.

Carts to be Tight.

Section 99. All carts, buckets or other vehicles used by the Contractor for the removal of material, shall be tight and so arranged and so loaded as not to spill over. Whenever a cart, bucket or other vehicle so used is leaky or unsuitable, it shall be immediately withdrawn from the work on notification by the Engineer, or his duly qualified assistant, in charge of that portion of the work.

Removed Expeditiously.

Section 100. Excavated material shall be removed expeditiously and disposed of, in any place selected by the Contractor, subject to the ordinances and regulations of the City authorities governing the disposal of such material, and the regulations of the United States Government as to the disposal or dumping of material in and about or near the Harbor of New York.

When Excavated Material May be Taken by the City.

Section 101. If at any time during the course of construction the City shall desire for City purposes any part of the material excavated, and the cost of such disposal shall not exceed the cost to the Contractor of the method in which he is then disposing of it, the Commission may order such material dumped or turned over to the City at a point designated without cost to the City.

Earth Excavation, Definition of.

Section 102. Earth excavation includes the excavation of all materials of whatever nature encountered in the trenches, excepting ledge rock in place and boulders requiring blasting.

Excavation in Trenches, How Measured.

Section 103. The net outside width of the railroad structure, as ordered and indicated on the plans, and the depth, also as ordered and as indicated on the plans, will govern as to width and depth in the measurements for payment for excavation. No deduction from the volume of excavation determined as above, will be made on account of basements or cellars in property acquired by the City for the construction of the railroad or on account of vault space or of spaces occupied by pipes and other subsurface structures.

No Allowance Outside of Ordered Net Lines.

Section 104. There will be no measurement or allowance made nor money paid for excavation outside (below or wider than) the net measurement lines as above indicated, or in rock excavation, for irregularities of surface; and no allowance shall be made for any excess excavation caused by slips or slides. It is understood and agreed that for all such matters the Contractor has estimated and allowed in the unit prices of the schedule.

Change of Street Grade.

Section 105. Where the contract drawings indicate that the grade of any street is to be raised the Contractor shall fill in the street to the changed grade as required and such work shall be measured and paid for at the price stipulated for earth excavation, Schedule Item 1.

Payment for Excavation.

Section 106. Excavation shall be paid for at the price or prices given in Schedule Items 1 and 2 for excavation in earth and Item 3 for excavation in rock.

Prices for Excavation to Include.

Section 107. The prices herein stipulated for excavation, Schedule Items 1, 2 and 3, are to include the cost of the disposal of the materials excavated, of backfilling, of all decking and bridging, of all sheeting and bracing, and of maintaining and supporting of trenches during and after excavation, of all pumping or bailing, and of the maintenance, support, etc., of all surface and subsurface structures of whatever nature, payment for the maintenance and support of which is not herein elsewhere specifically provided for.

6—TUNNELING.

How Lined.

Section 108. All tunnels shall be lined with steel or cast iron and concrete, or with concrete or brick masonry.

Where tunnels are lined with concrete or brick work without metal tubes, proper provisions shall be made for keeping the tunnels dry by the use of drains, and by other methods as elsewhere provided.

Packing.

Section 109. The space between the extrados of the arch or back of the sidewalls and the rock or other materials of excavation, shall be filled with concrete to a height of two feet above the spring line of the arch—above this concrete the space shall be filled with dry masonry packing. Similarly in the tunnel floor, if concrete is used, all loose muck shall, if directed by the Engineer, be removed to the solid rock and the space filled in with concrete up to the bottom line of the section ordered by the Engineer for tunnel excavation and concrete. All such concrete or other packing, being outside of the net section line for excavation as ordered by the Engineer, shall be at the sole expense of the Contractor.

Grout.

Section 110. After the tunnel lining and packing is in place, if required by the Engineer, a grout, consisting of one (1) part fine, clean and sharp sand and one (1) part Portland cement, shall be pumped in under pressure, from time to time behind the masonry, so as to completely fill all the voids. Where tunnels are made by the use of a shield, similar grout shall be pumped in to completely fill the space left by the tail piece of the shield as soon as the shield is moved forward.

Payment for Grout.

Section 111. Where grout is ordered and used, it shall be paid for at the price herein provided, Schedule Item 11.

Lines for Excavation.

Section 112. The tunnel, at any place, is to be excavated to the line of the cross-section ordered by the Engineer for that place.

No Payment for Excavation Beyond Ordered Lines.

Section 113. All loose or shaky rock, whose fall or settlement might, in the judgment of the Engineer, produce an unequal or concentrated pressure on the masonry, shall be removed, and the space refilled with such class of masonry as the Engineer may require and as provided in Section 109, but no payment will be made for any excavation outside of the cross-section of the tunnel excavation ordered by the Engineer, as provided in Section 112.

Blasting.

Section 114. Drilling and blasting must be conducted with all possible care and in such a manner as not to shatter the roof and sides outside of the section lines, as ordered by the Engineer, nor endanger adjoining property.

Drains.

Section 115. All seams carrying water shall be carefully drained, as specified under the clauses relating to drainage.

Precautions Against Settlement.

Section 116. The Contractor must take every precaution, and such precautions as the Engineer may direct, by suitable shields, timbering, lagging or other supports, to prevent any settlement or movement of surrounding ground. Such timber as cannot be drawn without endangering the work or the ground above, shall be left in place and thoroughly surrounded by masonry and grouted.

Timbering.

Section 117. Timbering shall be used wherever necessary to support the materials or to secure the safety of the work or workmen. It will be at the sole expense of the Contractor and included in the contract price for tunnel excavation, Schedule Item 5. Wherever practicable it shall be removed before the concrete lining or concrete or other packing is placed.

Compressed Air.

Section 118. If for the work under the Harlem River and for the approaches thereto or elsewhere on the work a method is adopted requiring the use of compressed air, a plant must be provided of sufficient capacity to insure at all times and under all conditions an ample supply of air to prosecute the work with safety and dispatch, and proper air locks shall be built with safety locks, in addition to provide for the escape of workmen at time of accident.

Methods to be Approved.

Section 119. All methods of tunneling shall be subject to the approval of the Engineer, and be changed from time to time, if, in his judgment, the local conditions so require, and during construction approved methods of ventilation and lighting shall be used.

Tunneling, Payment For.

Section 120. The price per cubic yard, stipulated herein, Schedule Item 5, for tunnel excavation, is to cover all expense due to the presence of quicksand or other soft material, rotten rock, boulders, etc.; the cost of all pumping and bailing; of all timbering, and removal of same; of removing all excavated material; of all ventilation and lighting; and of all other work incident to the excavation of the tunnel. Any expense that may arise from loose or shaky rock or from falls or cave-ins, or from any unexpected obstacles, shall be borne by the Contractor. In earth sections the tunnel excavation must be large enough to permit building the masonry to the full required thickness, clear of such timbering and lagging as it may be necessary to build in. As a fair provision for such contingencies, it is assumed that the excavation will extend an average distance of one (1) foot outside the net line in the roof and sides and six (6) inches below the net line in the floor, and measurements for payment in tunnel excavation in earth will be made to those lines. It is distinctly understood, however, that no such allowances or any other allowance in tunnel excavation will be made in connection with timbering in tunnel excavation in rock.

Chambers, Drains, etc.

Section 121. Excavations for chambers, for skewbacks of arches, for sump holes, drains or for any other purpose in the tunnel, are to be measured according to the lines of the cross-sections determined by the Engineer, and paid for by the cubic yard as tunnel excavation.

Additional Enlargement.

Section 122. If after the excavation has been made of a certain size by direction of the Engineer, he is of opinion that the nature of the rock or other material is such that the form and dimensions of the masonry for which said excavation was intended must be increased, he may order an enlargement of the excavation for the purpose of building masonry of greater thickness, and the Contractor is to make such enlargement, which is to be measured according to the lines given by the Engineer, and paid for at the price per cubic yard stipulated in the schedule for tunnel excavation.

7—BACKFILLING.

Quality of Material. How Placed.

Section 128. The trenches at the sides of and over the top of the subway and wherever backfilling is necessary, shall be backfilled with sand, gravel or other good clean earth, free from perishable material and from stones exceeding six (6) inches in diameter, and not containing in any place a proportion of stone of or below that size exceeding one (1) part of stone to five (5) parts of earth. The filling shall be compacted by flooding with water or, in cases where flooding with water is not practicable it shall be compacted by ramming in layers, not exceeding six inches in depth.

Subsurface Structures. Frozen Material Not Permitted.

Section 129. Whenever pipes, sewers or other subsurface structures are met with, the filling must be carefully packed, rammed and tamped under such subsurface structures, using special tools for the purpose. No filling of trenches with frozen earth will in any case be permitted, nor will any filling be permitted over frozen material.

Sheeting Removed.

Section 130. As fast as the work of filling permits, sheeting and other timber supporting the sides of the excavation shall be carefully withdrawn, or shall be left in place, as may be directed by the Engineer, and the spaces left by the removal of such material carefully back-filled.

How Paid For.

Section 131. The cost of backfilling is to be included in the prices paid for earth and rock excavation, Schedule Items 1, 2, 2-A, 3 and 3-A.

8—PILING AND TIMBERING.

Piles.

Section 132. If in the judgment of the Engineer the ground is of such a character as to require piling, the Contractor shall drive such piles as the Engineer directs. The piles shall be of good sound pine or spruce, straight and free from shakes; they shall be not less than twelve (12) inches in diameter at the butt end, or less than six (6) inches in diameter at the point, and shall be driven to the satisfaction of the Engineer and by means of a steam hammer driver if so required by him. If necessary the points of the piles shall be protected by proper shoes, and the butts by rings or caps. Piles shall not be spliced unless permitted by the Engineer, and then in such manner as he directs. Piles shall be carefully cut off to the grade given by the Engineer.

Piles Driven in Required Location.

Section 133. Piles shall be driven in the position and manner and to the depth ordered; if driven in a wrong position or injured in any way by driving they must be withdrawn and replaced by others. After being driven they shall be cut off to a true plane for proper adjustment with capping timber or masonry.

Payment for Timber Piles.

Section 134. The price herein stipulated to be paid, per linear foot of timber piles, Schedule Item 12, is to cover the cost of furnishing, driving and preparing the piles ready for the capping timbers or masonry, and the portion cut off and removed will not be included in the length measured for payment. No test piles, guide piles, or piles other than those that are a part of the finished foundation and are included within the net width of the finished foundation will be paid for.

Concrete Piles.

Section 135. If in the judgment of the Engineer special conditions so require, piles of reinforced concrete of an approved form of construction shall be used.

Payment for Piles Other Than Timber Piles.

Section 136. Payment for piles other than timber piles will be as provided in Article XII. of the contract.

Grillage.

Section 137. Timber grillage foundations shall be built if so directed by the Engineer.

Foundation Timber.

Section 138. All foundation timber shall be of pine or spruce, or other timber permitted by the Engineer, sound and free from shakes. It shall be of such dimensions, and laid in such manner, as the special plans to be issued shall require, and held in place by spikes or good seasoned oak or locust treenails.

Foundation Timber, Measurement and Payment.

Section 139. No wastage is to be allowed for, and the estimate of the quantities of foundation timber used will be based on the amount ordered by the Engineer and placed according to his direction. Payment for foundation timber will be as provided in Schedule Item 13.

9—CEMENT.

Portland Cement.

Section 140. All cement used in the work shall be true Portland cement, by which is meant the finely pulverized product, resulting from the calcination to incipient fusion of a properly proportioned intimate mixture of argillaceous and calcareous earths or rocks, to which no addition greater than three (3) per cent. has been made subsequent to calcination.

Brand to be Approved.

Section 141. Before any cement is furnished, the brand shall receive the approval of the Engineer. Cement, to be acceptable, shall be of a well-known brand which has been in successful use for large engineering works in America for at least five (5) years, and which has an established reputation for uniform character. Preference will be given to cements which, by their records, show a tendency to maintain high strength of mortar with increased age.

Inspection.

Section 142. Cement shall be subject to inspection at the place of manufacture or on the work, and to such tests as may be ordered by the Engineer. The Engineer or his representatives shall have access at all times and places to inspect the methods of manufacture, storage and protection, and shall have liberty to inspect the daily laboratory records of tests and analyses at the cement works.

Tests.

Section 143. In general, tests will conform to the methods recommended by the Committee on Uniform Tests of Cement of the American Society of Civil Engineers. Unless otherwise directed, samples will be taken at the place of manufacture by a representative of the Engineer, and sent to the Commission's laboratory, where the tests will be made. If required, tests will be made on the individual samples, without intermixing.

Specific Gravity and Color.

Section 144. The cement shall have a specific gravity of not less than 3.10 nor more than 3.25 after being thoroughly dried at a temperature of 212 degrees Fahr. The color shall be uniform, bluish gray, free from yellow or brown particles.

Chemical Analysis.

Section 145. Chemical analyses of cement made from time to time shall show a reasonably uniform composition. Cement shall not contain more than 1.75 per cent. of sulphuric anhydride (SO_3) nor more than 4 per cent. of magnesia (MgO).

Fineness.

Section 146. The fineness of the cement shall be such that it shall leave by weight a residue of not more than eight (8) per cent. on a No. 100, and not more than twenty-five (25) per cent. on a No. 200 sieve; the wires of the sieves being respectively 0.0045 inch and 0.0024 inch in diameter.

Time of Setting.

Section 147. It shall not develop initial set in less than thirty (30) minutes unless a more quickly-setting cement is specifically required, and shall develop hard set in not less than one (1) hour nor more than ten (10) hours.

Soundness.

Section 148. Pats of neat cement, after remaining one (1) day in moist air, shall be kept in air or water of normal temperature for at least twenty-eight (28) days, or shall be exposed to an atmosphere of steam, above boiling water, in a loosely closed vessel for at least five (5) hours; and the separate parts under any of these conditions, shall remain hard without any indications of checking, cracking, distortion, disintegration or blotching.

Tensile Strength.

Section 149. Neat cement briquettes shall have at the end of one (1) day in moist air a breaking strength, per square inch of sectional area, of not less than one hundred and fifty (150) pounds; at the end of seven (7) days—one (1) day in air, six (6) days in water—of not less than five hundred (500) pounds; and at the end of twenty-eight (28) days—one (1) day in air, twenty-seven (27) days in water—of not less than six hundred (600) pounds. The strength at twenty-eight (28) days shall not be less than that at seven (7) days.

Mortar Briquettes.

Mortar briquettes, composed of one (1) part of cement and three (3) parts of standard Ottawa sand, by weight, shall have at the end of seven (7) days—one (1) day in air, six (6) days in water—a breaking strength, per square inch of sectional area, of not less than two hundred (200) pounds; and at the end of twenty-eight (28) days—one (1) day in air, twenty-seven (27) days in water—of not less than three hundred (300) pounds. The strength at twenty-eight (28) days shall show an increase of not less than fifty (50) pounds over the strength at seven (7) days.

Long-time Tests.

Section 150. Tests will be made from time to time extending over longer periods than twenty-eight (28) days. If such tests show a tendency to unsoundness or unusual reduction in strength with increased age, the Engineer shall have the right to prohibit further use of that brand and to require that another brand be substituted.

Storage During Tests.

Section 151. All cement shall be held in storage to allow ample time for tests to be made before the cement is required for use in the work.

How Contained.

Section 152. Cement shall be packed and delivered in canvas sacks or other strong, well-made packages, plainly marked with the manufacturer's brand, and sealed in an approved manner. The weights of such packages shall be uniform.

Methods of Storing.

Section 153. The Contractor shall at all times keep in store on the work, or at some point convenient thereto, an abundant supply of cement, so as to guard against possible shortage. It shall be stored in a weather-tight building, with a tight floor a proper distance above the ground, and with sufficient floor space to admit of storing each lot of cement, of not more than two hundred (200) barrels, or its equivalent, separately, so as to facilitate identification of each individual lot in case of necessity for further tests or rejection. Cement that has become partially set or otherwise damaged shall not be used.

10—MORTAR.

Cement and Sand. Mixing.

Section 154. All mortar shall be prepared from accepted cement and clean, sharp sand, approved by the Engineer. These ingredients shall be thoroughly mixed dry in the proportions as specified below; water shall then be added, so as to produce a stiff paste. Water used in mortar, grout or concrete must be clean, fresh water, no salt water being permitted. The mortar shall be freshly mixed for the work on hand, in proper boxes made for that purpose, and no mortar shall be used that has stood beyond such limit of time as may be determined by the Engineer.

How Measured.

Section 155. For purposes of mixture, three hundred and seventy-five (375) pounds of Portland cement shall be estimated at three and one-half (3½) cubic feet of volume. The proportional parts of sand and stone or gravel shall be by volume as cast into the measuring box. The proportions for brick and stone masonry shall be one (1) part cement to two (2) parts sand; for pointing, one (1) part cement and one (1) part sand; for concrete masonry, as specified under the head of concrete; and for other classes of work, as directed by the Engineer; for grout, one (1) part of cement to one (1) part of fine sand.

11—MASONRY.

Laid in Portland Cement.

Section 156. All masonry, except as otherwise specified, shall be laid in Portland cement mortar, and shall be built of the forms and dimensions shown on the plans, or as directed by the Engineer from time to time; and the system of joining or bonding ordered by the Engineer shall be strictly followed.

Water Not to Interfere With.

Section 157. Care must be taken that no water shall interfere with the proper laying of masonry in any of its parts.

Freezing Weather.

Section 158. During freezing weather such masonry only shall be built whose construction, in the judgment of the Engineer, can not be postponed, except at the cost of delaying the work. The Contractor shall provide such appliances as are necessary for heating the water and the materials used in the masonry according to the specific instructions of the Engineer.

Protected in Freezing Weather.

Section 159. During freezing weather all masonry shall be protected by a suitable covering of salt hay, canvas, tarpaulin or by such material or in such ways as may be necessary to insure it against freezing.

Hot Weather.

Section 160. During hot weather all masonry, especially concrete, shall be kept wet by sprinkling and properly covered until it has become thoroughly set and hardened.

Pointing.

Section 161. Unless otherwise permitted, every joint that is to be pointed shall be raked out, within two days after being laid, to a depth of at least two inches.

Section 162. Pointing of the face joints of masonry shall be thoroughly made with cement mortar mixed in the proportion of one (1) part of cement to one (1) part of sand, except where otherwise specially provided.

Section 163. No pointing shall be done in freezing weather, and masonry laid between December 1 and April 1 shall not be pointed until permitted by the Engineer.

Defective Masonry.

Section 164. Any masonry which is found to be defective from any cause whatsoever, before the final completion and acceptance of the work, must be removed and properly rebuilt, or if damaged during such time must be properly repaired.

Stone Cleaned.

Section 165. All stone before being laid shall be thoroughly cleaned and washed if so directed by the Engineer.

12—CONCRETE.

How Composed.

Section 166. The concrete shall be composed of gravel or broken stone, or a mixture of both, free from all dust and dirt, and mixed together with the proportion of mortar specified below.

Sand.

Section 167. Sand for concrete shall be of the kind herein specified for mortar.

Stone.

Section 168. Stone for concrete shall be sound, clean gravel, or sound, hard, broken limestone, or trap rock, or a mixture of such gravel and broken stone may be used.

Sizes of Stone.

Section 169. Broken stone or gravel for concrete shall be graded from fine to coarse, and that which is all of one size, or practically so, shall not be used. It shall be screened or washed so as to remove all dust, and it shall contain no pieces that will pass through a hole three-eighths (⅜) inch in diameter, and no pieces that will not pass through a hole one and one-half (1½) inches in diameter. Broken stone or gravel for concrete, graded as above, but between three-eighths (⅜) and three-fourths (¾) inch in diameter, may be required and used in special parts of the work.

Rubble Concrete.

Section 170. In concrete, where the thickness is thirty (30) inches or more, if permitted by the Engineer, the Contractor may embed in the same pieces of sound stone whose greatest diameter does not exceed twelve (12) inches and whose least diameter or thickness is not less than three-quarters (¾) of the greatest diameter. These stones shall be set by hand in the concrete as the layers are being rammed, and so placed that each stone is completely and perfectly embedded. No two (2) stones shall be within six (6) inches of each other and no stones within four (4) inches of an exposed face, nor shall any such stone be placed nearer than six (6) inches to any metal built in the concrete for reinforcing the same.

Proportions.

Section 171. The proportions of cement, sand and stone (or gravel) used in making concrete shall be as follows:

Section 172. Concrete in floor, sidewalls and roof one (1) part of cement, two (2) parts of sand and four (4) parts of stone. Concrete for tube tunnels under the Harlem River will be as indicated on the plans.

Section 173. Protective concrete outside of waterproofing lines on sides and roof, one (1) part of cement, four (4) parts of sand and eight (8) parts of stone.

Mixing by Machine.

Section 174. Whenever practicable, concrete shall be machine mixed. A rotary machine of a pattern approved by the Engineer, and mixing only one batch at a time, shall be used.

Mixing by Hand.

Section 175. When concrete is mixed by hand the stone or gravel shall be spread on a platform in a bed about six (6) inches thick, and shall be thoroughly wet. Sand shall be spread on a platform and the requisite portion of cement spread on the sand. After thoroughly mixing the latter, the dry mixture thus formed shall be spread evenly over the bed of stone wet, as above, and the whole turned over until thoroughly mixed, but not less than two (2) turnings on the mixing board shall be allowed in any case, water being added as necessary. Care shall be taken to keep the bed of concrete wet and avoid piling.

How Laid.

Section 176. Concrete shall be placed immediately after mixing in layers of such thickness as may be directed by the Engineer, and shall be thoroughly compacted throughout the mass by ramming or spading, special tamping bars or tools being used as approved by the Engineer. The amount of water used in making the concrete shall be as approved by the Engineer. If a small amount of water has been used in mixing, ramming shall be continued until the water flushes to the surface; as a rule, however, concrete shall be placed wet.

Made Smooth to Receive Waterproofing.

Section 177. Concrete to which waterproofing is to be applied shall be made smooth at the time of laying and shall be carefully protected from injury by barricades or otherwise, if necessary, until thoroughly set.

Time for Hardening.

Section 178. Concrete shall be allowed to set for twelve (12) hours, or more, if so directed, before any work shall be laid upon it; and no walking over or working upon it shall be allowed while it is setting. Concrete shall not be flooded with water before being thoroughly set.

Rock Surface to be Cleaned.

Section 179. Before laying concrete on rock surfaces the latter shall be swept clean of all debris and dirt, and when laid on earth the earth shall be rammed as directed before placing the concrete.

Surface Rough for Bonding.

Section 180. Wherever a section of concrete is necessarily left unfinished, leaving a surface which will be hard set before additional concrete is laid, the surface shall be left rough to form a bond with the new work; and if deemed necessary by the Engineer, the points shall be reinforced with steel bars or dowls, to be furnished by the Contractor.

Joints Cleaned.

Section 181. In all cases of joints of old with new work the old surfaces shall be thoroughly cleaned and wet, and a coating of mortar or cement shall be applied, if required, before placing the concrete.

Forms.

Section 182. Suitable forms shall be provided by the Contractor to support the concrete while being placed in the walls or roofs. These forms shall be immediately replaced by new ones as soon as they commence to lose their proper shape. Before being used they shall be carefully cleaned of cement and dirt in order to provide a perfectly smooth face to the exposed surface of the concrete. The forms shall be made of wood, kept carefully planed; or made of metal sufficiently thick to retain their shape without the use of wood.

Section 183. No forms made of wood, and covered with iron will be permitted.

Section 184. The forms, if made of wood, shall be made of boards with tight joints, tongued and grooved, if required by the Engineer.

Precautions in Placing.

Section 185. Every precaution shall be taken in placing or assembling the forms to do so in such a manner that when removed, after the concrete has been placed, the faces of the concrete that are to remain exposed shall present a smooth and even surface.

Forms, How Set. Forms Removed. Surface Irregularities Corrected. Defective Work Replaced.

Section 186. The forms shall be set true to line, firmly secured, and be so tight as not to allow water in the mortar to escape; they shall be thoroughly wet before

placing the concrete and shall be removed as soon after the concrete has been placed as in the judgment of the Engineer may be done with safety to the work. Immediately on the removal thereof the faces that will remain exposed shall be carefully examined and any irregularities of the surface corrected; projections shall be removed and voids filled with mortar. If, however, the voids are such as to indicate an excessive loss of mortar, portions of the concrete shall be cut out to the fullness of such defects and the space refilled with a rich concrete or mortar in such proportions and in such manner as the Engineer may direct.

Reinforcement Steel.

Section 187. Where reinforcement steel or wire mesh is used, efficient means shall be provided to maintain it in the exact position it is to occupy in the completed work, and to prevent it from becoming dislodged, or moved in any manner, when concrete is placed.

Surfaces Not to be Painted.

Section 188. The exposed faces of the concrete, excepting within station limits, shall be left with the natural cement finish; therefore, immediately following the removal of the forms, followed by the removal of the projections and the filling of voids, as provided above, these entire surfaces shall be rubbed down in such a manner, approved by the Engineer, as will leave a smooth and even surface, the object in view being to obtain a generally smooth finished surface with uniformity in color.

Impervious to Water.

Section 189. It is intended to obtain concrete impervious to water; the concrete shall be mixed and deposited with this end in view, and on the roof of the Railroad, if waterproofing is not used, the top surface of the concrete shall be carefully troweled as may be directed in order to add to its imperviousness.

Concrete, How Measured and Paid For.

Section 190. Concrete masonry shall be measured in place in the work to the prescribed net lines ordered by the Engineer and shall be paid for at the prices in Schedule Items 6 and 7; which prices are to include the cost of all scaffolding, centres, forms, etc., and removing the same, and all work incidental thereto.

Backing or Filling Concrete, Not Paid For.

Section 191. No concrete backing or filling outside of the ordered net lines of excavation will be paid for.

(For Concrete in Sewers, see Sewers.)

13—BRICK MASONRY.

Quality.

Section 192. Bricks for masonry shall be of the best quality common bricks, burned hard entirely through, regular and uniform in shape and size and of compact texture.

Hollow Terra Cotta Blocks.

Section 193. Hollow terra cotta blocks or bricks may be required in station work, on the outside of walls of the structure or at such other places as the Engineer may direct. They shall be of the best porous terra cotta as approved by the Engineer, and shall be laid in such manner as hereinafter specified or as the Engineer may direct.

How Laid.

Section 194. All brick masonry shall be laid in mortar of the quality above described, except that in exposed locations coloring matter may be added, if required by the Engineer. The bricks shall be laid to line with joints in the face work (except in stations) not exceeding one-quarter ($\frac{1}{4}$) of an inch in the beds, and three-eighths ($\frac{3}{8}$) of an inch on ends; the bricks to be thoroughly wet before laying and to be completely embedded in mortar under the bottom and on the sides and ends at one operation, care being taken to have every joint full of mortar.

All exterior surfaces shall be smooth and regular.

Cleaned.

Section 195. The inside faces of all arches and other exposed parts shall have all the mortar scraped off and washed clean immediately after the centres have been struck, and shall be pointed and left in neat condition.

No "Bats" or Culls.

Section 196. All bricks of whatever nature shall be carefully culled and, if necessary, gauged before laying, at the expense of the Contractor. No "bats" shall be used except in large masses of brickwork, where a moderate proportion, to be determined by the Engineer, may be used, but nothing smaller than half bricks.

Racked or Toothed.

Section 197. All unfinished work shall be racked or toothed, as directed by the Engineer, and before new work is joined to it the faces of the brick in the old work must be scraped entirely clean, scrubbed with a stiff brush and be well moistened.

Special Bricks.

Section 198. Where necessary to make a neat joint in connection with steel framework, or at corners, curves, or other similar places, special bricks of proper shape shall be furnished and used. All centres and forms shall be made to fit the curves of the work; they shall be put up and removed in a manner satisfactory to the Engineer.

Measurements and Payments.

Section 199. Brick masonry shall be measured to the lines indicated and shown on the plans and as ordered by the Engineer and shall be paid for as herein stipulated in Schedule Item 9, for common brick masonry, and Item 10 for hollow terra cotta brick or tile masonry; these prices are to include the cost of all scaffolding, forms, centres, etc., and the removal of the same, of all plastering and pointing, and of all other work incidental thereto.

14—STONE MASONRY.

Rubble Stone Masonry, Where Used.

Section 200. Rubble stone masonry will be used for supporting the street railroads over the roof of the Railroad where permanent supports are required, or at such other places as the Engineer may require.

How Laid.

Section 201. Rubble stone masonry shall be made of sound, clean stone of suitable size, quality and shape for the work in hand and shall be laid in mortar mixed in the proportion of one (1) part of cement to three (3) parts of sand. All beds and joints shall be well filled with mortar and the work must be thoroughly bonded.

Measurements and Payments.

Section 202. Rubble stone masonry shall be measured in place in the work and to the lines ordered by the Engineer, and it shall be paid for as herein stipulated under Schedule Item 8.

Other Masonry.

Section 203. In case, during the progress of the work, stone masonry of a different class than that specified above shall become necessary and shall be required by the Engineer, the same shall be constructed according to specifications applicable to the best work of such class, and it shall be paid for as provided in Article 12 of the contract.

15—WATERPROOFING.

General Limits of Waterproofing.

Section 204. In general, waterproofing of the structure will be limited to the roof and sidewalls at the stations, and to those surfaces near ground water or mean high water if ground water level is found for any reason to be below mean high water. At other places free drainage shall be provided by pipe drains, hollow tile or broken stone.

Protecting Masonry.

Section 205. The protecting masonry shall be hollow terra cotta blocks, common brick or concrete, laid and paid for as herein elsewhere provided, and shall not be less than four inches in thickness.

Laid Against Sheeting.

Section 206. In places where permanent sheeting is placed at the waterproofing line, the waterproofing, if permitted by the Engineer, may be applied against the sheeting.

Surfaces to be Made Smooth.

Section 207. All surfaces to which waterproofing is to be applied shall be made as smooth as possible; on these surfaces there shall be spread either hot melted pitch or asphaltum in a thick layer of uniform thickness; on this layer of pitch or asphaltum shall be laid a treated woven fabric of such material as may be approved by the Engineer; this process shall be repeated until such number of layers as may be required by the Engineer have been placed and a final coat of pitch or asphaltum shall then be applied.

Definition of Term "Ply."

Section 208. The term "ply" as used in these specifications shall mean a layer of treated woven fabric, both sides of which shall be coated with pitch or asphaltum at the time of laying.

Number of "Ply."

Section 209. The number of plies of waterproofing on the sides at stations shall in no case be less than three (3), except as hereinafter provided where brick laid in asphalt mastic is used.

Brick in Asphalt Mastic.

Section 210. Over the roof of the structure within station limits and over the tracks passing through the stations within said limits, also on the sides and bottom of the structure below a line of two (2) feet above ground water, or if ground water is below mean high water level, then two (2) feet above mean high water, one (1) ply of waterproofing, as described above, shall be used with one or more layers of brick laid in asphalt mastic; the number of layers of bricks to be determined by the Engineer.

In any case where brick laid in asphalt mastic is not used, the number of plies shall be as local conditions require and as directed by the Engineer.

Quality of Brick.

Section 211. The quality of brick shall be the same as provided in the specifications under the head of Brick Masonry. The brick shall be properly dried and shall be heated before laying.

Measurements and Payments.

Section 212. Brick in asphalt mastic will be measured in place to the lines ordered by the Engineer, and will be paid for at the price herein stipulated, Schedule Item 16.

Section 213. Six (6) plies of waterproofing may be substituted for brick in asphalt mastic, if approved by the Engineer, and will be paid for as provided for fabric waterproofing.

Asphalt Mastic.

Section 214. Asphalt mastic shall contain one-third (1-3) pure bitumen, the other ingredients to be sand and lime dust or cement, in proportions governed by local requirements and weather conditions.

Leaks Stopped.

Section 215. Any masonry that is found to leak at any time prior to the completion of the work and final acceptance thereof by the Commission shall be cut out and the leak stopped, at the sole expense of the Contractor.

Quality of Pitch.

Section 216. Pitch shall consist of either coal-tar or natural asphalt as the Engineer shall elect; it must be delivered on the work in packages that are plainly marked with the manufacturer's brand, and indicating the grade and quality of the material.

Coal-tar Pitch.

Section 217. The coal-tar pitch shall be straight-run pitch containing not less than twenty-five (25) per centum and not more than thirty-two (32) per centum of free carbon, which will soften at approximately 70° F., and melt at 100° F., being a grade in which distillate oils distilled therefrom shall have a specific gravity of 1.05.

Quality of Asphalt.

Section 218. The asphalt used shall be the best grade of Bermudez, lake or other natural asphalt, subject to the approval of the Engineer, and shall comply with the following requirements:

The asphalt shall contain in its refined state not less than ninety-five (95) per cent. of natural bitumen soluble in rectified carbon bisulphide or in chloroform. The remaining ingredients shall be such as not to exert an injurious effect on the work. Not less than two-thirds (2-3) of the total bitumen shall be soluble in petroleum

naphtha of seventy (70) degrees Baume or in acetone. The asphalt shall not lose more than four (4) per cent. of its weight when maintained for ten (10) hours at a temperature of three hundred (300) degrees Fahrenheit.

Woven Fabric for Waterproofing.

Section 219. The fabric to be used shall be a woven fabric which shall have been treated with pitch or asphaltum before being brought on the work. The fabric and the material used in its treatment shall be approved by the Engineer.

Concrete to Be Dry.

Section 220. All concrete shall be dry before waterproofing is attached. If, in the judgment of the Engineer, it is impracticable to have the concrete dry, then there shall be first laid a layer of the treated fabric, on the upper surface of which is to be spread the first layer of pitch or asphaltum; the said layer of fabric shall then be counted as one of the required plies.

Each layer of pitch or asphaltum fluxed as directed by the Engineer must completely and entirely cover the surface on which it is spread without cracks or blowholes.

Fabric for Waterproofing to Be Carefully Laid.

Section 221. The fabric must be rolled out into the pitch or asphaltum while the latter is still hot, and pressed against it so as to insure its being completely stuck over its entire surface, great care being taken that all joints are well broken by overlapping, and that the ends of the rolls of the bottom layers are carried up on the inside of the layers on the sides, and those of the roof down on the outside of the layers on the sides so as to secure a full lap of at least one (1) foot. Especial care must be taken with this detail.

Section 222. When the finishing layer of concrete is laid over or next to the waterproofing material, care must be taken not to break, tear or injure in any way the outer surface of the pitch or asphaltum.

Skilled Labor to Be Employed.

Section 223. None but competent men, especially skilled in work of this kind, shall be employed to lay the waterproofing.

Measurements and Payments.

Section 224. Measurements will be made on the basis of actual area covered by the number of plies ordered, no account being taken of laps, and the waterproofing will be paid for as herein stipulated, Schedule Item 15.

16—STEEL AND IRON.

Open Hearth Process.

Section 225. Steel shall be made in open hearth furnace.

Chemical and Physical Properties.

Section 226. The chemical and physical properties of finished material shall conform to the following limits:

Properties	Structural Steel.	Carbon Rivet Steel.	Steel Castings.
Phos. (Max.)	.04%	.04%	.05%
Sulph. "	.05%	.04%	.05%
Mn. "	.60%	.60%	.80%
Si. "	.10%	.10%	.35%
Ult. Str.	60000±4000	50000±4000	65000±(Min.)
Yield Point	55% Ult.	55% Ult.	35000±(Min.)
Elongation	$\frac{1500000}{\text{Ult. Str.}}$	$\frac{1500000}{\text{Ult. Str.}}$	20% in 2″
Fracture	Silky.	Silky.	Fine granular.
Cold Bend	180° flat.	180° flat.	120° (d.=3+.)

Yield Point.

Section 227. The yield point shall be that strain, beyond which the elongation ceases to be proportional to the weight imposed, and may be indicated by drop of beam. The speed of testing shall be governed by the inspector.

Finish.

Section 228. Sufficient discard shall be made to insure sound material free from piping or excessive segregation. The material shall be finished straight and smooth, and shall be free from all seams or other defects. Any imperfection which may develop during the progress of the work will be sufficient cause for rejection.

Steel Castings.

Section 229. Steel castings shall be true to pattern and free from injurious imperfections.

Standard Test Pieces.

Section 230. The tensile strength, yield point and ductility of the material shall be determined from a standard test piece of not more than two (2) inches in width, and about one-half (½) square inch in sectional area, cut from a full sized bar, with sides turned or planed parallel so as to give a uniform minimum section for at least nine (9) inches. Whenever practicable the two sides of the test piece shall be left as they come from the rolls, but the finish on opposite sides shall be alike in this respect.

Specimens for Bending.

Section 231. Specimens for bending shall be cut from the material as rolled.

Rivet Rods.

Section 232. Rivet rods shall be tested as rolled.

Steel Castings.

Section 233. For steel castings the test piece shall be turned to a uniform minimum section of one-half (½) inch diameter, for a length of at least two and one-half (2½) inches. Specimens for bending shall be one (1) inch by one-half (½) inch in section.

Ductility Elongation.

Section 234. In determining the ductility, the elongation shall be measured after breaking on an original length as specified, in which length shall occur the curve of reduction each side of the point of fracture.

Where Taken From.

Section 235. For rollers the specimens shall be cut from the finished bar so that the centre of the specimen shall be one inch from the outside of the bar.

Section 236. For steel castings the specimens shall be cut from coupons cast on some portion of a casting from each melt, and shall be annealed with the casting before it is cut off.

Treatment of Test Specimens.

Section 237. The material from which test specimens are cut shall receive the same treatment as the material which it represents in the finished structure.

Number of Tests.

Section 238. At least one tensile and one bending test shall be made from each melt of steel as rolled. In case steel differing three-eighths (⅜) inch or more in thickness is rolled from one melt, a test shall be made from the thickest and from the thinnest material rolled.

Variation in Weight.

Section 239. A variation in weight of any piece of steel of two and one-half (2½) per centum from that specified, shall be sufficient cause for rejection, except in case of sheared plates exceeding one hundred (100) inches in width, where the variation may be five (5) per centum.

Material Marked.

Section 240. Each finished piece of steel shall be marked with the melt number, excepting that bars for reinforcing concrete shall be bundled and the melt number stamped on a metal tag attached to each bundle.

WROUGHT IRON.

Double Rolled.

Section 241. All wrought iron shall be double rolled, and no scrap used in its manufacture. It shall be thoroughly welded in rolling, shall be tough, ductile, and fibrous, and shall be finished straight and smooth. It shall be uniform in quality and free from surface defects.

Method of Testing.

Section 242. The methods specified for testing rolled steel shall apply generally to wrought iron. It shall show by the standard test piece an ultimate strength of fifty thousand (50,000) lbs. per square inch, and a yield point of twenty-six thousand (26,000) lbs. per square inch. It shall bend one hundred and thirty-five (135) degrees with inner radius not to exceed twice the thickness of the piece tested. When nicked and bent the fracture shall show at least ninety (90) per centum fibrous.

CAST IRON.

True to Pattern Tests.

Section 243. All castings shall be true to pattern, out of wind and free from injurious imperfections. They shall be of a good quality of tough gray iron made by the cupola process. Sample test pieces, cylindrical in shape, one and one-quarter (1¼) inches in diameter, and fifteen (15) inches long, cast under the same circumstances as those which attended the casting of the full-sized piece, shall sustain at the centre, when resting upon two dull knife edges twelve (12) inches apart, a load of three thousand (3,000) lbs. with a deflection of at least one-tenth (1/10) of an inch before rupture.

WORKMANSHIP.

Quality.

Section 244 All workmanship shall be first class. All parts exposed to view shall be neatly finished. All nuts on the finished structure shall be hexagonal.

Rods Deformed Sections.

Section 245. Rods and bars to be used for reinforcing concrete shall be deformed as approved by the Engineer; plain bars will not be used.

Bent Rods and Bars.

Section 246. Bent rods and bars and other bent material shall be bent hot and annealed, except that obtuse bends in material less than one square inch section may be made cold when permitted by the Engineer. The bending shall be done before the material is delivered on the work. Except in special cases, all bends shall be made uniformly to template.

Material Straightened in Shop.

Section 247. All material shall be straightened in the shop before being worked in any way.

Holes Accurately Spaced.

Section 248. All holes shall be accurately spaced and punched. Unfair holes shall be reamed to exact match; drifting to enlarge the holes will not be allowed. Poor matching of holes will be cause for rejection.

Size of Punch.

Section 249. In punching, the diameter of the punch shall not exceed by more than one-sixteenth (1/16) of an inch, the diameter of the rivet to be used, and the diameter of the die shall be as small as may be required to punch a clean hole. When the materials to be sub-punched and reamed, a punch of diameter three-sixteenths (3/16) of an inch smaller than specified above shall be used, and all reaming shall be done after the material is assembled, with twist drills of one-sixteenth (1/16) of an inch greater diameter than the rivet to be used.

Sub-punching and Drilling.

Section 250. All material over seven-eighths (⅞) of an inch thick shall be drilled from the solid. Material over five-eighths (⅝) of an inch and not exceeding seven-eighths (⅞) of an inch in thickness shall be sub-punched and reamed. All other material may be direct punched.

Sheared Edges.

Section 251. Sheared edges of material exceeding five-eighths (⅝) of an inch in thickness, to be used in main members shall be planed at least one-eighth (⅛) of an inch.

Burrs Removed.

Section 252. All burrs shall be removed, and the members shall have all parts firmly drawn together with bolts before reaming or riveting is commenced.

Riveting.

Section 253. Rivets when driven shall completely fill the holes, and shall be machine driven wherever possible. They shall have full concentric heads or they shall

be countersunk when so required. Rivet heads shall not be flattened to less than half the diameter of the rivet on the line of the shank unless countersunk.

Use of Bolts.

Section 254. Generally the use of bolts instead of rivets will not be permitted, but when used in special cases the holes shall be reamed parallel, and the bolts turned to a driving fit.

Templates.

Section 255. All holes for field rivets, excepting those in connections of lateral and sway bracing, shall be sub-punched and accurately drilled to an iron template, or reamed and match marked while the connecting parts are temporarily assembled in the shop. In case of splices of upper chords or other compression members, the abutting members shall be brought to a forcible contact.

Finished Members.

Section 256. Finished members shall be true and free from kinks, twists, or open joints. Ends of floor beams and stringers shall be finished square and true.

Rods Upset.

Section 257. Rods and bars which are to receive a thread shall be properly upset. Where threads are cut on steel, they shall be properly filleted.

Annealing.

Section 258. Steel, except in minor details, which has been partially heated, shall be properly annealed. All steel castings shall be annealed.

Abutting Surfaces Faced.

Section 259. All abutting surfaces, except flanges of plate girders, shall be neatly planed or faced perpendicular to the direction of the strain, so as to insure even bearings.

Stiffeners.

Section 260. Stiffeners of plate girders shall fit neatly against the flange angles. Web splice plates and fillers under stiffeners shall be cut to fit within one-eighth (1/8) of an inch of flange angles.

Pins and Rollers.

Section 261. Pins and rollers shall be turned accurately to a gauge, and shall be of full size throughout. All pin-holes shall be bored truly and at right angles to the axes of the members to be connected, and shall fit the pins with a play not exceeding one thirty-second (1/32) of an inch.

Bed Plates Planed.

Section 262. Bed plates shall be planed. The bottom of the shoes shall be planed exactly parallel to the centre line unless otherwise shown. The cutting of the planing tool shall be in the direction of expansion.

Details Boxed.

Section 263. Nuts, bolts, rivets and other details shall be boxed.

Weight Marked.

Section 264. The weight of every piece and box shall be plainly marked upon it.

Inspection.

Section 265. Free access and information shall be given by the Contractor for a thorough inspection of material and workmanship, with proper office facilities.

Mill Orders in Triplicate.

Section 266. The Engineer shall be furnished copies in triplicate of all mill orders, and no material shall be rolled nor work done before the Engineer has been notified so that he may arrange for the Inspector.

Contractor Responsible.

Section 267. The Inspector shall make detailed reports of his inspection to the Engineer and may notify the Contractor of any defects in the material or workmanship, but all acceptances made by him shall be considered temporary, and his inspection shall in no way relieve the Contractor of full responsibility for the character and accuracy of the work until its completion and final acceptance by the Engineer.

Errors in Plans.

Section 268. The Contractor shall be responsible for all errors which can be discovered by checking or examining the plans.

Chemical Analysis.

Section 269. Chemical determination of the percentage of carbon, phosphorus, sulphur and manganese shall be made by the manufacturer from a test ingot, so taken, during the casting of each melt of steel, as to fairly represent the melt. Two copies of such analysis shall be furnished to the Engineer or his Inspector.

Check Analysis.

Section 270. Check analysis shall be made, at the discretion of the Engineer, of the finished material, on drillings from pieces selected by the Inspector from parts suspected of being most highly segregated. These analyses shall not show a variation above the ladle analysis of more than twenty-five (25) per centum for phosphorus, nor more than fifty (50) per centum for sulphur. The analyses shall be made by a chemist designated by the Engineer.

Contractor to Make Tests.

Section 271. The Contractor shall furnish, without extra charge, such standard test pieces as may be necessary to determine the uniform quality of the material and also the use of a reliable testing machine, with necessary labor for testing.

Inspector's Office.

Section 272. The Contractor shall furnish for the use of the Inspector a suitably equipped office at the mills and at the shops.

Loading and Shipping.

Section 273. All parts shall be carefully loaded and protected from injuries during transportation by such means as will be satisfactory to the Inspector. After delivery of materials at the work the Contractor will be required to store the same on skids at least twelve (12) inches above the ground and to keep the same in good condition. Any piece showing injurious effects of rough handling at any stage until the final acceptance of the work may be rejected.

Payments for Steel and Cast Iron.

Section 274. The prices to be paid for steel and cast iron are as herein provided in Schedule Items 19, 20, 21, 22, 23 and 24. These prices include the cost of material delivered and erected in the work, with the exception of Item 23, the placing of which is provided for in Item 22. These prices are to include also the cost of all necessary cleaning and painting (where painting is required) and of all other incidental work. The quantity of metal to be paid for shall be the number of pounds actually placed in accordance with the drawings or orders.

Miscellaneous Castings.

Section 275. For other castings, not included in the above and not including castings for sewer work or pipes, payment will be made as provided in Schedule Item 25.

WIRE MESH.

Wire Mesh.

Section 276. Wire mesh, of a character and weight to be approved by the Engineer, is to be furnished and placed around the lower flanges of the roof girders, and at other places as may be required, in order to hold the concrete in place.

Wire Mesh, Payment For.

Section 277. Wire mesh, wherever used, will be paid for as stipulated in Schedule Item 26, which price is to include the material in place and all work necessary and incidental thereto.

17—PAINTING.

Section 278. All metal work, excepting as otherwise herein provided, shall be painted with three coats of paint, including the shop coat, of kind and quality approved by the Engineer. Lead or carbon paint will generally be required.

Shop Coat.

Section 279. All iron shall be scraped free from scale, and receive one coat of red lead paint as herein specified before leaving the shops. All surfaces which come

in contact or are enclosed shall be painted before being assembled. All turned or faced surfaces shall receive a coat of white lead and tallow before leaving the shops.

Quality of Red Lead.

Section 280. The red lead shall be strictly pure, and shall contain at least 80 per cent. of "true lead" ($Pb_3 O_4$). The color shall be a clean, pure tint. The red lead shall be of the fineness that when washed with water through a No. 19 silk bolting cloth, not more than 1 per cent. shall be left on the screen.

Quality of Linseed Oil.

Section 281. The linseed oil must be absolutely pure, fully aged and ripened, well settled oil. It shall be perfectly clear on receipt, and after heating to 212° Fahr. on a current of hydrogen, shall not show a deposit of foots nor a loss of over 0.4 per cent. for raw oil, nor over 0.2 per cent. for boiled oil. The specific gravity at 60° Fahr. for raw oil shall be between 0.932 and 0.937, and for boiled oil between 0.936 and 0.940.

Original Packages.

Section 282. All material shall be delivered, inspected and sampled in original packages.

Proportions in Mixture.

Section 283. Red lead paint shall be mixed in the proportion of 500 pounds of red lead to 5½ gallons of boiled linseed oil, and 11 gallons of raw linseed oil.

Damaged Shop Coat to be Renewed.

Section 284. Where the shop coat has become damaged before or after erection, through any cause whatever, it shall be renewed with the same kind of paint as originally used, such renewal to be considered only as a part of the original shop coat. If the Engineer so directs, on members or parts of members buried in concrete the shop coat will be omitted.

Structural Steel and Rods.

Section 285. Structural steel and rods to be embedded in concrete shall be protected from the weather before being put in place, and shall be cleaned and scales removed but not painted before being incased in the concrete.

Second Coat Carbon Paint.

Section 286. The second coat of paint shall be a carbon paint approved by the Engineer. It shall be applied after erection, but not until the metal has been cleaned from dirt or other objectionable matter that may be found thereon.

Metal to be Cleaned After Erection.

Section 287. After erection the metal shall be thoroughly cleaned of all dirt, rust or scales by stiff wire brushes or sand blasts, as directed, and afterward dusted and thoroughly and evenly painted as described above. No paint shall be applied until the cleaning has been passed upon by an Inspector.

Section 288. Between stations the exposed members shall be given a third coat, which shall be a carbon paint of a color and quality approved by the Engineer.

Third Coat, When Applied.

Section 289. The third or finishing coat shall be applied to all exposed surfaces of the metal after its erection, and after a completion of the masonry or other work; it shall be applied at such time after such completion and before the final acceptance of the work as in the judgment of the Engineer may be advisable. The several field coats shall be sufficiently tinted to be distinctive.

Surfaces in Contact.

Section 290. Surfaces of exposed members inaccessible after erecting, shall be cleaned and painted before erecting.

Recesses, etc.

Section 291. All recesses that might contain water, or through which water could enter, must be filled with thick paint or a waterproof cement of ground skins before receiving final painting.

Section 292. All surfaces so close together as to prevent the insertion of a brush, must be painted thoroughly by using a piece of cloth, if necessary.

Rainy or Freezing Weather.

Section 293. No painting in rainy or freezing weather or on wet surfaces will be permitted.

Payments.

Section 294. Payment for painting is included in the prices for steel and iron.

18—DUCTS AND CONDUITS.

Vitrified Ducts—Quality and Size.

Section 295. The ducts to contain cables for transmitting electricity shall be manufactured of the best clay, thoroughly mixed, burnt and vitrified, sound in all respects, straight and free from soft spots, stones, cracks or blisters liable to impair their strength or durability; in lengths generally of from eighteen (18) to thirty-six (36) inches, shorter lengths shall only be used as directed; generally in four-way form with circular holes, the least diameter to be three and one-half (3½) inches; one, two or three-way ducts shall be used in special cases as determined by the Engineer. The interior surface of the holes to be smooth and clear of warts, tits, pits or blisters, which may tend to injure the electric cable in pulling the same through the duct. The ends to be cut smooth and at right angles to the axis of the duct and beveled on inside for three-quarters (¾) of an inch.

Thickness of Ducts.

Section 296. The outside walls and webs of four-way ducts to be three-quarters (¾) of an inch thick; the outside dimensions of ducts to be not less than nine and one-quarter (9¼) nor more than ten (10) inches, and constructed square on outer lines; the dimensions of single, two-way or three-way ducts shall be consistent with the above.

Ends Combed.

Section 297. The ends of ducts to be combed with two (2) sets of three (3) combings each, each combing to have a width of one-quarter (¼) of an inch and a depth of one-sixteenth (1/16) of an inch.

Glaze.

Section 298. The inside and outside of ducts to be thoroughly glazed in the most approved manner with good salt glaze.

Inspection.

Section 299. All ducts to be subject to inspection, both at the place of manufacture and on the work. All rejected ducts to be promptly removed by the Contractor at his expense.

How Laid.

Section 300. The ducts shall be laid in beds of cement mortar about one-quarter (¼) of an inch in thickness, with broken joints and with full bearing. Two (2) strips of thick unbleached muslin six (6) inches wide, and coated with neat cement mortar, shall be used to wrap each joint, the ends of the wrap to lap six (6) inches. The muslin shall be not less than 56 by 60 count, weight not less than four (4) ounces to the yard and width thirty-six (36) inches. In laying the ducts care must be taken to close abutting joints so that practically the end of ducts shall be in contact on all sides. Where ducts are laid on curves, the wraps must be doubled if required, to protect the openings between the ends of the ducts on the outer line of the duct and to exclude all mortar from duct openings.

Mandrels.

Section 301. The ducts shall be laid with a linked mandrel of the length and diameter to be prescribed, the same accurately fitting the duct openings, the mandrel to be left in each duct until the next succeeding duct is laid.

Dowel Pins.

Section 302. The ducts shall be laid with dowel pins, at least two pins on the opposite sides horizontally.

Laid to Line.

Section 303. The ducts shall be so laid that the centre of the holes shall be true to line and grade.

To be Rodded.

Section 304. After the ducts are laid, and sufficient time is given to allow the mortar in beds to partially set, they shall be rodded; all mortar or other foreign matter must be cleaned from the duct openings, leaving a clear and smooth opening.

If obstructions are found in rodding the ducts which cannot be removed by cleaners, so as to give a clear and smooth opening of three and one-half (3½) inches in all duct openings, the ducts shall be removed and relaid; all ducts, during construction and after being rodded, shall be plugged with suitable plugs, to be furnished by the Contractor. If wooden plugs are used they shall be immersed in water for at least eight (8) hours before being put in place.

Measurement and Payment for Vitrified Ducts.

Section 305. Tunnel ducts shall be paid for per duct foot in place at the price herein stipulated for tunnel ducts, Schedule Item 18, which price shall include the cost of furnishing, laying, rodding and all the material and work incidental thereto. The tunnel ducts to be provided under Schedule Item 18, shall include only those intended solely for the purpose of the operation of the Railroad.

Duct Manholes.

Section 306. Duct manholes shall be built at the sides of the railroad in connection therewith and as indicated on the plans. These manholes shall be generally at intervals of about three hundred feet, and shall be on either or both sides of the Railroad, as necessary, in accordance with the location of the duct lines. They may vary in form as may be necessary to accommodate the work to local conditions.

Duct Manholes at Stations.

Section 307. Duct manholes will be built at the ends of the stations to provide for the passage of the ducts under the station platforms, and if found necessary on account of the lengths of stations, additional manholes will be constructed under the platforms.

Section 308. At manholes the ducts will be laid to conform to the special conditions.

Section 309. In all work where iron pipe or fibre conduits are installed for a part of their length in the structure and for another part as open construction, the ends of such runs shall be carried outside of said structure as open construction and shall terminate in outlet or junction boxes located by the Engineer.

Section 310. The iron pipe or fibre conduits required by section 309 will be built mainly in the walls, roofs or other parts of the stations; portions, however, of the runs will be left exposed, to be covered later by the station finish work.

Quality of Iron Pipe Conduit.

Section 311. All iron conduit used for any purpose in connection with the work herein shall be of the best grade (Galvaduct or equal), standard weight wrought iron or steel piping, protected inside and out by a coat of zinc or enamel. It shall be delivered to the work in bundles of full length pipes, each length marked with the trade-mark of the manufacturer. It shall bend cold 90 degrees about a radius equal to ten diameters without signs of flaw or fracture in either pipe or enamel.

Installation.

Section 312. All conduit shall be carefully cleaned before and after erection, and all ends shall be reamed free from burrs, and inside surfaces shall be free from all imperfections liable to injure the cable.

Joints Watertight.

Section 313. All joints shall be made with standard couplings, well treated with red lead, and screwed up to make a watertight job.

Fibre Conduits, Quality, Laying, etc.

Section 314. All fibre conduit shall be made of impregnated fibre equal to that manufactured by the Fibre Conduit Company of Orangeburg, New York.

It shall be of uniform thickness, having walls of not less than one-quarter (¼) inch and true cylindrical holes not less than two (2) inches in diameter. Lengths shall be not less than five (5) feet, and all ends shall be finished.

All joints shall be made by suitable finished sleeves fitting closely over the ends of the conduit and made watertight by making up with an approved bituminous compound.

After laying, all ducts shall provide a clear, true opening, free from obstructions and imperfections in any way injurious to the wires to be installed. All ducts shall be rodded and cleaned with an approved mandrel not less than one and three-quarter (1¾) inches in diameter and eighteen (18) inches long.

Built in Concrete, etc.

Section 315. Conduits built into concrete or other parts of the structure shall be properly protected and supported, so that the same shall not be injured by the building operations.

Not Built in Concrete.

Section 316. Conduit not built into the structure shall be supported by approved pipe straps located not more than eight feet apart, or in any other manner designated by the Engineer, and they shall be kept boxed or otherwise suitably protected from injury.

Bends and Offsets.

Section 317. Bends and offsets may be made in the field if proper tools are used, but in no case shall deformed, split or crushed conduit be erected. Not more than two right angle bends shall be made between any two outlet boxes without special approval of the Engineer.

Measurement and Payment.

Section 318. Measurements for the above iron pipe or fibre conduits shall be per linear foot of single conduit placed in the work—in accordance with the requirements—and payment for the same shall be as herein stipulated in Schedule Item 32.

Outlet and Pull Boxes and Payment for Same.

Section 319. All outlet and pull boxes shall be made of cast iron, with openings threaded for the conduit ends, and conduits shall be screwed into these openings and made up with red lead to effect a watertight joint. Covers shall be of cast iron and watertight, and no other boxes or covers shall be used except under special permission of the Engineer. The price for each cast iron outlet box furnished and placed in the work shall be as herein stipulated in Schedule Item 33.

19—DRAINS AND PUMPS.

Railroad to be Drained.

Section 320. Every part of the Railroad, the stations and appurtenances connected therewith, must be arranged so far as possible that any water finding access thereto will be led away automatically to the City sewers.

Section 321. Where the Railroad is on an inclined gradient, and is constructed in dry, porous soil, the floor of the Railroad may be depended on to act as a conduit. At the bottom of the inclined gradient connections must be made with a sewer or with subdrains lying beneath the Railroad and draining into the sewers.

Subdrains.

Section 322. Along such parts of the work where the soil is not porous, or where the floor of the Railroad cannot, in the judgment of the Engineer, be used as a conduit, there shall be laid, beneath the rail level and on a continuous descending gradient, drain pipes of vitrified salt-glazed stoneware, of the quality described in these specifications for sewer pipe. These drain pipes shall be of such diameter not exceeding fifteen (15) inches, as the Engineer may direct, and there shall be one (1) such drain for each two (2) tracks. Each drain shall be laid in the concrete or directly in the soil with tight or open joints, as directed, and in such manner and in such position as, in the opinion of the Engineer, local circumstances require.

Connections and Cross Drains.

Section 323. Where drain pipes connect with the City sewers, the junction shall be protected by suitable traps, and back-pressure valves or gate valves where necessary, to prevent back rush of water or gas from the sewers. Connections with the Railroad shall be as necessity demands and all as directed by the Engineer. Cross drains to connect with the main drains will be placed at such places and in such manner as the Engineer shall direct; also vertical drains at the sides of the Railroad. These drains shall be of vitrified pipe or of cast iron. as directed.

Broken Stone for Drainage.

Section 324. On the roof of the Railroad and at other points as may be directed or indicated on the plans, broken stone shall be placed for the purposes of drainage.

Sumps.

Section 325. At the low points of the grade of the Railroad where the same passes below the bottom of adjacent sewers there shall be constructed sumps connected with the subdrains or the floor of the Railroad. Such sumps must be watertight, with a capacity of not less than eight hundred (800) gallons each.

Pumps for Tunnel Drainage.

Section 326. Adjacent to each sump a suitable enclosure shall be provided in which two pumps shall be installed, each of which shall have ample capacity to remove all the water entering the sump at that point under ordinary conditions. These pumps shall each have a separate source of power, and shall be arranged to operate antomatically. Under this contract the Contractor will only furnish the pump or pumps required and set them in place as directed, including the necessary pipe and drainage connections between the sumps and sewers.

The pumps shall be of the capacity required by the Engineer.

Capacity.

Section 327. If in the opinion of the Engineer the service requires it, each of these pumps shall be able to remove from the sump eight hundred gallons per minute.

Delivery to Sewers, etc.

Section 328. The delivery of such pumps shall be into the City sewers, and all piping, valves, etc., in connection therewith, shall be installed as a part of this contract.

Payment for Drains, Broken Stone, Pumps, etc.

Section 329. All drains shall be measured in place and the actual net length as laid for each class of drain will be paid for as herein provided in Schedule Item 17. The prices therein provided for each class of pipe will include providing and laying the pipe and all specials of any nature whatsoever such as bends, tees, wyes, handholes, etc., and all materials necessary for jointing the same. Where back-pressure valves or gate valves are required the cost of setting the same will be included in the above, but the Contractor will be paid in addition the actual net cost of such valves plus ten (10) per cent.

Section 330. For broken stone for drainage, furnished and placed, Section 324, payment will be made as provided in Schedule Item 14.

Section 331. For pumps, Section 326, the Contractor will be paid as provided in Article XII. of the contract, not including, however, the pipe connections with sumps and sewers which pipe will be paid for as hereinbefore provided in Schedule Item 17.

Soil Pipes for Stations.

Section 332. It will be necessary to lay soil pipes in the floors and walls of the stations. These pipes are to be cast iron, "extra heavy." They will be placed in positions as shown on the plans and will be paid for as provided in Schedule Item 34.

20—SEWERS.

In Accordance With Plans and Specifications.

Section 333. All sewers and appurtenances shall be built of the materials, of the sizes and dimensions, on the lines and grades, at the depths, with the connections, and in the manner called for by these specifications and shown on the drawings.

Change of Location.

Section 334. If in the opinion of the Engineer, it is impracticable during the progress of the work to construct any sewers, manholes, or other appurtenances, according to the contract drawings, owing to the presence of unknown subsurface structures or other contingencies, the Contractor shall construct such sewers, manholes or appurtenances in the location given by and according to the directions of the Engineer.

General Clauses Apply.

Section 335. The general clauses in this contract relating to excavation, both in open trench and tunnel, backfilling, cement, mortar, masonry, waterproofing, piling, timber work of all kinds, care of streets and public places, maintenance of surface and subsurface structures, protection of persons and property, repaving or restoring of the surface of the street or other public places, responsibility of the Contractor, authority of the Engineer to examine and condemn materials, and the power of the Commission and the Engineer in all or any other respects to enforce this contract, apply to the construction and reconstruction of sewers, water mains or pavements, unless specifically amended or exempted, both along the route occupied by the Railroad and elsewhere.

No Claims for Damages.

Section 336. Should postponement or delay be occasioned by the precedence of paving or other contracts, which may be either let or executed by the Borough President, Commissioner of Water Supply, Gas and Electricity, or other heads of

departments, either before or after the execution of this contract, on the line of the work, no claims for damages therefor shall be made or allowed; nor shall any claim for damages be made or allowed in consequence of the street or the adjoining sewers not being in the condition contemplated by the parties at the time of making the contract, except that if the Contractor shall be delayed in the performance of his work by reason of the street or the adjoining sewers not being in such condition, an allowance of time may be given for the completion of the work as elsewhere provided in this contract.

Size of Trenches.

Section 337. The trenches for sewers and basin culverts both in earth and in rock, in streets along the route of the Railroad, shall have vertical sides and shall be not less than six inches wider than the greatest external width of the sewer or its foundation on the side farthest away from the subway; and in other streets the trenches shall have vertical sides, and shall be not less than six inches wider on each side than the greatest external diameter of the sewer, but shall be not less than three feet in width. They shall be excavated to the depth and to the form of the sewer or its foundation.

Limit of Trench Opening.

Section 338. Not more than one hundred (100) feet of trench in sewers off the line of the railroad shall be opened at any one time in advance of the sewer already completed, unless by permission of the Engineer, and for a distance specified.

Excavation Completed in Advance.

Section 339. The excavation of trenches shall be fully completed a sufficient distance in advance of the laying of the sewer, and the exposed end of the sewer shall in all cases be fully protected.

Trenches for Manholes and Receiving Basins.

Section 340. Where the foundation for a manhole or a receiving basin extends beyond the line of such manhole or receiving basin, the minimum excavation required in earth shall be to the lines of the smallest rectangle, enclosing the full dimensions of the exterior of the foundation, and shall have vertical sides to the surface, but it shall, in all cases, be not less than six inches larger than the greatest external dimension of the manhole or receiving basin. In rock excavation, the trench shall be six inches larger than the greatest external dimension of the manhole or receiving basin, or its foundation, and shall have vertical sides to the surface.

Foundations.

Section 341. Where the ground does not afford a sufficiently solid foundation, the trench shall be excavated to such increased depth as the Engineer may deem necessary, and this extra depth, and all other irregularities in the bottom of the trench, shall be filled up to the required level and form, with such material, and in such manner, as the Engineer shall direct. If so directed, piles shall be driven and a timber or reinforced concrete foundation shall be constructed, as elsewhere provided in these specifications, to support the sewer.

Inspection of Grades.

Section 342. When the trench is properly prepared, and before laying any sewer, the Contractor shall notify the Engineer, who will, thereupon, cause the grades for the sewer to be tested, and if correct the sewer shall then be laid in the presence of a duly authorized inspector, and no construction work shall be done in his absence.

Trenches to be Kept Free from Water.

Section 343. The trenches shall be kept entirely free from water while the foundation and the masonry are being constructed or the sewer laid. In no case shall water be allowed to flow over the invert or foundation or through the sewer until the mortar is thoroughly set.

Tunneling.

Section 344. When tunneling for sewers shall be deemed advisable, it shall be done in a manner approved by the Engineer.

Gutter and Passageway to be Kept Open.

Section 345. At all times, gutters shall be kept open for surface drainage, and the streets and sidewalks shall be kept clear and free for the passage of carts, wagons, carriages and street or steam railroad cars or pedestrians, and as otherwise provided in these specifications.

Crosswalk, Sidewalk and Roadway to be Kept Clear.

Section 346. Where any crosswalk or roadway is cut by the trench, it shall be temporarily replaced by a timber bridge with side railings, according to the direction and approval of the Engineer. The work shall at all times be conducted so as to cause as little inconvenience as practicable to the public.

Disposition of Paving Material.

Section 347. All curb, gutter, flagging, paving and macadam stones, necessary to be removed, which in the judgment of the Engineer are suitable to be used again, shall be stored in such places as the Engineer shall direct, or shall be removed as provided in these specifications; in all cases a passageway on the sidewalks and in the roadway shall be preserved free from needless obstructions.

Flow of Sewers to be Maintained.

Section 348. The Contractor shall provide for the flow of all sewers, drains and watercourses, interrupted during the progress of the work, and shall restore and make good all connections, and shall immediately cart away all offensive matter, in such manner and with such precautions as the Engineer may direct. All temporary house connections shall be made by closed iron pipes, with suitable provision for preventing leakage at joints. Wooden troughs for such connections will not be permitted.

Brick.

Section 349. In the construction of brick masonry none but the best quality of common brick burned hard entirely through, regular and uniform in shape and size and of compact texture, shall be used. They shall be culled as they are brought on the ground, and bats and bricks of improper quality are to be removed from the work. A limited number of bats may be used in manholes and closures, and in the outer ring of the sewers where more than two rings of bricks are required.

How Laid.

Section 350. The bricks shall be properly wet immediately before laying. Every brick is required to be laid in a full joint of mortar, made as described in these specifications, on its bed, end and side, at one operation. In no case is mortar to be slushed or grouted in afterward. The bricks shall be neatly and truly laid, every second course to line, and the points to be carefully struck on the inside.

Racked Back or Toothed.

Section 351. All brick work, as it progresses, shall be racked back in courses, and in no case will it be allowed to be toothed, unless by special permission from the Engineer.

Back or Stone Inverts.

Section 352. All inverts, or bottom curves, shall be formed from profiles accurately made according to the dimensions of the sewer, and correctly set according to the grades furnished. The masonry shall be allowed to set for twenty-four (24) hours before the arch is turned. Vitrified brick or granite paving blocks shall be used for the inner ring of the invert when required by the Engineer, and whenever so used they must be thoroughly jointed, so as to be watertight along the inner surface of the sewer. The last course of the invert masonry below the springing line shall be laid as headers.

Brick Arches.

Section 353. The arches or upper curves shall be formed on strong centres of correct form, according to the sizes and shapes required, and keyed with stretchers in full joints of mortar. The extrados of the arch shall be plastered with mortar one inch thick, mixed in the proportion of one part of cement to two parts of sand. The centres shall not be removed or withdrawn in less than thirty-six hours, or until the work is thoroughly set, and until the filling in of the arch is properly put into place to a depth which is at least one foot above the crown of the arch. The centres in all cases shall be struck and not drawn, so as not to crack or injure the work. Should any crack or settlement appear in the arch after the centres are removed, so much of the work as the Engineer may require shall be taken down immediately and replaced.

Spurs.

Section 354. Vitrified or iron sewer pipes or spurs, equal in every respect to those described elsewhere in these specifications, and of a size required by the Engineer, but not less than six inches interior diameter with hubs moulded for house connections, and of sufficient length to project at least four inches beyond the exterior of the

sewer, shall be built into the walls of brick sewers and at such an angle as indicated on the plan, or as the Engineer may direct.

How Built In.

Section 355. Spurs shall be built in wherever similar house connections exist in the present sewer which is to be reconstructed under this contract, but in no case shall the distance be more than twenty feet between spurs. In the case of the construction of new sewers where no sewers existed previously, except sewers under public parks or those crossing intersecting streets, they shall be built opposite each house, and where there are no houses, they shall be not more than fifteen feet apart on each side of the sewer or at such frequent intervals as local conditions may require. They shall be set so that their inner ends shall be flush with the inner face of the sewer, at such height in the walls as the Engineer may direct, and each pipe shall be sealed on the outside with an approved earthenware cover set in mortar.

Iron Chair Spurs.

Section 356. Where the sewers to be built under this contract will be at a depth greater than thirteen feet below the established grade of the street (or below the surface of the street where final grades have not been established), cast iron chair spurs, of the design shown on the drawings, not less than six inches in diameter and of the weight of extra heavy soil pipe, shall be used unless otherwise ordered by the Engineer. Where house drains are to be connected to these spurs, extra heavy soil pipe and fittings shall be used for the riser between the spur and the house drain. Where the spurs are provided for future connections, risers of extra heavy soil pipe shall be placed in each spur and shall be brought to a point thirteen feet below the established grade of the street, the end of which shall be sealed with an approved cover laid in cement mortar. The joints of this pipe shall be packed, leaded and caulked in accordance with these specifications for laying water mains.

Under Station Platforms.

Section 357. Wherever the sewer passes under a station platform or other structure, extra heavy soil pipe shall be laid from the spur to the outside of such station or other structure, brought up to a point thirteen feet below the established grade of the street, caulked and sealed, as provided above. All pipes passing under such structures shall be laid in concrete.

Concrete Sewers, Form, Dimensions and Materials.

Section 358. If, during the construction of the sewers, it is deemed advisable to interchange concrete and brick, the Contractor may, with the approval of the Engineer, build such sewers of either kind and quality herein specified.

Steel Bars Used if Ordered.

Section 359. Concrete sewers shall be reinforced with steel bars, if so indicated on the plans or directed by the Engineer.

Profiles and Inverted Centres for Inverts.

Section 360. Proper profiles for the concrete inverts shall be set up at the required distances, and the concrete for the bottom and invert of the sewer shall be deposited in place and rammed and worked down to the required shape. The concrete for the bottom and invert, if so directed, shall be placed in alternate lengths extending between every other pair of profiles, so that opportunity may be given to properly work the concrete in place.

Invert to be Protected.

Section 361. The concrete of the invert shall be protected during the progress of the work with planking, or by such other suitable methods as the Engineer shall direct and for so long a time as he may require.

Forms, Moulds, etc.

Section 362. Suitable forms or moulds, of the size and design to be approved by the Engineer, shall be provided by the Contractor to support the concrete of the side walls and roof while the same is being rammed into the permanent work.

Defective Work.

Section 363. If any voids, or irregular or defective work is discovered upon removing the forms or moulds, such voids or work shall be cut out and filled with a rich concrete or mortar mixed in such proportions and of such materials as provided elsewhere in these specifications.

Joints.

Section 364. No joints between different sections of the walls of a sewer shall, in any case, be a straight line, but shall always be stepped or toothed, so as to give a broken joint in the manner to be approved by the Engineer.

Spur Pipes, Branches, etc.

Section 365. In so far as they will be applicable to sewers constructed of concrete, the provisions and requirements for spurs, branches, etc., in brick sewers shall be understood to govern in such construction.

Vitrified Pipe Sewers—Quality of Pipe.

Section 366. Pipe sewers shall be built of vitrified, salt glazed stoneware pipe, with or without hub, as the Engineer may direct. The pipe shall be of the best quality, thoroughly and perfectly burnt, without warps, cracks or imperfections, well and smoothly glazed over the entire inner and outer surfaces and perfect in shape. The pipe shall be subject to all tests ordered in conformity with any requirements of the Bureau of Sewers, at any time previous to its being used.

Thickness.

Section 367. The size of the pipes shall be designated by their interior diameters. Each pipe shall be a true cylinder, and of even thickness throughout, according to the following schedule:

6-inch pipes shall be not less than ⅝ of an inch thick.
8-inch pipes shall be not less than ¾ of an inch thick.
10-inch pipes shall be not less than ⅞ of an inch thick.
12-inch pipes shall be not less than 1 inch thick.
15-inch pipes shall be not less than 1¼ inches thick.
18-inch pipes shall be not less than 1½ inches thick.
24-inch pipes shall be not less than 2 inches thick.
30-inch pipes shall be not less than 2½ inches thick.

Lengths.

Section 368. No pipe shall be less than 2 feet in length, and pipes of 12 inches, 15 inches and 18 inches in diameter shall be not less than 3 feet in length.

Curved and Split Pipes.

Section 369. When required, curved pipes shall be furnished and laid, curved to such a radius as may be required or as indicated on the plan of the work. No curved pipe shall exceed 3 feet in length. Split pipes shall be used when found necessary.

Hub and Spigot Pipe.

Section 370. In case the Engineer shall order hub and spigot pipe to be used, the hub shall have a depth of at least three (3) inches from its face to the shoulder of the pipe on which it is moulded, and shall have an interior diameter not less than one (1) nor more than two (2) inches greater than the exterior diameter of the pipe which is to be fitted into it.

Straight Pipe With Collars.

Section 371. In case the Engineer shall order pipe without hubs to be used, it shall be fitted with a collar of the same thickness as the pipe and not less than five inches wide. Each collar must have an internal diameter of not less than one-half inch nor more than one and one-half inches greater than the external diameter of the pipe to which it is to be fitted.

Spur Pipes.

Section 372. Pipes having spurs not less than six inches in diameter with hubs moulded thereon for house connections shall be furnished and laid at such points as indicated on the plan or as directed by the Engineer, and when not immediately used, they shall be sealed on the outside with approved vitrified earthenware covers set in mortar.

Risers.

Section 373. The provisions for risers on brick sewers shall also apply to pipe sewers.

Bends.

Section 374. Bends, siphons and special pipes shall be furnished and laid of the size and forms shown on the plans of the work, or as required.

Pipe Sewers, How Laid.

Section 375. All pipes shall be laid in concrete cradles of the required form and dimensions. The first layer of concrete shall be four inches thick, for the full width of the cradle, and after being thoroughly tamped shall be allowed to set for a period of not less than twenty-four hours. Upon the bed thus prepared, the pipe shall be laid true according to the lines and grades furnished. The ends of the pipes shall abut against each other and in such manner that there shall be no shoulder or unevenness of any kind along the bottom half of the sewer on the inside. Unless otherwise ordered, not less than fifteen feet of pipe shall be laid at any one time, in any one length of trench. The remainder of the concrete shall then be put in place and shall be exposed for at least twenty-four hours for inspection, as required for the bottom course.

Jointing Hub and Spigot Pipes.

Section 376. When hub and spigot pipes are used, the lower half of each hub shall be plastered on the inside with a layer of cement mortar mixed in the proportion of one part of cement to one part of sand and of sufficient thickness to bring the inner surface of the abutting pipes flush and even with the established flow line. After the pipes are fitted, the space between the inside of the upper half of each hub and the outside of the entering pipe shall be filled with cement mortar mixed as above specified, and the outside of the joint shall be thoroughly sealed with the same kind of mortar and the joints carefully wiped inside and outside.

Jointing Pipes Without Hubs.

Section 377. When pipe without hubs is used, a collar or ring shall be used at joints and shall lap equally the ends of each abutting pipe. Such collar or ring shall consist of not more than three pieces, the largest of which shall be placed at the bottom.

Spaces Between Pipes Uniform.

Section 378. The space between the ring and the pipes shall be as uniform as possible and shall be thoroughly filled with cement mortar mixed in the proportions specified for hub and spigot pipe. The joints shall be carefully wiped and pointed inside and outside and all mortar that may be left on the inside shall be removed and the inside of the pipe left clean and smooth throughout.

Iron Pipe Sewers.

Section 379. Sewers of iron pipe, of quality and laid in the manner described elsewhere in these specifications for the laying of water mains, shall be laid wherever indicated on the plans or at such places as the Engineer shall direct.

Special Castings.

Section 380. Wherever such pipes are laid under station platforms or through vaults, they shall, when required by the Engineer, be provided with special castings for manholes, which shall be fitted with a cover bolted on so as to make an airtight joint, according to the plans to be furnished by the Engineer.

Ventilators.

Section 381. Whenever, in the opinion of the Engineer, it becomes necessary to provide ventilation for sewers under station platforms or other structures, iron pipe shall be laid from the sewer to the surface of the street and fitted with proper gratings according to the plans to be furnished by the Engineer.

Connections.

Section 382. All existing sewers, culverts, drains and house connections intercepted by the proposed sewers, culverts or receiving basins shall be connected with the new work by proper curves and grades and in such manner as the Engineer shall direct; and all drains, basins or culverts rendered unnecessary or becoming disused by the work herein contemplated shall be filled in and made solid with good wholesome earth in the manner directed. Provision shall also be made for the connection of future sewers or basins by constructing brick spurs or inserting vitrified pipe at the points indicated on the contract drawings and at other points as the Engineer may direct. These connections shall be closed with bulkheads not less than eight inches in thickness and of the quality specified for brick masonry.

Fresh Work to be Protected.

Section 383. All fresh work shall be carefully protected from injury in every way. No wheeling or walking will be allowed on it and any portion injured must be relaid by the Contractor; no walking or working over the pipes after they are laid,

except as may be necessary in tamping the earth and refilling, will be allowed until there is at least two and one-half feet of earth over them.

Pipes to be Kept Clean.

Section 384. The interior of pipe sewers shall be carefully freed from all dirt, cement and superfluous material of every description as the work progresses, for which purpose a disc, mould or plate, attached to a rod sufficiently long to pass two joints from the end of the pipe last laid, shall be continuously worked through.

Exposed Ends of Pipes to be Protected.

Section 385. The exposed ends of pipe sewers shall, in all cases, be protected with a board or other stopper carefully fitted to the pipe, to prevent earth or other substances from washing in, and in no case shall brick or stone be used for that purpose.

Manholes.

Section 386. The masonry of manholes shall be carried up so that the top of the iron head when set shall be at the level of the established grade of the street at that point or to such height as the Engineer may direct, and from templates correctly made and set at top and bottom, between which not less than eight lines shall be drawn. Where manholes are not built to the established grade of the street, they shall be covered, when necessary, by selected bluestone slabs eight inches in thickness, to support the manhole heads. All joints shall be neatly struck and pointed on the inside. Each manhole shall be plastered thoroughly on the outside with cement mortar one inch in thickness, mixed in the proportion of one part of cement to two parts of sand.

Foundations.

Section 387. The foundations for manholes shall be of concrete or masonry of the kind indicated on the plans and shall be not less than twelve inches below the invert elevation of the sewer, except as otherwise indicated on the plan. When foundation additional to that indicated on the plan is required, it shall be built as directed by the Engineer.

Section 388. Sewer pipes shall be built in and trimmed, when necessary, so as to be flush with the inner face of the manhole, and an arch, laid in cement mortar, shall be turned over the pipe.

Vitrified Bricks or Granite Blocks.

Section 389. The invert shall be built of vitrified brick, granite blocks or concrete masonry, as indicated on the contract drawings.

Use of Bats.

Section 390. A reasonable number of bats not smaller than half bricks may be used in the construction of manholes or receiving basins, provided all interstices are thoroughly filled with mortar.

Steps.

Section 391. Standard steps of good quality of galvanized wrought iron, of the size, length and shape required for steps, shall be built into the interior sides of all manholes at a distance apart of not more than fifteen (15) inches vertically and they shall be so arranged that the lowest step shall be not more than two feet above the bench at the bottom of the manholes nor more than two feet above the invert of the sewer where there is no bench. Each manhole head shall be cast with a wrought iron step on the inside, when directed by the Engineer.

Bluestone.

Section 392. Hammer-dressed bluestone shall be furnished and laid of the form and thickness required as indicated on the plans or as otherwise directed.

Manhole Head and Cover.

Section 393. A cast iron manhole head and cover of the quality specified for cast iron, and except in special cases, of the pattern adopted by the President of the Borough in which the work is located, and in dimensions, weight and all other respects satisfactory to the Engineer shall be fitted on a bed of mortar to each of the above described manholes. Manhole heads and covers which do not conform to these specifications shall be at once removed from the work.

Perforations.

Section 394. Covers to be used on manholes in the street shall be perforated. Those used on sidewalk manholes shall be tight-fitting, without perforations.

Weights.

Section 395. Each manhole head and cover shall have its weight distinctly marked upon it with oil paint. The following shall be allowed as the minimum and maximum weights:

Street manhole head, 475 to 500 pounds.
Street manhole cover, 135 to 150 pounds.
Sidewalk manhole head, 300 to 310 pounds.
Sidewalk manhole cover, 100 to 110 pounds.

Noiseless Heads and Covers.

Section 396. When the pavement of the street is asphalt on wooden block, the manhole shall be fitted with a noiseless head and cover, to be approved by the Engineer, where new heads and covers are necessary.

Sealed Manhole Heads and Covers.

Section 397. All manholes in station platforms, vaults or other structures shall be provided with sealed manhole heads and covers according to the design indicated on the plans.

Emergency Manholes.

Section 398. Where a sewer crosses under the subway, emergency manholes shall be provided when directed by the Engineer and according to plans to be furnished by him.

Manholes to be Completed.

Section 399. Manholes shall in all cases be fully and completely built and fitted with their covers as the work progresses, and the sewers shall not be laid beyond or in advance of any uncompleted manhole.

Receiving Basins.

Section 400. Receiving basins shall be built as located on the plans or as the Engineer shall direct and in accordance with the plans to be furnished. Each portion of the basin shall be built of the size and materials designated on said drawings and shall be thoroughly plastered, both inside and outside, with cement mortar in the proportion of one part of cement to two parts of sand.

Foundations.

Section 401. The foundations for receiving basins shall be of concrete or masonry of the kind indicated on the plans and shall extend not less than twelve inches below the finished floor of the basin, except as otherwise indicated on the plans. When additional foundation is required, it shall be built as directed by the Engineer.

Stone Flooring.

Section 402. The flooring shall be of hammer-dressed North River bluestone flagging, not less than three inches thick, in not more than two pieces, and shall be well set in a full bed of mortar and rammed into place. The floor may be finished with cement mortar mixed in the proportion of one part of cement to one part of sand if so directed by the Engineer. The mortar shall be spread, while fresh, upon the concrete base and before the latter shall have reached its first set; it shall be in such quantity that after thorough manipulation it shall be one inch in thickness.

Head Stone and Gutter Stone.

Section 403. Where head stone and gutter stone are required they shall be of sound, durable granite of the dimensions indicated on the plan, hammer dressed to an even surface and cut to the satisfaction of the Engineer. Cast iron basin heads and gutter pieces of the design indicated on the plans shall be set instead of the above when required.

Cast-Iron Cover.

Section 404. A cast-iron cover of approved pattern weighing not less than eighty nor more than ninety-five pounds shall be fitted to the opening in the head stone.

Grate Bar.

Section 405. A grate bar made according to the plan shall be fastened solidly into the said head stone in the manner indicated.

Cast-Iron Trap.

Section 406. A cast-iron trap of the form and dimensions indicated on the plan free from imperfections, and properly coated with coal pitch varnish shall be furnished and built into place as directed by the Engineer.

Joints.

Section 407. The joints shall be tightly fitted with an oakum gasket or with cement mortar if so desired.

Iron Steps.

Section 408. Galvanized iron steps of the same design required for manholes shall be built into the walls.

Culvert Pipes.

Section 409. The culvert pipe for connections with sewers shall be 12-inch vitrified pipe unless otherwise indicated on the plan, and of the kind and quality previously described, and shall be laid, in all cases, in a concrete cradle of the form and dimensions required for pipe sewers in accordance with the directions of the Engineer. In case it becomes necessary to connect any basin already built, with the work to be constructed, so much of such culverts as in the opinion of the Engineer may be necessary shall be taken up and rebuilt or relaid with vitrified pipe, or brick as the case may be, in the manner described above and reconnected in a straight line from the basin to the sewer.

Flush Tanks.

Section 410. Automatic flush tanks of a type approved by the Engineer shall be built where indicated on the plans or where directed by the Engineer.

Waterproofing.

Section 411. Whenever, in the opinion of the Engineer, it is necessary to waterproof a sewer, chamber or receiving basin, or their appurtenances, it shall be done as indicated on the plans or as directed by the Engineer and in the manner described elsewhere in these specifications.

Mortar.

Section 412. All masonry shall be laid in Portland cement mortar of the quality described in these specifications. It shall be mixed in the proportion of one (1) part of cement to two (2) parts of sand, excepting as otherwise specially provided.

Concrete.

Section 413. All concrete for sewers shall be made in the proportions of one (1) part of cement to two and one-half (2½) parts of sand and four and one-half (4½) parts of stone of the quality described in these specifications.

Paving.

Section 414. On the completion of each section of one hundred feet of sewer, the sidewalks and roadways shall be restored as provided under the heading of "Street Surface and Park Surface Restored."

Permits for Connections.

Section 415. The Commissioner of Public Works shall have the right to connect any sewer or sewers with the sewers herein described or to grant permits to any person or persons to make connections therewith at any time before it is finally completed, and the Contractor shall not interfere with or place obstructions in the way of such person or persons as may be employed in building such new sewer or sewers or in making such connections. This is not to be construed, however, as permitting the introduction of storm water or sewerage into any sewer being constructed under this contract before its final completion.

Thoroughly Cleaned.

Section 416. During the progress of the work, and until the entire completion and final acceptance thereof, the sewers, drains, basins, culverts and connections shall be kept thoroughly cleaned throughout, and left clean, and the drainage of any old sewer that may be taken up or intercepted shall be provided for and taken care of by the Contractor, all at his own expense.

Payment for Sewers.

Section 417. Payment for sewers will be per lineal foot of sewer complete as herein provided in Schedule Items 37 to 74, both inclusive, except as hereinafter specifically provided. The price for each class of sewer is to include each and every item applicable thereto as herein given in Sections 333 to 416 of these specifications and as otherwise provided in the contract and as indicated on the plans; excepting as is hereinafter specially provided.

Excavations.

Section 418. In addition to the price per lineal foot for completed sewer, as above provided, excavation will be paid for at the prices herein stipulated in Schedule Items 2-A and 3-A (which prices shall include all the matters referred to in Section 107), on the basis of size of trench stipulated in Sections 337 and 340, excepting where the sewer is built by tunneling, in which case tunnel excavation will be paid for at the price herein stipulated in Schedule Item 5-A (which prices shall include all the matters referred to in Sections 117 and 120), on the basis of the net ordered lines of the sewer. Payment for street surface restored shall be as provided in Schedule Items 30-A or B.

Steel Beams and Reinforcing Rods.

Section 419. Where steel beams or reinforcing rods are required and ordered, such beams and rods will be paid for in addition to the price bid for the sewer and at the prices herein stipulated for furnishing and placing such material and all work incidental thereto, in Schedule Item 20 or 21.

Automatic Flush Tanks.

Section 420. Where automatic flush tanks are built as provided in Section 410 of the specifications they will be paid for as herein provided in Article XII of the contract.

Waterproofing.

Section 421. Where waterproofing is required and placed in accordance with Section 411 of the specifications it will be paid for at the prices herein stipulated for waterproofing, Schedule Item 15 or 16.

Siphons.

Section 422. Where inverted siphons passing under the subway structure are called for and built, they shall be considered as part of the regular subway construction from outside to outside of the sewer chambers or between points of departure from standard sewer construction, such limits being indicated on the plans; and payment for such siphons will be made in accordance with the various classes of work or material as are applicable thereto in the Schedule and at the prices therein stipulated for such items.

Cast-Iron Pipe Sewers, etc.

Section 424. All cast-iron pipe sewers wherever built, and the parts, within the limits of the Railroad, or as indicated on the plans, of all other sewers crossing over or under the Railroad, will be paid for in accordance with the various classes of work or material applicable thereto in the Schedule and at the prices stipulated therein for such classes of work or material.

House and Drainage Connections.

Section 425. The cost of the maintenance, support or construction of all house or other drainage connections made necessary by construction under Sections 422 and 424 will be included in the prices for the several classes of work and material entering into such construction.

21—Requirements for Pipes.

Generally.

Section 426. Whenever it is necessary to relay any water main, all new material required for the same shall be of the quality and laid in the manner specified below, and subject to the various clauses of these specifications applicable thereto.

Pipes to be Cylinders.

Section 427. The pipes shall be circular cylinders, with the inner and outer surfaces concentric, and of the full interior diameter required.

Hubs and Spigots.

Section 428. The hub or socket and the spigot end shall be shaped in exact conformity with the standards of the Department of Water Supply, to be furnished by the Commission, and will be tested by circular gauges.

Section 429. The seat or shoulder of the socket and the end of the spigot shall be straight and even, and at right angles to the axis of the pipe, so as to make a smooth, tight joint. Special care will be required in making the sockets and spigots

to conform to the drawings and all pipes will be rigorously inspected at these points. No pipe will be received whose eccentricity at either the spigot or socket ends, exceeds one-eighth (⅛) of an inch, or whose dimensions differ by more than one-eighth (⅛) of an inch from those required.

Section 430. The pipes shall be designated by dimensions of the interior diameter

Section 431. Bands, lugs, buttons, or ribs shall, if required, be cast on the pipes, of such forms and dimensions as the Engineer may direct.

Length of Pipe.

Section 432. The straight pipe shall be twelve (12) feet long, exclusive of hub; other pipe as may be directed.

Section 433. All straight pipes shall be straight in the direction of the axis of the cylinder.

Thickness and Weights.

Section 434. The thickness of the pipes, branches and special castings shall correspond with the standards of the Department of Water Supply. The weight for straight pipe shall be approximately as follows:

60-inch pipes,	12,835	pounds each.
48-inch pipes,	8,270	pounds each.
42-inch pipes,	6,860	pounds each.
36-inch pipes,	5,305	pounds each.
30-inch pipes,	3,940	pounds each.
24-inch pipes,	2,660	pounds each.
20-inch pipes,	2,005	pounds each.
16-inch pipes,	1,475	pounds each.
12-inch pipes,	1,015	pounds each.
8-inch pipes,	580	pounds each.
6-inch pipes,	415	pounds each.

High Pressure Fire System.

Section 435. For high-pressure fire system standard spigots and grooves—The weights for straight pipes, with lugs, shall be approximately as follows, in pounds per length:

	Of 3 ft.	Of 4 ft.	Of 6 ft.	Of 12 ft.
8-inch	355	420	550	935
12-inch	615	745	1,000	1,765
16-inch	1,005	1,215	1,635	2,905
20-inch	1,475	1,795	2,425	4,320
24-inch	2,105	2,585	3,535	6,385

All requirements as to weights, laying, tests, etc., shall be in strict accordance with the standard requirements of the Department of Water Supply, Gas and Electricity.

Section 436. The thickness of the metal of the pipes and special castings will be tested by calipers after the castings have been freed from sand and cleaned.

Variations in Thickness.

Section 437. No pipe will be received when the thickness of metal is less by more than one-twelfth (1-12) of an inch than the thickness required by the standards.

Underweight.

Section 438. No straight pipe or casting will be received which weighs less than the weights above mentioned by more than five (5) per cent., for pipes 16 inches or less in diameter, or more than four (4) per cent. for pipes more than 16 inches in diameter. No special casting will be received which weighs less than the standard weight by more than ten (10) per cent. for pipes 12 inches or less in diameter, and eight (8) per cent. for larger pipes.

Straight Pipe Cast Vertically.

Section 439. All straight pipes shall be cast vertically, and all pipes 12 inches or more in diameter shall be cast with the hub end down.

Section 440. All the castings shall be made in such molding sand or loam as will leave the surface clean and smooth.

Castings, How Marked.

Section 441. All the castings shall have the year in which they are cast, the running number of the castings of the same size and form, the letters D. W. S., and

the initials or name of the Contractor, and of the foundry where cast, cast on the outer side in raised letters of not less than two (2) inches in length and one-eighth (⅛) of an inch in relief, in such manner as the Engineer may designate; and in case any pipe shall be condemned, the letters D. W. S. shall be erased by the Contractor.

Quality of Cast Iron.

Section 442. The metal of which the castings are to be cast (which shall be remelted in a cupola or air-furnace) shall be pig-iron, made without any admixture of cinder-iron, or other inferior metal, and shall be of such character as to make a pipe strong, tough and of an even grain, entirely free from uncombined carbon when seen under the microscope, and such as will bear, satisfactorily, drilling and cutting, and shall have a tensile strength of at least sixteen thousand (16,000) pounds to the square inch.

Section 443. The castings shall be free from scoria, sand holes, air bubbles, and other defects and imperfections.

Castings to be Clean.

Section 444. The castings shall be perfectly cleaned and no lumps shall be left on the inner surface of the barrels or sockets, or on the outer surface of the spigot end. The castings shall be subject to hammer inspection. Iron-wire brushes shall be used, as well as softer brushes, to remove the loose dust. No acid or other liquid shall be used in cleaning the castings.

Pipes to be Coated.

Section 445. Every pipe, branch and special casting shall be carefully coated inside and out with coal pitch and oil. Every casting shall likewise be entirely free from rust when the coating is applied. If the casting cannot be dipped immediately after being cleaned, the surface shall be oiled with linseed oil, to preserve it until it is ready to be dipped. No casting shall be dipped after rust has set in.

Pitch.

Section 446. The coal-tar pitch shall be made from coal tar distilled until the naphtha is entirely removed and the material mixed with linseed oil so as to make a smooth, tough and tenacious coating. Pitch which becomes hard and brittle when cold will not answer for this use.

Section 447. Pitch of the proper quality having been obtained, it shall be carefully heated in a suitable vessel to a temperature of three hundred (300) degrees Fahrenheit, and shall be maintained at not less than this temperature during the time of dipping. The material will thicken and deteriorate after a number of pipes have been dipped; fresh pitch shall, therefore, be frequently added, and occasionally the vessel shall be entirely emptied of its old contents and refilled with fresh pitch.

Section 448. Every casting shall attain a temperature of three hundred (300) degrees Fahrenheit, before being removed from the vessel of hot pitch. It shall then be slowly removed and laid on skids to drip.

To be Inspected Before Dipping.

Section 449. No casting shall be dipped until the authorized inspector has examined it as to cleaning and rust, and subjected it thoroughly to the hammer test. It may then be dipped, after which it will be passed to the hydraulic press to meet the required water test. The proper coating shall be tough and tenacious when cold on the pipes, and not brittle or with any tendency to scale off.

Tests.

Section 450. The castings must be capable of sustaining a pressure, in the hydraulic press, of three hundred (300) pounds to a square inch, and any casting which shows any defect by leaking, sweating or otherwise, will be rejected. This test shall be made at the foundry, and at the expense of the Contractor.

Weighed and Marked.

Section 451. The castings shall be weighed, and the weight distinctly marked on the castings in white paint. The Contractor shall provide at the foundry where the pipes and castings are to be manufactured proper sealed scales and weights for weighing the castings, which shall be done at the expense of the Contractor, under the supervision of the Inspector.

Blocking and Wedges.

Section 452. Each pipe over eight (8) inches inside diameter, unless otherwise ordered, shall be placed on two (2) blocks and four (4) wedges of hemlock timber, the wedges to rest on the blocks and the pipe on the wedges.

Timber for Blocking.

Section 453. The blocks and wedges shall be of sound hemlock timber; 48 and 36-inch pipe shall be laid on blocks 4 feet long, 12 inches wide and 6 inches thick, with wedges 18 inches long, 6 inches wide, 4 inches thick on one end and ½ inch thick on the other; 30 and 24-inch pipe on blocks 3 feet long, 10 inches wide and 5 inches thick, with wedges 15 inches long, 5 inches wide and 3½ inches thick on one end and ½ inch thick on the other end; 12 and 20-inch pipe on blocks 2 feet long, 8 inches wide and 4 inches thick with wedges 12 inches long, 4 inches wide, 3 inches thick on one end and ½ inch thick on the other.

Joints.

Section 454. The spigot end of the pipe shall be inserted into the hub to within from one-fourth (¼) to one-eighth (⅛) of an inch of the full depth of the hub, and the space around the pipe shall be equalized so as to give as nearly as possible an equal space for the packing. The space between the pipe and the hub shall be packed with clean, sound jute packing yarn, free from tar, far enough to leave the proper space for lead. The remaining space shall then be filled by running it full of lead to a depth of four (4) inches, with a bead outside of the face of the hub large enough to allow for caulking, so that when the joint is properly caulked the lead will be flush with the hub of the pipe. After the joint shall have been run with lead, it shall be caulked by means of proper tools, so as to make a watertight joint

Lead.

Section 455. The lead to be used shall be of the best quality of pure, soft lead. and in every respect suitable for the purpose.

Notice of Interruption to be Given.

Section 456. In case it becomes necessary to cut any connection with any other main, house or hydrant, or in any way to interfere with the continuous and normal flow of water, due notice shall be sent at least forty-eight (48) hours in advance to the Engineer and to the Commissioner of Water Supply, and the Contractor shall, if so ordered, make a temporary by-pass or other arrangement to preserve the flow of water while breaking connections.

Connections Interfered With.

Section 457. All connections cut, interfered with or injured shall be restored under the directions of the Engineer, without delay and in accordance with the rules and regulations of the Department of Water Supply governing such matters, to a suitable condition as good as existed before commencing work.

Stopcocks, etc.

Section 458. Stopcocks, boxes, branches, curved pipe, and other specials according to the standards of the Department of Water Supply shall be set where necessary.

Section 459. For gas pipes, steam pipes, air pipes, mail tubes and any other pipes not herein enumerated, the standard weights and all other requirements shall be in accordance with the standard specifications and requirements of the several owners of such structures.

22—STREET SURFACE AND PARK SURFACE RESTORED.

Pavement to be Restored.

Section 460. As soon as the structure in any excavation or trench made within a street shall be completed and the trench backfilled, a temporary pavement shall be laid and maintained in a condition satisfactory to the Engineer; and after the earth shall have become, in the opinion of the Engineer, sufficiently settled, the Contractor shall proceed to restore the surface to a condition similar to, and equally as good as, that existing previous to the commencement of construction; except that the Contractor will not be required to permanently restore the pavement of roadways between curb lines, but shall provide a temporary roadway pavement as follows:

Temporary Roadway Pavement.

Section 461. Upon the backfill, placed and compacted as provided under the clauses relating to backfilling, shall be placed a layer of sand, about an inch and

a half in thickness, on which shall be laid a pavement of granite blocks carefully laid and rammed to the required finished grade of the street surface. The end and side joints shall be thoroughly filled with sand, and shall not exceed ¾ of an inch in thickness. The granite blocks required for this temporary pavement, if found in or under the original pavement, shall be stored at a suitable place until required for use. In case granite blocks are not found in or under the original pavement, they may be obtained by the Contractor, free of cost, from the Bureau of Highways at the corporation yards.

The Contractor shall maintain the temporary roadway pavement thus laid for a period not exceeding six months from the time of its completion in any one block or street intersection. During this period the Contractor shall, without requiring previous notice, readjust or relay any portion of the pavement wherever and whenever a straight edge 3 feet long, laid in any direction, shows a depression of more than ¾ inch.

All the requirements as to street surface restored, including temporary roadway pavements, shall apply to the trenches for sewers, pipes or other subsurface structures along or off the line of the Railroad. Within the limits of private property to be taken by the City for the extension of Irving Place, these requirements will not apply.

Other Sidewalks May be Laid.

Section 462. Nothing contained in these specifications shall be understood or construed as prohibiting the Contractor from making any arrangement with any property owner to lay another style of sidewalk, or other surface covering within curb lines, in place of the sidewalk or other surface covering taken up; in which case the Contractor shall file with the Commission a copy of his contract with such property owner, duly acknowledged in writing by both parties.

In case any property owner desires to lay a sidewalk, or other surface covering within curb lines, affected by this contract, different from the one removed, and shall notify the Commission in writing that he has failed to make satisfactory arrangements for such work with the Contractor, then the Commission, in its discretion, may direct the Contractor to finish and dress off the filling over his work to such grade as the Engineer may select, and further direct him to remove from the area to be restored all material of whatever nature not required to be relaid, and to permit another contractor to lay such sidewalk or other surface covering; in which case the liability of the Contractor under this contract shall cease, as far as that part of his work is concerned, whenever the Engineer shall report to the Commission that the instructions of the Commission have been complied with, exactly the same as if the Contractor had fully completed the restoration as hereinbefore provided.

Payment for Street Surface Restored.

Section 463. Payment for street surface restored will be made as provided in Schedule Item 30-A or B, which prices shall include the cost of restoring all curbs, manhole heads and covers, gratings, vault lights, etc., that formed a part of the original street surface.

Measurements.

Section 464. The measurement for payment for street surface restored will be to the net line of ordered excavation.

Outside of Net Lines.

Section 465. All other pavement outside of the net lines of ordered excavation, either along or off the line of the Railroad, that may have become damaged, directly or indirectly, as the result of the Contractor's operations, shall be restored by the Contractor at his own cost and expense to a condition similar to and equally good as that existing previous to the commencement of construction.

Parks and Parkways.

Section 466. All parks and parkways including trees, shrubbery, etc., as elsewhere provided in this contract and the specifications, are to be restored to the satisfaction of the Department of Parks.

Measurement.

Section 467. Measurements for park surface restored are to be to the net lines of ordered excavation.

Payment For.

Section 468. Payment for park surface restored will be made at the price provided in Schedule Item 31.

Outside of Net Lines.

Section 469. Any damage done outside of the net lines of ordered excavation in connection with the construction of the work to park surfaces or growths, under the jurisdiction of the Department of Parks, shall be restored to the satisfaction of the said Department, and at the Contractor's own cost and expense.

23—VAULT LIGHTS, GRATINGS AND HAND-RAILS.

Vault Lights.

Section 470. The roofs of the stations, where under sidewalks, parks or parkways, shall, to as great an extent as possible, consist of vault light construction. These lights shall be made with lenses, not exceeding three (3) inches in diameter, of strong glass set in cement; they shall be provided with non-slipping treads, buttons or other devices all of design approved by the Engineer; and shall be of sufficient strength to carry, when supported in a manner similar to that in which they are to be permanently set, an equally distributed load of at least five hundred (500) pounds per square foot without signs of failure, deformation or permanent set, when such test load is removed. The right is reserved to test at least one (1) frame or panel in every ten (10), as selected by the Engineer. Should the one selected fail, another will be selected by the Engineer; and if that fail, then the whole lot may be rejected. The vault lights must be set in place with cement, lead or other means to be absolutely waterproof. Any tests required shall be at the Contractor's expense.

Measurement and Payment.

Section 471. The area for payment for vault lights shall be to lines not exceeding one (1) foot outside of the inner faces of the supporting walls, and the price paid will be as provided in Schedule Item 29, which price shall include all material and work incidental to the completed vault lights in place.

Steel Gratings.

Section 472. Steel gratings shall be provided and placed over fan and other ventilating chambers, over stations and station approaches, at places shown on the plans, or at other places if required by the Engineer. They will be constructed as shown on the detailed plans for gratings.

Measurement and Payment.

Section 473. Gratings will be measured to the lines as constructed and payment therefor will be made as herein provided in Schedule Item 28, which price shall include the grating in place in the work, all frames and framing, and all incidental work.

Galvanized Iron Pipe Hand-Rails.

Section 474. Galvanized iron pipe hand-rails will be placed in the Railroad over the benches containing the ducts. They shall be securely fastened to the wall of the tunnel by means of expansion bolts, and as shown on the contract drawings. Measurements for payment will be per lineal foot of hand-rail in place in the work, complete, and at the price as stipulated in Schedule Item 27.

IV.—SECURITY TO BE FURNISHED BY CONTRACTOR.

Security by Contractor. Contractor's Bond.

Article 27. Simultaneously with the execution of this contract the Contractor shall give security for the performance of his obligation by filing with the Comptroller a bond in the form annexed hereto, entitled, "Form of Bond," executed by the Contractor and by two or more sureties to be corporations or persons approved by the Commission in the sum specified in the Invitation to Contractors for the Section embraced in this contract. In case any of the sureties upon the bond shall become insolvent or unable in the opinion of the Commission to pay promptly the amount of such bond to the extent to which such surety might be liable, then the Contractor within ten days after notice by the Commission to the Contractor shall, by supplemental bond or otherwise, substitute another and sufficient surety to be approved by the Commission in place of the surety so insolvent or unable. If the Contractor shall fail, within such ten days or such further time as the Commission may grant, to substitute another and sufficient surety, then the contractor shall, for all the purposes of this contract be deemed to be in default in the performance of his obligations hereunder and upon the said bond, and the Commission may terminate the contract or may bring any proper suit or proceeding against the Contractor and the sureties, or either of them, or may require to be deducted from any moneys then in, or thereafter coming into, the hands of the City and due to the Contractor

the amount for which the surety insolvent or unable as aforesaid shall have justified on the bond; and the moneys so deducted shall be held by the Comptroller as collateral security for the performance of the condition of the bond.

V.—PAYMENTS TO CONTRACTOR.

Partial Payments.

Article 28. In order to assist the Contractor to prosecute the work advantageously, the Engineer shall, from time to time, as the work progresses, but not oftener than once a month, make in writing an estimate, such as in his opinion shall be just and fair, of the amount and value of the work done and materials incorporated in the work by the Contractor according to the terms of this contract (but it is understood that in making such estimates the Engineer shall not necessarily be governed by the unit prices contained in the Contractor's proposal), provided, however, that estimates may at any time be withheld or reduced, if, in the opinion of the Engineer, the work is not proceeding in accordance with the contract. The first such estimate shall be of the amount and value of the work done and materials incorporated in the work since the Contractor commenced the performance of this contract on his part. Every subsequent estimate except the final estimate shall be of the amount and value of the work done and materials incorporated in the work since the last preceding estimate was made, provided, however, that no such estimate shall be required to be made when, in the judgment of the Engineer, the total value of the work done and materials incorporated in the work since the last preceding estimate amounts to less than ten thousand dollars ($10,000). The Engineer shall further include accepted structural iron and steel delivered on the site of the work, but not incorporated in the work, at the rate of forty dollars ($40) per ton of two thousand pounds. But the quantity of such structural iron and steel included in any partial estimate shall not exceed the quantity of such material, as determined by the Engineer, required for the ensuing six months, and any material included in a partial estimate which may subsequently become unsatisfactory, shall be deducted from succeeding partial estimates. No materials not incorporated in the work, excepting such structural iron and steel, and none of the Contractor's plant shall be included in partial estimates.

Not by Strict Measurement.

Article 29. Such estimates shall not be required to be made by strict measurement, but they may be made by measurement or by estimation, or partly by one method and partly by the other, and it shall be sufficient if they are approximate only.

Vouchers.

Article 30. Upon each such estimate being made and certified in writing to the Commission, the Commission shall forthwith prepare and certify a voucher for ninety per cent. of the amount stated in such estimate or certificate to be the value of the work done and materials furnished, and the City shall within thirty (30) days after the date of the certification of such voucher by the Commission pay the same; provided, however, that the City may at all times reserve and retain from said partial payments, or any of them, in addition to the ten per cent. above mentioned to be retained and reserved, any sum or all sums which by the terms hereof, or of any law of the State of New York passed prior to the date hereof, it is or may be authorized to reserve or retain.

Final Estimate.

Article 31. Whenever, in the opinion of the Engineer, the Contractor shall have completely performed this contract on his part, the Engineer shall so certify, in writing, to the Commission, and in his certificate shall state, from actual measurements, the whole amount of work done by the Contractor, and also the value of such work under and according to the terms of this contract. On the expiration of ninety (90) days after the acceptance by the Commission of the work herein agreed to be done by the Contractor, and the filing of a certificate of the completion and acceptance of the work in the office of the Comptroller, signed by the Engineer and the Commission, the City shall pay to the Contractor the amount remaining after deducting from the amount or value stated in the last-mentioned certificate, all such sums as shall theretofore have been paid to the Contractor under any of the provisions of this contract, and also any sum or all such sums of money as by the terms hereof the City is or may be authorized to reserve or retain; provided, that nothing herein contained shall be construed to affect the right, hereby reserved, of the Commission to reject the whole or any portion of the aforesaid work, should the said certificate be found, or known to be, inconsistent with the terms of this contract, or otherwise improperly given. All prior certificates upon which partial payments may have been

made, being merely estimates, shall be subject to correction in the final certificate, which final certificate may be made without notice thereof to the Contractor, or of the measurements upon which it is based.

Interest in Case of Delayed Payments.

Article 32. If the payment of the amount due the Contractor on any voucher shall be delayed beyond the time stipulated in Article 30, in the case of partial payment, or Article 31, in the case of final payment, the City shall pay the Contractor interest on such amount at the rate of four and one-half (4½) per cent. per annum for the period of such delay; it being understood that such payments of interest, if any, are to be in lieu of any claim of the Contractor for alleged damages for breach of contract or otherwise in case of delayed payments. The term for which interest shall be paid shall be reckoned, in the case of a partial payment from the thirtieth day after the certification of such voucher by the Commission, and in the case of a final payment from the ninetieth day after the acceptance of the work by the Commission, to the date of payment of the voucher. The date of payment of a voucher shall be considered the day on which the voucher is ready for payment as evidenced by the records of the Department of Finance. If interest shall become due on any partial payment the amount thereof, as determined by the Commission, shall be added to a succeeding payment. If interest shall become due on a final payment it shall be paid on a supplementary voucher prepared by the Commission and forwarded to the Comptroller for payment in the usual manner.

No Estoppel.

Article 33. The City shall not, nor shall any Department or officer thereof, be precluded or estopped by any return or certificate made or given by the Commission, any Engineer, or other officer, agent or appointee thereof under any provision of this contract, from at any time either before or after the final completion and acceptance of the work and payment therefor pursuant to any such return or certificate, showing the true and correct amount, quality and character of the work done and materials furnished by the Contractor or any other person under this agreement, or from showing at any time that any such return or certificate is untrue and incorrect or improperly made in any particular, or that the work and materials, or any part thereof, do not in fact conform to the specifications; and the City shall not be precluded or estopped, notwithstanding any such return or certificate and payment in accordance therewith, from demanding and recovering from the Contractor such damages as it may sustain by reason of his failure to comply with this contract or the specifications.

No Waiver.

Article 34. Neither the acceptance of the Commission or its Engineer, or any of its employees, nor any order, measurement or certificate by the Engineer, nor any order by the Commission for payment of money, nor any payment for, nor acceptance of the whole or any part of the work by the Engineer or the Commission, nor any extension of time, nor any possession taken by the Commission, or its employees, shall operate as a waiver of any portion of this contract or of any power herein reserved to the Commission, or any right to damages herein provided; nor shall any waiver of any breach of this contract be held to be a waiver of any other or subsequent breach.

Final Payment to Terminate Liability of City.

Article 35. The acceptance by the Contractor of the last payment aforesaid shall be and shall operate as a release to the City, from all claim and liability to the Contractor for anything done or furnished for, or relating to, the work, or for any act or neglect of the Commission, the City or of any person relating to or affecting the work, except only the claim against the City for the remainder, if any there be, of the amounts kept or retained as provided in this contract.

Contractor's Claims for Damage. Statements of Damage to be Filed With Engineer.

Article 36. If the Contractor shall claim compensation for any damage sustained by reason of the acts of the Commission, or its agents, he shall, within ten days after the sustaining of such damage, make a written statement of the nature of the damage sustained to the Engineer. On or before the fifteenth day of the month succeeding that in which any such damage shall have been sustained, the Contractor shall file with the Engineer an itemized statement of the details and amount of such damage, and, unless such statement shall be made as thus required, his claim for compensation may be forfeited and invalidated, and he shall not be entitled to payment on account of any such damage.

Lien Law.

Article 37. If at any time before or within thirty days after the whole work agreed herein to be performed and all the labor and material herein agreed to be delivered have been performed or delivered or completed and accepted by the City any person or persons claiming to have performed any labor or furnished any material toward the performance or completion of this contract shall file with the Commission and with the Comptroller of the City any such notice as is described in the Lien Law, the City shall retain until the discharge thereof from moneys under its control so much of such moneys as shall be sufficient to satisfy and discharge the amount in such notice claimed to be due, together with the costs of any action or actions brought to enforce such lien created by the filing of such notice.

VI.—Contractor's Liability for Injuries to Persons or Property.

Contractor Approves Plans as Involving No Damage.

Article 38. The Contractor expressly admits and covenants to and with the City that the plans and specifications and other provisions of this contract, if the work be done without fault or negligence on the part of the Contractor, do not involve any danger to the foundations, walls or other parts of adjacent buildings or structures or to navigation; and the Contractor will at his own expense make good any damage that shall, in the course of construction, be done to any such foundations, walls or other parts of adjacent buildings or structures or to navigation. The liability of the Contractor under this covenant is absolute and is not dependent upon any question of negligence on his part, or on the part of his agents, servants or employees and the neglect of the Engineer to direct the Contractor to take any particular precautions or to refrain from doing any particular thing, shall not excuse the Contractor in case of any such damage. Where the work is required to be done by tunneling the same admission and covenant shall also apply to the foundations, walls and other parts of buildings and to any railroad track or structure, subway, street, conduit, pipe, sewer or other structure or surface over the tunnel. But this admission and covenant shall not apply to the foundations, walls or other parts of buildings or any part thereof acquired by the City and which the Engineer may determine should be razed.

Traffic to be Maintained.

Article 39. The Contractor shall, during the performance of the work, safely maintain the traffic on streets, avenues, highways, parks, waters or other public places as provided in the specifications, and shall take all necessary precautions to place proper guards for the prevention of accidents and put up and keep at night suitable and sufficient lights.

Indemnification for Accidents, etc.

Article 40. The Contractor shall be solely responsible for all physical injuries to persons or property occurring on account of and during the performance of the work hereunder, and shall indemnify and save harmless the City from liability upon any and all claims for damages on account of such injuries to persons or property, and from all costs and expenses in suits which may be brought against the City for such injuries to person or property; it being distinctly understood, stipulated and agreed that the Contractor shall be solely responsible and liable for and shall fully protect and indemnify the City against all claims for damages to persons or property occasioned by or resulting from blasting or other methods or processes in the work of construction whether such damages be attributable to negligence of the Contractor or his employees or otherwise.

Money Due the Contractor or May be Retained to Meet Claims.

Article 41. In case any claim shall be made by any person or corporation against the Contractor or the City for loss or damage to person or property as aforesaid, the amount of such claim or so much thereof as the Commission shall deem reasonable, shall, upon the requirement and in the discretion of the Commission, be retained by the Comptroller out of any moneys thereafter growing due to the Contractor hereunder (in addition to the other sums hereinbefore authorized to be so retained), as security for the payment of such claim or claims. If and when the liability of the City or the Contractor on such claim or claims shall have been established by a judgment of a court of competent jurisdiction, or shall have been admitted by the Contractor to be valid, the said claim or claims shall be paid from the amount so retained and the balance, if any, paid to the Contractor. Should there be any unsatisfied claims for injuries to persons or property at the time when the final estimate for the work is made and returned, the Engineer shall have the right to retain out of said final estimate a sum in his judgment sufficient to protect the City in regard

to all unsatisfied claims as aforesaid and in case the amount thus retained should be insufficient to pay the amount adjudicated to be due upon such claim the City may sue for and recover from the Contractor the amount or balance as a debt from the Contractor to the City. The Engineer may further, if in his judgment such a course is necessary, at the time of making the final estimate, and as a condition to making the same, require the Contractor to continue his bond or any part thereof, for a time not exceeding the time when such claims would be barred under the existing Statute of Limitations, as security against any claims then unsatisfied or not presented.

Examinations of Abutting Property.

Article 42. In order to safeguard the owners or tenants of abutting property and at the same time prevent unjust or fraudulent claims against the Contractor or the City in respect thereto, the Engineer shall cause a detailed examination of all adjacent or abutting property to be made before construction is begun. The owner, or tenant of each parcel or his or their duly authorized representative, shall be invited by a notice in writing delivered to a person apparently in charge of the premises, to be present, and the Contractor, or his duly authorized representative, shall attend and with the Engineer shall make such detailed examination. A complete record of the existing conditions of each parcel shall be made in triplicate, signed by the Engineer and the Contractor, and one copy shall be delivered to the owner, one to the Contractor and one shall be retained by the Commission. At such times as the Engineer may direct, and upon the completion of the work, or upon notice to the Engineer by the owner or tenant that physical injury has occurred, further examination shall be made and the findings recorded and filed as above.

Damage to Works During Construction.

Article 43. All risk of loss or damage to the works, or to any part thereof, or to any of the materials, tools, implements or other things used in doing the work, prior to final completion, is assumed and shall be borne by the Contractor, and any such loss or damage shall be made good by the Contractor at his own cost, and the construction shall be carried forward by him in accordance with this contract, without additional cost to the City by reason of such loss or damage.

VII.—CITY TO SECURE CONTRACTOR AGAINST INTERFERENCE BY INJUNCTIONS, TO ACQUIRE REAL ESTATE, ETC.

City's Assurances to Contractor of Right to Construct.

Article 44. The City hereby stipulates and covenants to and with the Contractor that the City will secure and assure to the Contractor so long as the Contractor shall perform the stipulations of this contract, the right to construct the railroad as prescribed in this contract free of all right, claim or other interference, whether by injunction, suit for damages or otherwise, on the part of any owners, abutting owner, or other person; but not including any interference, legal or otherwise, by patentees or persons claiming to be patentees of tools, methods or appliances.

Claims for Infringement of Patents.

Article 45. The Contractor shall hold himself responsible for any claims made against the City for any infringement of patents by the use of patented articles in the performance and completion of the work, or of any process connected with the work agreed to be performed under this contract, or of any materials used upon the said work; and shall save harmless and indemnify the City for all costs, expenses and damages which the City shall be obliged to pay by reason of any infringement of patents used in the performance and completion of the work.

Acquisition of Real Estate.

Article 46. The City will acquire all such real estate and rights of way or other rights, terms, franchises, easements and privileges therein which, in the opinion of the Commission, it shall be necessary to acquire or extinguish for the purpose of constructing the works free of interference or right of interference; provided, however, that this covenant shall not apply to or include any damages for physical injuries to property referred to in chapter 6 hereof, whether or not compensation for such damages be awarded in a condemnation proceeding. If compensation for any such damages shall be included in an award in condemnation proceedings the Contractor shall, upon demand, promptly reimburse the City for any payments made by it for such purposes.

VIII.—TIME FOR COMPLETION, DAMAGES FOR DELAY, ETC.

Commencement and Completion of Work.

Article 47. Time is of the essence of this contract. The Contractor shall begin actual work within sixty (60) days after the execution of this contract. The entire work covered by this contract shall be completed in all respects within forty-two (42) months from the date of the delivery of this contract.

Price to be Reduced for Delay.

Article 48. In the event of delay in completion of the works beyond the period herein prescribed, or beyond the period to which such time may be extended by resolution of the Commission for good cause shown, the City shall—whether the working force be increased as provided in the specifications or not—be paid damages for such delay. Inasmuch as the amount of such damages will be extremely difficult to ascertain, especially in view of the fact that the railroad herein contracted for is only a part of a complete system, the remainder of which is to be constructed under other contracts, it is hereby expressly agreed that damages shall be liquidated and paid by reducing the price to be paid the Contractor as follows: From the amounts which shall become payable to the Contractor after the expiration of the periods above limited (but not including the retained percentages from amounts theretofore certified to be due) there shall be deducted and retained by the City the following percentages: From the amount due for the first month after the expiration of such periods one (1) per centum thereof; from the amount due for the second month after the expiration of such periods two (2) per centum thereof; from the amount due for the third month after the expiration of such periods three (3) per centum thereof; from the amount due for the fourth month after the expiration of such periods four (4) per centum thereof; similarly from any amounts which may subsequently become due there shall be deducted a percentage, the rate of which shall equal the number of months which may have elapsed between the expiration of the periods above limited and the time when such payments shall become due. These amounts shall be deducted and retained by the City and are hereby agreed upon and determined as the measure of liquidated damages (and not as a penalty) to the City. But in case the Contractor shall be delayed by reason of any labor strike not caused or instituted or provoked by the Contractor, or by any subcontractor, agent or representative of the Contractor (which fact the Contractor shall prove to the satisfaction of the Commission), or in case the Contractor shall be delayed by any injunction or by any interference of public authority, and in case the Contractor cannot, notwithstanding such injunction or interference, with reasonable diligence make up for the delay so occasioned by speedier work when the Contractor shall not be so interfered with, then the said date for completion shall be extended by resolution of the Commission to a date later than the expiration of the said period by the amount of the time of such delay.

Commission May Intervene in Case of Injunction.

Article 49. But no injunction, strike or interference of public authority shall be ground for such extension, except if and from the time when the Contractor shall give the Commission notice of the injunction or other cause of delay, with copies of the injunction or other orders and of the papers upon which the same shall have been granted. The Commission and the City or either shall be accorded the right to intervene or become a party to any suit or proceeding in which any such injunction shall be obtained, and to move to dissolve the same or otherwise, as the Commission or City may deem proper. If necessary the Corporation Counsel or the Counsel of the Commission or both shall be authorized by the Contractor to appear, for that purpose, as counsel or attorneys for him.

Article 50. The time stipulated within which to complete the works is based upon the quantities of the various items entering into the work as stated in the form of proposal, which are given solely for the purpose of classifying bids. In case these quantities are exceeded or diminished then an extension or diminution of the term of this contract shall be made. It is, however, understood and agreed that in case an increase in any one item is balanced or offset by diminution of other items, no change in the term shall be made, and in any event the Engineer shall determine the amount of extension or diminution of time in respect of the relative increase or reduction in the quantities involved in the final completion.

Suspension of Work and Additional Time for Performance.

Article 51. The Commission reserves the right of temporarily suspending the execution of the whole or any part of the work herein contracted to be done, if it shall deem it for the interest of the City so to do, without compensation to the Contractor

for such suspension, other than extending the time for completing the work as much as it may have been delayed by such suspension.

Time for Completion to be Extended in Case of Delay in Acquiring Real Estate.

Article 52. In case the Contractor shall at any time give notice to the Commission that any real estate is necessary under this contract for any of the purposes specified above, which notice shall give a brief description of such real estate, the Commission shall (if it finds that such exists) begin and conduct with diligence, proceedings to acquire the real estate described; and in case the Commission shall fail to put the Contractor in possession of such real estate within three (3) months from the date of the delivery of such notice the Commission shall allow the Contractor so much additional time wherein to perform and complete this contract on his part as the Engineer shall certify in writing to be just, but no allowance by way of damages shall be made for such delay.

Extension's Not Cumulative.

Article 53. It is expressly understood, however, that the periods of extension referred to herein shall not be cumulative, but only the single period of delay giving the greatest extension shall be taken into consideration.

Permission to Complete Contract Not a Waiver.

Article 54. The permitting of the Contractor to go on and finish the work, or any part of it, after the time fixed for its completion, or after the date to which the time for completion may have been extended, or the making of partial payments to the Contractor after any such periods, shall in no wise operate as a waiver on the part of the City of any of its rights under this contract.

IX.—REMEDIES IN CASE OF CONTRACTOR'S DEFAULT.

Article 55. If the work to be done under this contract shall be abandoned by the Contractor, or if this contract shall be assigned, or the work sublet by him, otherwise than as herein specified, or if at any time the Engineer shall be of the opinion, and shall so certify in writing to the Commission that the performance of the contract is unnecessarily or unreasonably delayed, or that the Contractor is wilfully violating any of the provisions or covenants of this contract, or of the specifications, or is executing the same in bad faith or not in accordance with the terms thereof, or if the work be not fully completed within the time named in this contract for its completion, or within the time to which the completion of the contract may be extended by the Commission, the Commission may

(1) Notify the Contractor, by a written notice, to discontinue all work, or any part thereof, under this contract, and thereupon the Contractor shall discontinue the work, or such part thereof, and the Commission shall thereupon have the right to contract for the completion of the works in the manner prescribed by law, or to place such and so many persons as it may deem advisable, by contract or otherwise, to work, and complete the work herein described, or such part thereof, to take possession of and use any or all of the materials, plant, tools, equipment, supplies and property of every kind provided by the Contractor for the purpose of his work, and to procure other materials for the completion of the same, and to charge the expense of said labor and materials to the Contractor. The expense so charged shall be deducted and paid by the City out of such moneys as may be due or may at any time thereafter grow due to the Contractor under and by virtue of this contract, or any part thereof. And in case such expense shall exceed the amount which would have been payable under the contract if the same had been completed by the Contractor, he shall pay the amount of such excess to the City; and in case such expense shall be less than the amount which would have been payable under this contract if the same had been completed by the Contractor, he shall forfeit all claim to the difference; and when any particular part of the work is being carried on by the Commission, by contract or otherwise, under the provisions of this article of the contract, the Contractor shall continue the remainder of the work in conformity with the terms of this contract, and in such manner as in nowise to hinder or interfere with the persons or workmen employed, as above provided, by the Commission, by contract or otherwise, to do any part of the work, or to complete the same under the provisions of this article of the contract. And

Or Proceed Upon Bond.

(2) The City may also proceed as to the Commission shall seem proper upon the bond. And

Or May Bring Suit.

(3) The City may also bring any suit or proceeding for specific performance or for injunction or to recover damages or to obtain any relief or for any purpose proper under this contract.

X.—MISCELLANEOUS PROVISIONS.

Changes in the Contract.

Article 56. No correction or change in this contract shall be made except by written instrument duly authorized by the Commission and consented to by the Contractor and by the sureties upon his bond; but this provision shall not limit or affect the right to prescribe variations whether of construction or location of route as in this contract elsewhere provided.

Members of Commission Not Liable.

Article 57. No claim shall be made by the Contractor against any member of the Commission personally by reason of this contract or of any of its articles or provisions.

Contractor Not to Assign, Sublet, Etc.

Article 58. The Contractor shall not assign, transfer, convey, sublet or otherwise dispose of this contract or his right, title or interest in or to the same or any part thereof without the previous consent in writing of the Commission, and he shall not assign by power of attorney or otherwise any of the moneys to become due and payable under this contract unless by and with the like consent. If the Contractor shall without such previous written consent assign, transfer, convey, sublet or otherwise dispose of this contract or of his right, title or interest therein or any of the moneys to become due under this contract, to any other person, company or corporation, this contract may at the option of the Commission be revoked and annulled and the City shall thereupon be relieved and discharged from any and all liability and obligations growing out of the same to the Contractor and to his assignee or transferee; and no right under this contract or to any money to become due hereunder shall be asserted against the City in law or in equity by reason of any so-called assignment of this contract or any part thereof or of any moneys to grow due hereunder unless authorized as aforesaid by the written consent of the Commission; provided that nothing herein contained shall be construed to hinder, prevent or affect an assignment by the Contractor for the benefit of his creditors made pursuant to the statutes of the State of New York.

Provisions in Case Commission Ceases.

Article 59. In case the Commission shall cease to exist the Legislature may provide what public officer or officers shall exercise the powers and duties of the Commission under and by virtue of this contract; and in default of such provision, such powers and duties shall be deemed to be vested in the Mayor of the City. In case any officer or officers other than the Commission shall hereafter have the powers of the Commission or any of them, then the provisions of this contract shall be applicable to such officer or officers to the extent to which the powers of the Commission shall appertain to such officer or officers, and any official act or determination of such officer or officers or of this Commission shall be sufficient hereunder, anything herein to the contrary notwithstanding, if the same be done or had by lawful vote or resolution or in such manner as the Legislature may from time to time prescribe.

Labor Law.

Article 60. The Contractor agrees to comply with the provisions of the Labor Law, including section 3 thereof as re-enacted by chapter 36 of the Laws of 1909. The Contractor further agrees and stipulates that no laborer, workman or mechanic in the employ of the Contractor, subcontractor or other person doing or contracting to do the whole or a part of the work contemplated by this contract, shall be permitted or required to work more than eight hours in any one calendar day, except in cases of extraordinary emergency, caused by fire, flood or danger to life or property; and further, that the wages to be paid for a legal day's work as hereinbefore defined to all classes of such laborers, workmen or mechanics upon the work contemplated by this contract or upon any material to be used upon or in connection therewith, shall not be less than the prevailing rate for a day's work in the same trade or occupation in the Borough of the City, where the work hereby contemplated, about or in connection with which such labor is performed, is in its final or completed form to be situated, erected or used; and that each such laborer, workman or mechanic employed by the Contractor or by any subcontractor or other person on, about or upon the work contemplated by this contract, shall receive such wages herein provided for. This contract shall be void

and of no effect, unless the Contractor shall comply with the provisions of this section. In obedience to the requirements of section 14 of the Labor Law, it is further provided that if the provisions of the said section 14 are not complied with, this contract shall be void.

All Necessary Legal Provisions Deemed Inserted Herein.

Article 61. It is the intent and understanding of the parties to this agreement that each and every provision of law required to be inserted in this contract should be and is inserted herein. Furthermore, it is hereby stipulated that every such provision is to be deemed to be inserted herein; and if, through mistake or otherwise, any such provision is not inserted or is not inserted in correct form, then the contract shall forthwith, upon the application of either party, be amended by such insertion so as to comply strictly with the law, and without prejudice to the rights of either party hereunder.

Provision in Case of Unlawful Provision.

Article 62. If this contract contains any unlawful provision not an essential part of the general structure of the contract and which shall not appear to have been a controlling or very material inducement to the making thereof the same shall be deemed of no effect and shall, upon the application of either party, be struck from the contract without affecting the binding force of the contract as it shall remain after omitting such provision.

In witness whereof, this contract has been executed for The City of New York by the Public Service Commission for the First District under and by resolution duly adopted by the Commission and the seal of the Commission has been hereto affixed and attested by its Secretary and these presents have been signed by its Chairman; and the Contractor has caused its corporate seal to be hereto affixed and these presents to be executed by its proper officers the day and year first above written.

PUBLIC SERVICE COMMISSION FOR THE FIRST DISTRICT.

By...................., Chairman.

Attest:

...................., Secretary.

State of New York, County of New York, ss.:

On the .... day of ...., 1910, before me personally appeared William R. Willcox and Travis H. Whitney, to me known and known to me to be the said William R. Willcox, the Chairman, and the said Travis H. Whitney, the Secretary of the Public Service Commission for the First District; and the said William R. Willcox and Travis H. Whitney being by me duly sworn, did depose and say, each for himself and not the one for the other, the said William R. Willcox, that he resides in the Borough of Manhattan, in the City, County and State of New York, that he is the Chairman of the said Commission and that he subscribed his name to the foregoing contract by virtue of the authority thereof; and the said Travis H. Whitney, that he resides in the Borough of Brooklyn, in the County of Kings, City and State of New York, that he is the Secretary of the said Commission and that he subscribed his name thereto by like authority; and both the said William R. Willcox and Travis H. Whitney that they know the seal of the said Commission and that the same was affixed to the foregoing instrument by the authority of the said Commission and of a resolution duly adopted by the same.

State of New York, County of New York, ss.:

On this .... day of ...., 1910, before me personally came .... to me known and known to me to be the individual.. described in and who executed the foregoing instrument, and ..he.. duly acknowledged to me that ..he.. executed the same.

State of New York, County of New York, ss.:

On this .... day of ...., 1910, before me personally appeared ...., to me known, who, being by me first duly sworn, did depose and say: That he resided in ...., in the State of........; that he is .... of ...., the corporation described in and which executed the foregoing instrument; that he knew the corporate seal of said company; that one of the seals affixed to said contract was such corporate seal, and that it was affixed thereto by order of the Board of Directors of said Company, and that he signed his name thereto by like authority.

Form of Contractor's Bond.

Route No. 5, Section No. 6.

Know All Men by These Presents, That .... of ...., hereinafter called the Contractor, and .... and ...., hereinafter called the Sureties, are

held and firmly bound unto The City of New York, hereinafter called the City, in the sum of .... dollars ($........), lawful money of the United States of America, to be paid to the City, for which payment well and truly to be made the Contractor and the Sureties do hereby bind themselves and their, and each of their, executors, administrators, successors and assigns firmly by these presents, as follows: The Contractor to be so held and bound for the full amount of the said sum of .... dollars ($........), and each of the said Sureties to be so held and bound only for a portion of said sum as follows:

The said ....

for the sum of...... ....dollars ($........); the said ....

for the sum of..........................dollars ($........); the said ....

for the sum of..........................dollars ($........); the said ....

for the sum of..........................dollars ($........).

In Witness Whereof, The Contractor and the Sureties have hereunto set their hands and seals and such of them as are corporations have caused their respective seals to be hereto affixed and these presents to be attested by the proper officers, this .... day of ...., 1910.

Whereas, The City by the Public Service Commission for the First District (hereinafter called the Commission) is about to enter into a contract with the Contractor bearing even date herewith for the construction of that portion of a Rapid Transit Railroad known as Section 6 of Route 5, in ...., and extending from.......... street to .... street, in the Borough of ...., in The City of New York, more particularly described in the said contract; and

Whereas, The City is about to enter into such contract with the Contractor upon the condition, and not otherwise, that this bond shall be given to the City, and upon the faith thereof, now therefore,

The condition of the foregoing obligation is such that if the Contractor shall fully perform the said contract, then this obligation shall be null and void, but else it shall remain in full force and virtue.

It is expressly agreed, between the City and the Sureties (and it is upon such agreement that the City accepts this bond) that the Sureties will and do waive any and every notice of default on the part of the Contractor; that they will and do permit the City to extend the time of the Contractor to make any payment or do any act; that no omission on the part of the City to give any notice of extension of time granted by or on behalf of the City shall be availed of by the Sureties or any of them as a defense upon this Bond; that the Sureties shall not set up or have any defense upon this bond by reason of any alteration of the said contract unless such alteration shall be represented by a formal written instrument duly executed between the City and the Contractor which shall have been duly authorized by a vote of the Commission; and that in case of such alteration, however made, the same shall be a defense to the Sureties only to the extent of the actual injury or damage caused to the Sureties by said alteration.*

ROUTE 5, SECTION 1, BATTERY PARK TO DEY STREET.

Contractor's Proposal for the Construction of a Portion of a Rapid Transit Railroad.

(Route 5, Section 1.)

Notice—Sums of money must be written in words and also in figures, except in the schedules. There must remain annexed hereto: Copy of invitation to contractors. Copy of form of contract. Copy of form of bond.

To the Public Service Commission for the First District:

1. The undersigned†...

.... do.. hereby, in pursuance of the invitation to contractors, a copy of which is attached hereto, propose according to the terms thereof to enter into a contract in the form

annexed hereto with The City of New York for the construction of section 1 of Route 5, and to furnish all necessary labor, materials, machinery, tools, apparatus and other means of construction and perform all the work mentioned in the said contract at the unit prices for the several items as given in the following Schedule of Unit Prices, or as otherwise provided in the form of contract. It is understood that the quantities of various items specified in the following schedule are given as a basis for the uniform comparison of bids and are not in any way guaranteed or represented as correct or intended to be relied on, and they shall not be taken as final and shall form no basis for any claim in case they do not correspond with the final measurements or quantities. It is further understood that the Commission reserves the right to increase or diminish or to omit entirely any of the quantities of items as therein stated:

---

*The execution of the bond must be duly proved before delivery in the form essential to proof to entitle a deed to record in the State of New York. Full affidavits of justification of sureties must be added.

†The bidder's name must be inserted here. If the bid is submitted by a corporation, the full legal title must be given here and a certified copy of the certificate of incorporation must be submitted, together with an affidavit showing the amount of stock paid in in cash and the names and addresses of the directors and principal officers. If the bid is submitted by a firm, the above blank must be filled up in the following form, "the firm of A. B. & Co., composed of A. B. C. D. etc." (giving the names of all the partners).

Schedule of Unit Prices.

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
1.	For earth excavation, above mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard........................	....	160,000	....
2.	For earth excavation, below mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard........................	....	143,000	....
2a.	For earth excavation, both above and below mean high water, for sewers and pipes, including the disposal of it, etc., per cubic yard........................	....	9,000	....
3.	For rock excavation (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard..........	....	61,000	....
4.	For underpinning buildings, including all incidental work and material, per lineal front foot of building underpinned as follows:			
	(a) For buildings less than seven stories in height, per front foot................	....	3,000	.
	(b) For buildings from seven to twelve stories in height, per front foot........	....	400	....
	(c) For buildings over twelve stories in height, per front foot..................	....	300	....

(2) If this proposal is accepted, the undersigned will within ten days after delivery of notice, execute and deliver the contract with the City in the form aforesaid and at the same time will deliver to the Comptroller of The City of New York, pursuant to the terms of the said contract, a bond in the sum of five hundred thousand dollars ($500,000) in the form hereto annexed with the following named sureties, viz.:

(3) The Commission may cause any notice intended for the undersigned to be delivered at Room .... on the ...... floor of the building .... in the Borough of ...., in The City of New York. Such delivery shall be sufficient notice to the undersigned.

(4) At the time of delivering this proposal to the Commission the undersigned will separately deliver a certified check payable to the order of the Comptroller of The City of New York for the sum of fifteen thousand dollars ($15,000). If the Commission shall notify the undersigned that this contractor's proposal is accepted and that the proposed contract is consented to by the Board of Estimate and Apportionment, then if the undersigned shall fail within ten days thereafter or within such longer period as may be prescribed by the Commission to procure the above described bond to be duly executed and delivered; or if the undersigned shall fail to procure the contract to be duly executed and delivered as aforesaid, then the invitation to contractors and this contractor's proposal shall constitute a contract binding the undersigned to pay to the City the damages by it sustained by reason of such failure of the undersigned, as provided in said invitation to contractors. And the undersigned hereby assigns to the City the said sum so specially deposited by the delivery of such certified check, subject only to the condition that if this proposal shall not be accepted, or, if it shall be accepted and the undersigned shall within ten days after notice as aforesaid or any longer period prescribed by the Commission, execute the said contract and procure the said bond to be duly executed and delivered, then the amount of the said check so specially deposited shall be returned to the undersigned.

(5) A notice of acceptance of this proposal by the Commission addressed to the undersigned as aforesaid shall forthwith, at the option of the Commission, operate as against the undersigned as a complete making of a contract according to the form thereof as aforesaid, with the blanks therein contained filled in according to this proposal.

(6) There are no persons interested with the undersigned in this proposal, except*

(7) This proposal is made without any connection with any other person making a proposal or bid for the same purpose, and is in all respects fair and without collusion or fraud. No member of the Board of Aldermen, head of department, chief of bureau, deputy thereof or clerk therein, or other officer of The City of New York, or any member or employee of the Public Service Commission for the First District, is interested directly or indirectly, as contracting party, partner, stockholder, or otherwise in, or in the performance of, the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof.

Dated the ...., 1910.

Affidavit of Verification.

State of New York, City and County of New York, ss.:

...., being duly sworn, says: I am† the proposing contractor above named. I have read the foregoing proposal. The same is in all respects true.

Sworn to before me this .... day of ...., 1910.

ROUTE 5, SECTION 2, DEY STREET TO WALKER STREET.

Contractor's Proposal for the Construction of a Portion of a Rapid Transit Railroad.

(Route 5, Section 2.)

Notice—Sums of money must be written in words and also in figures, except in the schedules. There must remain annexed hereto: Copy of invitation to contractors. Copy of form of contract. Copy of form of bond.

To the Public Service Commission for the First District:

1. The undersigned‡...
.... do..
hereby, in pursuance of the Invitation to Contractors, a copy of which is attached hereto, propose according to the terms thereof to enter into a contract in the form annexed hereto with The City of New York for the construction of Section 2 of Route 5, and to furnish all necessary labor, materials, machinery, tools, apparatus and other means of construction and perform all the work mentioned in the said contract at the unit prices for the several items as given in the following Schedule of Unit Prices, or as otherwise provided in the form of contract. It is understood that the quantities of various items specified in the following schedule are given as a basis for the uniform comparison of bids and are not in any way guaranteed or represented as correct or intended to be relied on, and they shall not be taken as final and shall form no basis for any claim in case they do not correspond with the final measurements or quantities. It is further understood that the Commission reserves the right to increase or diminish or to omit entirely any of the quantities of items as therein stated:

---

*Here insert the names and addresses of all persons interested with the bidder. If there are no such persons strike out the word "except."

†If the bidder is an individual, do not fill this blank; if the bidder is a firm, here say, "a member of the firm of ...."; if a corporation, say, "the (President or other officer duly authorized) of the........ .... Company."

‡The bidder's name must be inserted here. If the bid is submitted by a corporation, the full legal title must be given here and a certified copy of the certificate of incorporation must be submitted, together with an affidavit showing the amount of stock paid in in cash and the names and addresses of the directors and principal officers. If the bid is submitted by a firm, the above blank must be filled up in the following form, "the firm of A. B. & Co., composed of A. B. C. D. etc." (giving the names of all the partners).

Schedule of Unit Prices.

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
1.	For earth excavation, above mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard	....	256,100	....
2.	For earth excavation, below mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard	....	142,300	....

‡The bidder's name must be inserted here. If the bid is submitted by a corporation, the full legal title must be given here and a certified copy of the certificate of incorporation must be submitted, together with an affidavit showing the amount of stock paid in in cash and the names and addresses of the directors and principal officers. If the bid is submitted by a firm, the above blank must be filled up in the following form, "the firm of A. B. & Co., composed of A. B. C. D. etc." (giving the names of all the partners).

hereto, propose according to the terms thereof to enter into a contract in the form annexed hereto with The City of New York for the construction of Section 2-A of Route 5, and to furnish all necessary labor, materials, machinery, tools, apparatus and other means of construction and perform all the work mentioned in the said contract at the unit prices for the several items as given in the following Schedule of Unit Prices, or as otherwise provided in the form of contract. It is understood that the quantities of various items specified in the following schedule are given as a basis for the uniform comparison of bids and are not in any way guaranteed or represented as correct or intended to be relied on, and they shall not be taken as final and shall form no basis for any claim in case they do not correspond with the final measurements or quantities. It is further understood that the Commission reserves the right to increase or diminish or to omit entirely any of the quantities of items as therein stated:

Schedule of Unit Prices.

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
1.	For earth excavation, above mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard....................	....	28,070	....
2.	For earth excavation, below mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard....................	....	59,370	....
3.	For rock excavation (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard......	....	100	....
4.	For underpinning buildings, including all incidental work and material, per lineal front foot of building underpinned, as follows:			
	(a) For buildings less than seven stories in height, per front foot..............	....	318	....
	(b) For buildings from seven to twelve stories in height, per front foot........	....	70	....
	(c) For buildings over twelve stories in height, per front foot................	....	....	....
6.	For concrete masonry, in place, per cubic yard	....	18,180	....
7.	For protective concrete masonry in place outside of waterproofing, per cubic yard	....	2,625	....
8.	For rubble stone masonry in place, per cubic yard	....	500	....
9.	For brick masonry, in place, per cubic yard	....	230	....
10.	For hollow terra cotta brick masonry, in place, per cubic yard..................	....	105	....
12.	For timber piles, in place, and prepared, per lineal foot........................	....	1,000	....
13.	For timber foundations, placed and fastened, per thousand feet B. M........	....	2M	....
14.	For broken stone or gravel, in place, other than that used in concrete, per cubic yard	....	1,070	....
15.	For waterproofing, treated woven fabric, laid with pitch or asphaltum, in place, as follows:			
	(a) For 1-ply, per square yard..........	....	20,625	....
	(b) For 2-ply, per square yard..........	....	100	....
	(c) For 3-ply, per square yard..........	....	1,255	....
	(d) For 4-ply, per square yard..........	....	100	....

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
	(e) For 5-ply, per square yard..........	....	100	....
	(f) For 6-ply, per square yard..........	....	120	....
16.	For waterproofing, brick laid in asphalt mastic, in place, per cubic yard........	....	3,255	....
17.	For vitrified or cast-iron drain pipe in place, as follows:			
	(a) For 12-inch vitrified pipe, per lineal foot	....	100	....
	(b) For 10-inch vitrified pipe, per lineal foot	....	100	....
	(c) For 8-inch vitrified pipe, per lineal foot	....	800	....
	(d) For 6-inch vitrified pipe, per lineal foot	....	200	....
	(e) For 4-inch vitrified pipe, per lineal foot	....	100	....
	(f) For 8-inch cast-iron pipe, per lineal foot	....	....	....
	(g) For 6-inch cast-iron pipe, per lineal foot	....	100	....
	(h) For 4-inch cast-iron pipe, per lineal foot	....	625	....
18.	For tunnel ducts, in place, as required by section 305 of the specifications, per duct foot	....	45,025	....
19.	For riveted steel, painted and erected, per ton of two thousand pounds...........	....	2,275	....
20.	For steel beams and shapes with connections, painted and erected, per ton of two thousand pounds.................	....	1,945	....
21.	For steel rods and bars built in concrete, per ton of two thousand pounds......	....	23	....
25.	For miscellaneous iron castings, other than tunnel lining, such as manhole heads and covers, gratings, etc.; but not including castings for sewer work or pipes; in place, per ton of two thousand pounds	....	10	....
26.	For wire mesh, in place, per pound......	....	4,100	....
28.	For steel gratings for ventilation, in place, including frames, etc., per square foot..	....	900	....
29.	For vault lights, in place, per square foot.	....	2,025	....
30.	For street surface restored:			
	(a) Sidewalks, including curbs and all structures and growths therein or thereon, per square yard..................	....	2,442	....
	(b) For temporary repavement and maintenance of roadways, per square yard..	....	2,798	....
32.	For wrought-iron or fibre electric conduits, in place in stations, as follows:			
	(a) For three-fourths-inch (¾-inch) wrought-iron, per lineal foot.........	....	9,640	....
	(b) For one and one-half-inch (1½-inch) wrought-iron, per lineal foot.........	....	520	....
	(c) For two-inch (2-inch) wrought-iron, per lineal foot.......................	....	260	....
	(d) For two-inch (2-inch) fibre, per lineal foot	....	2,160	....
33.	For cast-iron outlet boxes in place in stations, each	....	578	....

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
34.	For six-inch (6-inch) cast-iron pipe and fittings, including specials ("extra heavy"), in place in stations, per lineal foot	....	770	....
	SEWERS—ITEMS 37 TO 74.			
	Egg-Shaped Brick or Concrete Sewers, Items 44 *to* 51.			
45.	For 3 foot 6 inch by 2 foot 4 inch, per lineal foot..............................	....	(†190)	....
47.	For 4 foot 0 inch by 2 foot 8 inch, per lineal foot..............................	....	(†230)	....
	Circular Sewers—Brick or Concrete or Reinforced Concrete, Items 52 *to* 66.			
54.	For 4 foot 3 inch, per lineal foot..........	....	(†42)	....
55.	For 4 foot 9 inch, per lineal foot..........	....	(†208)	....
57.	For 5 foot 6 inch, per lineal foot..........	....	(†68)	....
	SURFACE AND SUBSURFACE STRUCTURES, ITEMS 75 AND 76.			
75	For street surface railroads, including the support, reconstruction, rebuilding, etc., where necessary (but not including permanent masonry supports, if required and added, and not including additional vaults, if required and constructed in excess of the number existing), as follows:			
	(a) For electric railroads, per lineal foot of single track.......................	....	1,280	....
	(b) For horse railroads, per lineal foot of single track.......................	....	100	....
	PIPES IN STREETS—ITEMS 77 TO 126.			
	For Work and Material as Called for by Section 71 *of the Specifications.*			
	Water and Gas Pipes—Items 77 to 108.			
	Water Pipes—Items 77 to 88.			
	For water pipes in place, as follows:			
78.	For 4-inch water pipe, per lineal foot....	....	100	....
82.	For 12-inch water pipe, per lineal foot....	....	500	....
86.	For 30-inch water pipe, per lineal foot....	....	400	....
	Gas Pipes—Items 89 *to* 99.			
	For gas pipes in place, as follows:			
91.	For 6-inch gas pipe, per lineal foot.......	....	960	....
	New Cast-iron Hub and Spigot Water and Gas Pipe—Items 100 *and* 101.			
100.	For new cast-iron hub and spigot straight pipe delivered on the work, per ton of two thousand pounds.................	....	21	....
101.	For new cast-iron hub and spigot pipe, special castings, delivered on the work, per ton of two thousand pounds.......	....	6	....

---

†Included in Railroad construction under section 424 of the specifications.

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
	High Pressure Fire System Pipes, Standard Spigot and Grooves—Items 102 *to* 106. For high pressure fire system pipe in place, as follows:			
102.	For 8-inch high pressure fire system water pipe, per lineal foot..................	....	100	....
103.	For 12-inch high pressure fire system water pipe, per lineal foot............	....	490	....
104.	For 16-inch high pressure fire system water pipe, per lineal foot............	....	150	....
	New Cast-iron Spigot and Groove Pipe for High Pressure Fire System—Items 107 *and* 108.			
107.	For new cast-iron spigot and groove straight pipe delivered on the work, per ton of two thousand pounds..........	....	12	....
108.	For new cast-iron spigot and groove pipe, special castings, delivered on the work, per ton of two thousand pounds......	....	4	....
	DUCTS IN STREETS.			
	Electric Ducts and Conduits in Streets.			
	(Other than tunnel ducts and street railroad ducts which are provided for in Items 18 and 75-a.)			
127.	For electric ducts and conduits in place, as provided in Section 71-a of the specifications, per duct foot................	....	11,000	....

(2) If this proposal is accepted, the undersigned will within ten days after delivery of notice, execute and deliver the contract with the City in the form aforesaid and at the same time will deliver to the Comptroller of The City of New York pursuant to the terms of the said contract a bond in the sum of two hundred and fifty thousand dollars ($250,000) in the form hereto annexed with the following named Sureties, viz.:

....
....
....
....

(3) The Commission may cause any notice intended for the undersigned to be delivered at Room No................on the................floor of the building No.........................in the Borough of.................................. in the City of New York. Such delivery shall be sufficient notice to the undersigned.

(4) At the time of delivering this proposal to the Commission the undersigned will separately deliver a certified check payable to the order of the Comptroller of The City of New York for the sum of ten thousand dollars ($10,000). If the Commission shall notify the undersigned that this Contractor's Proposal is accepted and that the proposed contract is consented to by the Board of Estimate and Apportionment, then if the undersigned shall fail within ten days thereafter or within such longer period as may be prescribed by the Commission to procure the above described bond to be duly executed and delivered; or if the undersigned shall fail to procure the contract to be duly executed and delivered as aforesaid, then the Invitation to Contractors and this Contractor's Proposal shall constitute a contract binding the undersigned to pay to the City the damages by it sustained by reason of such failure of the undersigned, as provided in said Invitation to Contractors. And the undersigned hereby assigns to the City the said sum so specially deposited by the delivery of such certified check, subject only to the condition that if this Proposal shall not be accepted, or, if it shall be accepted and the undersigned shall within ten days after notice as aforesaid or any longer period prescribed by the Commission, execute the

said contract and procure the said bond to be duly executed and delivered, then the amount of the said check so specially deposited shall be returned to the undersigned.

(5) A notice of acceptance of this Proposal by the Commission addressed to the undersigned as aforesaid shall forthwith, at the option of the Commission, operate as against the undersigned as a complete making of a contract according to the form thereof as aforesaid, with the blanks therein contained filled in according to this proposal.

(6) There are no persons interested with the undersigned in this Proposal, except*

(7) This proposal is made without any connection with any other person making a proposal or bid for the same purpose, and is in all respects fair and without collusion or fraud. No member of the Board of Aldermen, head of department, chief of bureau, deputy thereof or clerk therein, or other officer of The City of New York, or any member or employee of the Public Service Commission for the First District is interested directly or indirectly, as contracting party, partner, stockholder, or otherwise in, or in the performance of, the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof.

1. The undersigned‡...

.... do..

hereby, in pursuance of the Invitation to Contractors, a copy of which is attached hereto, propose according to the terms thereof to enter into a contract in the form annexed hereto with The City of New York for the construction of Section 4 of Route 5, and to furnish all necessary labor, materials, machinery, tools, apparatus and other means of construction and perform all the work mentioned in the said contract at the unit prices for the several items as given in the following Schedule of Unit Prices, or as otherwise provided in the form of contract. It is understood that the quantities of various items specified in the following schedule are given as a basis for the uniform comparison of bids, and are not in any way guaranteed or represented as correct or intended to be relied on, and they shall not be taken as final and shall form no basis for any claim in case they do not correspond with the final measurements or quantities. It is further understood that the Commission reserves the right to increase or diminish or to omit entirely any of the quantities of items as therein stated:

---

*Here insert the names and addresses of all persons interested with the bidder. If there are no such persons strike out the word "except."

†If the bidder is an individual, do not fill this blank; if the bidder is a firm, here say, "a member of the firm of.."; if a corporation, say "the (President or other officer duly authorized) of the.......... .... Company."

‡The bidder's name must be inserted here. If the bid is submitted by a corporation, the full legal title must be given here and a certified copy of the certificate of incorporation must be submitted, together with an affidavit showing the amount of stock paid in in cash and the names and addresses of the directors and principal officers. If the bid is submitted by a firm, the above blank must be filled up in the following form, "the firm of A. B. & Co., composed of A. B. C. D. etc." (giving the names of all the partners).

Schedule of Unit Prices.

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
1.	For earth excavation, above mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard..................	....	181,400	....
2.	For earth excavation, below mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard......................	....	14,100	....
2a.	For earth excavation, both above and below mean high water, for sewers and pipes, including the disposal of it, etc., per cubic yard......................	....	9,000	....
3.	For rock excavation (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard........	....	25,700	....
4.	For underpinning buildings, including all incidental work and material per lineal front foot of building underpinned, as follows:			
	(a) For buildings less than seven stories in height, per front foot................	....	2,100	....
	(b) For buildings from seven to twelve stories in height, per front foot........	....	1,600	....
	(c) For buildings over twelve stories in height, per front foot.................	....	70	....
5.	For tunnel excavation, including disposal of material, timbering, etc., per cubic yard	....	33,000	....
6.	For concrete masonry, in place, per cubic yard	....	46,400	....
7.	For protective concrete masonry in place outside of waterproofing, per cubic yard.	....	1,200	....
8.	For rubble stone masonry in place, per cubic yard	....	900	....
9.	For brick masonry, in place, per cubic yard	....	1,300	....
10.	For hollow terra cotta brick masonry, in place, per cubic yard.................	....	1,700	....
11.	For grout of Portland cement, per barrel of Portland cement used.............	....	1,000	....
13.	For timber foundations, placed and fastened, per thousand feet B. M..........	....	2M	....
14.	For broken stone or gravel, in place, other than that used in concrete, per cubic yard	....	3,700	....
15.	For waterproofing, treated woven fabric, laid with pitch or asphaltum, in place, as follows:			
	(a) For 1-ply, per square yard.........	....	9,900	....
	(b) For 2-ply, per square yard.........	....	100	....
	(c) For 3-ply, per square yard.........	....	1,320	....
	(d) For 4-ply, per square yard.........	....	100	....
	(e) For 5-ply, per square yard.........	....	100	....
	(f) For 6-ply, per square yard.........	....	100	....
16.	For waterproofing, brick laid in asphalt mastic, in place, per cubic yard........	....	1,550	....

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
17.	For vitrified or cast-iron drain pipe, in place, as follows:			
	(a) For 12-inch vitrified pipe, per lineal foot	....	100	....
	(b) For 10-inch vitrified pipe, per lineal foot	....	100	....
	(c) For 8-inch vitrified pipe, per lineal foot	....	3,330	....
	(d) For 6-inch vitrified pipe, per lineal foot	....	200	....
	(e) For 4-inch vitrified pipe, per lineal foot	....	100	....
	(f) For 8-inch cast-iron pipe, per lineal foot	....	....	....
	(g) For 6-inch cast-iron pipe, per lineal foot	....	100	....
	(h) For 4-inch cast-iron pipe, per lineal foot	....	4,420	....
18.	For tunnel ducts, in place, as required by Section 305 of the specifications, per duct foot	....	437,000	....
19.	For riveted steel, painted and erected, per ton of two thousand pounds........	....	1,940	....
20.	For steel beams and shapes with connections, painted and erected, per ton of two thousand pounds........	....	1,750	....
21.	For steel rods and bars built in concrete, per ton of two thousand pounds........	....	1,250	....
24.	For cast-iron columns erected and painted, per ton of two thousand pounds........	....	90	....
25.	For miscellaneous iron castings, other than tunnel lining, such as manhole heads and covers, gratings, etc.; but not including castings for sewer work or pipes; in place, per ton of two thousand pounds..	....	16	....
26.	For wire mesh, in place, per pound......	....	6,030	....
27.	For one and one-half-inch (1½-inch) galvanized iron pipe hand rail, in place, including expansion bolts, etc., per lineal foot	....	10,140	....
28.	For steel gratings for ventilation, in place, including frames, etc., per square foot..	....	6,200	....
29.	For vault lights, in place, per square foot..	....	900	....
30.	For street surface restored:			
	(a) Sidewalks including curbs and all structures and growths therein and thereon, per square yard........	....	6,950	....
	(b) For temporary repavement and maintenance of roadways, per square yard..	....	15,470	....
31.	For park surface restored (all classes), per square yard	....	1,350	....
32.	For wrought-iron or fibre electric conduits, in place in stations, as follows:			
	(a) For three-fourths-inch (¾-inch) wrought-iron, per lineal foot........	....	4,500	....
	(b) For one and one-half-inch (1½-inch) wrought-iron, per lineal foot........	....	570	....
	(c) For two-inch (2-inch) wrought-iron, per lineal foot........	....	310	....

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
	(d) For two-inch (2-inch) fibre, per lineal foot	....	2,200	....
33.	For cast-iron outlet boxes in place in stations, each	....	242	....
34.	For six-inch (6-inch) cast-iron pipe and fittings, including specials ("extra heavy"), in place in stations, per lineal foot	....	25	....
	SEWERS—ITEMS 37 TO 74.			
	Vitrified and Cast-iron Pipe—Items 37 *to* 43.			
38.	For 15-inch vitrified pipe sewer, per lineal foot	....	2,134	....
39.	For 18-inch vitrified pipe sewer, per lineal foot	....	170	....
	Egg-Shaped Brick or Concrete Sewers—Items 44 *to* 51.			
45.	For 3 foot 6 inch by 2 foot 4 inch, per lineal foot	....	1,978	....
48	For 4 foot 3 inch by 2 foot 10 inch, per lineal foot	....	228	....
	SURFACE AND SUBSURFACE STRUCTURES—*Items* 75 *and* 76.			
75	For street surface railroads, including the support, reconstruction, rebuilding, etc., where necessary (but not including permanent masonry supports, if required and added, and not including additional vaults, if required and constructed in excess of the number existing), as follows:			
	(a) For electric railroads, per lineal foot of single track.......................	....	4,800	....
	(b) For horse railroads, per lineal foot of single track	....	150	....
	PIPES IN STREETS—ITEMS 77 TO 126.			
	For Work and Material as Called for by Section 71 *of the Specifications.*			
	Water and Gas Pipes—Items 77 to 108.			
	Water Pipes—Items 77 to 88.			
	For water pipes in place, as follows:			
78.	For 4-inch water pipe, per lineal foot....	....	100	....
79.	For 6-inch water pipe, per lineal foot....	....	530	....
82.	For 12-inch water pipe, per lineal foot....	....	1,560	....
87.	For 36-inch water pipe, per lineal foot....	....	2,300	....
	Gas Pipes—Items 89 to 99.			
	For gas pipes in place, as follows:			
90.	For 4-inch gas pipe, per lineal foot......	....	130	....
91.	For 6-inch gas pipe, per lineal foot......	....	1,800	....
92.	For 8-inch gas pipe, per lineal foot......	....	1,070	....
94.	For 12-inch gas pipe, per lineal foot......	....	270	....
	New Cast-iron Hub and Spigot Water and Gas Pipe—Items 100 *and* 101.			
100.	For new cast-iron hub and spigot straight pipe delivered on the work, per ton of two thousand pounds..................	....	130	....

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
101.	For new cast-iron hub and spigot pipe, special castings, delivered on the work, per ton of two thousand pounds........	....	40	....
	High Pressure Fire System Pipes, Standard Spigot and Grooves—Items 102 *to* 106.			
	For high pressure fire system pipe in place, as follows:			
102.	For 8-inch high pressure fire system water pipe, per lineal foot....................	....	100	....
103.	For 12-inch high pressure fire system water pipe, per lineal foot..............	....	90	....
104.	For 16-inch high pressure fire system water pipe, per lineal foot...................	....	120	....
	New Cast-iron Spigot and Groove Pipe for High Pressure Fire System—Items 107 *and* 108.			
107.	For new cast-iron spigot and groove straight pipe delivered on the work, per ton of two thousand pounds............	....	12	....
108.	For new cast-iron spigot and groove pipe, special castings, delivered on the work, per ton of two thousand pounds........	....	4	....
	DUCTS IN STREETS.			
	Electric Ducts and Conduits in Streets.			
	(Other than tunnel ducts and street railroad ducts which are provided for in Items 18 and 75-a).			
127.	For electric ducts and conduits in place, as provided in Section 71-a of the specifications, per duct foot................	....	49,600	....

(2) If this proposal is accepted, the undersigned will within ten days after delivery of notice, execute and deliver the contract with the City in the form aforesaid and at the same time will deliver to the Comptroller of The City of New York pursuant to the terms of the said contract a bond in the sum of three hundred thousand dollars ($300,000) in the form hereto annexed with the following named Sureties, viz.:

....

....

....

....

(3) The Commission may cause any notice intended for the undersigned to be delivered at Room No. .... on the .... floor of the building No. .... in the Borough of .... in The City of New York. Such delivery shall be sufficient notice to the undersigned.

(4) At the time of delivering this proposal to the Commission the undersigned will separately deliver a certified check payable to the order of the Comptroller of The City of New York for the sum of ten thousand dollars ($10,000). If the Commission shall notify the undersigned that this Contractor's Proposal is accepted and that the proposed contract is consented to by the Board of Estimate and Apportionment then if the undersigned shall fail within ten days thereafter or within such longer period as may be prescribed by the Commission to procure the above described bond to be duly executed and delivered; or if the undersigned shall fail to procure the contract to be duly executed and delivered as aforesaid, then the Invitation to Contractors and this Contractor's Proposal shall constitute a contract binding the undersigned to pay to the City damages by it sustained by reason of such failure of

the undersigned as provided in said Invitation to Contractors. And the undersigned hereby assigns to the City the said sum so specially deposited by the delivery of such certified check, subject only to the condition that if this Proposal shall not be accepted, or, if it shall be accepted and the undersigned shall within ten days after notice as aforesaid or any longer period prescribed by the Commission, execute the said contract and procure the said bond to be duly executed and delivered, then the amount of the said check so specially deposited shall be returned to the undersigned.

(5) A notice of acceptance of this Proposal by the Commission addressed to the undersigned as aforesaid shall forthwith, at the option of the Commission, operate as against the undersigned as a complete making of a contract according to the form thereof as aforesaid, with the blanks therein contained filled in according to this Proposal.

(6) There are no persons interested with the undersigned in this Proposal, except*

(7) This Proposal is made without any connection with any other person making a proposal or bid for the same purpose, and is in all respects fair and without collusion or fraud. No member of the Board of Aldermen, head of department, chief of bureau, deputy thereof or clerk therein, or other officer of The City of New York, or any member or employee of the Public Service Commission for the First District is interested directly or indirectly, as contracting party, partner, stockholder, or otherwise in, or in the performance of, the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof.

Dated the ...., 1910.

Affidavit of Verification.

State of New York, City and County of New York, ss.:

.................................., being duly sworn, says: I am†............ the proposing Contractor above named. I have read the foregoing proposal. The same is in all respects true.

Sworn to before me this .... day of ...., 1910.

ROUTE 5, SECTION 5, 14TH STREET TO 26TH STREET.

Contractor's Proposal for the Construction of a Portion of a Rapid Transit Railroad.

(Route 5, Section 5.)

Notice—Sums of money must be written in words and also in figures, except in the schedules. There must remain annexed hereto: Copy of Invitation to Contractors. Copy of form of contract. Copy of form of bond.

To the Public Service Commission for the First District:

1. The undersigned*.. do.. hereby, in pursuance to the Invitation to Contractors, a copy of which is attached hereto, propose according to the terms thereof to enter into a contract in the form annexed hereto with The City of New York for the construction of Section 5 of Route 5, and to furnish all necessary labor, materials, machinery, tools, apparatus and other means of construction and perform all the work mentioned in the said contract at the unit prices for the several items given in the following Schedule of Unit Prices, or as otherwise provided in the form of contract. It is understood that the quan-

....

(3) The Commission may cause any notice intended for the undersigned to be delivered at Room No...............on the...................floor of the building No.........................in the Borough of................................ in the City of New York. Such delivery shall be sufficient notice to the undersigned.

(4) At the time of delivering this proposal to the Commission the undersigned will separately deliver a certified check payable to the order of the Comptroller of The City of New York for the sum of ten thousand dollars ($10,000). If the Commission shall notify the undersigned that this Contractor's Proposal is accepted and that the proposed contract is consented to by the Board of Estimate and Apportionment, then if the undersigned shall fail within ten days thereafter or within such longer period as may be prescribed by the Commission to procure the above described bond to be duly executed and delivered; or if the undersigned shall fail to procure the contract to be duly executed and delivered as aforesaid, then the Invitation to Contractors and this Contractor's Proposal shall constitute a contract binding the undersigned to pay to the City the damages by it sustained by reason of such failure of the undersigned, as provided in said Invitation to Contractors. And the undersigned hereby assigns to the City the said sum so specially deposited by the delivery of such certified check, subject only to the condition that if this Proposal shall not be accepted, or, if it shall be accepted and the undersigned shall within ten days after notice as aforesaid or any longer period prescribed by the Commission, execute the said contract and procure the said bond to be duly executed and delivered, then the amount of the said check so specially deposited shall be returned to the undersigned.

(5) A notice of acceptance of this Proposal by the Commission addressed to the undersigned as aforesaid shall forthwith, at the option of the Commission operate as against the undersigned as a complete making of a contract according to the form thereof as aforesaid, with the blanks therein contained filled in according to this Proposal.

(6) There are no persons interested with the undersigned in this Proposal, except*

(7) This Proposal is made without any connection with any other person making a proposal or bid for the same purpose, and is in all respects fair and without collusion or fraud. No member of the Board of Aldermen, head of department, chief of bureau, deputy thereof or clerk therein, or other officer of The City of New York, or any member or employee of the Public Service Commission for the First District is interested directly or indirectly, as contracting party, partner, stockholder, or otherwise in, or in the performance of the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof.

Dated, the ...., 1910.

Affidavit of Verification.

State of New York, City and County of New York, ss.:

............................., being duly sworn, says: I am†.................. the proposing Contractor above named. I have read the foregoing proposal. The same is in all respects true.

Sworn to before me this ...... day of ...., 1910.

ROUTE 5, SECTION 6, 26TH STREET TO 40TH STREET.

Contractor's Proposal for the Construction of a Portion of a Rapid Transit Railroad.

(Route 5, Section 6.)

Notice—Sums of money must be written in words and also in figures, except in the schedules. There must remain annexed hereto: Copy of Invitation to Contractors. Copy of Form of Contract. Copy of Form of Bond.

To the Public Service Commission for the First District:

1. The undersigned‡...
.... do .. hereby, in pursuance of the Invitation to Contractors, a copy of which is attached hereto, propose according to the terms thereof to enter into a contract in the form annexed hereto with The City of New York for the construction of Section 6 of Route 5, and to furnish all necessary labor, materials, machinery, tools, apparatus and other means of construction and perform all the work mentioned in the said contract at the unit prices for the several items as given in the following Schedule of Unit Prices, or as otherwise provided in the form of contract. It is understood that the quantities of various items specified in the following schedule are given as a basis for the uniform comparison of bids and are not in any way guaranteed or represented as correct or intended to be relied on, and they shall not be taken as final and shall form no basis for any claim in case they do not correspond with the final measurements or quantities. It is further understood that the Commission reserves the right to increase or diminish or to omit entirely any of the quantities of items as therein stated:

---

*Here insert the names and addresses of all persons interested with the bidder. If there are no such persons strike out the word "except."

†If the bidder is an individual, do not fill this blank; if the bidder is a firm, here say, "a member of the firm of ...."; if a corporation, say, "the (President or other officer duly authorized) of the.......................Company."

‡The bidder's name must be inserted here. If the bid is submitted by a corporation, the full legal title must be given here and a certified copy of the certificate of incorporation must be submitted, together with an affidavit showing the amount of stock paid in in cash and the names and addresses of the directors and principal officers. If the bid is submitted by a firm, the above blank must be filled up in the following form, "the firm of A. B. & Co., composed of A. B., C. D., etc." (giving the names of all the partners).

Schedule of Unit Prices.

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
1.	For earth excavation above mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard....................	....	73,000	....
2.	For earth excavation, below mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard	....	500	....
2a.	For earth excavation, both above and below mean high water, for sewers and pipes, including the disposal of it, etc., per cubic yard	....	37,000	....
3.	For rock excavation (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard......	....	116,200	....
3a.	For rock excavation for sewers and pipes, including the disposal of it, etc., per cubic yard	....	27,000	....
4.	For underpinning buildings, including all incidental work and material, per lineal front foot of building underpinned, as follows:			
	(a) For buildings less than seven stories in height, per front foot................	....	340	....
	(b) For buildings from seven to twelve stories in height, per front foot........	....	30	....
	(c) For buildings over twelve stories in height, per front foot	....	....	....
5.	For tunnel excavation (except tunneling sewers), including disposal of material, timbering, etc., per cubic yard	....	85,000	....
5a.	For tunnel excavation for sewers and pipes, including the disposal of material, timber, etc., per cubic yard	....	2,810	....
6.	For concrete masonry, in place, per cubic yard	....	42,300	....
7.	For protective concrete masonry in place outside of waterproofing, per cubic yard	....	370	....
8.	For rubble stone masonry in place, per cubic yard	....	1,700	....
9.	For brick masonry, in place, per cubic yard	....	1,610	....
10.	For hollow terra cotta brick masonry, in place, per cubic yard	....	880	....
11.	For grout of Portland cement, per barrel of Portland cement used............	....	2,500	....
13.	For timber foundations, placed and fastened, per thousand ft. B. M........	....	2M	....
14.	For broken stone or gravel, in place, other than that used in concrete, per cubic yard	....	3,100	....
15.	For waterproofing, treated woven fabric, laid with pitch or asphaltum, in place, as follows:			
	(a) For 1-ply, per square yard...........	....	4,810	....
	(b) For 2-ply, per square yard...........	....	100	....
	(c) For 3-ply, per square yard...........	....	6,300	....
	(d) For 4-ply, per square yard...........	....	100	....
	(e) For 5-ply, per square yard...........	....	100	....
	(f) For 6-ply, per square yard...........	....	100	....

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
16.	For waterproofing, brick laid in asphalt mastic, in place, per cubic yard.........	....	650	....
17.	For vitrified or cast iron drain pipe, in place, as follows:			
	(a) For 12-inch vitrified pipe, per lineal foot	....	100	....
	(b) For 10-inch vitrified pipe, per lineal foot	....	100	....
	(c) For 8-inch vitrified pipe, per lineal foot	....	5,100	....
	(d) For 6-inch vitrified pipe, per lineal foot	....	200	....
	(e) For 4-inch vitrified pipe, per lineal foot	....	100	....
	(f) For 8-inch cast-iron pipe, per lineal foot	....	....	....
	(g) For 6-inch cast-iron pipe, per lineal foot	....	100	....
	(h) For 4-inch cast-iron pipe, per lineal foot	....	8,200	....
18.	For tunnel ducts, in place, as required by section 305 of the specifications, per duct foot	....	555,000	....
19.	For riveted steel, painted and erected, per ton of two thousand pounds............	....	1,770	....
20.	For steel beams and shapes with connections, painted and erected, per ton of two thousand pounds	....	2,710	....
21.	For steel rods and bars built in concrete, per ton of two thousand pounds........	....	610	....
24.	For cast iron columns erected and painted, per ton of two thousand pounds........	....	60	....
25.	For miscellaneous iron castings, other than tunnel lining, such as manhole heads and covers, gratings, etc.; but not including castings for sewer work or pipes; in place, per ton of two thousand pounds..	....	15	....
26.	For wire mesh, in place, per pound......	....	8,200	....
27.	For one and one-half inch (1½-inch) galvanized iron pipe hand rail, in place, including expansion bolts, etc., per lineal foot	....	12,900	....
28.	For steel gratings for ventilation, in place, including frames, etc., per square foot..	....	10,100	....
29.	For vault lights, in place, per square foot	....	6,400	....
30.	For street surface restored:			
	(a) Sidewalks including curbs and all structures and growths therein and thereon, per square yard	....	3,170	....
	(b) For temporary repavement and maintenance of roadways, per square yard..	....	19,630	....
32.	For wrought-iron or fibre electric conduits, in place in stations, as follows:			
	(a) For three-fourths inch (¾-inch) wrought-iron, per lineal foot..........	....	12,000	....
	(b) For one and one-half inch (1½-inch) wrought-iron, per lineal foot..........	....	900	....
	(c) For two-inch (2-inch) wrought-iron, per lineal foot	....	460	....
	(d) For two-inch (2-inch) fibre, per lineal foot	....	4,400	....

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
33.	For cast-iron outlet boxes in place in stations, each	....	640	....
34.	For six-inch (6-inch) cast-iron pipe and fittings, including specials ("extra heavy"), in place in stations, per lineal foot	....	60	....
	SEWERS—ITEMS 37 TO 74.			
	Vitrified and Cast Iron Pipe—Items 37 *to* 43.			
38.	For 15-inch vitrified pipe sewer, per lineal foot	....	720	....
39.	For 18-inch vitrified pipe sewer, per lineal foot	....	1,055	....
42.	For cast-iron sewer pipe (straight pipe) in place in the work, per ton of two thousand pounds	....	9	....
	Egg-Shaped Brick or Concrete Sewers—Items 44 *to* 51.			
45.	For 3 feet 6 inches by 2 feet 4 inches, per lineal foot	....	390	....
47.	For 4 feet 0 inch by 2 feet 8 inches, per lineal foot	....	†(60)	....
	Circular Sewers—Brick or Concrete or Reinforced Concrete—Items 52 *to* 66.			
57.	For 5 feet 6 inches per lineal foot........	....	1,080	....
58.	For 5 feet 6 inches in tunnel, per lineal foot	....	1,280	....
60.	For 6 feet 0 inch per lineal foot..........	....	1,160	....
64.	For 8 feet 0 inch per lineal foot..........	....	420	....
66.	For 9 feet 6 inches per lineal foot........	....	1,935	....
	Sewers of Special Forms—Items 67 to 72.			
71.	For triple section, per lineal foot.........	....	102	....
72.	For 4 feet 0 inch wooden barrel, per lineal foot	....	336	....
	SURFACE AND SUBSURFACE STRUCTURES—ITEMS 75 AND 76.			
75.	For street surface railroads, including the support, reconstruction, rebuilding, etc., where necessary (but not including permanent masonry supports, if required and added, and not including additional vaults, if required and constructed in excess of the number existing), as follows:			
	(a) For electric railroads, per lineal foot of single track	....	5,800	....
	(b) For horse railroads, per lineal foot of single track	....	270	....
	PIPES IN STREETS—ITEMS 77 TO 126.			
	For Work and Material as Called for by Section 71 *of the Specifications.*			
	Water and Gas Pipes—Items 77 to 108.			
	Water Pipes—Items 77 to 88.			
	For water pipes in place, as follows:			
78.	For 4-inch water pipe, per lineal foot.....	....	100	....
79.	For 6-inch water pipe, per lineal foot......	....	1,230	....

---

†Included in Railroad construction under section 424 of the specifications.

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
	Gas Pipes—Items 89 *to* 99.			
	For gas pipes in place, as follows:			
90.	For 4-inch gas pipe, per lineal foot.......	....	160	....
91.	For 6-inch gas pipe, per lineal foot.......	....	830	....
92.	For 8-inch gas pipe, per lineal foot......	....	880	....
94.	For 12-inch gas pipe, per lineal foot......	....	1,000	....
95.	For 16-inch gas pipe, per lineal foot......	....	110	....
96.	For 20-inch gas pipe, per lineal foot......	....	230	....
	New Cast-Iron Hub and Spigot Water and Gas Pipe—Items 100 *and* 101.			
100.	For new cast-iron hub and spigot straight pipe delivered on the work, per ton of two thousand pounds	....	27	....
101.	For new cast-iron hub and spigot pipe, special castings, delivered on the work, per ton of two thousand pounds........	....	7	....
	Air Pipes—Items 121 *to* 124.			
	For air pipe in place, as follows:			
122.	For 8-inch air pipe, per lineal foot........	....	250	....
	DUCTS IN STREETS.			
	Electric Ducts and Conduits in Streets.			
	(Other than tunnel ducts and street railroad ducts which are provided for in Items 18 and 75a.)			
127.	For electric ducts and conduits in place, as provided in Section 71a of the specifications, per duct foot	....	103,000	....

(2) If this proposal is accepted, the undersigned will, within ten days after delivery of notice, execute and deliver the contract with the City in the form aforesaid and at the same time will deliver to the Comptroller of The City of New York pursuant to the terms of the said contract a bond in the sum of three hundred and fifty thousand dollars ($350,000) in the form hereto annexed, with the following named Sureties, viz.:

....
....
....
....

(3) The Commission may cause any notice intended for the undersigned to be delivered at Room No. .... on the ...... floor of the building No. .... in the Borough of .... in The City of New York. Such delivery shall be sufficient notice to the undersigned.

(4) At the time of delivering this proposal to the Commission the undersigned will separately deliver a certified check payable to the order of the Comptroller of The City of New York for the sum of ten thousand dollars ($10,000). If the Commission shall notify the undersigned that this Contractor's Proposal is accepted and that the proposed contract is consented to by the Board of Estimate and Apportionment, then if the undersigned shall fail within ten days thereafter or within such longer period as may be prescribed by the Commission to procure the above described bond to be duly executed and delivered; or if the undersigned shall fail to procure the contract to be duly executed and delivered as aforesaid, then the Invitation to Contractors and this Contractor's Proposal shall constitute a contract binding the undersigned to pay to the City the damages by it sustained by reason of such failure of the undersigned, as provided in said Invitation to Contractors. And the undersigned hereby assigns to the City the said sum so specially deposited by the delivery of such certified check, subject only to the condition that if this Proposal shall not be accepted, or, if it shall be accepted and the undersigned shall within ten days after notice as aforesaid or any longer period prescribed by the Commission, execute the said con-

tract and procure the said bond to be duly executed and delivered, then the amount of the said check so specially deposited shall be returned to the undersigned.

(5) A notice of acceptance of this Proposal by the Commission addressed to the undersigned as aforesaid shall forthwith, at the option of the Commission, operate as against the undersigned as a complete making of a contract according to the form thereof as aforesaid, with the blanks therein contained filled in according to this Proposal.

(6) There are no persons interested with the undersigned in this Proposal, except*

(7) This Proposal is made without any connection with any other person making a proposal or bid for the same purpose, and is in all respects fair and without collusion or fraud. No member of the Board of Aldermen, head of department, chief of bureau, deputy thereof or clerk therein, or other officer of The City of New York, or any member or employee of the Public Service Commission for the First District is interested directly or indirectly, as contracting party, partner, stockholder, or otherwise in, or in the performance of, the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof.

Dated, the ...., 1910.

Sworn to before me this ...... day of ...., 1910.

ROUTE 5, SECTION 7, 40TH STREET TO 53D STREET.

Contractor's Proposal for the Construction of a Portion of a Rapid Transit Railroad.
(Route 5, Section 7.)

Notice—Sums of money must be written in words and also in figures, except in the schedules. There must remain annexed hereto: Copy of Invitation to Contractors, copy of form of contract, copy of form of bond.

To the Public Service Commission for the First District:

1. The undersigned‡..
.... do .. hereby, in pursuance of the Invitation to Contractors, a copy of which is attached hereto, propose according to the terms thereof to enter into a contract in the form annexed hereto with The City of New York for the construction of Section 7 of Route 5, and to furnish all necessary labor, materials, machinery, tools, apparatus and other means of construction and perform all the work mentioned in the said contract at the unit prices for the several items as given in the following Schedule of Unit Prices or as otherwise provided in the form of contract. It is understood that the quantities of various items specified in the following schedule are given as a basis for the uniform comparison of bids and are not in any way guaranteed or represented as correct or intended to be relied on, and they shall not be taken as final and shall form no basis for any claim in case they do not correspond with the final measurements or quantities. It is further understood that the Commission reserves the right to increase or diminish or to omit entirely any of the quantities of items as therein stated:

---

*Here insert the names and addresses of all persons interested with the bidder. If there are no such persons strike out the word "except."

†If the bidder is an individual, do not fill this blank; if the bidder is a firm, here say, "a member of the firm of ...."; if a corporation, say, "the (President or other officer duly authorized) of the......................Company."

‡The bidder's name must be inserted here. If the bid is submitted by a corporation, the full legal title must be given here and a certified copy of the certificate of incorporation must be submitted, together with an affidavit showing the amount of stock paid in in cash and the names and addresses of the directors and principal officers. If the bid is submitted by a firm, the above blank must be filled up in the following form, "the firm of A. B. & Co., composed of A. B. C. D. etc." (giving the names of all the partners).

Schedule of Unit Prices.

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
1.	For earth excavation above mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard........................	....	125,600	....

	Mail Tubes—Items 125 *and* 126.			
125.	For 8-inch mail tube in place, per lineal foot	....	1,900	....
126.	For new 8-inch mail tube, delivered on the work, per ton of two thousand pounds..	....	10	....
	DUCTS IN STREETS			
	Electric Ducts and Conduits in Streets.			
	(Other than tunnel ducts and street railroad ducts which are provided for in Items 18 and 75-a).			
127.	For electric ducts and conduits in place, as provided in Section 71a of the specifications, per duct foot.................	....	106,000	....

(2) If this proposal is accepted, the undersigned will within ten days after delivery of notice, execute and deliver the contract with the City in the form aforesaid and at the same time will deliver to the Comptroller of The City of New York pursuant to the terms of the said contract a bond in the sum of three hundred and fifty thousand dollars ($350,000) in the form hereto annexed with the following named Sureties, viz.:

....
....
....

....

(3) The Commission may cause any notice intended for the undersigned to be delivered at Room No. .... on the .... floor of the building No. .... in the Borough of.......................... in the City of New York. Such delivery shall be sufficient notice to the undersigned.

(4) At the time of delivering this proposal to the Commission the undersigned will separately deliver a certified check payable to the order of the Comptroller of The City of New York for the sum of ten thousand dollars ($10,000). If the Commission shall notify the undersigned that this Contractor's Proposal is accepted and that the proposed contract is consented to by the Board of Estimate and Apportionment, then if the undersigned shall fail within ten days thereafter or within such longer period as may be prescribed by the Commission to procure the above described bond to be duly executed and delivered; or if the undersigned shall fail to procure the contract to be duly executed and delivered as aforesaid, then the Invitation to Contractors and this Contractor's Proposal shall constitute a contract binding the undersigned to pay to the City the damages by it sustained by reason of such failure of the undersigned, as provided in said Invitation to Contractors. And the undersigned hereby assigns to the City the said sum so specially deposited by the delivery of such certified check, subject only to the condition that if this Proposal shall not be accepted, or, if it shall be accepted and the undersigned shall within ten days after notice as aforesaid or any

longer period prescribed by the Commission, execute the said contract and procure the said bond to be duly executed and delivered, then the amount of the said check so specially desposited shall be returned to the undersigned.

(5) A notice of acceptance of this Proposal by the Commission addressed to the undersigned as aforesaid shall forthwith, at the option of the Commission, operate as against the undersigned as a complete making of a contract according to the form thereof as aforesaid, with the blanks therein contained filled in according to this Proposal.

(6) There are no persons interested with the undersigned in this Proposal, except*

(7) This Proposal is made without any connection with any other person making a proposal or bid for the same purpose, and is in all respects fair and without collusion or fraud. No member of the Board of Aldermen, head of department, chief of bureau, deputy thereof or clerk therein, or other officer of The City of New York, or any member or employee of the Public Service Commission for the First District is interested directly or indirectly, as contracting party, partner, stockholder, or otherwise in, or in the performance of, the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof.

Dated the ...., 1910.

Affidavit of Verification.

State of New York, City and County of New York, ss.:

....................................being duly sworn, says: I am†............ the proposing Contractor above named. I have read the foregoing proposal. The same is in all respects true.

Sworn to before me this .... day of ...., 1910.

ROUTE 5, SECTION 8, 53D STREET TO 67TH STREET.

Contractor's Proposal for the Construction of a Portion of a Rapid Transit Railroad.

(Route 5, Section 8.)

Notice—Sums of money must be written in words and also in figures, except in the schedules. There must remain annexed hereto: Copy of invitation to Contractors. Copy of form of contract. Copy of form of bond.

To the Public Service Commission for the First District:

1. The undersigned‡..
.... do.. hereby, in pursuance of the Invitation to Contractors, a copy of which is attached hereto, propose according to the terms thereof to enter into a contract in the form annexed hereto with The City of New York for the construction of Section 8 of Route 5, and to furnish all necessary labor, materials, machinery, tools, apparatus and other means of construction and perform all the work mentioned in the said contract at the unit prices for the several items as given in the following Schedule of Unit Prices, or as otherwise provided in the form of contract. It is understood that the quantities of various items specified in the following schedule are given as a basis for the uniform comparison of bids, and are not in any way guaranteed or represented as correct or intended to be relied on, and they shall not be taken as final and shall form no basis for any claim in case they do not correspond with the final measurements or quantities. It is further understood that the Commission reserves the right to increase or diminish or to omit entirely any of the quantities of items as therein stated:

---

*Here insert the names and addresses of all persons interested with the bidder. If there are no such persons, strike out the word "except."

†If the bidder is an individual, do not fill this blank; if the bidder is a firm, here say, "a member of the firm of ...."; if a corporation, say " (President or other officer duly authorized) of the .... Company."

‡The bidder's name must be inserted here. If the bid is submitted by a corporation, the full legal title must be given here and a certified copy of the certificate of incorporation must be submitted, together with an affidavit showing the amount of stock paid in in cash and the names and addresses of the directors and principal officers. If the bid is submitted by a firm, the above blank must be filled up in the following form, "the firm of A. B. & Co., composed of A, B. C, D. etc." (giving the names of all the partners).

Schedule of Unit Prices.

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
1.	For earth excavation, above mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard	....	172,700	....
2a.	For earth excavation, both above and below mean high water, for sewers and pipes, including the disposal of it, etc., per cubic yard	....	24,000	....
3.	For rock excavation (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard	....	54,000	....
3a.	For rock excavation for sewers and pipes, including the disposal of it, etc., per cubic yard	....	2,200	....
4.	For underpinning buildings, including all incidental work and material, per lineal front foot of building underpinned as follows:			
	(a) For buildings less than seven stories in height, per front foot	....	1,743	....
	(b) For buildings from seven to twelve stories in height, per front foot	....	....	....
	(c) For buildings over twelve stories in height, per front foot	....	....	....
5.	For tunnel excavation, including disposal of material, timbering, etc., per cubic yard	....	78,900	....
6.	For concrete masonry, in place, per cubic yard	....	45,100	....
7.	For protective concrete masonry in place outside of waterproofing, per cubic yard.	....	430	....
8.	For rubble stone masonry in place, per cubic yard	....	3,750	....
9.	For brick masonry, in place, per cubic yard.	....	3,480	....
10.	For hollow terra cotta brick masonry, in place, per cubic yard	....	470	....
11.	For grout of Portland cement, per barrel of Portland cement used	....	2,000	....
14.	For broken stone or gravel, in place, other than that used in concrete, per cubic yard	....	2,400	....
15.	For waterproofing, treated woven fabric, laid with pitch or asphaltum, in place, as follows:			
	(a) For 1-ply, per square yard	....	3,050	....
	(b) For 2-ply, per square yard	....	100	....
	(c) For 3-ply, per square yard	....	7,600	....
	(d) For 4-ply, per square yard	....	100	....
	(e) For 5-ply, per square yard	....	100	....
	(f) For 6-ply, per square yard	....	100	....
16.	For waterproofing, brick laid in asphalt mastic, in place, per cubic yard	....	430	....
17.	For vitrified or cast-iron drain pipe, in place, as follows:			
	(a) For 12-inch vitrified pipe, per lineal foot	....	100	....
	(b) For 10-inch vitrified pipe, per lineal foot	....	100	....
	(c) For 8-inch vitrified pipe, per lineal foot	....	7,100	....

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
	(d) For 6-inch vitrified pipe, per lineal foot	....	200	....
	(e) For 4-inch vitrified pipe, per lineal foot	....	100	....
	(f) For 8-inch cast-iron pipe, per lineal foot	....	....	....
	(g) For 6-inch cast-iron pipe, per lineal foot	....	100	....
	(h) For 4-inch cast-iron pipe, per lineal foot	....	11,170	....
18.	For tunnel ducts, in place, as required by Section 305 of the specifications, per duct foot	....	569,000	....
19.	For riveted steel, painted and erected, per ton of two thousand pounds............	....	1,417	....
20.	For steel beams and shapes with connections, painted and erected, per ton of two thousand pounds	....	760	....
21.	For steel rods and bars built in concrete per ton of two thousand pounds........	....	1,305	....
25.	For miscellaneous iron castings, other than tunnel lining, such as manhole heads and covers, gratings, etc., but not including castings for sewer work or pipes; in place, per ton of two thousand pounds...	....	5	....
26.	For wire mesh, in place, per pound........	....	1,370	....
27.	For one and one half-inch (1½ inch) galvanized iron pipe hand rail, in place, including expansion bolts, etc., per lineal foot	....	12,758	....
28.	For steel gratings for ventilation, in place, including frames, etc., per square foot	....	8,560	....
29.	For vault lights, in place, per square foot.	....	5,600	....
30.	For street surface restored:			
	(a) Sidewalks, including curbs and all structures and growths therein and thereon, per square yard...............	....	8,710	....
	(b) For temporary repavement and maintenance of roadways, per square yard....	....	17,190	....
32.	For wrought iron or fibre electric conduits, in place, in stations, as follows:			
	(a) For three-fourths inch (¾-inch) wrought-iron, per lineal foot	....	7,865	....
	(b) For one and one-half inch (1½-inch) wrought-iron, per lineal foot..........	....	706	....
	(c) For two-inch (2-inch) wrought-iron, per lineal foot........................	....	380	....
	(d) For two-inch (2-inch) fibre, per lineal foot	....	2,200	....
33.	For cast-iron outlet boxes in place, in stations, each	....	494	....
34.	For six-inch (6-inch) cast-iron pipe and fittings, including specials ("extra heavy"), in place in stations, per lineal foot......	....	90	....
	SEWERS—ITEMS 37 TO 74.			
	Vitrified and Cast Iron Pipe—Items 37 to 43.			
38.	For 15-inch vitrified pipe sewer, per lineal foot	....	1,596	....

39.	For 18-inch vitrified pipe sewer, per lineal foot	....	1,758	....
	Egg-Shaped Brick or Concrete Sewers—Items 44 *to* 51.			
45.	For 3 feet 6 inches by 2 feet 4 inches per lineal foot	....	1,863	....
47.	For 4 feet 0 inch by 2 feet 8 inches per lineal foot	....	342	....
	Circular Sewers—Brick or Concrete or Reinforced Concrete—Items 52 *to* 66.			
59.	For 5 feet 9 inches per lineal foot	....	268	....
60.	For 6 feet 0 inch per lineal foot	....	260	....
63.	For 7 feet 0 inch per lineal foot	....	870	....
65.	For 8 feet 9 inches per lineal foot	....	520	....
	SURFACE AND SUBSURFACE STRUCTURES—ITEMS 75 AND 76.			
75.	For street surface railroads, including the support, reconstruction, rebuilding, etc., where necessary (but not including permanent masonry supports, if required and added, and not including additional vaults, if required and constructed in excess of the number existing), as follows:			
	(a) For electric railroads, per lineal foot of single track	....	7,624	....
	(b) For horse railroads, per lineal foot of single track	....	....	....
	PIPES IN STREETS—ITEMS 77 TO 126.			
	For Work and Material as Called for by Section 71 *of the Specifications.*			
	Water and Gas Pipes—Items 77 *to* 108.			
	Water Pipes—Items 77 *to* 88.			
	For water pipes in place, as follows:			
78.	For 4-inch water pipe, per lineal foot	....	100	....
79.	For 6-inch water pipe, per lineal foot	....	680	....
84.	For 20-inch water pipe, per lineal foot	....	60	....
	Gas Pipes—Items 89 *to* 99.			
	For gas pipes in place, as follows:			
90.	For 4-inch gas pipe, per lineal foot	....	400	....
91.	For 6-inch gas pipe, per lineal foot	....	800	....
92.	For 8-inch gas pipe, per lineal foot	....	900	....
95.	For 16-inch gas pipe, per lineal foot	....	60	....
96.	For 20-inch gas pipe, per lineal foot	....	1,000	....
98.	For 30-inch gas pipe, per lineal foot	....	250	....
	New Cast-iron Hub and Spigot Water and Gas Pipe—Items 100 *and* 101.			
100.	For new cast-iron hub and spigot straight pipe delivered on the work, per ton of two thousand pounds	....	36	....
101.	For new cast-iron hub and spigot pipe, special castings, delivered on the work, per ton of two thousand pounds	....	9	....
	Air Pipes—Items 121 *to* 124.			
	For air pipe in place, as follows:			
122.	For 8-inch air pipe, per lineal foot	....	550	....
124.	For new 8-inch air pipe, delivered on the work, per lineal foot	....	100	....

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
	DUCTS IN STREETS. *Electric Ducts and Conduits in Streets.* (Other than tunnel ducts and street railroad ducts which are provided for in Items 18 and 75-a.)			
127.	For electric ducts and conduits in place, as provided in Section 71a of the specifications, per duct foot................	....	121,000	....

(2) If this Proposal is accepted, the undersigned will within ten days after delivery of notice, execute and deliver the contract with the City in the form aforesaid and at the same time will deliver to the Comptroller of The City of New York pursuant to the terms of the said contract a bond in the sum of three hundred thousand dollars ($300,000) in the form hereto annexed with the following named Sureties, viz.:

....

....

....

....

(3) The Commission may cause any notice intended for the undersigned to be delivered at Room No. .... on the .... floor of the building No. .... in the Borough of .... in the City of New York. Such delivery shall be sufficient notice to the undersigned.

(4) At the time of delivering this proposal to the Commission the undersigned will separately deliver a certified check payable to the order of the Comptroller of The City of New York for the sum of ten thousand dollars ($10,000). (2) If this proposal is accepted, the undersigned will, within ten days after delivery of notice, execute and deliver the contract with the City in the form aforesaid and at the same time will deliver to the Comptroller of The City of New York, pursuant to the terms of the said contract, a bond in the sum of three hundred thousand dollars ($300,000), in the form hereto annexed, with the following named Sureties, viz.:

....

....

....

....

(3) The Commission may cause any notice intended for the undersigned to be delivered at Room No.........., on the...... floor of the building No............. in the Borough of.............., in The City of New York. Such delivery shall be sufficient notice to the undersigned.

(4) At the time of delivering this proposal to the Commission the undersigned will separately deliver a certified check payable to the order of the Comptroller of The City of New York for the sum of ten thousand dollars ($10,000). If the Commission shall notify the undersigned that the Contractor's Proposal is accepted and that the proposed contract is consented to by the Board of Estimate and Apportionment, then, if the undersigned shall fail within ten days thereafter or within such longer period as may be prescribed by the Commission, to procure the above described bond to be duly executed and delivered; or if the undersigned shall fail to procure the contract to be duly executed and delivered as aforesaid, then the Invitation to Contractors and this Contractor's Proposal shall constitute a contract binding the undersigned to pay to the City the damages by it sustained by reason of such failure of the undersigned, as provided in said Invitation to Contractors. And the undersigned hereby assigns to the City the said sum so specially deposited by the delivery of such certified check, subject only to the condition that if this Proposal shall not be accepted, or, if it shall be accepted and the undersigned shall within ten days after notice as aforesaid or any longer period prescribed by the Commission, execute the said contract and procure the said bond to be duly executed and delivered, then the amount of the said check so specially deposited shall be returned to the undersigned.

(5) A notice of acceptance of this Proposal by the Commission addressed to the undersigned as aforesaid shall forthwith, at the option of the Commission, operate as against the undersigned as a complete making of a contract according to the form thereof as aforesaid, with the blanks therein contained filled in according to this Proposal.

(6) There are no persons interested with the undersigned in this Proposal, except*

(7) This proposal is made without any connection with any other person making a proposal or bid for the same purpose, and is in all respects fair and without collusion or fraud. No member of the Board of Aldermen, head of department, chief of bureau, deputy thereof or clerk therein, or other officer of The City of New York, or any member or employee of the Public Service Commission for the First District is interested directly or indirectly, as contracting party, partner, stockholder, or otherwise in, or in the performance of, the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof.

Dated the............................, 1910.

...., being duly sworn, says: I am†
....
the proposing Contractor above named. I have read the foregoing proposal. The same is in all respects true.

Sworn to before me this..................day of.................., 1910.

ROUTE 5, SECTION 10, 79TH STREET TO 93D STREET.

Contractor's Proposal for the Construction of a Portion of a Rapid Transit Railroad

(Route 5, Section 10.)

Notice—Sums of money must be written in words and also in figures, except in the schedules. There must remain annexed hereto: Copy of invitation to Contractors Copy of form of contract. Copy of form of bond.

To the Public Service Commission for the First District:

1. The undersigned‡..
....do..
hereby, in pursuance of the Invitation to Contractors, a copy of which is attached hereto, propose according to the terms thereof to enter into a contract in the form annexed hereto with The City of New York for the construction of Section 10 of Route 5, and to furnish all necessary labor, materials, machinery, tools, apparatus and other means of construction and perform all the work mentioned in the said contract at the unit prices for the several items as given in the following Schedule of Unit Prices, or as otherwise provided in the form of contract. It is understood that the quantities of various items specified in the following schedule are given as a basis for the uniform comparison of bids and are not in any way guaranteed or represented as correct or intended to be relied on, and they shall not be taken as final and shall form no basis for any claim in case they do not correspond with the final measurements or quantities. It is further understood that the Commission reserves the right to increase or diminish or to omit entirely any of the quantities of items as therein stated:

Schedule of Unit Prices.

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
1.	For earth excavation, above mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard........................	....	44,700	....
2a.	For earth excavation, both above and below mean high water, for sewers and pipes, including the disposal of it, etc., per cubic yard............................	....	2,500	....
3.	For rock excavation (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard................	....	150,100	....
3a.	For rock excavation for sewers and pipes, including the disposal of it, etc., per cubic yard	....	700	....

†If the bidder is an individual, do not fill this blank; if the bidder is a firm, here say, "a member of the firm of..;" if a corporation, say, "the (President or other officer duly authorized) of the....... ....Company."

‡The bidder's name must be inserted here. If the bid is submitted by a corporation, the full legal title must be given here and a certified copy of the certificate of incorporation must be submitted, together with an affidavit showing the amount of stock paid in in cash and the names and addresses of the directors and principal officers. If the bid is submitted by a firm, the above blank must be filled up in the following form, "the firm of A. B. & Co., composed of A. B. C. D., etc." (giving the names of all the partners).

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.

(2) If this proposal is accepted, the undersigned will within ten days after delivery of notice, execute and deliver the contract with the City in the form aforesaid and at the same time will deliver to the Comptroller of The City of New York pursuant to the terms of the said contract a bond in the sum of three hundred thousand dollars ($300,000) in the form hereto annexed with the following named Sureties, viz.:

....

....

....

....

(3) The Commission may cause any notice intended for the undersigned to be

---

†Yard supply tracks for elevated railroad.

delivered at Room No................on the..................floor of the building No.....................in the Borough of...............................in the City of New York. Such delivery shall be sufficient notice to the undersigned.

(4) At the time of delivering this proposal to the Commission the undersigned will separately deliver a certified check payable to the order of the Comptroller of The City of New York for the sum of ten thousand dollars ($10,000). If the Commission shall notify the undersigned that this Contractor's Proposal is accepted and that the proposed contract is consented to by the Board of Estimate and Apportionment, then if the undersigned shall fail within ten days thereafter or within such longer period as may be prescribed by the Commission to procure the above described bond to be duly executed and delivered; or if the undersigned shall fail to procure the contract to be duly executed and delivered as aforesaid, then the Invitation to Contractors and this Contractor's Proposal shall constitute a contract binding the undersigned to pay to the City the damages by it sustained by reason of such failure of the undersigned as provided in said Invitation to Contractors. And the undersigned hereby assigns to the City the said sum so specially deposited by the delivery of such certified check, subject only to the condition that if this Proposal shall not be accepted, or, if it shall be accepted and the undersigned shall within ten days after notice as aforesaid or any longer period prescribed by the Commission, execute the said contract and procure the said bond to be duly executed and delivered, then the amount of the said check so specially deposited shall be returned to the undersigned.

(5) A notice of acceptance of this Proposal by the Commission addressed to the undersigned as aforesaid shall forthwith, at the option of the Commission operate as against the undersigned as a complete making of a contract according to the form thereof as aforesaid, with the blanks therein contained filled in accordance to this Proposal.

(6) There are no persons interested with the undersigned in this Proposal, except*

(7) This Proposal is made without any connection with any other person making a proposal or bid for the same purpose, and is in all respects fair and without collusion or fraud. No member of the Board of Aldermen, head of department, chief of bureau, deputy thereof or clerk therein, or other officer of The City of New York, or any member or employee of the Public Service Commission for the First District is interested directly or indirectly, as contracting party, partner, stockholder, or otherwise in, or in the performance of, the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof.

....Company."

To the Public Service Commission for the First District:

1. The undersigned‡ ....

.... do..
hereby, in pursuance of the Invitation to Contractors, a copy of which is attached hereto, propose according to the terms thereof to enter into a contract in the form annexed hereto with The City of New York for the construction of Section 12 of Route 5, and to furnish all necessary labor, materials, machinery, tools, apparatus and other means of construction and perform all the work mentioned in the said contract at the unit prices for the several items as given in the following Schedule of Unit Prices, or as otherwise provided in the form of contract. It is understood that the quantities of various items specified in the following schedule are given as a basis for the uniform comparison of bids and are not in any way guaranteed or represented as correct or intended to be relied on, and they shall not be taken as final and shall form no basis for any claim in case they do not correspond with the final measurements or quantities. It is further understood that the Commission reserves the right to increase or diminish or to omit entirely any of the quantities of items as therein stated:

Schedule of Unit Prices.

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
1.	For earth excavation, above mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard......................	....	126,000	....
2.	For earth excavation, below mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard......................	....	93,000	....

(2) If this proposal is accepted, the undersigned will within ten days after delivery of notice, execute and deliver the contract with the City in the form aforesaid and at the same time will deliver to the Comptroller of The City of New York pursuant to the terms of the said contract a bond in the sum of four hundred thousand dollars ($400,000) in the form hereto annexed with the following named Sureties, viz.:

....
....
....
....

(3) The Commission may cause any notice intended for the undersigned to be delivered at Room No..................on the................floor in the building No.....................in the Borough of.........................in the City of New York. Such delivery shall be sufficient notice to the undersigned.

(4) At the time of delivering this proposal to the Commission the undersigned will separately deliver a certified check payable to the order of the Comptroller of The City of New York for the sum of twelve thousand five hundred dollars ($12,500). If the Commission shall notify the undersigned that this Contractor's Proposal is accepted and that the proposed contract is consented to by the Board of Estimate and Apportionment, then if the undersigned shall fail within ten days thereafter or within such longer period as may be prescribed by the Commission to procure the above described bond to be duly executed and delivered; or if the undersigned shall fail to procure the contract to be duly executed and delivered as aforesaid, then the Invitation to Contractors and this Contractor's Proposal shall constitute a contract binding the undersigned to pay to the City the damages by it sustained by reason of such failure of the undersigned, as provided in said Invitation to Contractors. And the undersigned hereby assigns to the City the said sum so specially deposited by the delivery of such certified check, subject only to the condition that if this Proposal shall not be accepted, or, if it shall be accepted and the undersigned shall within ten days after notice as aforesaid or any longer period prescribed by the Commission, execute the said contract and procure the said bond to be duly executed and delivered, then the amount of the said check so specially deposited shall be returned to the undersigned.

(5) A notice of acceptance of this Proposal by the Commission addressed to the undersigned as aforesaid shall forthwith, at the option of the Commission, operate as against the undersigned as a complete making of a contract according to the form thereof as aforesaid, with the blanks therein contained filled in according to this Proposal.

(6) There are no persons interested with the undersigned in this Proposal, except*

(7) This Proposal is made without any connection with any other person making a proposal or bid for the same purpose, and is in all respects fair and without collusion or fraud. No member of the Board of Aldermen, head of department, chief of bureau, deputy thereof or clerk therein, or other officer of The City of New York, or any member or employee of the Public Service Commission for the First District is interested directly or indirectly, as contracting party, partner, stockholder, or otherwise in, or in the performance of the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof.

(2) If this proposal is accepted, the undersigned will within ten days after delivery of notice, execute and deliver the contract with the City in the form aforesaid and at the same time will deliver to the Comptroller of The City of New York pursuant to the terms of the said contract a bond in the sum of four hundred thousand dollars ($400,000) in the form hereto annexed with the following named Sureties, viz.:

....

....

....

....

(3) The Commission may cause any notice intended for the undersigned to be delivered at Room No......., on the........floor of the building No............, in the Borough of..........., in The City of New York. Such delivery shall be sufficient notice to the undersigned.

(4) At the time of delivering this proposal to the Commission the undersigned will separately deliver a certified check payable to the order of the Comptroller of The City of New York for the sum of twelve thousand five hundred dollars ($12,500). If the Commission shall notify the undersigned that this Contractor's Proposal is accepted and that the proposed contract is consented to by the Board of Estimate and Apportionment, then if the undersigned shall fail within ten days thereafter or within

such longer period as may be prescribed by the Commission to procure the above described bond to be duly executed and delivered; or if the undersigned shall fail to procure the contract to be duly executed and delivered as aforesaid, then the Invitation to Contractors and this Contractor's Proposal shall constitute a contract binding the undersigned to pay to the City the damages by it sustained by reason of such failure of the undersigned, as provided in said Invitation to Contractors. And the undersigned hereby assigns to the City the said sum so specially deposited by the delivery of such certified check, subject only to the condition that if this Proposal shall not be accepted, or, if it shall be accepted and the undersigned shall within ten days after notice as aforesaid or any longer period prescribed by the Commission, execute the said contract and procure the said bond to be duly executed and delivered, then the amount of the said check so specially deposited shall be returned to the undersigned.

(5) A notice of acceptance of this Proposal by the Commission addressed to the undersigned as aforesaid shall forthwith, at the option of the Commission, operate as against the undersigned as a complete making of a contract according to the form thereof as aforesaid, with the blanks therein contained filled in according to this Proposal.

(6) There are no persons interested with the undersigned in this Proposal, except*

(7) This Proposal is made without any connection with any other person making a proposal or bid for the same purpose, and is in all respects fair and without collusion or fraud. No member of the Board of Aldermen, head of department, chief of bureau, deputy thereof or clerk therein, or other officer of The City of New York, or any member or employee of the Public Service Commission for the First District is interested directly or indirectly, as contracting party, partner, stockholder, or otherwise in, or in the performance of, the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof.

....

(3) The Commission may cause any notice intended for the undersigned to be delivered at Room.........on the...........floor of the building.................in the Borough of..................in The City of New York. Such delivery shall be sufficient notice to the undersigned.

(4) At the time of delivering this proposal to the Commission the undersigned will separately deliver a certified check payable to the order of the Comptroller of The City of New York for the sum of fifteen thousand dollars ($15,000). If the Commission shall notify the undersigned that this Contractor's Proposal is accepted, and that the proposed contract is consented to by the Board of Estimate and Apportionment, then if the undersigned shall fail within ten days thereafter or within such longer period as may be prescribed by the Commission to procure the above described bond to be duly executed and delivered; or if the undersigned shall fail to procure the contract to be duly executed and delivered as aforesaid, then the Invitation to Contractors and this Contractor's Proposal shall constitute a contract binding the undersigned to pay to the City the damages by it sustained by reason of such failure of the undersigned as provided in said Invitation to Contractors. And the undersigned hereby assigns to the City the said sum so specially deposited by the delivery of such certified check, subject only to the condition that if this Proposal shall not be accepted, or, if it shall be accepted and the undersigned shall within ten days after notice as aforesaid or any longer period prescribed by the Commission, execute the said contract and procure the said bond to be duly executed and delivered, then the amount of the said check so specially deposited shall be returned to the undersigned.

(5) A notice of acceptance of this Proposal by the Commission addressed to the undersigned as aforesaid shall forthwith, at the option of the Commission, operate as against the undersigned as a complete making of a contract according to the form thereof as aforesaid, with the blanks therein contained filled in according to this Proposal.

(6) There are no persons interested with the undersigned in this Proposal, except*

(7) This Proposal is made without any connection with any other person making a proposal or bid for the same purpose, and is in all respects fair and without collusion or fraud. No member of the Board of Aldermen, head of department, chief of bureau, deputy thereof or clerk therein, or other officer of The City of New York, or any member or employee of the Public Service Commission for the First District is interested directly or indirectly, as contracting party, partner, stockholder, or otherwise in, or in the performance of, the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof.

Affidavit of Verification

State of New York, City and County of New York, ss.:

.... being duly sworn, says: I am†.. the proposing Contractor above named. I have read the foregoing proposal. The same is in all respects true.

Sworn to before me this............day of................, 1910.

ROUTE 5, SECTION 15, MOTT AVENUE TO 157TH STREET AND TO ALEXANDER AVENUE.

Contractor's Proposal for the Construction of a Portion of a Rapid Transit Railroad.

(Route 5, Section 15.)

Notice—Sums of money must be written in words and also in figures, except in the schedules. There must remain annexed hereto: Copy of Invitation to Contractors. Copy of form of contract. Copy of form of bond.

To the Public Service Commission for the First District:

1. The undersigned‡... do... hereby, in pursuance of the Invitation to Contractors, a copy of which is attached hereto, propose according to the terms thereof to enter into a contract in the form annexed hereto with The City of New York for the construction of Section 15 of Route 5, and to furnish all necessary labor, materials, machinery, tools, apparatus and other means of construction and perform all the work mentioned in the said contract at the unit prices for the several items as given in the following Schedule of Unit Prices, or as otherwise provided in the form of contract. It is understood that the quantities of various items specified in the following schedule are given as a basis for the uniform comparison of bids, and are not in any way guaranteed or represented as correct or intended to be relied on, and they shall not be taken as final, and shall form no basis for any claim in case they do not correspond with the final measurements or quantities. It is further understood that the Commission reserves the right to increase or diminish or to omit entirely any of the quantities of items as therein stated:

Schedule of Unit Prices.

(2) If this proposal is accepted, the undersigned will within ten days after delivery of notice, execute and deliver the contract with the City in the form aforesaid, and at the same time will deliver to the Comptroller of The City of New York, pursuant to the terms of said contract, a bond in the sum of five hundred thousand dollars ($500,000) in the form hereto annexed with the following named Sureties, viz.:

....

....

....

....

(3) The Commission may cause any notice intended for the undersigned to be delivered at Room No........, on the........floor of the building No..............in the Borough of..............., in The City of New York. Such delivery shall be sufficient notice to the undersigned.

(4) At the time of delivering this proposal to the Commission the undersigned will separately deliver a certified check payable to the order of the Comptroller of The City of New York for the sum of fifteen thousand dollars ($15,000). If the Commission shall notify the undersigned that this Contractor's Proposal is accepted, and that the proposed contract is consented to by the Board of Estimate and Apportionment, then if the undersigned shall fail within ten days thereafter or within such longer period as may be prescribed by the Commission to procure the above described bond to be duly executed and delivered; or if the undersigned shall fail to procure the contract to be duly executed and delivered as aforesaid, then the Invitation to Contractors and this Contractor's Proposal shall constitute a contract binding the undersigned to pay to the City the damages by it sustained by reason of such failure of the undersigned, as provided in said Invitation to Contractors. And the undersigned hereby assigns to the City the sum so specially deposited by the delivery of such certified check, subject only to the condition that if this Proposal shall not be accepted, or, if it shall be accepted and the undersigned shall within ten days after notice as aforesaid or any longer period prescribed by the Commission, execute the said con-

tract and procure the said bond to be duly executed and delivered, then the amount of the said check so specially deposited shall be returned to the undersigned.

(5) A notice of acceptance of this proposal by the Commission addressed to the undersigned as aforesaid shall forthwith, at the option of the Commission, operate as against the undersigned as a complete making of a contract according to the form thereof as aforesaid, with the blanks therein contained filled in according to this Proposal.

(6) There are no persons interested with the undersigned in this Proposal, except*

(7) This proposal is made without any connection with any other person making a proposal or bid for the same purpose, and is in all respects fair and without collusion or fraud. No member of the Board of Aldermen, head of department, chief of bureau, deputy thereof or clerk therein, or other officer of The City of New York, or any member or employee of the Public Service Commission for the First District is interested directly or indirectly, as contracting party, partner, stockholder, or otherwise in, or in the performance of, the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof.

SECTION NO. 7, FROM EAST 40TH STREET, UNDER LEXINGTON AVENUE TO EAST 53D STREET; CONTRACTOR, CHARLES H. PECKWORTH; AMOUNT, $2,750,463.40.

State of New York, Public Service Commission for the First District, Tribune Building, 154 Nassau Street, New York, July 5, 1911.

To the Board of Estimate and Apportionment of The City of New York:

The Public Service Commission for the First District herewith transmits to you for your consent, as required by law, a proposed contract between The City of New York and Charles H. Peckworth for the construction at the public expense of Section No. 7 of Route No. 5, being that portion of the proposed Lexington Avenue Rapid Transit Railroad which extends under Lexington avenue from East 40th street to East 53d street, in the Borough of Manhattan.

The Public Service Commission for the First District further requests your honorable Board to consent to the said contract herewith transmitted and to prescribe a limit to the amount of bonds available to meet the requirements of the said contract, to wit, the sum of two million seven hundred and fifty thousand four hundred and sixty-three dollars and forty cents ($2,750,463.40); and also to direct the Comptroller of The City of New York to issue the bonds of said City at such a rate of interest as the Commissioners of the Sinking Fund of said City may prescribe for the purpose of providing the necessary means for contruction at the public expense of the said portion of such railroad.

And the Public Service Commission for the First District does hereby, pursuant to section 45 of the Greater New York Charter, make request for the authorization of such corporate stock for the full amount sufficient to pay the entire estimated expense of executing such contract, to wit, the sum of two million seven hundred and fifty thousand four hundred and sixty-three dollars and forty cents ($2,750,463.40).

In witness whereof the Public Service Commission for the First District has

caused its official seal to be hereto affixed and attested by its Secretary and these presents to be signed by its Chairman this 5th day of July, 1911.

---

*Here insert the names and addresses of all persons interested with the bidder. If there are no such persons strike out the word "except."

†If the bidder is an individual, do not fill this blank; if the bidder is a firm, here say, "a member of the firm of....................................."; if a corporation, say, "the (President or other officer duly authorized) of the.................... ....Company."

PUBLIC SERVICE COMMISSION FOR THE FIRST DISTRICT, by W. R. WILLCOX, Chairman.

Attest: TRAVIS H. WHITNEY, Secretary.

After consideration of the bids on Section No. 7 of Route No. 5, the following resolution was duly moved and seconded:

Resolved, That this Commission hereby accepts the proposal of Charles H. Peckworth, dated October 27, 1910, for the construction of Section No. 7 of Route No. 5, being that portion of the proposed Lexington Avenue Rapid Transit Railroad which extends under Lexington avenue, from East 40th street to East 53d street, in the Borough of Manhattan, the aggregate of the unit prices in the proposal amounting to two million seven hundred and fifty thousand four hundred and sixty-three dollars and forty cents ($2,750,463.40).

Resolved, That the Chairman and the Secretary be and they hereby are authorized on behalf of the Commission to execute a contract in the form attached to the said proposal and to deliver the same if and when consented to by the Board of Estimate and Apportionment and upon compliance by the said Charles H. Peckworth with the requirements of the invitation to bidders attached to the said proposal.

Resolved, That the Chairman and Secretary be and they hereby are authorized and directed to request the Board of Estimate and Apportionment to consent to the said contract and to prescribe a limit to the amount of bonds available to meet the requirements of the said contract, to wit, the sum of two million seven hundred and fifty thousand four hundred and sixty-three dollars and forty cents ($2,750,463.40); and also to request the said Board of Estimate and Apportionment to direct the Comptroller to The City of New York to issue the bonds of said City at such a rate of interest as the Board of Commissioners of the Sinking Fund of said City may prescribe for the purpose of providing the necessary means for construction at the public expense of the said portion of such railroad; and also to make request for the authorization of bonds for the full amount sufficient to pay the entire estimated expense of executing such contract, to wit, the sum of two million seven hundred and fifty thousand four hundred and sixty-three dollars and forty cents ($2,750,463.40).

Resolved, That the Secretary give notice to the said Charles H. Peckworth that his proposal has been accepted and the contract awarded to him by this Commission, subject to its being consented to by the Board of Estimate and Apportionment, as required by law.

Resolved, That it be referred to Counsel to the Commission to inquire into the sufficiency of the sureties proposed to be given by the said Charles H. Peckworth, and in case the sureties named in the proposal of the said Charles H. Peckworth or any of them are not approved by the Commission, then to inquire into the sufficiency of any other or substitute sureties and in behalf of the Commission to do any such act as may be necessary and incidental to the furnishing of a proper bond.

Ayes—Commissioners Willcox, McCarroll, Maltbie, Eustis, Cram.

Nays—None.

Carried.

State of New York, County of New York, ss.:

I, Travis H. Whitney, Secretary of the Public Service Commission for the First District, do hereby certify that I have compared the above with the original adopted by said Commission on July 5, 1911, and that it is a correct transcript therefrom and of the whole of the original.

In testimony whereof I have hereunto subscribed my hand and affixed the seal of the Commission this 5th day of July, 1911.

TRAVIS H. WHITNEY, Secretary.

INVITATION TO CONTRACTORS.

Parts of Lexington Avenue Route.

The City of New York, acting by the Public Service Commission for the First District (hereinafter called "the Commission") invites proposals to construct portions of a proposed rapid transit railroad in the Boroughs of Manhattan and The Bronx in The City of New York. Proposals may be submitted separately for any one or more of the separate sections of which such railroad consists as hereinafter stated.

The points within the City between which the said several parts are to run and the route or routes to be followed are briefly as follows:

Lexington Avenue Route.

(Route No. 5.)

Section 1 begins under Battery Park and extends thence under Battery place, Greenwich street, Trinity place and Church street to a point about 80 feet north of the centre line of Dey street; with a station in Battery Park, a station at Rector street and a station at Cortlandt and Dey streets.

Section 2 begins at the end of Section 1 and extends thence under Church street, private property, Vesey street, private property, and Broadway to a point under Broadway about 110 feet north of the centre line of Walker street; with a station at Murray and Warren streets.

Section 2-A begins at the end of Section 2 and extends thence under Broadway to a point about on the northerly building line of Howard street. This section includes the Canal street station and also the portion of the Canal street subway lying thereunder.

Section 3 begins at the end of Section 2-A and extends thence under Broadway to a point about midway between Houston and Bleecker streets; with a station at Prince street.

Section 4 begins at the end of Section 3 and extends thence under Broadway. private property and the several cross streets to a point under private property at the southerly line of East 14th street and Irving place; with a station at Astor place and East 8th street.

Section 5 begins at the end of Section 4 and extends thence under Irving place, Gramercy Park and Lexington avenue to a point about 140 feet north of the centre line of East 26th street; with a station at East 14th and East 15th streets and a station at East 23d street.

Section 6 begins at the end of Section 5 and extends thence under Lexington avenue to about the centre line of East 40th street; with a station at East 27th and East 28th streets and a station at East 34th street.

Section 7 begins at the end of Section 6 and extends thence under Lexington avenue to a point about 50 feet north of the centre line of East 53d street; with a station at East 42d and 43d streets and a station at East 51st street.

Section 8 begins at the end of Section 7 and extends thence under Lexington avenue to a point about 50 feet north of the centre line of East 67th street; with a station at East 58th and East 59th streets.

Section 9 begins at the end of Section 8 and extends thence under Lexington avenue to a point about 70 feet south of the centre line of East 79th street; with a station at East 68th and East 69th streets and a station at East 77th street.

Section 10 begins at the end of Section 9 and extends thence under Lexington avenue to a point about 50 feet south of the centre line of East 93d street; with a station at East 86th street.

Section 11 begins at the end of Section 10 and extends thence under Lexington avenue to a point about 70 feet south of the centre line of East 106th street; with a station at East 96th street and a station at East 102d and East 103d streets.

Section 12 begins at the end of Section 11 and extends thence under Lexington avenue to a point about 115 feet south of the centre line of East 118th street; with a station at East 110th and East 111th streets and a station at East 116th street.

Section 13 begins at the end of Section 12 and extends thence under Lexington avenue to a point about 120 feet south of the centre line of East 129th street; with a station at East 125th street.

Section 14 begins at the end of Section 13 and extends thence under Lexington avenue, private property and the Harlem River to a point in private property in the Borough of The Bronx, thence under private property and Park avenue to East 135th street. Here the line divides into two branches. The west branch begins at about the centre line of East 135th street and extends thence under private property to a point in private property a distance of about 655 feet from the centre line of East 135th street and about 50 feet west of the centre line of Mott avenue. The east branch extends under Park avenue and partly under private property to about the intersection of the easterly line of Mott avenue with the westerly line of Park avenue.

Section 15. This section consists of two branches. The west branch begins at the end of the west branch of Section 14 and extends thence under East 138th street, private property and Mott avenue, Franz Sigel Park, private property and the several cross streets to a point in private property on the easterly side of River avenue about 120 feet south of the south line of East 157th street; with a station at East 138th street and East 149th street. (The portion of this section north of East 151st street is part of the River Avenue Route adopted by the Commission

on the 16th day of June, 1908.) The east branch begins at the end of the east branch of Section 14 and extends thence under Park avenue, private property, Canal Street West and East 138th street to a point in East 138th street about 150 feet easterly of the centre line of Alexander avenue, with a station between 3d and Alexander avenues.

The general plan of construction calls for a subsurface railroad having two tracks between Battery Park and Chambers street in Manhattan, and four tracks from Chambers street, in Manhattan, to 135th street and Park avenue in The Bronx, with the branches in The Bronx having in the main three tracks each. Turnouts, cross-overs, connections, sidings, loops, etc., will be constructed, all of which are more particularly indicated on the contract drawings.

For Section 14 two plans, designated Type H and Type K, respectively, have been prepared. The bidders for such section may submit a proposal for either or both of such types. After a comparison of the bids the Commission will determine which of such plans shall be adopted.

Bidders for the several sections will not be required to do the station finish work, nor to provide or lay tracks, ties or ballast.

The work of construction under the contract shall include the construction of all necessary sewers and connections, along the route of the railroad; also the necessary support, maintenance, readjustment and reconstruction of vaults adjacent to buildings, pipes, tubes, conduits, subways or other subsurface structures; the support and care, including underpinning where necessary, of all buildings, monuments, surface, subsurface and elevated railroads and other structures, etc., affected by or interfered with during the construction of the work; also the restoration of the sidewalks and the temporary paving and maintenance of roadways.

The method of construction will be partly by trench excavation (under cover, unless otherwise specified in the form of contract or permitted by the Commission), and partly by tunnel, as set forth in the forms of contract.

Bidders must examine the form of contract, specifications, maps and plans; must visit the location of the work and inform themselves of the present conditions along the line thereof and make their own estimates of the facilities and difficulties attending the execution of the proposed work.

A fuller description of the work to be done is set forth, and other requirements, provisions, details and specifications are stated, in the printed form of contract and in the contract drawings therein referred to. Printed copies of the forms of contract, bond and contractor's proposal, may be had on application at the office of the Commission, 154 Nassau street, Borough of Manhattan, City of New York. The contract drawings may be inspected at the same office, and copies thereof may be purchased by prospective bidders by payment of five dollars ($5) for the contract drawings for each section. The printed form of contract and the contract drawings are to be deemed a part of this invitation.

The Commission is informed by the Department of Docks and Ferries that docks and bulkheads along the East River may be available for dumping purposes. Information in regard thereto may be obtained by any intending bidder upon inquiry at the office of the Commission.

Partial payments to the Contractor will be made monthly as the work proceeds, as provided in the form of contract.

The Contractor for any section or sections will be required to complete the work as soon as practicable and within the time hereinafter prescribed for such completion.

Sealed bids or proposals will be received at the office of the Commission at 154 Nassau street, Borough of Manhattan, City of New York, until the 27th day of October, 1910, at twelve (12) o'clock noon, at which time, or at a later date to be fixed by the Commission, the proposals will be publicly opened.

Proposals must be in the form prescribed by the Commission, copies of which may be obtained at the office of the Commission.

A statement, based upon the estimate of the Engineer, of the quantities of the various classes of the work and of the nature and extent as near as practicable of the work required for each section, is to be found in the schedules forming a part of the form of Contractor's Proposal. The quantities given in such schedules are approximate only, being given as a basis for the uniform comparison of bids and no claim is to be made against the City on account of any excess or deficiency, absolute or relative, in the same, except as provided in the specifications and form of contract.

All proposals must, when submitted, be enclosed in a sealed envelope endorsed: "*Proposal for Constructing Rapid Transit Railroad—Route* 5, *Section* —*," and must be delivered to the Commission or its Secretary; and in the presence of the person submitting the proposal, it will be deposited in a sealed box in which all proposals will be deposited. No proposal will be received or deposited unless accompanied by a separate certified check for each section bid upon, drawn upon a national or state bank or trust company having its principal office in The City of New York, satisfactory to the Commission and payable to the order of the Comptroller of The City of New York for the amount herein specified for the section for which a proposal is made. Such check must not be enclosed in the envelope containing the proposal.

The Unit Prices must not be improperly balanced, and any bid which the Commission considers detrimental to the City's interests may be rejected.

No proposal, after it shall have been deposited with the Commission, will be allowed to be withdrawn for any reason whatever.

The award of the contract or contracts will be made by the Commission as soon as practicable after the opening of the proposals.

Bidders whose proposals are otherwise satisfactory, in case the sureties named by them are not approved by the Commission, may substitute in their proposals the names of other sureties approved by the Commission, but such substitution must be made within five days after notice of disapproval, unless this period is extended by the Commission.

A bidder whose proposal shall be accepted shall, in person or by duly authorized representative, attend at the said office of the Commission within ten days after the delivery of a notice by the Commission that his proposal is accepted and that the contract is consented to by the Board of Estimate and Apportionment, and such bidder shall then deliver a contract in the form referred to, duly executed and with its execution duly proved.

At the time of the delivery of the contract, the Contractor will be required to furnish security to the City by giving a bond for the amount hereinafter stated. The Contractor's bond must be in the form annexed to the form of contract.

In addition and as further security to the City, ten (10) per cent. of the amount certified from time to time to be due to the Contractor will be retained until the work is fully completed and accepted.

Schedule Indicating Time Allowed for Completion, the Amount of Bond and the Amount of Certified Check for Each of the Several Sections.

Route 5.	Time for Completion, Months.	Amount of Bond.	Amount of Certified Check.
Section 1	42	$500,000 00	$15,000 00
Section 2	42	600,000 00	15,000 00
Section 2A	42	250,000 00	10,000 00
Section 3	42	300,000 00	10,000 00
Section 4	36	300,000 00	10,000 00
Section 5	42	300,000 00	10,000 00
Section 6	42	350,000 00	10,000 00
Section 7	42	350,000 00	10,000 00
Section 8	42	300,000 00	10,000 00
Section 9	42	300,000 00	10,000 00
Section 10	42	300,000 00	10,000 00
Section 11	42	300,000 00	10,000 00
Section 12	42	400,000 00	12,500 00
Section 13	42	400,000 00	12,500 00
Section 14	42	500,000 00	15,000 00
Section 15	42	500,000 00	15,000 00

In case of failure or neglect to execute and deliver the contract or to execute and deliver the required bond, such bidder will, at the option of the Commission, be deemed either to have made the contract or to have abandoned the contract. In the latter case, the Commission will give notice thereof to such defaulting bidder, and the Commission may thereupon proceed to make another contract with such, if any, of the original bidders, as, in the opinion of the Commission, it will be to the best interests of the City to contract with, or may by new advertisement invite further

proposals. The defaulting bidder shall thereupon be liable to the City for all loss and damage by it sustained, including the excess, if any, of the amount it shall pay any other Contractor over the amount of the bid of such defaulting bidder.

---

*To be filled in with the Section number for which the proposal is made.

If the Commission shall give notice to any bidder that his or its proposal is accepted and that the contract is consented to by the Board of Estimate and Apportionment, and if the bidder shall fail within ten days thereafter or within such further period, if any, as may be prescribed by the Commission, to execute and deliver the contract and to execute and deliver the bond with sureties, then this Invitation to Contractors and proposal accepted as aforesaid shall be a contract binding the bidder to pay to the City the damage by it sustained by reason of such failure, and in such case the bidder shall, by the terms of the proposal, absolutely assign to the City the ownership of the check accompanying his or its proposal as a payment on account of such damages.

All such deposits made by bidders whose proposals shall not be accepted by the Commission will be returned to the person or persons making the same within five days after the contract shall be executed and delivered. The deposit of the successful bidder will be returned when the contract is executed and its provisions as to security are complied with.

The right to reject any and all bids is reserved.

New York, September 1, 1910.

PUBLIC SERVICE COMMISSION FOR THE FIRST DISTRICT, by WILLIAM R. WILLCOX, Chairman; TRAVIS H. WHITNEY, Secretary.

RAPID TRANSIT RAILROAD.

Contract—Route No. 5. Section No. 7.

Agreement, made this............day of.................., 1910, between The City of New York. hereinafter called the City, acting by the Public Service Commission for the First District, hereinafter called the Commission, party of the first part, and Bradley Contracting Co., hereinafter called the Contractor, party of the second part.

Whereas, The Commission in behalf of the City by due advertisement, pursuant to law, has invited contractors to submit to the Commission proposals for making this contract; and

Whereas, The Contractor has thereupon duly submitted to the Commission a proposal, which has been accepted; and

Whereas, The Board of Estimate and Apportionment of The City of New York has consented to this contract;

Now, therefore, in consideration of the mutual covenants and agreements hereinafter contained, and under the authority of chapter 4 of the Laws of 1891, entitled, "An Act to provide for Rapid Transit Railways in Cities of over One Million Inhabitants," and of the various acts amending the same, the parties do hereby, the City for itself and its successors and the Contractor for itself, its successors and assigns, agree each with the other as follows:

I.—GENERAL PROVISIONS AND DEFINITIONS.

Outline of Contract.

Article 1. The Contractor agrees to construct the part hereinafter described of a Rapid Transit Railroad, with its appurtenances. The City agrees to pay to the Contractor the sums of money hereinafter mentioned at the times and in the manner and upon the terms and conditions hereinafter set forth.

Brief Description of Works.

Article 2. The Railroad to be constructed under this contract forms a part of a certain route adopted by the Board of Rapid Transit Railroad Commissioners for The City of New York on May 12, 1905, and which, as modified, is known as the Lexington Avenue Route—or Route No. 5. The part to be constructed under this contract consists of Section No. 7.

Section 7—40th Street to 53d Street.

7. Beginning at a point at the centre line of 40th street, thence under Lexington avenue to a point about 50 feet north of the centre line of 53d street; with a station at East 42d and East 43d streets, and a station at East 51st street.

The precise location of the tracks, and the dimensions and other characteristics of the Railroad are more fully stated in the specifications forming a part of this contract, and in the detailed drawings and plans hereinafter mentioned.

Statutes Incorporated Herein.

Article 3. This contract is made pursuant to the Rapid Transit Act, which is to be deemed a part hereof as if it were incorporated herein.

Marginal Notes, etc.

Article 4. Titles, headings, running headlines and marginal notes are printed hereon merely for convenience and shall not be deemed to be any part of this contract for any purpose whatever.

Definitions of Words.

Article 5. The following words and expressions used in this contract shall, except where by the context it is clear that another meaning is intended, be construed as follows:

"City."

(1) The word "City" to mean The City of New York, and any other corporation or division of government to which the ownership, rights, powers and privileges of The City of New York, under the Rapid Transit Act, shall hereafter come, belong or appertain.

"Commission."

(2) The word "Commission" to mean the Public Service Commission for the First District, and any other board, body, commission, official or officials, to which or to whom the powers now belonging to the said Commission in respect to the location, construction, equipment, maintenance and operation of Rapid Transit Railroads under the provisions of the Rapid Transit Act shall, by virtue of any act or acts, hereafter pass or be held to appertain.

"Contractor."

(3) The word "Contractor" to mean the party of the second part to this contract, and its successors, and any and every person or corporation who or which shall at any time be liable in the place or for the party of the second part to perform any obligations under this contract assumed by the said party of the second part. For convenience the Contractor is hereinafter referred to as if the Contractor were an individual. The word "he" shall, as the sense may require, include "it," "she" and "they;" the word "him" shall include "her," "it" and "them;" and the word "his" shall include "its," "her" and "their."

"Comptroller."

(4) The word "Comptroller" to mean the Comptroller of The City of New York, and the officer or board to whom or to which his powers now existing under the Rapid Transit Act shall come to appertain.

"Engineer."

(5) The word "Engineer" to mean the Chief Engineer of the Commission or his duly authorized representative and any successor or successors duly appointed or any deputy or substitute for him who shall be appointed by the Commission or by its authority.

"Rapid Transit Act."

(6) The words "Rapid Transit Act" to mean chapter 4 of the Laws of 1891 as amended by chapters 102 and 556 of the Laws of 1892, chapters 528 and 752 of the Laws of 1894, chapter 519 of the Laws of 1895, chapter 729 of the Laws of 1896, chapter 616 of the Laws of 1900, chapter 587 of the Laws of 1901, chapters 533, 542, 544 and 584 of the Laws of 1902, chapters 562 and 564 of the Laws of 1904, chapters 599 and 631 of the Laws of 1905, chapters 472, 606 and 607 of the Laws of 1906, chapter 429 of the Laws of 1907, chapter 498 of the Laws of 1909, and chapters 205, 504, 505 and 506 of the Laws of 1910, or as heretofore otherwise amended.

"Railroad."

(7) The word "Railroad" to mean the part which the Contractor agrees by this contract to build, together with the station or stations to be built in conjunction therewith, and all appurtenances thereto which are to be constructed or provided by the Contractor.

"The Works."

(8) The words "the Works" to mean all of the matters and things herein agreed to be furnished or done by or on the part of the Contractor.

"New York."

(9) The words "New York" to mean The City of New York according to its boundaries at the date of this contract.

"Daily Newspaper."

(10) The words "daily newspaper" to mean any paper regularly published in New York on every day or every day except Sundays and holidays.

"Notice." "Direction."

(11) The word "notice" to mean a written notice. The word "direction" to mean a written direction.

Wherever in the specifications or upon the drawings the words "directed," "required," "permitted," "ordered," "designated," "prescribed" or words of like import are used, it shall be understood that the direction, requirement, permission, order, designation or prescription of the Engineer is intended, and similarly the words "approved," "acceptable," "satisfactory" or words of like import shall mean approved by or acceptable or satisfactory to the Engineer.

Legal Address of Contractor. Address May be Changed. Service Upon Contractor Personally.

Article 6. The address given in the bid or proposal, upon which this contract is founded, is hereby designated as the place where all notices, directions and other communications to the Contractor shall be certified, mailed or delivered. The delivering at the above-named place or depositing in a post-paid wrapper directed to the above place, in any post office box regularly maintained by the Post Office Department, of any notice, letter or other communication to the Contractor, shall be deemed sufficient service thereof upon the Contractor. Such address may be changed at any time by an instrument in writing executed and acknowledged by the Contractor and delivered to the Commission. Nothing herein contained shall be deemed to preclude or render inoperative the service of any notice, direction or other communication upon the Contractor personally.

Contractor Responsible for Acts of Subcontractor's Employees.

Article 7. If the Contractor shall cause any part of this contract to be performed by a subcontractor, the provisions of this contract shall apply to such subcontractor and his officers, agents and employees in all respects, as if he and they were employees of the Contractor; and the Contractor shall not be in any manner thereby discharged from his obligations and liabilities hereunder, but shall be liable hereunder for all acts and negligence of the subcontractor, his officers, agents and employees as if they were employees of the Contractor. The employees of the subcontractor shall be subject to the same provisions hereof as employees of the Contractor; and the work or materials furnished by the subcontractor shall be subject to the provisions hereof, as if furnished directly by the Contractor.

Commission May Disapprove Subcontractors.

Article 8. The Contractor, before making any subcontract of the work, shall state in writing to the Commission the name of the proposed subcontractor, the portion of the work which such subcontractor is to do or the materials which such subcontractor is to furnish, the place of business of such subcontractor and such other information as the Commission may require. The Commission shall have the right to require the Contractor not to award any subcontract to a person, firm or corporation disapproved of by the Commission.

II.—Work to be Done, Price, Etc.

Work to be Done.

Article 9. The Contractor shall do all the work and furnish all the materials, plant, tools and appliances necessary or proper for performing and completing the work of constructing the railroad in the manner and within the time hereinafter specified. He shall complete the railroad and do all the work and furnish all labor and materials in and about the construction of the railroad to the satisfaction of the Commission and in accordance with this contract and the specifications and drawings herein mentioned at the prices herein agreed upon and fixed therefor; provided, however, the said contract drawings may from time to time be altered or modified as hereinafter provided.

Construction Includes Sewer and Other Incidentals.

Article 10. In order to construct the railroad it will be necessary to take up and relay the sidewalk pavement or other surface material, and to lay and maintain a temporary pavement in the roadway, to protect, support and maintain during construction all buildings and other structures, including their foundations, and all elevated and surface and subsurface railroads, water mains, gas pipes, electric subways, poles and wires, pneumatic tubes, steam pipes, vaults, including vaults of abutting property, and other surface, subsurface and overhead structures, together with their necessary connections, as the same may be met with along the route; to build sewers both along the route and other streets; to make or remake the necessary manholes, catch basins

and other sewer connections therewith; to move, alter, readjust or rebuild water mains, gas pipes, electric subways, pneumatic tubes, steam pipes, vaults, including vaults of abutting property, and other subsurface structures, together with their necessary connections; and to do all such additional and incidental work as may be necessary for the completion of the railroad and the reconstruction and restoration of the street pavements or other surfaces (except as herein provided in respect ot temporary pavements for roadways), adjacent to the route of the railroad and which may have been directly or indirectly disturbed or injured by the Contractor in the progress of the work of construction, to as useful and good a condition as existed before construction shall have been begun. All such work of every description, including underpinning wherever necessary, of all buildings or structures of whatsoever nature, monuments, elevated railroads and surface and subsurface railroads affected by or interfered with during the construction of the railroad, is part of the work which is included in this contract and which the Contractor agrees to perform for the prices herein agreed upon.

Prices.

Article 11. The City will pay and the Contractor shall receive in full compensation for furnishing the necessary plant and all the materials and labor, and for performing and completing all the work which is necessary or proper to be furnished or performed in order to complete the railroad (including all incidental work) and also for all loss or damage arising out of the nature of the work aforesaid, or from the action of the elements or from any unforeseen obstruction or difficulty encountered in the prosecution of the work, and for all risks of any description connected with the work, and for all expenses incurred by or in consequence of the suspension or discontinuance of the work as herein specified, the following prices, to wit:

SCHEDULE OF UNIT PRICES.

Item 1. For earth excavation above mean high water (except excavation for sewers and pipes), including the disposal of it, etc., the sum of three dollars and ten cents ($3.10) per cubic yard.

Item 2a. For earth excavation, both above and below mean high water, for sewers and pipes, including the disposal of it, etc., the sum of three dollars and ten cents ($3.10) per cubic yard.

Item 3. For rock excavation (except excavation for sewers and pipes), including the disposal of it, etc., the sum of four dollars and twenty-five cents ($4.25) per cubic yard.

Item 3a. For rock excavation, for sewers and pipes, including the disposal of it, etc., the sum of four dollars and forty cents ($4.40) per cubic yard.

Item 4. For underpinning buildings, including all incidental work and material, as follows:

(a) For buildings less than seven (7) stories in height the sum of seventeen dollars ($17.00) per linear front foot of building underpinned.

(b) For buildings from seven (7) to twelve (12) stories in height the sum of thirty dollars ($30) per linear front foot of building underpinned.

Item 5. For tunnel excavation (except tunneling for sewers), including the disposal of material, timbering, etc., the sum of seven dollars and fifty cents ($7.50) per cubic yard.

Item 5a. For tunnel excavation for sewers, including the disposal of material, timbering, etc., the sum of ten dollars ($10.00) per cubic yard.

Item 6. For concrete masonry, in place, the sum of seven dollars and seventy-five cents ($7.75) per cubic yard.

Item 7. For protective concrete masonry, in place, outside of waterproofing, the sum of seven dollars and seventy-five cents ($7.75) per cubic yard.

Item 8. For rubble stone masonry, in place, the sum of three dollars ($3.00) per cubic yard.

Item 9. For brick masonry, in place, the sum of ten dollars ($10.00) per cubic yard.

Item 10. For hollow terra cotta brick masonry, in place, the sum of nine dollars ($9.00) per cubic yard.

Item 11. For grout of Portland cement, the sum of three dollars ($3.00) per barrel of Portland cement used.

Item 14. For broken stone or gravel, in place, other than that used in concrete, the sum of one dollar and sixty cents ($1.60) per cubic yard.

Item 15. For waterproofing, treated woven fabric, laid with pitch or asphaltum, in place, as follows:

(a) For one-ply, the sum of twenty-eight (28) cents per square yard.

(b) For two-ply, the sum of fifty (50) cents per square yard.

(c) For three-ply, the sum of sixty-five (65) cents per square yard.

(d) For four-ply, the sum of one dollar ($1.00) per square yard.

(e) For five-ply, the sum of one dollar and twenty cents ($1.20) per square yard.

(f) For six-ply, the sum of one dollar and fifty cents ($1.50) per square yard.

Item 16. for waterproofing, brick laid in asphaltic mastic, in place, the sum of eighteen dollars ($18) per cubic yard.

Item 17. For vitrified or cast iron drain pipe, in place, as follows:

(a) For twelve (12) inch vitrified pipe, the sum of sixty (60) cents per linear foot.

(b) For ten (10) inch vitrified pipe, the sum of fifty (50) cents per linear foot.

(c) For eight (8) inch vitrified pipe, the sum of forty (40) cents per linear foot.

(d) For six (6) inch vitrified pipe, the sum of thirty-five (35) cents per linear foot.

(e) For four (4) inch vitrified pipe, the sum of thirty (30) cents per linear foot.

(g) For six (6) inch cast iron pipe, the sum of ninety (90) cents per linear foot.

(h) For four (4) inch cast iron pipe, the sum of fifty-five (55) cents per linear foot.

Item 18. For tunnel ducts in place as required by section 305 of the specifications, the sum of nine (9) cents per duct foot.

Item 19. For riveted steel, painted and erected, the sum of seventy-two dollars ($72.00) per ton of two thousand pounds.

Item 20. For steel beams and shapes with connections, painted and erected, the sum of fifty-seven dollars ($57.00) per ton of two thousand pounds.

Item 21. For steel rods and bars built in concrete, the sum of sixty-four dollars ($64.00) per ton of two thousand pounds.

Item 24. For cast iron columns, erected and painted, the sum of fifty-six dollars ($56.00) per ton of two thousand pounds.

Item 25. For miscellaneous iron castings, other than tunnel lining, such as manhole heads and covers, gratings, etc., but not including castings for sewer work or pipes, in place, the sum of seventy-five dollars ($75.00) per ton of two thousand pounds.

Item 26. For wire mesh, in place, the sum of ten (10) cents per pound.

Item 27. For one and one-half (1½) inch galvanized iron pipe hand-rail, in place, including expansion bolts, etc., the sum of seventy-five (75) cents per linear foot.

Item 28. For steel gratings, for ventilation, in place, including frames, etc., the sum of one dollar and forty cents ($1.40) per square foot.

Item 29. For vault lights, in place, the sum of one dollar and twenty cents ($1.20) per square foot.

Item 30. For street surface restored:

(a) For street surface, except roadways, the sum of one dollar and twenty cents ($1.20) per square yard.

(b) For temporary restoration and maintenance of roadways, the sum of sixty (60) cents per square yard.

Item 32. For wrought-iron or fibre electric conduits, in place, in stations, as follows:

(a) For three-fourths (¾) inch wrought-iron conduits, the sum of eight (8) cents per linear foot.

(b) For one and one-half (1½) inch wrought-iron conduits, the sum of fifteen (15) cents per linear foot.

(c) For two (2) inch wrought-iron conduits, the sum of twenty-five (25) cents per linear foot.

(d) For two (2) inch fibre conduit the sum of fifteen (15) cents per linear foot.

Item 33. For cast iron outlet boxes, in place, in stations, the sum of one dollar ($1.00) each.

Item 34. For six (6) inch cast iron pipe and fittings including specials "extra heavy" in place, in stations, the sum of eighty (80) cents per linear foot.

SEWERS—ITEMS 37 TO 74.

Vitrified and Cast Iron Pipe—Items 37 *to* 43.

Item 38. For fifteen (15) inch vitrified pipe sewer, the sum of two dollars and thirty cents ($2.30) per linear foot.

Item 39. For eighteen (18) inch vitrified pipe sewer, the sum of two dollars and eighty cents ($2.80) per linear foot.

Egg-Shaped Brick or Concrete Sewers—Items 44 *to* 51.

Item 45. For 3 feet 6 inches by 2 feet 4 inches, the sum of six dollars ($6.00) per linear foot.

Item 47. For 4 feet by 2 feet 8 inches, the sum of seven dollars ($7.00) per linear foot.

Circular Sewers—Brick or Concrete or Reinforced Concrete—Items 52 *to* 66.

Item 53. For 4 feet, the sum of seven dollars and fifty cents ($7.50) per linear foot.

Item 58. For 5 feet 6 inches, in tunnel, the sum of thirteen dollars ($13.00) per linear foot.

SURFACE AND SUBSURFACE STRUCTURES—ITEMS 75 AND 76.

Item 75. For street surface railroads, including the support, reconstruction, rebuilding, etc., where necessary (but not including permanent masonry supports, if required and added, and not including additional vaults, if required and constructed, in excess of the number existing), as follows:

(a) For electric railroads, the sum of one dollar ($1.00) per linear foot of single track.

Item 76. For the temporary and permanent support and maintenance of elevated railroad structures and all work incidental thereto, the sum of one thousand dollars ($1,000) per column.

PIPES IN STREETS—ITEMS 77 TO 126.

For Work and Material as Called for by Section 71 *of the Specifications.*

Water and Gas Pipes—Items 77 *to* 108.

Water Pipes—Items 77 *to* 88.

For water pipes, in place, as follows:

Item 78. For 4-inch water pipe, the sum of thirty-five (35) cents per linear foot.

Item 79. For 6-inch water pipe, the sum of forty (40) cents per linear foot.

Item 82. For 12-inch water pipe, the sum of seventy (70) cents per linear foot.

Item 84. For 20-inch water pipe, the sum of ninety (90) cents per linear foot.

Item 86. For 30-inch water pipe, the sum of one dollar and twenty cents ($1.20) per linear foot.

Gas Pipes—Items 89 *to* 99.

For gas pipes, in place, as follows:

Item 90. For 4-inch gas pipe, the sum of thirty (30) cents per linear foot.

Item 91. For 6-inch gas pipe, the sum of forty (40) cents per linear foot.

Item 92. For 8-inch gas pipe, the sum of sixty (60) cents per linear foot.

Item 94. For 12-inch gas pipe, the sum of seventy (70) cents per linear foot.

Item 95. For 16-inch gas pipe, the sum of eighty (80) cents per linear foot.

Item 96. For 20-inch gas pipe, the sum of ninety (90) cents per linear foot.

New Cast-Iron Hub and Spigot Water and Gas Pipe—Items 100 *and* 101.

Item 100. For new cast iron hub and spigot straight pipe, delivered on the work, the sum of twenty-six dollars ($26.00) per ton of two thousand pounds.

Item 101. For new cast-iron hub and spigot pipe, special castings, delivered on the work, the sum of sixty-five dollars ($65.00) per ton of two thousand pounds.

Air Pipes—Items 121 *to* 124.

For air pipe, in place, as follows:

Item 121. For 6-inch air pipe, the sum of forty (40) cents per linear foot.

Item 122. For 8-inch air pipe, the sum of sixty (60) cents per linear foot.

New Air Pipe Delivered on the Work—Items 123 and 124.

Item 123. For new 6-inch air pipe, delivered on the work, the sum of one dollar ($1.00) per linear foot.

Item 124. For new 8-inch air pipe, delivered on the work, the sum of one dollar and fifty cents ($1.50) per linear foot.

Mail Tubes—Items 125 and 126.

Item 125. For 8-inch mail tube in place, the sum of sixty (60) cents per linear foot.

Item 126. For new 8-inch mail tube, delivered on the work, the sum of thirty dollars ($30.00) per ton of two thousand pounds.

DUCTS IN STREETS.

Electric Ducts and Conduits in Streets.

(Other than tunnel ducts and street railroad ducts which are provided for in Items 18 and 75-a.)

Item 127. For electric ducts and conduits in place, as provided in Section 71-a of the Specifications, the sum of thirteen (13) cents per duct foot.

Work Not Susceptible of Classification.

Article 12. In case any work or materials shall be required to be done or furnished in or about the works—whether specified herein or indicated on the plans or not—which are not susceptible of classification under the Schedule of Unit Prices, the Contractor shall and will if ordered by the Engineer do and perform such work and furnish such materials at and for the actual and necessary net cost in money to the Contractor for labor and for material, where new material is used, and in addition thereto ten per centum (10%) of such net cost for the use of tools and plant, superintendence and all other expenses incidental to the performance of such work and the furnishing of such material, and the Contractor shall have no further claim in excess of the above, but this method of payment shall not apply to the performance of any work or the furnishing of any material which in part or in whole is susceptible of classification under such schedule, which work or material shall be paid for in part or in whole, as the case may be, at the unit price given in such schedule, except as otherwise herein expressly provided.

In case any work or material shall be required to be done or furnished under the provisions of this article, for cost plus ten per centum (10%), the Contractor shall at the end of each day during the progress thereof furnish to the Engineer daily time slips showing the name and number of each workman employed thereon, the number of hours employed thereon, the character of work he is doing and the wages paid or to be paid to him and also a daily memorandum of the material delivered on the work showing the amount and character of such material, from whom purchased and the amount paid or to be paid therefor. If required, the Contractor shall produce any books, vouchers, records or memorandum showing the work and materials actually paid for and the actual prices therefor.

Quantities Approximate Only.

Article 13. It is expressly understood and agreed that the quantities of the various classes of work to be done and materials to be furnished under this contract, specified in the Contractor's Proposal, are approximate and only for the purpose of comparing, on a uniform basis, the bids offered for the works under this contract; and neither the City, nor the Commission, nor any member of the Commission, is to be held responsible that any of the said estimated quantities shall, by reason of inaccuracies, or changes in the works, be found even approximately correct in the construction of the works; and the Contractor shall make no claim for anticipated profit, or for loss of profit, because of a difference between the quantities of the various classes of work actually done or materials actually delivered, and the estimated quantities stated in the Contractor's Proposal.

Right of Commission to Amplify Plans.

Article 14. The Commission shall have the right, during the progress of the work, to amplify the plans, to add explanatory specifications and to furnish additional specifications and drawings.

Plans May be Modified.

Article 15. The Commission further reserves the right to change the location and to alter, in any way it may deem necessary for the public interest, the drawings aforesaid, in part or altogether, at any time during the progress of the work, without constituting grounds for any claim by the Contractor for payment or allowance for damages.

or extra service other than is provided for items of the different classes of construction shown in the schedule, or where not susceptible of classification, then as otherwise provided herein.

Contractor Bound to Complete in Best Manner.

Article 16. The Contractor shall complete the entire work in accordance with the specifications and contract drawings and according to the other provisions of this contract and within the times specified in this contract, in the most workmanlike manner and with the highest regard to the safety of life and property and according to the lines, levels and directions given by the Engineer, for the prices herein agreed upon.

Best Materials, Machinery, Tools, etc., to be Used.

Article 17. The Contractor shall furnish of the best description all materials, machinery, implements, tools and labor necessary to construct and put in complete working order all work covered by the specifications, contract drawings and provisions of this contract, including all additional specifications, drawings and details issued or required as herein provided for the prices hereinbefore agreed upon.

Contractor Has Examined Location, Plans, etc.

Article 18. The Contractor hereby represents that prior to the execution of this contract he has examined in detail on the ground the location mentioned herein and indicated on the plans, and that he has fully examined the plans and has read each and every clause and section of this contract and the specifications and has had full opportunity to consider the same and make necessary investigations relating thereto; and he agrees that he will not make any claim for, or have any right to, damages or an extension of time for completion of the works, or any other concession, because of any misinterpretation or misunderstanding of this contract or the specifications or of the plans, or because of any lack of information.

No Acceptance to Obviate the Necessity for Sound Work, etc.

Article 19. No acceptance of any part of the works or of materials therefor shall relieve the Contractor of his obligation to furnish sound material and perform sound work, whether with respect to such part or to any part of the works.

Inspection.

Article 20. The Commission contemplates, and the Contractor hereby approves, the most thorough and minute inspection by the Commission and its Engineer, and by their representatives or subordinates of all work and materials and of the manufacture or preparation of such materials from the beginning of construction to the final completion of the works. It is the intention of the Commission that its Engineer shall draw the attention of the Contractor to all errors or variations from the requirements of this contract or other defects in workmanship or materials. But it is expressly agreed that no omission on the part of the Commission or its Engineer or any officer, member or subordinate of the Commission to point out such errors, variations or defects shall give the Contractor any right or claim against the City or shall in any way relieve the Contractor from his obligations according to the terms of this contract.

Contractor to Afford Facilities for Inspection.

Article 21. The Contractor shall at all times give to the Commission and its members, to the Engineer and his assistants and subordinates, and any person designated by the Commission or its Chairman, all facilities, whether necessary or convenient, for inspecting the materials to be furnished and the work to be done under this contract. The members of the Commission, the Engineer and all employees of the Commission bearing his authorization or the authorization of the Commission or its Chairman, shall be admitted at any time summarily and without delay to any part of the works or to inspection of materials at any place or stage of their manufacture, preparation, shipment or delivery.

Engineer to be Furnished Facilities.

Article 22. The Engineer shall be furnished with every reasonable facility for ascertaining whether the work is in accordance with the requirements and intention of this contract, even to the extent of uncovering or taking down portions of finished work. Should the work thus exposed or examined prove satisfactory, the uncovering or taking down and the replacing of the covering or the making good of the parts removed shall be paid for at the contract prices for the class of work done; but should the work exposed or examined prove unsatisfactory, such uncovering, taking down, replacing and making good shall be at the expense of the Contractor.

Inspection Not to Relieve Contractor of Obligations.

Article 23. The inspection of the work shall not relieve the Contractor of any of his obligations to fulfill his contract as herein prescribed, and defective work shall be made good and unsuitable materials will be rejected, nothwithstanding that such work and materials have been previously overlooked by the Engineer and accepted or estimated for payment. If the work, or any part thereof, shall be found defective before the final acceptance of the whole work, the Contractor shall forthwith make good such defect, in a manner satisfactory to the Engineer, and if any material brought upon the ground for use in the work, or selected for the same, shall be condemned by the Engineer as unsuitable or not in conformity with the specifications, the Contractor shall forthwith remove such materials.

Engineer's Determination to be Final and Conclusive Upon Contractor.

Article 24. To prevent disputes and litigations, the Engineer shall in all cases determine the amount, quality, acceptability and fitness of the several kinds of work and materials which are to be paid for under this contract; shall determine all questions in relation to the works and the construction thereof, and shall in all cases determine every question which may arise relative to the fulfillment of this contract on the part of the Contractor. His determination and estimate shall be final and conclusive upon the Contractor, and in case any question shall arise between the parties hereto, touching this contract, such determination and estimate shall be a condition precedent to the right of the Contractor to receive any money under this contract.

Engineer to Explain.

Article 25. The Engineer shall make all necessary explanations as to the meaning and intention of the specifications, shall give all orders and directions contemplated therein or thereby and in every case in which a difficult or unforeseen condition shall arise in the performance of the work required by this contract.

Other Contractors.

During the progress of the work it will be necessary for other contractors and persons to do work in or about the construction or equipment of the railroad. The Contractor shall afford to such other contractors or persons such facilities as the Engineer may require.

Differences Between Contractor and Other Contractors.

Any differences or conflicts which may arise between the Contractor and other contractors of the Commission in regard to their work shall be adjusted and determined by the Engineer.

Substitute for Chief Engineer.

Article 26. Any engineer substituted by the Commission in place of the Chief Engineer during his absence, illness or inability or when the Commission shall so determine, shall, during his official connection, have all the power and authority of the Chief Engineer, and in all respects be recognized as such Chief Engineer.

III.—SPECIFICATIONS.

Specifications and Drawings Subject to Requirement of Railroad of Highest Class.
Where Text of Contract Doubtful, Best Materials and Workmanship Required.

Section 1. The specifications and contract drawings hereinafter mentioned and taken in connection with the other provisions of this contract. are intended by the Commission to be full and comprehensive, and to show all the work required to be done. But in a work of this magnitude it is impossible either in advance to show all details, or precisely to forecast all exigencies The specifications and contract drawings are to be taken, therefore, as indicating the amount of work, its nature and the method of construction so far as the same are now distinctly apprehended. The Railroad is intended to be constructed for actual use and operation as an interurban railroad of the highest class, adapted to the necessities of the people [illegible] ork, in the best manner, according to the best rules and usages of railroad construction, and in the event of any doubt as to the meaning of any portion or portions of the specifications or contract drawings, or of the text of the contract, the same shall be interpreted as calling for the best construction, both as to materials and workmanship, capable of being supplied or applied under the then existing local conditions. All the clauses of the specifications, and all the parts of the contract drawings, are, therefore, to be understood, construed and interpreted as intending to produce the results hereinbefore stated.

To Construct in Accordance With Specifications.

Section 2. The Contractor shall construct and complete the Railroad strictly in accordance with the requirements of these specifications; if, in the specifications or contract, any detail or other matter or thing requisite be not mentioned, nevertheless the same is deemed to be included and the Contractor hereby undertakes to do the same as part of the work hereunder, at the unit prices for each class of work where applicable or as provided in Article XII. of the contract.

Maps and Drawings.

Section 3. The contract plans referred to in the contract and specifications bear date June 15, 1910, are each countersigned by the Engineer, are stamped with the seal of the Commission, bear the general title:

For Section 7, Route No. 5.

Drawings as follows:

General Notes; Map and Profile; Nos. A9, B16, B17, B101, B102; C1 to C39, inclusive, C1008, C1010, C1011, C401, C1032.

Plans and Contract Drawings.

Section 4. The sections and dimensions shown on the contract drawings are typical sections and dimensions which should be applicable to the greater part of the work. Where, however, changes are deemed necessary they may be ordered under Article XV. of the contract and the Engineer shall issue such plans and specifications as may be necessary.

Supplementary Drawings.

Section 5. In addition to the contract drawings already mentioned, the Commission has had prepared a set of maps and plans, bearing the same seal and general title as the contract drawings, but designated as supplementary drawings. These supplementary drawings exhibit certain information which the Commission has received from its Engineer of the nature of the soil underlying portions of the route, the nature and position of elevated and surface railways, water mains, gas and other pipes, sewers, electric subways, manholes, hydrants, catch basins and other surface and subsurface structures.

Supplementary Drawings May be Examined.

Section 6. These supplementary drawings, for each section of the work, can be seen at the office of the Engineer, also samples of material taken in connection with test borings. They are exhibited to the Contractor without any guarantee on the part of the Commission as to their completeness or correctness. The Contractor may have copies (blue prints) of these drawings for one or more of the sections, for such aid, if any, as may be derived from them, on the payment of the cost of printing.

In Case of Difficulties Not Indicated on Supplementary Drawings.

Section 7. If, upon opening the streets, by tunneling or otherwise, difficulties of any nature be encountered which are not indicated or suggested by the supplementary drawings, or by the samples of the test borings, or if additional surface or subsurface structures or obstructions be discovered or found of different size or in different positions or of different nature from those shown on the supplementary drawings, or if any way such supplementary drawings be found erroneous, the Contractor shall take every necessary or proper precaution to overcome the unforeseen difficulty, and is to support, maintain, protect, remove, adjust or readjust, as the case may be, the additional or different surface or subsurface structures according to the direction of the Engineer, and as provided in this contract and these specifications.

Specifications Not Exclusive.

Section 8. It is expressly understood that the specifications do not include all requirements, but are requirements in addition to those heretofore or elsewhere given or provided in this contract. The specifications and other provisions of this contract, and the contract drawings, are intended to be explanatory of each other. Should, however, any discrepancy appear or any misunderstanding arise as to the import of anything contained in either, the explanation of the Engineer shall be final and conclusive.

Section 9. These specifications are grouped in subdivisions as follows:

1. Description of the Work. 2. General Clauses. 3. Manner of Prosecution and Maintenance of Traffic. 4. Street Railroad Tracks, Mains and other Surface or Subsurface Structures. 5. Excavation. 6. Tunneling. 7. Backfilling. 8. Piling and Timbering. 9. Cement. 10. Mortar. 11. Masonry. 12. Concrete. 13. Brick Masonry. 14. Stone Masonry. 15. Waterproofing. 16. Steel and Iron. 17. Painting. 18. Ducts and Conduits. 19. Drains and Pumps. 20. Sewers. 21. Requirements for Pipes. 22. Street Surface and Park Surface Restored. 23. Vault Lights, Gratings and Hand-rails.

1—Brief Description of the Work.

General Nature.

Section 10. The Rapid Transit Railroad which is hereinbefore described is to be an underground railroad or subway, the general details of construction and the location of the various tracks, junctions, grades, etc., being indicated more particularly on the contract drawings.

Stations to be Constructed.

Section 11. Stations are to be constructed at such places as are indicated on the plans, but station finish work is not included in the work to be done under this contract. Station construction must, however, be kept so advanced that station finish contractors can complete their work coincidently with the completion of the Railroad.

Surface and Subsurface Structures.

Section 12. In addition to the construction of the Railroad, it will be necessary to do various incidental work which is generally referred to in Article X hereof.

Ventilating Chambers and Gratings.

Section 13. In order to provide for a frequent renewal of air in the Railroad, chambers for the installation of necessary ventilating devices shall be built at the sides of the Railroad and in connection therewith. These chambers shall be generally of the form and dimensions as shown on the plans, varying somewhat with the requirements of local conditions. They will be so arranged that the air will discharge through gratings placed generally in the sidewalks in the roofs of the chambers. If, owing to local conditions, it becomes necessary to lead the air to gratings or other outlets away from the chambers, suitable air-ways, ducts or flues shall be constructed.

The chambers will be built at the places and as indicated on the plans.

Section 14. Other openings with gratings will be built at or over the stations, for the purpose of admitting air to the Railroad.

Section 15. The chambers will be provided with suitable doors or openings, and with ladders reaching to the street for use as exits in case of emergency.

2—General Clauses.

Prevention of Water Percolation.

Section 16. It is the very essence of these specifications to secure a railroad structure underground which shall be free from the percolation of ground or outside water. The mixing and placing of the concrete and the placing and protection of the waterproofing shall be with this end in view.

Best Quality of Work.

Section 17. All materials and workmanship must be of the best class in every respect, and the Engineer is to be the sole judge of their quality and efficiency.

Rapidity and Safety.

Section 18. All the work shall be prosecuted in the manner, according to local conditions, best calculated to promote rapidity in construction, to secure safety to life and property and to reduce to the minimum any interference with abutting property and the public travel. Decking of the streets, paving, or other surface work affecting, or affected by, street traffic shall be prosecuted during such hours as will reduce such interference to a minimum. Night work shall be conducted, in accordance with the directions of the Engineer, so that annoyances to occupants of abutting property shall be reduced to a minimum, and the Engineer may, if in his judgment conditions so require, direct that night work be omitted.

Contract Section Part of System.

Section 19. The contract section embraced in this contract is one of a number of contract sections forming part of an extensive rapid transit railroad system,

which the interests of the City imperatively require should be completed and put in operation without delay. If the Contractor shall fail so to prosecute his work that, in the judgment of the Engineer, it shall not be reasonablly probable that the work will be completed within the time limited, the Contractor, if directed by the Commission, shall increase the number of shifts and the number of men in each shift as may be necessary to insure the completion of the work within the time required by this contract, or within the shortest possible time thereafter.

Emergencies.

Section 20. In case of emergencies involving danger to life or property, continuous work with an increased force may be ordered by the Engineer for such time as may be necessary.

Permits.

Section 21. No work shall be begun until the Commission shall issue to the Contractor a permit authorizing him to proceed. No permits for excavation will be issued until the Contractor has given satisfactory assurance to the Engineer that the material needed for construction has been acquired and is available. Such permits are to be in such form and to cover such portions of the work as the Commission shall prescribe.

When to be Filed with Borough President.

Section 22. Before any opening is made in the surface of a street. a copy of the permit issued by the Commission shall have been filed with the Borough President not less than five days, unless the Engineer shall expressly direct work to begin within a less period.

Notice Regarding Commencement of Work.

Section 23. Before commencing work on any part of the route, whether on the Railroad or on the sewers lying off the line of the Railroad, the Contractor shall give notice in writing to the Engineer at least one (1) week in advance of his intention to commence such operations; and before commencing manufacture, or resuming manufacture, if the same has been suspended, of any article called for by these specifications, notice shall be given to the Engineer in writing at least one (1) week in advance, with the name and address of the maker and the amount and description of the material to be manufactured.

Shafts and Dumping Platforms.

Section 24. Plans showing the proposed location, and proposed methods of construction, of shafts, dumping platforms, etc., shall be submitted to the Engineer and receive his approval before permits will be granted for such plant and appliances to be constructed and put in operation.

Ordinances and Regulation.

Section 25. In all operations connected with the Works, all ordinances of the City, and of the Board of Health. so far as they may be valid and operative with respect thereto, and all laws of this State which are now applicable to and control or limit in any way the actions of those engaged in the work or affecting the materials belonging to them, shall be respected and strictly complied with, and the Contractor shall further strictly comply with all applicable Federal, State and Municipal regulations regarding the transportation in and around the City and Harbor of materials used in, or in connection with, the work.

Requirements of Borough President, etc., to be Observed.

Section 26. Whenever the construction of the Works under the provisions of this contract shall interfere with, disturb or endanger any sewer, water pipe, gas pipe, or other duly authorized subsurface structure, the work of construction at such points shall be conducted in accordance with the reasonable requirements of the Borough President or the Commissioner of Water Supply, Gas and Electricity or other officer or local authority having the care of and the jurisdiction or control over such subsurface structures so interfered with, disturbed or endangered.

Building and Water Permits; Shut-offs for Water Pipes, etc.

Section 27. The Contractor shall procure all permits necessary or requisite for the underpinning of buildings and the reconstruction thereof; he shall, at his own cost, provide for the water supply necessary for his work and he shalll bear the cost of the service of inspectors required by any municipal department or other public authority in or about the execution of the work other than the inspectors or the employees of the Commission. He shall bear the expense absolutely necessary in the bagging of gas pipes where it is necessary to cut off the supply of same and

of the shutting off and restoration of the flow in water mains where such work applies to the maintenance and support thereof as provided in section 70 of the specifications.

Storage on Cross Streets.

Section 29. No material of any nature shall be stored along the streets occupied by the Railroad in Manhattan or on 138th street, in The Bronx. On cross streets adjacent to the work, only such material may be stored as may be necessary, in case of an emergency, to sheet or to support the excavation; or a reasonable amount of such structural material as may be absolutely necessary to avoid delay in construction may be stored; such material must not be allowed to accumulate, but must be replenished from day to day. The amount to be so allowed shall be determined by the Engineer.

Material Stored.

Section 30. Excavated sand, gravel or stone that in the judgment of the Engineer is suitable for use in mortar, concrete, or masonry, also structural and other material to be used in the work, may be stored in such locations and for such periods as are approved by the Engineer.

Approval of Engineer Revocable.

Section 31. In any case material may only be so stored with the approval of the Engineer, revocable at any time; and if so ordered, such material shall be removed immediately on receipt of the order, or within a period of time to be therein stated.

Access to Fire Hydrants.

Section 32. Wherever the work is being carried on, free access must be given to every fire hydrant and fire alarm box, and when required hydrants shall be extended by suitable tube or piping to an accessible point as approved by the Engineer, and to the satisfaction of the Chief of the Fire Department. Materials must not be piled at any time or place within ten (10) feet of any fire hydrant or fire alarm box; and where materials are unavoidably piled or placed in the vicinity of a fire hydrant or fire alarm box, and to such height as to obscure a sight of the same, the position of such hydrant or fire alarm box shall be indicated by suitable signals, both day and night.

Work to be Cleared.

Section 33. At his own expense and as directed from time to time by the Engineer, the Contractor is to clear the work, streets and all public places occupied by him of all refuse and rubbish that may accumulate from any source whatever and leave them in a neat condition.

Assistance to be Rendered to Owners of Buildings.

Section 34. Where access to any adjacent property is temporary cut off, owing to the occupancy of the street by the Contractor, he must, at his own cost. tender every assistance to the owner or occupant in handling such materials of any description, including all material to be removed by the Department of Street Cleaning, that has to be taken to or removed from such property; such material shall be taken to or from the nearest accessible point that in the opinion of the Engineer is convenient for handling.

Waste Material.

Section 35. Waste material of any character will under no conditions be permitted to remain on the streets, but must immediately on its becoming unfit for use in the work be carted away and disposed of by the Contractor as hereinbefore provided; nor shall such materials be allowed to accumulate in the trenches.

Conveniences for Men.

Section 36. Necessary conveniences, properly secluded from public observation, shall be constructed and maintained by the Contractor at his own expense, wherever needed for the use of the Contractor's employees, to the satisfaction of the Engineer and the sanitary authorities.

Fences.

Section 37. Wherever necessary the Contractor shall erect and maintain at his own expense fences for the protection of adjoining property and of the adjoining public places.

Advertisements Forbidden.

Section 38. The using of fences and buildings during construction for advertising purposes, other than the name and address of the Contractor, is forbidden; all temporary buildings and fences erected by the Contractor shall be neat in appearance and shall be painted as directed by the Engineer.

Barricades.

Section 39. Barricades and bridges shall be erected by the Contractor at his own cost, for the protection of the work or use of the public; they shall be substantial in character and neat in appearance.

Detailed Drawings.

Section 40. The Engineer will prepare and furnish to the Contractor, from time to time as required, drawings and plans amplifying such details of the contract drawings as may be necessary, and drawings and plans necessary to show the adjustment and reconstruction of all surface and subsurface structures wherever the reconstruction of the same is necessitated by the construction of the railroad. These plans must be strictly followed, unless local conditions should develop, during construction, suggesting changes, when, with the approval of the Engineer, such changes may be permitted.

Working and Shop Drawings.

Section 41. The Contractor shall make all working or shop drawings which may be required in addition to the contract drawings, or in addition to such other drawings as the Commission may issue in amplification of such contract drawings, as explained above. All working or shop drawings shall be submitted in duplicate to the Engineer for his approval, which approval shall be indicated by his countersigning one set of such working or shop drawings and returning the same to the Contractor. Should the working or shop drawings be not approved by the Engineer, then the Engineer shall return one set of such working or shop drawings, with the necessary corrections and changes indicated thereon; and the Contractor must make such corrections and changes, and again submit plans in duplicate for the approval of the Engineer; and no work called for by said working or shop drawings shall be done until the approval of the Engineer be obtained, which must be given or refused within ten (10) working days after delivery to him at his office of such plans in duplicate.

Lines and Grades.

Section 42. During the progress of the work the Commission will give, through the Engineer, to the Contractor, suitable points, marks or benches, indicating the line and grade of the Railroad and of the sewers; such points or bench marks to be established at such intervals as the Engineer deems necessary for the Contractor to be able to perform his work. The principal lines and grades are to be given by the Engineer, who may change them from time to time as may be authorized and directed by the Commission. The stakes and marks given by the Engineer shall be carefully preserved by the Contractor, who shall give to the Engineer all necessary assistance and facilities for establishing benches and plugs for making measurements.

Notice, How Given.

Section 43. When the Contractor is absent from any part of the work where it may be necessary to give instructions, orders will be given by the Engineer to, and shall be received and promptly obeyed by, the superintendent or overseer of the Contractor, who may have charge of the particular work in relation to which the orders are given, and a confirmation in writing of such orders will be given to the Contractor by the Engineer if so requested.

Imperfect Work.

Section 44. Any imperfect construction which may be discovered before the final acceptance of the work, shall be corrected immediately on the requirement of the Engineer and at the Contractor's expense, notwithstanding that it may have been overlooked by the proper inspector.

Damaged Work to be Replaced.

Section 45. All work of whatever kind which during its progress and before its final acceptance shall become damaged from any cause, so much of it as may be objectionable shall be broken up or removed and be replaced by good and sound work at the Contractor's expense.

Condemned Materials to be Removed.

Section 46. If any material brought on the ground for use in the work or selected for the same shall be condemned by the Engineer as unsuitable or not in conformity with the specifications, the Contractor shall forthwith remove such materials as may be directed by the Engineer.

Competent Men.

Section 47. The Contractor shall employ only competent, skillful and faithful men to do the work. Whenever the Engineer shall notify the Contractor in writing that in his opinion any man on the work is incompetent, unfaithful or disorderly, such man shall be discharged from the work and shall not again be employed on it.

3—MANNER OF PROSECUTION AND MAINTENANCE OF TRAFFIC.

Access to Buildings, etc.

Section 48. No building shall, without the consent of the occupant, and after notice to the Engineer, be deprived of means of access thereto; and, where streets are open suitable bridges shall be built and maintained, at the Contractor's expense, to permit owners and occupants to reach their premises. Where necessary, proper and easy means for passengers to reach or leave street cars shall be maintained.

Wharves and Docks.

Section 50. For that portion of the route adjoining wharves and docks the work must be so prosecuted as to permit free access to neighboring wharves and docks.

Contiguous Contract Sections.

Section 50-a. On the division line of contiguous contract sections, the Engineer will decide any matters in the details of construction within a limit of ten feet on either side of the line where the work of contractors may be in conflict, and direct which of the contractors shall complete the details of construction within such limits.

Other Portions of the Route.

Section 51. Generally the Contractor will be permitted to conduct its work in the most expeditious manner possible, having due regard for the safety of persons and property and facilities for traffic and under such instructions as the Engineer may give from time to time.

Facilities for Travel.

Section 52. All necessary facilities are to be furnished by the Contractor for the benefit of street travel, both in longitudinal and cross streets.

Decking of Streets and Sidewalks.

Section 53. In order to provide the minimum interference with traffic and the minimum inconvenience to abutting property owners, during the construction of the Railroad, on all parts of the work when the excavation is in trench the streets and sidewalks shall, except as hereinafter specifically provided, be substantially decked or covered over, and every precaution must be taken to keep traffic free from interruption.

Street Intersections.

Section 61. The street intersections, except in cases where open trench excavation without cover is permitted, shall be kept at all times open for traffic for their full width. The street intersections in cases where open trench excavation without cover is permitted must be kept at all times open to traffic for at least one-half the width of the cross roadway, except that cross roadways in which surface railroads are located shall be kept at all times open to traffic for their full width.

Where portions of a street intersection are opened the same shall be substantially and neatly bridged for foot traffic. In all cases the Contractor shall at all times keep all the street crossings on the lines of the sidewalks in a clean and neat condition, bridging gutters and low places where water might collect.

Close Observance of Above Requirements.

Section 62. The Commission will insist upon the close observance of the above requirements, and no departure therefrom will be allowed, excepting upon the written permission of the Commission.

Openings for Ventilation.

Section 63. Wherever the excavations are decked, where gas pipes are maintained in service or where gases are liable to accumulate, suitable openings shall be provided for proper ventilation, or the Contractor may maintain services by temporary mains above the street decking.

Temporary Pipes, etc.

Section 64. Temporary pipes, if laid above the street or sidewalk surfaces, shall be neatly and substantially placed, and in a manner to cause the minimum of inconvenience to the abutting property owners and to the public.

In General.

Section 65. In general, work will, as provided herein, be carried on under covered roadways. In exceptional cases, however, where rock is within a few feet of the street or sidewalk surface, it may be impracticable to operate drills while the street is covered, until a sufficient depth of excavation has been obtained. In such cases such latitude will be allowed the Contractor as may prove absolutely necessary for the execution of its contract, and as the Engineer with the approval of the Commission may deem advisable, after a thorough understanding of the exact conditions and necessities has been determined.

4—STREET RAILROAD TRACKS, MAINS AND OTHER SURFACE OR SUBSURFACE STRUCTURES.

Notice to be Given.

Section 66. Notice is to be given by the Contractor to all companies and the proper City officials, owning or having charge of surface or subsurface structures along any part of the work, of his intention to commence operations along such part of the route, at least one (1) week in advance, and the Contractor shall file with the Engineer at the same time a copy of said notice; and he shall co-operate with the proper officers or officials in charge of such structures and shall furnish them with all reasonable facilities to inspect the methods of caring for their property.

Plans Furnished.

Section 67. In the rearrangement of subsurface structures requiring removal and relaying or reconstruction due to interference with the railroad structure a tentative plan will be made by the Engineer, which will be submitted to the parties interested; if any reasonable changes are then requested by any of the said parties within ten days after the submission of the tentative plan, such changes will then be made, if, in the judgment of the Engineer they will best conserve the interest of all parties concerned; a further plan will then be made which, on the approval of the Engineer, will be final.

Reconstruction or Relaying, etc.

Section 68. Whenever it becomes necessary to cut, move, change, or reconstruct any surface or subsurface structures, or connections therewith, such work shall be done according to the reasonable satisfaction of the owners of such pipes or other structures.

Reasonable Dispatch.

Section 69. All work of reconstruction or alteration shall be done with reasonable dispatch, and facilities are to be provided so that said work will interfere as little as possible with the practical working and use of such structures.

Maintenance, Support, etc.

Section 70. The Contractor shall at all times, by suitable bridging or other supports, maintain and support in an entirely safe condition for the usual service and to the reasonable satisfaction of the owners, all surface and subsurface structures encountered during the prosecution of his work. All surface and subsurface structures and surfaces of whatever character along the line of the work shall be protected from injury, but should any injury occur the Contractor shall fully restore such surface or subsurface structures or surfaces to as good a condition as existed before the injury was done. All the above, including also all changes of surface or subsurface structures made by the Contractor for his own convenience in executing his work, shall be done at the Contractor's own expense and included in the prices stipulated in the schedule for excavation except as otherwise herein specifically provided.

Necessary Permanent Changes of Pipes.

Section 71. Changes of water, gas, steam or other pipes made necessary because of physical interference with the railroad structure, and requiring the removal, relaying or reconstruction of such pipes and their appurtenances in other than the original position, will be paid for at the prices stipulated in Schedule Items 77 to 99, Items 102 to 106, Items 109 to 114, Items 121 to 122, and Item 125. These prices are per linear foot of pipe laid including all work, labor and material incidental to such laying, excepting that:

(1) If new pipes have to be provided and are ordered by the Engineer, such new pipes will be paid for in addition to the price paid for laying, etc., at the prices stipulated in Schedule Items 100 and 101, Items 107 and 108, Items 115 to 120, Items 123 and 124, and Item 126, which prices are to cover the cost of the new pipes delivered on the work.

(2) If the pipes in their new locations are outside of the ordered net lines for excavation for the railroad structure, necessitating additional excavation and restora-

tion of street surface, such excavation will be paid for at the prices stipulated in Schedule Items 2-A and 3-A (which prices shall include all the matters referred to in Section 107), and for restoration of street surface, Item 30-A and B, but only to the net lines ordered by the Engineer for excavation for such pipe work.

Necessary Permanent Changes of Electric Conduits and Ducts.

Section 71-a. Changes of electric conduits or ducts and their appurtenances found in the streets (other than street railway ducts, payment for which is provided for in Schedule Item 75-A), made necessary because of physical interference with the railroad structure, and requiring the removal, relaying or reconstruction in other than the original position, will be paid for at the price stipulated in Schedule Item 127. The price per duct foot as provided in Schedule Item 127 is to include the cost of all ducts in place; of all manholes, vaults, service boxes and their appurtenances; of drawing cables and providing new cables where necessary; of the proper restoration of all services that may be affected by the changes in the duct lines; of such excavation and restoration of street surface as may be necessitated by the changes in the duct lines, and all other work and material incidental to and necessary for the completed duct lines.

Surface and Elevated Railroads.

Section 72. The Contractor shall maintain and support, in a manner that will cause the minimum interference with traffic, all surface, subsurface and elevated railroads along the line of or crossing the line of the work.

Surface Railroads.

Section 73. The Contractor shall maintain and support, both temporarily and permanently, in a safe condition all street surface railroads (including steam railroads), including ducts, cables and all other appurtenances of such railroads; he shall rebuild either in their original or in new locations all parts of such surface railroads, including ducts, cables and all other appurtenances of such railroads, whose reconstruction or rebuilding may be necessitated by the construction of the work. Payment therefor will be at the rates specified in the Schedule for electric railroad, Item 75-A, or for horse railroad, Item 75-B, which prices will include the cost of all work incidental thereto. Where permanent masonry supports are required and added, and where additional vaults in excess of the number existing are required and constructed to give equivalent facilities, they will be paid for at the prices given in the Schedule for the several classes of work or material applicable thereto.

Elevated Railroads.

Section 74. The Contractor shall maintain and support both temporarily and permanently in a safe condition all elevated railroad structures. Payment therefor will be at the rate specified in Schedule Item 76, which price will include the cost of all incidental work, including the reconstruction and building where necessary of all column foundations and parts of column foundations lying without the net lines of the subway structure.

Subsurface Railroads.

Section 75. The Contractor shall support and maintain both temporarily and permanently in a safe condition all subsurface railroads and their appurtenances. Payment therefor shall be deemed included in the prices for excavation, Schedule Items 1, 2 and 3.

Facilities to be Given to Make Extensions.

Section 76. In the event of the owners or the City desiring to make any alteration or extension to their structures, or do any work to or in connection with surface or subsurface structures owned by them or it, at the time the work under this contract is in progress, the Contractor shall give said owners or the City all reasonable opportunity to perform such work; provided such work or alteration for the benefit solely of the owners of subsurface structures does not cause the Contractor any serious loss or delay, as shall be determined by the Commission.

Parks and Parkways, Trees, etc.

Section 77. In any park or parkway, or where any grass plots or trees exist along any street occupied by the Contractor, proper precautions must be taken to protect from injury all such trees or grass plots. For every tree removed, injured or destroyed, the Contractor shall set out a new thrifty tree of the same kind as the tree removed, injured or destroyed, and not less than fifteen (15) feet in height and not less than three and one-half (3½) inches in diameter measured two feet above the surface of the ground, and in such position as the Commissioner of Parks shall indicate. All roads, cross-paths, grass plots, shrubbery and other plants

removed or affected by the construction of the railroad, shall be restored as soon as possible to as good a condition as existed before the commencement of the work.

Replanting Under Direction of Park Commissioner.

Section 78. In replanting trees and the replanting of grass plots the Contractor must be governed by the reasonable requirement of the Commissioner of Parks or by other authorities specially charged with the care of these trees or grass plots, and the nature and depth of the soil to be placed therein must be approved by such authorities and by the Commission.

Payments, How Made.

Section 79. Payment for all work covered by Sections 77 and 78 shall be included in the prices paid for Park or Street Surface Restored, Schedule Items 31 or 30.

5—EXCAVATION.

Width of Excavation.

Section 80. Special care must be taken to avoid damage wherever excavation under cover is being done or where open excavation is permitted. The width of such excavation shall not exceed the width actually necessary, in the opinion of the Engineer, for the proper prosecution of the work. All excavations shall be of such width, in addition to that of the railroad, as shall be necessary in the opinion of the Engineer for the proper and expeditious progress of the work, and to permit the laying and readjusting of all sewers, mains, subways and other subsurface structures encountered along the route and contiguous to the railroad.

Depth of Trenches.

Section 81. Trenches shall be excavated to such depth, both in soft ground and in rock, as may be necessary to permit the laying of such concrete bed or special foundation as may be deemed necessary by the Engineer.

Sides to be Secured.

Section 82. The sides of the excavations shall be secured against slips by suitable sheet piling or sheeting, held in place by braces, shores or walling timbers, special precautions being taken where there is additional pressure, due to the presence of buildings or other structures. Where a movement of the ground might cause the settlement of an adjacent building, the sheeting must be started, if near the building, before the elevation of the bottom of the foundation of the building is reached; if away from the building, at such depth of the excavation as the Engineer may permit; and the excavation must not be made in advance of or below the bottom of the sheeting.

Filling Back of Sheeting.

Section 83. Sheeting shall be driven wherever possible, but when it is placed against the sides of the excavation, the spaces or voids back of the sheeting must be immediately and carefully filled with suitable material to prevent as far as possible the natural ground back of the sheeting from moving.

Buildings Underpinned.

Section 84. To secure adjacent ground or the buildings thereon, or to prevent bringing an unusual pressure on the structure when completed, the Contractor shall secure the sides of the excavation by suitable timbering, and shall safely and permanently underpin adjacent buildings. As part of this obligation the Contractor shall use such methods of construction or underpinning, pneumatic or otherwise, as special conditions may require and the Engineer shall approve.

Payment For.

Section 86. Where underpinning of a building is necessary and the work is done as provided in Section 84, payment will be made to the Contractor as, and at the price, provided in Schedule Item 4. The classification as to the number of stories has reference to the number of stories above the surface of the street.

Sheeting.

Section 87. No payment shall be made to the Contractor for sheeting left in the ground or in the work, unless the Engineer shall in writing require it to be left in, in which case payment shall be made to the Contractor for the sheeting so left in as measured by the Engineer, and at one-half the current market price for new material of the same grade, character and dimensions, and without any allowance or payment for placing the same or the expense thereof. This section applies only to the sheeting in trench work.

Timber for Temporary Purposes.

Section 88. All timber used for sheeting, shoring, bracing, decking or other temporary purposes, shall be sound and free from any defects that may impair its strength. It shall be provided, placed and removed at the Contractor's own cost and expense. The top or wearing surface of all decking used for carriageways shall be of hard yellow pine, sound, straight and free from all shakes, and large loose knots. All sheeting and timber used temporarily shall be put in place by skilled mechanics, keyed tight by wedges where necessary, and so arranged as to be withdrawn readily without endangering the adjoining soil.

Vaults of Abutting Property.

Section 89. The cost of the removal, where necessary, of all walls or other parts of vaults of abutting property along the line of the railroad that are within the ordered net lines of excavation is to be included in earth excavation as provided in Section 102, but the restoration of all such walls or other parts of vaults within the ordered net lines of excavation will be paid for at the unit prices specified in the Schedule applicable to the several classes of work and material involved in such restoration.

The above is not to be construed, however, as applicable to any work beyond the ordered net lines of excavation, which shall be at the Contractor's own cost and expense.

Vaults Disturbed.

Section 90. Wherever vaults are broken through or otherwise disturbed, the Contractor shall, at his own cost and expense, erect a temporary partition on or about the building line, or as directed, that will afford proper protection to the owner or occupant of the adjoining premises.

Rock.

Section 91. Ledge rock in place, and boulders within the ordered line of excavation requiring blasting, will be considered as rock excavation.

Preparations for Rock Measurement.

Section 92. Whenever rock is encountered in the trench, it shall be stripped of earth in sections of not less than 20 feet; and the engineer in charge shall be duly notified, in order that he may measure or cross-section the same.

Blasting.

Section 93. Whenever rock or material requiring blasting is encountered in any trench or tunnel, all necessary precautions must be exercised by the Contractor, as required by the ordinances of the City relative to blasting. Explosives shall be used only of such character and strength as may be permitted by the Commission, and the right is reserved for the Engineer to direct that in special cases ordinary blasting powder only, in small charges, shall be used. Blasting shall not be done between the hours of 11 p. m. and 7 a. m. without the express permission of the Engineer, and under such restrictions as he may impose.

Storage of Explosives.

Section 94. No larger quantity of explosives shall be kept on the line of the work than will be actually required for the twelve (12) hours of work next ensuing, and it shall be kept under lock, the key to which is to be only in the hands of the foreman or other equally trustworthy person. The amount of explosives kept in any one place shall not exceed the limit permitted by any ordinance of the City, or as may be determined by the Commission. Caps and exploders shall not be kept in the same place with dynamite and other explosives. During freezing weather, special precautions shall be taken as to the care and manipulation of dynamite.

Near Pipes and Mains.

Section 95. Whenever any pipe or main is encountered in or alongside of the trench, right is reserved to direct that all rock within five (5) feet of the same shall be removed by means other than blasting.

General Precautions in Blasting.

Section 96. In rock excavation in the trenches for the railroad the work must be so regulated as to avoid, as far as possible, shattering the rock beyond the established line for excavation.

Blasting.

Section 97. Generally the central portion of the excavation must, when directed by the Engineer, be kept some distance in advance of the excavation near the sides,

and if the rock, owing to its general character and structure, has a tendency to break large, or the strike and dip of the stratification indicate a liability to slip or slide into the excavation, the Contractor must place the drill holes at close intervals on the established lines for excavation, in order to avoid excessive excavation and to preserve the established lines thereof.

Pumping.

Section 98. Whenever water is encountered in trenches, the same shall be removed by bailing or pumping, great care being taken when pumping that the surrounding particles of soil be not disturbed or removed. If necessary to prevent such disturbance, the pumping must be done by a series of driven wells whose points are protected by fine wire cloths, the rate of flow at each well being made so slow as not to remove the particles of soil; or the pumping must be done by other means approved by the Engineer. The delivery from all pumps shall be conducted into the adjacent sewers, and the delivery pipes shall be so arranged as to be readily inspected at all times to ascertain if the water is free from particles of soil.

Carts to be Tight.

Section 99. All carts, buckets or other vehicles used by the Contractor for the removal of material, shall be tight and so arranged and so loaded as not to spill over. Whenever a cart, bucket or other vehicle so used is leaky or unsuitable, it shall be immediately withdrawn from the work on notification by the Engineer, or his duly qualified assistant, in charge of that portion of the work.

Removed Expeditiously.

Section 100. Excavated material shall be removed expeditiously and disposed of, in any place selected by the Contractor, subject to the ordinances and regulations of the City authorities governing the disposal of such material, and the regulations of the United States Government as to the disposal or dumping of material in and about or near the Harbor of New York.

When Excavated Material May be Taken by the City.

Section 101. If at any time during the course of construction the City shall desire for City purposes any part of the material excavated, and the cost of such disposal shall not exceed the cost to the Contractor of the method in which he is then disposing of it, the Commission may order such material dumped or turned over to the City at a point designated without cost to the City.

Earth Excavation, Definition of.

Section 102. Earth excavation includes the excavation of all materials of whatever nature encountered in the trenches, excepting ledge rock in place and boulders requiring blasting.

Excavation in Trenches, How Measured.

Section 103. The net outside width of the railroad structure, as ordered and indicated on the plans, and the depth, also as ordered and as indicated on the plans, will govern as to width and depth in the measurements for payment for excavation. No deduction from the volume of excavation determined as above, will be made on account of basements or cellars in property acquired by the City for the construction of the railroad or on account of vault space or of spaces occupied by pipes and other subsurface structures.

No Allowance Outside of Ordered Net Lines.

Section 104. There will be no measurement or allowance made nor money paid for excavation outside (below or wider than) the net measurement lines as above indicated, or in rock excavation, for irregularities of surface; and no allowance shall be made for any excess excavation caused by slips or slides. It is understood and agreed that for all such matters the Contractor has estimated and allowed in the unit prices of the schedule.

Change of Street Grade.

Section 105. Where the contract drawings indicate that the grade of any street is to be raised the Contractor shall fill in the street to the changed grade as required and such work shall be measured and paid for at the price stipulated for earth excavation, Schedule Item 1.

Payment for Excavation.

Section 106. Excavation shall be paid for at the price or prices given in Schedule Items 1 and 2 for excavation in earth and Item 3 for excavation in rock.

Prices for Excavation to Include.

Section 107. The prices herein stipulated for excavation, Schedule Items 1, 2 and 3, are to include the cost of the disposal of the materials excavated, of backfilling, of all decking and bridging, of all sheeting and bracing, and of maintaining and supporting of trenches during and after excavation, of all pumping or bailing, and of the maintenance, support, etc., of all surface and subsurface structures of whatever nature, payment for the maintenance and support of which is not herein elsewhere specifically provided for.

6—TUNNELING.

How Lined.

Section 108. All tunnels shall be lined with steel or cast iron and concrete, or with concrete or brick masonry.

Where tunnels are lined with concrete or brick work without metal tubes, proper provisions shall be made for keeping the tunnels dry by the use of drains, and by other methods as elsewhere provided.

Packing.

Section 109. The space between the extrados of the arch or back of the sidewalls and the rock or other materials of excavation, shall be filled with concrete to a height of two feet above the spring line of the arch—above this concrete the space shall be filled with dry masonry packing. Similarly in the tunnel floor, if concrete is used, all loose muck shall, if directed by the Engineer, be removed to the solid rock and the space filled in with concrete up to the bottom line of the section ordered by the Engineer for tunnel excavation and concrete. All such concrete or other packing, being outside of the net section line for excavation as ordered by the Engineer, shall be at the sole expense of the Contractor.

Grout.

Section 110. After the tunnel lining and packing is in place, if required by the Engineer, a grout, consisting of one (1) part fine, clean and sharp sand and one (1) part Portland cement, shall be pumped in under pressure, from time to time behind the masonry, so as to completely fill all the voids. Where tunnels are made by the use of a shield, similar grout shall be pumped in to completely fill the space left by the tail piece of the shield as soon as the shield is moved forward.

Payment for Grout.

Section 111. Where grout is ordered and used, it shall be paid for at the price herein provided, Schedule Item 11.

Lines for Excavation.

Section 112. The tunnel, at any place, is to be excavated to the line of the cross-section ordered by the Engineer for that place.

No Payment for Excavation Beyond Ordered Lines.

Section 113. All loose or shaky rock, whose fall or settlement might, in the judgment of the Engineer, produce an unequal or concentrated pressure on the masonry, shall be removed, and the space refilled with such class of masonry as the Engineer may require and as provided in Section 109, but no payment will be made for any excavation outside of the cross-section of the tunnel excavation ordered by the Engineer, as provided in Section 112.

Blasting.

Section 114. Drilling and blasting must be conducted with all possible care and in such a manner as not to shatter the roof and sides outside of the section lines, as ordered by the Engineer, nor endanger adjoining property.

Drains.

Section 115. All seams carrying water shall be carefully drained, as specified under the clauses relating to drainage.

Precautions Against Settlement.

Section 116. The Contractor must take every precaution, and such precautions as the Engineer may direct, by suitable shields, timbering, lagging or other supports, to prevent any settlement or movement of surrounding ground. Such timber as cannot be drawn without endangering the work or the ground above, shall be left in place and thoroughly surrounded by masonry and grouted.

Timbering.

Section 117. Timbering shall be used wherever necessary to support the materials or to secure the safety of the work or workmen. It will be at the sole expense of the Contractor and included in the contract price for tunnel excavation, Schedule Item 5. Wherever practicable it shall be removed before the concrete lining or concrete or other packing is placed.

Compressed Air.

Section 118. If for the work under the Harlem River and for the approaches thereto or elsewhere on the work a method is adopted requiring the use of compressed air, a plant must be provided of sufficient capacity to insure at all times and under all conditions an ample supply of air to prosecute the work with safety and dispatch, and proper air locks shall be built with safety locks, in addition to provide for the escape of workmen at time of accident.

Methods to be Approved.

Section 119. All methods of tunneling shall be subject to the approval of the Engineer, and be changed from time to time, if, in his judgment, the local conditions so require, and during construction approved methods of ventilation and lighting shall be used.

Tunneling, Payment For.

Section 120. The price per cubic yard, stipulated herein, Schedule Item 5, for tunnel excavation, is to cover all expense due to the presence of quicksand or other soft material, rotten rock, boulders, etc.; the cost of all pumping and bailing; of all timbering, and removal of same; of removing all excavated material; of all ventilation and lighting; and of all other work incident to the excavation of the tunnel. Any expense that may arise from loose or shaky rock or from falls or cave-ins, or from any unexpected obstacles, shall be borne by the Contractor. In earth sections the tunnel excavation must be large enough to permit building the masonry to the full required thickness, clear of such timbering and lagging as it may be necessary to build in. As a fair provision for such contingencies, it is assumed that the excavation will extend an average distance of one (1) foot outside the net line in the roof and sides and six (6) inches below the net line in the floor, and measurements for payment in tunnel excavation in earth will be made to those lines. It is distinctly understood, however, that no such allowances or any other allowance in tunnel excavation will be made in connection with timbering in tunnel excavation in rock.

Chambers, Drains, etc.

Section 121. Excavations for chambers, for skewbacks of arches, for sump holes, drains or for any other purpose in the tunnel, are to be measured according to the lines of the cross-sections determined by the Engineer, and paid for by the cubic yard as tunnel excavation.

Additional Enlargement.

Section 122. If after the excavation has been made of a certain size by direction of the Engineer, he is of opinion that the nature of the rock or other material is such that the form and dimensions of the masonry for which said excavation was intended must be increased, he may order an enlargement of the excavation for the purpose of building masonry of greater thickness, and the Contractor is to make such enlargement, which is to be measured according to the lines given by the Engineer, and paid for at the price per cubic yard stipulated in the schedule for tunnel excavation.

7—BACKFILLING.

Quality of Material. How Placed.

Section 128. The trenches at the sides of and over the top of the subway and wherever backfilling is necessary, shall be backfilled with sand, gravel or other good clean earth, free from perishable material and from stones exceeding six (6) inches in diameter, and not containing in any place a proportion of stone of or below that size exceeding one (1) part of stone to five (5) parts of earth. The filling shall be compacted by flooding with water or, in cases where flooding with water is not practicable it shall be compacted by ramming in layers, not exceeding six inches in depth.

Subsurface Structures. Frozen Material Not Permitted.

Section 129. Whenever pipes, sewers or other subsurface structures are met with, the filling must be carefully packed, rammed and tamped under such subsurface structures, using special tools for the purpose. No filling of trenches with frozen earth will in any case be permitted, nor will any filling be permitted over frozen material.

Sheeting Removed.

Section 130. As fast as the work of filling permits, sheeting and other timber supporting the sides of the excavation shall be carefully withdrawn, or shall be left in place, as may be directed by the Engineer, and the spaces left by the removal of such material carefully back-filled.

How Paid For.

Section 131. The cost of backfilling is to be included in the prices paid for earth and rock excavation, Schedule Items 1, 2, 2-A, 3 and 3-A.

8—PILING AND TIMBERING.

Piles.

Section 132. If in the judgment of the Engineer the ground is of such a character as to require piling, the Contractor shall drive such piles as the Engineer directs. The piles shall be of good sound pine or spruce, straight and free from shakes; they shall be not less than twelve (12) inches in diameter at the butt end, or less than six (6) inches in diameter at the point, and shall be driven to the satisfaction of the Engineer and by means of a steam hammer driver if so required by him. If necessary the points of the piles shall be protected by proper shoes, and the butts by rings or caps. Piles shall not be spliced unless permitted by the Engineer, and then in such manner as he directs. Piles shall be carefully cut off to the grade given by the Engineer.

Piles Driven in Required Location.

Section 133. Piles shall be driven in the position and manner and to the depth ordered; if driven in a wrong position or injured in any way by driving they must be withdrawn and replaced by others. After being driven they shall be cut off to a true plane for proper adjustment with capping timber or masonry.

Payment for Timber Piles.

Section 134. The price herein stipulated to be paid, per linear foot of timber piles, Schedule Item 12, is to cover the cost of furnishing, driving and preparing the piles ready for the capping timbers or masonry, and the portion cut off and removed will not be included in the length measured for payment. No test piles, guide piles, or piles other than those that are a part of the finished foundation and are included within the net width of the finished foundation will be paid for.

Concrete Piles.

Section 135. If in the judgment of the Engineer special conditions so require, piles of reinforced concrete of an approved form of construction shall be used.

Payment for Piles Other Than Timber Piles.

Section 136. Payment for piles other than timber piles will be as provided in Article XII. of the contract.

Grillage.

Section 137. Timber grillage foundations shall be built if so directed by the Engineer.

Foundation Timber.

Section 138. All foundation timber shall be of pine or spruce, or other timber permitted by the Engineer, sound and free from shakes. It shall be of such dimensions, and laid in such manner, as the special plans to be issued shall require, and held in place by spikes or good seasoned oak or locust treenails.

Foundation Timber, Measurement and Payment.

Section 139. No wastage is to be allowed for, and the estimate of the quantities of foundation timber used will be based on the amount ordered by the Engineer and placed according to his direction. Payment for foundation timber will be as provided in Schedule Item 13.

9—CEMENT.

Portland Cement.

Section 140. All cement used in the work shall be true Portland cement, by which is meant the finely pulverized product, resulting from the calcination to incipient fusion of a properly proportioned intimate mixture of argillaceous and calcareous earths or rocks, to which no addition greater than three (3) per cent. has been made subsequent to calcination.

Brand to be Approved.

Section 141. Before any cement is furnished, the brand shall receive the approval of the Engineer. Cement, to be acceptable, shall be of a well-known brand which has been in successful use for large engineering works in America for at least five (5) years, and which has an established reputation for uniform character. Preference will be given to cements which, by their records, show a tendency to maintain high strength of mortar with increased age.

Inspection.

Section 142. Cement shall be subject to inspection at the place of manufacture oı on the work, and to such tests as may be ordered by the Engineer. The Engineer or his representatives shall have access at all times and places to inspect the methods of manufacture, storage and protection, and shall have liberty to inspect the daily laboratory records of tests and analyses at the cement works.

Tests.

Section 143. In general, tests will conform to the methods recommended by the Committee on Uniform Tests of Cement of the American Society of Civil Engineers. Unless otherwise directed, samples will be taken at the place of manufacture by a representative of the Engineer, and sent to the Commission's laboratory, where the tests will be made. If required, tests will be made on the individual samples, without intermixing.

Specific Gravity and Color.

Section 144. The cement shall have a specific gravity of not less than 3.10 nor more than 3.25 after being thoroughly dried at a temperature of 212 degrees Fahr. The color shall be uniform, bluish gray, free from yellow or brown particles.

Chemical Analysis.

Section 145. Chemical analyses of cement made from time to time shall show a reasonably uniform composition. Cement shall not contain more than 1.75 per cent. of sulphuric anhydride (SO_3) nor more than 4 per cent. of magnesia (MgO).

Fineness.

Section 146. The fineness of the cement shall be such that it shall leave by weight a residue of not more than eight (8) per cent. on a No. 100, and not more than twenty-five (25) per cent. on a No. 200 sieve; the wires of the sieves being respectively 0.0045 inch and 0.0024 inch in diameter.

Time of Setting.

Section 147. It shall not develop initial set in less than thirty (30) minutes unless a more quickly-setting cement is specifically required, and shall develop hard set in not less than one (1) hour nor more than ten (10) hours.

Soundness.

Section 148. Pats of neat cement, after remaining one (1) day in moist air, shall be kept in air or water of normal temperature for at least twenty-eight (28) days, or shall be exposed to an atmosphere of steam, above boiling water, in a loosely closed vessel for at least five (5) hours; and the separate parts under any of these conditions, shall remain hard without any indications of checking, cracking, distortion, disintegration or blotching.

Tensile Strength.

Section 149. Neat cement briquettes shall have at the end of one (1) day in moist air a breaking strength, per square inch of sectional area, of not less than one hundred and fifty (150) pounds; at the end of seven (7) days—one (1) day in air, six (6) days in water—of not less than five hundred (500) pounds; and at the end of twenty-eight (28) days—one (1) day in air, twenty-seven (27) days in water—of not less than six hundred (600) pounds. The strength at twenty-eight (28) days shall not be less than that at seven (7) days.

Mortar Briquettes.

Mortar briquettes, composed of one (1) part of cement and three (3) parts of standard Ottawa sand, by weight, shall have at the end of seven (7) days—one (1) day in air, six (6) days in water—a breaking strength, per square inch of sectional area, of not less than two hundred (200) pounds; and at the end of twenty-eight (28) days—one (1) day in air, twenty-seven (27) days in water—of not less than three hundred (300) pounds. The strength at twenty-eight (28) days shall show an increase of not less than fifty (50) pounds over the strength at seven (7) days.

Long-time Tests.

Section 150. Tests will be made from time to time extending over longer periods than twenty-eight (28) days. If such tests show a tendency to unsoundness or unusual reduction in strength with increased age, the Engineer shall have the right to prohibit further use of that brand and to require that another brand be substituted.

Storage During Tests.

Section 151. All cement shall be held in storage to allow ample time for tests to be made before the cement is required for use in the work.

How Contained.

Section 152. Cement shall be packed and delivered in canvas sacks or other strong, well-made packages, plainly marked with the manufacturer's brand, and sealed in an approved manner. The weights of such packages shall be uniform.

Methods of Storing.

Section 153. The Contractor shall at all times keep in store on the work, or at some point convenient thereto, an abundant supply of cement, so as to guard against possible shortage. It shall be stored in a weather-tight building, with a tight floor a proper distance above the ground, and with sufficient floor space to admit of storing each lot of cement, of not more than two hundred (200) barrels, or its equivalent, separately, so as to facilitate identification of each individual lot in case of necessity for further tests or rejection. Cement that has become partially set or otherwise damaged shall not be used.

10—Mortar.

Cement and Sand. Mixing.

Section 154. All mortar shall be prepared from accepted cement and clean, sharp sand, approved by the Engineer. These ingredients shall be thoroughly mixed dry in the proportions as specified below; water shall then be added, so as to produce a stiff paste. Water used in mortar, grout or concrete must be clean, fresh water, no salt water being permitted. The mortar shall be freshly mixed for the work on hand, in proper boxes made for that purpose, and no mortar shall be used that has stood beyond such limit of time as may be determined by the Engineer.

How Measured.

Section 155. For purposes of mixture, three hundred and seventy-five (375) pounds of Portland cement shall be estimated at three and one-half (3½) cubic feet of volume. The proportional parts of sand and stone or gravel shall be by volume as cast into the measuring box. The proportions for brick and stone masonry shall be one (1) part cement to two (2) parts sand; for pointing, one (1) part cement and one (1) part sand; for concrete masonry, as specified under the head of concrete; and for other classes of work, as directed by the Engineer; for grout, one (1) part of cement to one (1) part of fine sand.

11—Masonry.

Laid in Portland Cement.

Section 156. All masonry, except as otherwise specified, shall be laid in Portland cement mortar, and shall be built of the forms and dimensions shown on the plans, or as directed by the Engineer from time to time; and the system of joining or bonding ordered by the Engineer shall be strictly followed.

Water Not to Interfere With.

Section 157. Care must be taken that no water shall interfere with the proper laying of masonry in any of its parts.

Freezing Weather.

Section 158. During freezing weather such masonry only shall be built whose construction, in the judgment of the Engineer, can not be postponed, except at the cost of delaying the work. The Contractor shall provide such appliances as are necessary for heating the water and the materials used in the masonry according to the specific instructions of the Engineer.

Protected in Freezing Weather.

Section 159. During freezing weather all masonry shall be protected by a suitable covering of salt hay, canvas, tarpaulin or by such material or in such ways as may be necessary to insure it against freezing.

Hot Weather.

Section 160. During hot weather all masonry, especially concrete, shall be kept wet by sprinkling and properly covered until it has become thoroughly set and hardened.

Pointing.

Section 161. Unless otherwise permitted, every joint that is to be pointed shall be raked out, within two days after being laid, to a depth of at least two inches.

Section 162. Pointing of the face joints of masonry shall be thoroughly made with cement mortar mixed in the proportion of one (1) part of cement to one (1) part of sand, except where otherwise specially provided.

Section 163. No pointing shall be done in freezing weather, and masonry laid between December 1 and April 1 shall not be pointed until permitted by the Engineer.

Defective Masonry.

Section 164. Any masonry which is found to be defective from any cause whatsoever, before the final completion and acceptance of the work, must be removed and properly rebuilt, or if damaged during such time must be properly repaired.

Stone Cleaned.

Section 165. All stone before being laid shall be thoroughly cleaned and washed if so directed by the Engineer.

12—CONCRETE.

How Composed.

Section 166. The concrete shall be composed of gravel or broken stone, or a mixture of both, free from all dust and dirt, and mixed together with the proportion of mortar specified below.

Sand.

Section 167. Sand for concrete shall be of the kind herein specified for mortar.

Stone.

Section 168. Stone for concrete shall be sound, clean gravel, or sound, hard, broken limestone, or trap rock, or a mixture of such gravel and broken stone may be used.

Sizes of Stone.

Section 169. Broken stone or gravel for concrete shall be graded from fine to coarse, and that which is all of one size, or practically so, shall not be used. It shall be screened or washed so as to remove all dust, and it shall contain no pieces that will pass through a hole three-eighths (⅜) inch in diameter, and no pieces that will not pass through a hole one and one-half (1½) inches in diameter. Broken stone or gravel for concrete, graded as above, but between three-eighths (⅜) and three-fourths (¾) inch in diameter, may be required and used in special parts of the work.

Rubble Concrete.

Section 170. In concrete, where the thickness is thirty (30) inches or more, if permitted by the Engineer, the Contractor may embed in the same pieces of sound stone whose greatest diameter does not exceed twelve (12) inches and whose least diameter or thickness is not less than three-quarters (¾) of the greatest diameter. These stones shall be set by hand in the concrete as the layers are being rammed, and so placed that each stone is completely and perfectly embedded. No two (2) stones shall be within six (6) inches of each other and no stones within four (4) inches of an exposed face, nor shall any such stone be placed nearer than six (6) inches to any metal built in the concrete for reinforcing the same.

Proportions.

Section 171. The proportions of cement, sand and stone (or gravel) used in making concrete shall be as follows:

Section 172. Concrete in floor, sidewalls and roof one (1) part of cement, two (2) parts of sand and four (4) parts of stone. Concrete for tube tunnels under the Harlem River will be as indicated on the plans.

Section 173. Protective concrete outside of waterproofing lines on sides and roof, one (1) part of cement, four (4) parts of sand and eight (8) parts of stone.

Mixing by Machine.

Section 174. Whenever practicable, concrete shall be machine mixed. A rotary machine of a pattern approved by the Engineer, and mixing only one batch at a time, shall be used.

Mixing by Hand.

Section 175. When concrete is mixed by hand the stone or gravel shall be spread on a platform in a bed about six (6) inches thick, and shall be thoroughly wet. Sand shall be spread on a platform and the requisite portion of cement spread on the sand. After thoroughly mixing the latter, the dry mixture thus formed shall be spread evenly over the bed of stone wet, as above, and the whole turned over until thoroughly mixed, but not less than two (2) turnings on the mixing board shall be allowed in any case, water being added as necessary. Care shall be taken to keep the bed of concrete wet and avoid piling.

How Laid.

Section 176. Concrete shall be placed immediately after mixing in layers of such thickness as may be directed by the Engineer, and shall be thoroughly compacted throughout the mass by ramming or spading, special tamping bars or tools being used as approved by the Engineer. The amount of water used in making the concrete shall be as approved by the Engineer. If a small amount of water has been used in mixing, ramming shall be continued until the water flushes to the surface; as a rule, however, concrete shall be placed wet.

Made Smooth to Receive Waterproofing.

Section 177. Concrete to which waterproofing is to be applied shall be made smooth at the time of laying and shall be carefully protected from injury by barricades or otherwise, if necessary, until thoroughly set.

Time for Hardening.

Section 178. Concrete shall be allowed to set for twelve (12) hours, or more, if so directed, before any work shall be laid upon it; and no walking over or working upon it shall be allowed while it is setting. Concrete shall not be flooded with water before being thoroughly set.

Rock Surface to be Cleaned.

Section 179. Before laying concrete on rock surfaces the latter shall be swept clean of all debris and dirt, and when laid on earth the earth shall be rammed as directed before placing the concrete.

Surface Rough for Bonding.

Section 180. Wherever a section of concrete is necessarily left unfinished, leaving a surface which will be hard set before additional concrete is laid, the surface shall be left rough to form a bond with the new work; and if deemed necessary by the Engineer, the points shall be reinforced with steel bars or dowls, to be furnished by the Contractor.

Joints Cleaned.

Section 181. In all cases of joints of old with new work the old surfaces shall be thoroughly cleaned and wet, and a coating of mortar or cement shall be applied, if required, before placing the concrete.

Forms.

Section 182. Suitable forms shall be provided by the Contractor to support the concrete while being placed in the walls or roofs. These forms shall be immediately replaced by new ones as soon as they commence to lose their proper shape. Before being used they shall be carefully cleaned of cement and dirt in order to provide a perfectly smooth face to the exposed surface of the concrete. The forms shall be made of wood, kept carefully planed; or made of metal sufficiently thick to retain their shape without the use of wood.

Section 183. No forms made of wood, and covered with iron will be permitted.

Section 184. The forms, if made of wood, shall be made of boards with tight joints, tongued and grooved, if required by the Engineer.

Precautions in Placing.

Section 185. Every precaution shall be taken in placing or assembling the forms to do so in such a manner that when removed, after the concrete has been placed, the faces of the concrete that are to remain exposed shall present a smooth and even surface.

Forms, How Set. Forms Removed. Surface Irregularities Corrected. Defective Work Replaced.

Section 186. The forms shall be set true to line, firmly secured, and be so tight as not to allow water in the mortar to escape; they shall be thoroughly wet before

placing the concrete and shall be removed as soon after the concrete has been placed as in the judgment of the Engineer may be done with safety to the work. Immediately on the removal thereof the faces that will remain exposed shall be carefully examined and any irregularities of the surface corrected; projections shall be removed and voids filled with mortar. If, however, the voids are such as to indicate an excessive loss of mortar, portions of the concrete shall be cut out to the fullness of such defects and the space refilled with a rich concrete or mortar in such proportions and in such manner as the Engineer may direct.

Reinforcement Steel.

Section 187. Where reinforcement steel or wire mesh is used, efficient means shall be provided to maintain it in the exact position it is to occupy in the completed work, and to prevent it from becoming dislodged, or moved in any manner, when concrete is placed.

Surfaces Not to be Painted.

Section 188. The exposed faces of the concrete, excepting within station limits, shall be left with the natural cement finish; therefore, immediately following the removal of the forms, followed by the removal of the projections and the filling of voids, as provided above, these entire surfaces shall be rubbed down in such a manner, approved by the Engineer, as will leave a smooth and even surface, the object in view being to obtain a generally smooth finished surface with uniformity in color.

Impervious to Water.

Section 189. It is intended to obtain concrete impervious to water; the concrete shall be mixed and deposited with this end in view, and on the roof of the Railroad, if waterproofing is not used, the top surface of the concrete shall be carefully troweled as may be directed in order to add to its imperviousness.

Concrete, How Measured and Paid For.

Section 190. Concrete masonry shall be measured in place in the work to the prescribed net lines ordered by the Engineer and shall be paid for at the prices in Schedule Items 6 and 7; which prices are to include the cost of all scaffolding, centres, forms, etc., and removing the same, and all work incidental thereto.

Backing or Filling Concrete, Not Paid For.

Section 191. No concrete backing or filling outside of the ordered net lines of excavation will be paid for.

(For Concrete in Sewers, see Sewers.)

13—Brick Masonry.

Quality.

Section 192. Bricks for masonry shall be of the best quality common bricks, burned hard entirely through, regular and uniform in shape and size and of compact texture.

Hollow Terra Cotta Blocks.

Section 193. Hollow terra cotta blocks or bricks may be required in station work, on the outside of walls of the structure or at such other places as the Engineer may direct. They shall be of the best porous terra cotta as approved by the Engineer, and shall be laid in such manner as hereinafter specified or as the Engineer may direct.

How Laid.

Section 194. All brick masonry shall be laid in mortar of the quality above described, except that in exposed locations coloring matter may be added, if required by the Engineer. The bricks shall be laid to line with joints in the face work (except in stations) not exceeding one-quarter (¼) of an inch in the beds, and three-eighths (⅜) of an inch on ends; the bricks to be thoroughly wet before laying and to be completely embedded in mortar under the bottom and on the sides and ends at one operation, care being taken to have every joint full of mortar.

All exterior surfaces shall be smooth and regular.

Cleaned.

Section 195. The inside faces of all arches and other exposed parts shall have all the mortar scraped off and washed clean immediately after the centres have been struck, and shall be pointed and left in neat condition.

No "Bats" or Culls.

Section 196. All bricks of whatever nature shall be carefully culled and, if necessary, gauged before laying, at the expense of the Contractor. No "bats" shall be used except in large masses of brickwork, where a moderate proportion, to be determined by the Engineer, may be used, but nothing smaller than half bricks.

Racked or Toothed.

Section 197. All unfinished work shall be racked or toothed, as directed by the Engineer, and before new work is joined to it the faces of the brick in the old work must be scraped entirely clean, scrubbed with a stiff brush and be well moistened.

Special Bricks.

Section 198. Where necessary to make a neat joint in connection with steel framework, or at corners, curves, or other similar places, special bricks of proper shape shall be furnished and used. All centres and forms shall be made to fit the curves of the work; they shall be put up and removed in a manner satisfactory to the Engineer.

Measurements and Payments.

Section 199. Brick masonry shall be measured to the lines indicated and shown on the plans and as ordered by the Engineer and shall be paid for as herein stipulated in Schedule Item 9, for common brick masonry, and Item 10 for hollow terra cotta brick or tile masonry; these prices are to include the cost of all scaffolding, forms, centres, etc., and the removal of the same, of all plastering and pointing, and of all other work incidental thereto.

14—STONE MASONRY.

Rubble Stone Masonry, Where Used.

Section 200. Rubble stone masonry will be used for supporting the street railroads over the roof of the Railroad where permanent supports are required, or at such other places as the Engineer may require.

How Laid.

Section 201. Rubble stone masonry shall be made of sound, clean stone of suitable size, quality and shape for the work in hand and shall be laid in mortar mixed in the proportion of one (1) part of cement to three (3) parts of sand. All beds and joints shall be well filled with mortar and the work must be thoroughly bonded.

Measurements and Payments.

Section 202. Rubble stone masonry shall be measured in place in the work and to the lines ordered by the Engineer, and it shall be paid for as herein stipulated under Schedule Item 8.

Other Masonry.

Section 203. In case, during the progress of the work, stone masonry of a different class than that specified above shall become necessary and shall be required by the Engineer, the same shall be constructed according to specifications applicable to the best work of such class, and it shall be paid for as provided in Article 12 of the contract.

15—WATERPROOFING.

General Limits of Waterproofing.

Section 204. In general, waterproofing of the structure will be limited to the roof and sidewalls at the stations, and to those surfaces near ground water or mean high water if ground water level is found for any reason to be below mean high water. At other places free drainage shall be provided by pipe drains, hollow tile or broken stone.

Protecting Masonry.

Section 205. The protecting masonry shall be hollow terra cotta blocks, common brick or concrete, laid and paid for as herein elsewhere provided, and shall not be less than four inches in thickness.

Laid Against Sheeting.

Section 206. In places where permanent sheeting is placed at the waterproofing line, the waterproofing, if permitted by the Engineer, may be applied against the sheeting.

Surfaces to be Made Smooth.

Section 207. All surfaces to which waterproofing is to be applied shall be made as smooth as possible; on these surfaces there shall be spread either hot melted pitch or asphaltum in a thick layer of uniform thickness; on this layer of pitch or asphaltum shall be laid a treated woven fabric of such material as may be approved by the Engineer; this process shall be repeated until such number of layers as may be required by the Engineer have been placed and a final coat of pitch or asphaltum shall then be applied.

Definition of Term "Ply."

Section 208. The term "ply" as used in these specifications shall mean a layer of treated woven fabric, both sides of which shall be coated with pitch or asphaltum at the time of laying.

Number of "Ply."

Section 209. The number of plies of waterproofing on the sides at stations shall in no case be less than three (3), except as hereinafter provided where brick laid in asphalt mastic is used.

Brick in Asphalt Mastic.

Section 210. Over the roof of the structure within station limits and over the tracks passing through the stations within said limits, also on the sides and bottom of the structure below a line of two (2) feet above ground water, or if ground water is below mean high water level, then two (2) feet above mean high water, one (1) ply of waterproofing, as described above, shall be used with one or more layers of brick laid in asphalt mastic; the number of layers of bricks to be determined by the Engineer.

In any case where brick laid in asphalt mastic is not used, the number of plies shall be as local conditions require and as directed by the Engineer.

Quality of Brick.

Section 211. The quality of brick shall be the same as provided in the specifications under the head of Brick Masonry. The brick shall be properly dried and shall be heated before laying.

Measurements and Payments.

Section 212. Brick in asphalt mastic will be measured in place to the lines ordered by the Engineer, and will be paid for at the price herein stipulated, Schedule Item 16.

Section 213. Six (6) plies of waterproofing may be substituted for brick in asphalt mastic, if approved by the Engineer, and will be paid for as provided for fabric waterproofing.

Asphalt Mastic.

Section 214. Asphalt mastic shall contain one-third (1-3) pure bitumen, the other ingredients to be sand and lime dust or cement, in proportions governed by local requirements and weather conditions.

Leaks Stopped.

Section 215. Any masonry that is found to leak at any time prior to the completion of the work and final acceptance thereof by the Commission shall be cut out and the leak stopped, at the sole expense of the Contractor.

Quality of Pitch.

Section 216. Pitch shall consist of either coal-tar or natural asphalt as the Engineer shall elect; it must be delivered on the work in packages that are plainly marked with the manufacturer's brand, and indicating the grade and quality of the material.

Coal-tar Pitch.

Section 217. The coal-tar pitch shall be straight-run pitch containing not less than twenty-five (25) per centum and not more than thirty-two (32) per centum of free carbon, which will soften at approximately 70° F., and melt at 100° F., being a grade in which distillate oils distilled therefrom shall have a specific gravity of 1.05.

Quality of Asphalt.

Section 218. The asphalt used shall be the best grade of Bermudez, lake or other natural asphalt, subject to the approval of the Engineer, and shall comply with the following requirements:

The asphalt shall contain in its refined state not less than ninety-five (95) per cent. of natural bitumen soluble in rectified carbon bisulphide or in chloroform. The remaining ingredients shall be such as not to exert an injurious effect on the work. Not less than two-thirds (2-3) of the total bitumen shall be soluble in petroleum

naphtha of seventy (70) degrees Baume or in acetone. The asphalt shall not lose more than four (4) per cent. of its weight when maintained for ten (10) hours at a temperature of three hundred (300) degrees Fahrenheit.

Woven Fabric for Waterproofing.

Section 219. The fabric to be used shall be a woven fabric which shall have been treated with pitch or asphaltum before being brought on the work. The fabric and the material used in its treatment shall be approved by the Engineer.

Concrete to Be Dry.

Section 220. All concrete shall be dry before waterproofing is attached. If, in the judgment of the Engineer, it is impracticable to have the concrete dry, then there shall be first laid a layer of the treated fabric, on the upper surface of which is to be spread the first layer of pitch or asphaltum; the said layer of fabric shall then be counted as one of the required plies.

Each layer of pitch or asphaltum fluxed as directed by the Engineer must completely and entirely cover the surface on which it is spread without cracks or blowholes.

Fabric for Waterproofing to Be Carefully Laid.

Section 221. The fabric must be rolled out into the pitch or asphaltum while the latter is still hot, and pressed against it so as to insure its being completely stuck over its entire surface, great care being taken that all joints are well broken by overlapping, and that the ends of the rolls of the bottom layers are carried up on the inside of the layers on the sides, and those of the roof down on the outside of the layers on the sides so as to secure a full lap of at least one (1) foot. Especial care must be taken with this detail.

Section 222. When the finishing layer of concrete is laid over or next to the waterproofing material, care must be taken not to break, tear or injure in any way the outer surface of the pitch or asphaltum.

Skilled Labor to Be Employed.

Section 223. None but competent men, especially skilled in work of this kind, shall be employed to lay the waterproofing.

Measurements and Payments.

Section 224. Measurements will be made on the basis of actual area covered by the number of plies ordered, no account being taken of laps, and the waterproofing will be paid for as herein stipulated, Schedule Item 15.

16—STEEL AND IRON.

Open Hearth Process.

Section 225. Steel shall be made in open hearth furnace.

Chemical and Physical Properties.

Section 226. The chemical and physical properties of finished material shall conform to the following limits:

Properties	Structural Steel.	Carbon Rivet Steel.	Steel Castings.
Phos. (Max.)	.04%	.04%	.05%
Sulph. "	.05%	.04%	.05%
Mn. "	.60%	.60%	.80%
Si. "	.10%	.10%	.35%
Ult. Str.	60000±4000	50000±4000	65000±(Min.)
Yield Point	55% Ult.	55% Ult.	35000±(Min.)
Elongation	$\frac{1500000}{\text{Ult. Str.}}$	$\frac{1500000}{\text{Ult. Str.}}$	20% in 2"
Fracture	Silky.	Silky.	Fine granular.
Cold Bend	180° flat.	180° flat.	120° (d.=3+.)

Yield Point.

Section 227. The yield point shall be that strain, beyond which the elongation ceases to be proportional to the weight imposed, and may be indicated by drop of beam. The speed of testing shall be governed by the inspector.

Finish.

Section 228. Sufficient discard shall be made to insure sound material free from piping or excessive segregation. The material shall be finished straight and smooth, and shall be free from all seams or other defects. Any imperfection which may develop during the progress of the work will be sufficient cause for rejection.

Steel Castings.

Section 229. Steel castings shall be true to pattern and free from injurious imperfections.

Standard Test Pieces.

Section 230. The tensile strength, yield point and ductility of the material shall be determined from a standard test piece of not more than two (2) inches in width, and about one-half (½) square inch in sectional area, cut from a full sized bar, with sides turned or planed parallel so as to give a uniform minimum section for at least nine (9) inches. Whenever practicable the two sides of the test piece shall be left as they come from the rolls, but the finish on opposite sides shall be alike in this respect.

Specimens for Bending.

Section 231. Specimens for bending shall be cut from the material as rolled.

Rivet Rods.

Section 232. Rivet rods shall be tested as rolled.

Steel Castings.

Section 233. For steel castings the test piece shall be turned to a uniform minimum section of one-half (½) inch diameter, for a length of at least two and one-half (2½) inches. Specimens for bending shall be one (1) inch by one-half (½) inch in section.

Ductility Elongation.

Section 234. In determining the ductility, the elongation shall be measured after breaking on an original length as specified, in which length shall occur the curve of reduction each side of the point of fracture.

Where Taken From.

Section 235. For rollers the specimens shall be cut from the finished bar so that the centre of the specimen shall be one inch from the outside of the bar.

Section 236. For steel castings the specimens shall be cut from coupons cast on some portion of a casting from each melt, and shall be annealed with the casting before it is cut off.

Treatment of Test Specimens.

Section 237. The material from which test specimens are cut shall receive the same treatment as the material which it represents in the finished structure.

Number of Tests.

Section 238. At least one tensile and one bending test shall be made from each melt of steel as rolled. In case steel differing three-eighths (⅜) inch or more in thickness is rolled from one melt, a test shall be made from the thickest and from the thinnest material rolled.

Variation in Weight.

Section 239. A variation in weight of any piece of steel of two and one-half (2½) per centum from that specified, shall be sufficient cause for rejection, except in case of sheared plates exceeding one hundred (100) inches in width, where the variation may be five (5) per centum.

Material Marked.

Section 240. Each finished piece of steel shall be marked with the melt number, excepting that bars for reinforcing concrete shall be bundled and the melt number stamped on a metal tag attached to each bundle.

WROUGHT IRON.

Double Rolled.

Section 241. All wrought iron shall be double rolled, and no scrap used in its manufacture. It shall be thoroughly welded in rolling, shall be tough, ductile, and fibrous, and shall be finished straight and smooth. It shall be uniform in quality and free from surface defects.

Method of Testing.

Section 242. The methods specified for testing rolled steel shall apply generally to wrought iron. It shall show by the standard test piece an ultimate strength of fifty thousand (50,000) lbs. per square inch, and a yield point of twenty-six thousand (26,000) lbs. per square inch. It shall bend one hundred and thirty-five (135) degrees with inner radius not to exceed twice the thickness of the piece tested. When nicked and bent the fracture shall show at least ninety (90) per centum fibrous.

CAST IRON.

True to Pattern Tests.

Section 243. All castings shall be true to pattern, out of wind and free from injurious imperfections. They shall be of a good quality of tough gray iron made by the cupola process. Sample test pieces, cylindrical in shape, one and one-quarter (1¼) inches in diameter, and fifteen (15) inches long, cast under the same circumstances as those which attended the casting of the full-sized piece, shall sustain at the centre, when resting upon two dull knife edges twelve (12) inches apart, a load of three thousand (3,000) lbs. with a deflection of at least one-tenth (1/10) of an inch before rupture.

WORKMANSHIP.

Quality.

Section 244 All workmanship shall be first class. All parts exposed to view shall be neatly finished. All nuts on the finished structure shall be hexagonal.

Rods Deformed Sections.

Section 245. Rods and bars to be used for reinforcing concrete shall be deformed as approved by the Engineer; plain bars will not be used.

Bent Rods and Bars.

Section 246. Bent rods and bars and other bent material shall be bent hot and annealed, except that obtuse bends in material less than one square inch section may be made cold when permitted by the Engineer. The bending shall be done before the material is delivered on the work. Except in special cases, all bends shall be made uniformly to template.

Material Straightened in Shop.

Section 247. All material shall be straightened in the shop before being worked in any way.

Holes Accurately Spaced.

Section 248. All holes shall be accurately spaced and punched. Unfair holes shall be reamed to exact match; drifting to enlarge the holes will not be allowed. Poor matching of holes will be cause for rejection.

Size of Punch.

Section 249. In punching, the diameter of the punch shall not exceed by more than one-sixteenth (1/16) of an inch, the diameter of the rivet to be used, and the diameter of the die shall be as small as may be required to punch a clean hole. When the materials to be sub-punched and reamed, a punch of diameter three-sixteenths (3/16) of an inch smaller than specified above shall be used, and all reaming shall be done after the material is assembled, with twist drills of one-sixteenth (1/16) of an inch greater diameter than the rivet to be used.

Sub-punching and Drilling.

Section 250. All material over seven-eighths (⅞) of an inch thick shall be drilled from the solid. Material over five-eighths (⅝) of an inch and not exceeding seven-eighths (⅞) of an inch in thickness shall be sub-punched and reamed. All other material may be direct punched.

Sheared Edges.

Section 251. Sheared edges of material exceeding five-eighths (⅝) of an inch in thickness, to be used in main members shall be planed at least one-eighth (⅛) of an inch.

Burrs Removed.

Section 252. All burrs shall be removed, and the members shall have all parts firmly drawn together with bolts before reaming or riveting is commenced.

Riveting.

Section 253. Rivets when driven shall completely fill the holes, and shall be machine driven wherever possible. They shall have full concentric heads or they shall

be countersunk when so required. Rivet heads shall not be flattened to less than half the diameter of the rivet on the line of the shank unless countersunk.

Use of Bolts.

Section 254. Generally the use of bolts instead of rivets will not be permitted, but when used in special cases the holes shall be reamed parallel, and the bolts turned to a driving fit.

Templates.

Section 255. All holes for field rivets, excepting those in connections of lateral and sway bracing, shall be sub-punched and accurately drilled to an iron template, or reamed and match marked while the connecting parts are temporarily assembled in the shop. In case of splices of upper chords or other compression members, the abutting members shall be brought to a forcible contact.

Finished Members.

Section 256. Finished members shall be true and free from kinks, twists, or open joints. Ends of floor beams and stringers shall be finished square and true.

Rods Upset.

Section 257. Rods and bars which are to receive a thread shall be properly upset. Where threads are cut on steel, they shall be properly filleted.

Annealing.

Section 258. Steel, except in minor details, which has been partially heated, shall be properly annealed. All steel castings shall be annealed.

Abutting Surfaces Faced.

Section 259. All abutting surfaces, except flanges of plate girders, shall be neatly planed or faced perpendicular to the direction of the strain, so as to insure even bearings.

Stiffeners.

Section 260. Stiffeners of plate girders shall fit neatly against the flange angles. Web splice plates and fillers under stiffeners shall be cut to fit within one-eighth (⅛) of an inch of flange angles.

Pins and Rollers.

Section 261. Pins and rollers shall be turned accurately to a gauge, and shall be of full size throughout. All pin-holes shall be bored truly and at right angles to the axes of the members to be connected, and shall fit the pins with a play not exceeding one thirty-second (1/32) of an inch.

Bed Plates Planed.

Section 262. Bed plates shall be planed. The bottom of the shoes shall be planed exactly parallel to the centre line unless otherwise shown. The cutting of the planing tool shall be in the direction of expansion.

Details Boxed.

Section 263. Nuts, bolts, rivets and other details shall be boxed.

Weight Marked.

Section 264. The weight of every piece and box shall be plainly marked upon it.

Inspection.

Section 265. Free access and information shall be given by the Contractor for a thorough inspection of material and workmanship, with proper office facilities.

Mill Orders in Triplicate.

Section 266. The Engineer shall be furnished copies in triplicate of all mill orders, and no material shall be rolled nor work done before the Engineer has been notified so that he may arrange for the Inspector.

Contractor Responsible.

Section 267. The Inspector shall make detailed reports of his inspection to the Engineer and may notify the Contractor of any defects in the material or workmanship, but all acceptances made by him shall be considered temporary, and his inspection shall in no way relieve the Contractor of full responsibility for the character and accuracy of the work until its completion and final acceptance by the Engineer.

Errors in Plans.

Section 268. The Contractor shall be responsible for all errors which can be discovered by checking or examining the plans.

Chemical Analysis.

Section 269. Chemical determination of the percentage of carbon, phosphorus, sulphur and manganese shall be made by the manufacturer from a test ingot, so taken, during the casting of each melt of steel, as to fairly represent the melt. Two copies of such analysis shall be furnished to the Engineer or his Inspector.

Check Analysis.

Section 270. Check analysis shall be made, at the discretion of the Engineer, of the finished material, on drillings from pieces selected by the Inspector from parts suspected of being most highly segregated. These analyses shall not show a variation above the ladle analysis of more than twenty-five (25) per centum for phosphorus, nor more than fifty (50) per centum for sulphur. The analyses shall be made by a chemist designated by the Engineer.

Contractor to Make Tests.

Section 271. The Contractor shall furnish, without extra charge, such standard test pieces as may be necessary to determine the uniform quality of the material and also the use of a reliable testing machine, with necessary labor for testing.

Inspector's Office.

Section 272. The Contractor shall furnish for the use of the Inspector a suitably equipped office at the mills and at the shops.

Loading and Shipping.

Section 273. All parts shall be carefully loaded and protected from injuries during transportation by such means as will be satisfactory to the Inspector. After delivery of materials at the work the Contractor will be required to store the same on skids at least twelve (12) inches above the ground and to keep the same in good condition. Any piece showing injurious effects of rough handling at any stage until the final acceptance of the work may be rejected.

Payments for Steel and Cast Iron.

Section 274. The prices to be paid for steel and cast iron are as herein provided in Schedule Items 19, 20, 21, 22, 23 and 24. These prices include the cost of material delivered and erected in the work, with the exception of Item 23, the placing of which is provided for in Item 22. These prices are to include also the cost of all necessary cleaning and painting (where painting is required) and of all other incidental work. The quantity of metal to be paid for shall be the number of pounds actually placed in accordance with the drawings or orders.

Miscellaneous Castings.

Section 275. For other castings, not included in the above and not including castings for sewer work or pipes, payment will be made as provided in Schedule Item 25.

WIRE MESH.

Wire Mesh.

Section 276. Wire mesh, of a character and weight to be approved by the Engineer, is to be furnished and placed around the lower flanges of the roof girders, and at other places as may be required, in order to hold the concrete in place.

Wire Mesh, Payment For.

Section 277. Wire mesh, wherever used, will be paid for as stipulated in Schedule Item 26, which price is to include the material in place and all work necessary and incidental thereto.

17—PAINTING.

Section 278. All metal work, excepting as otherwise herein provided, shall be painted with three coats of paint, including the shop coat, of kind and quality approved by the Engineer. Lead or carbon paint will generally be required.

Shop Coat.

Section 279. All iron shall be scraped free from scale, and receive one coat of red lead paint as herein specified before leaving the shops. All surfaces which come

in contact or are enclosed shall be painted before being assembled. All turned or faced surfaces shall receive a coat of white lead and tallow before leaving the shops.

Quality of Red Lead.

Section 280. The red lead shall be strictly pure, and shall contain at least 80 per cent. of "true lead" ($Pb_3 O_4$). The color shall be a clean, pure tint. The red lead shall be of the fineness that when washed with water through a No. 19 silk bolting cloth, not more than 1 per cent. shall be left on the screen.

Quality of Linseed Oil.

Section 281. The linseed oil must be absolutely pure, fully aged and ripened, well settled oil. It shall be perfectly clear on receipt, and after heating to 212° Fahr. on a current of hydrogen, shall not show a deposit of foots nor a loss of over 0.4 per cent. for raw oil, nor over 0.2 per cent. for boiled oil. The specific gravity at 60° Fahr. for raw oil shall be between 0.932 and 0.937, and for boiled oil between 0.936 and 0.940.

Original Packages.

Section 282. All material shall be delivered, inspected and sampled in original packages.

Proportions in Mixture.

Section 283. Red lead paint shall be mixed in the proportion of 500 pounds of red lead to 5½ gallons of boiled linseed oil, and 11 gallons of raw linseed oil.

Damaged Shop Coat to be Renewed.

Section 284. Where the shop coat has become damaged before or after erection, through any cause whatever, it shall be renewed with the same kind of paint as originally used, such renewal to be considered only as a part of the original shop coat. If the Engineer so directs, on members or parts of members buried in concrete the shop coat will be omitted.

Structural Steel and Rods.

Section 285. Structural steel and rods to be embedded in concrete shall be protected from the weather before being put in place, and shall be cleaned and scales removed but not painted before being incased in the concrete.

Second Coat Carbon Paint.

Section 286. The second coat of paint shall be a carbon paint approved by the Engineer. It shall be applied after erection, but not until the metal has been cleaned from dirt or other objectionable matter that may be found thereon.

Metal to be Cleaned After Erection.

Section 287. After erection the metal shall be thoroughly cleaned of all dirt, rust or scales by stiff wire brushes or sand blasts, as directed, and afterward dusted and thoroughly and evenly painted as described above. No paint shall be applied until the cleaning has been passed upon by an Inspector.

Section 288. Between stations the exposed members shall be given a third coat, which shall be a carbon paint of a color and quality approved by the Engineer.

Third Coat, When Applied.

Section 289. The third or finishing coat shall be applied to all exposed surfaces of the metal after its erection, and after a completion of the masonry or other work; it shall be applied at such time after such completion and before the final acceptance of the work as in the judgment of the Engineer may be advisable. The several field coats shall be sufficiently tinted to be distinctive.

Surfaces in Contact.

Section 290. Surfaces of exposed members inaccessible after erecting, shall be cleaned and painted before erecting.

Recesses, etc.

Section 291. All recesses that might contain water, or through which water could enter, must be filled with thick paint or a waterproof cement of ground skins before receiving final painting.

Section 292. All surfaces so close together as to prevent the insertion of a brush, must be painted thoroughly by using a piece of cloth. if necessary.

Rainy or Freezing Weather.

Section 293. No painting in rainy or freezing weather or on wet surfaces will be permitted.

Payments.

Section 294. Payment for painting is included in the prices for steel and iron.

18—DUCTS AND CONDUITS.

Vitrified Ducts—Quality and Size.

Section 295. The ducts to contain cables for transmitting electricity shall be manufactured of the best clay, thoroughly mixed, burnt and vitrified, sound in all respects, straight and free from soft spots, stones, cracks or blisters liable to impair their strength or durability; in lengths generally of from eighteen (18) to thirty-six (36) inches, shorter lengths shall only be used as directed; generally in four-way form with circular holes, the least diameter to be three and one-half (3½) inches; one, two or three-way ducts shall be used in special cases as determined by the Engineer. The interior surface of the holes to be smooth and clear of warts, tits, pits or blisters, which may tend to injure the electric cable in pulling the same through the duct. The ends to be cut smooth and at right angles to the axis of the duct and beveled on inside for three-quarters (¾) of an inch.

Thickness of Ducts.

Section 296. The outside walls and webs of four-way ducts to be three-quarters (¾) of an inch thick; the outside dimensions of ducts to be not less than nine and one-quarter (9¼) nor more than ten (10) inches, and constructed square on outer lines; the dimensions of single, two-way or three-way ducts shall be consistent with the above.

Ends Combed.

Section 297. The ends of ducts to be combed with two (2) sets of three (3) combings each, each combing to have a width of one-quarter (¼) of an inch and a depth of one-sixteenth (1/16) of an inch.

Glaze.

Section 298. The inside and outside of ducts to be thoroughly glazed in the most approved manner with good salt glaze.

Inspection.

Section 299. All ducts to be subject to inspection, both at the place of manufacture and on the work. All rejected ducts to be promptly removed by the Contractor at his expense.

How Laid.

Section 300. The ducts shall be laid in beds of cement mortar about one-quarter (¼) of an inch in thickness, with broken joints and with full bearing. Two (2) strips of thick unbleached muslin six (6) inches wide, and coated with neat cement mortar, shall be used to wrap each joint, the ends of the wrap to lap six (6) inches. The muslin shall be not less than 56 by 60 count, weight not less than four (4) ounces to the yard and width thirty-six (36) inches. In laying the ducts care must be taken to close abutting joints so that practically the end of ducts shall be in contact on all sides. Where ducts are laid on curves, the wraps must be doubled if required, to protect the openings between the ends of the ducts on the outer line of the duct and to exclude all mortar from duct openings.

Mandrels.

Section 301. The ducts shall be laid with a linked mandrel of the length and diameter to be prescribed, the same accurately fitting the duct openings, the mandrel to be left in each duct until the next succeeding duct is laid.

Dowel Pins.

Section 302. The ducts shall be laid with dowel pins, at least two pins on the opposite sides horizontally.

Laid to Line.

Section 303. The ducts shall be so laid that the centre of the holes shall be true to line and grade.

To be Rodded.

Section 304. After the ducts are laid, and sufficient time is given to allow the mortar in beds to partially set, they shall be rodded; all mortar or other foreign matter must be cleaned from the duct openings, leaving a clear and smooth opening.

If obstructions are found in rodding the ducts which cannot be removed by cleaners, so as to give a clear and smooth opening of three and one-half ($3\frac{1}{2}$) inches in all duct openings, the ducts shall be removed and relaid; all ducts, during construction and after being rodded, shall be plugged with suitable plugs, to be furnished by the Contractor. If wooden plugs are used they shall be immersed in water for at least eight (8) hours before being put in place.

Measurement and Payment for Vitrified Ducts.

Section 305. Tunnel ducts shall be paid for per duct foot in place at the price herein stipulated for tunnel ducts, Schedule Item 18, which price shall include the cost of furnishing, laying, rodding and all the material and work incidental thereto. The tunnel ducts to be provided under Schedule Item 18, shall include only those intended solely for the purpose of the operation of the Railroad.

Duct Manholes.

Section 306. Duct manholes shall be built at the sides of the railroad in connection therewith and as indicated on the plans. These manholes shall be generally at intervals of about three hundred feet, and shall be on either or both sides of the Railroad, as necessary, in accordance with the location of the duct lines. They may vary in form as may be necessary to accommodate the work to local conditions.

Duct Manholes at Stations.

Section 307. Duct manholes will be built at the ends of the stations to provide for the passage of the ducts under the station platforms, and if found necessary on account of the lengths of stations, additional manholes will be constructed under the platforms.

Section 308. At manholes the ducts will be laid to conform to the special conditions.

Section 309. In all work where iron pipe or fibre conduits are installed for a part of their length in the structure and for another part as open construction, the ends of such runs shall be carried outside of said structure as open construction and shall terminate in outlet or junction boxes located by the Engineer.

Section 310. The iron pipe or fibre conduits required by section 309 will be built mainly in the walls, roofs or other parts of the stations; portions, however, of the runs will be left exposed, to be covered later by the station finish work.

Quality of Iron Pipe Conduit.

Section 311. All iron conduit used for any purpose in connection with the work herein shall be of the best grade (Galvaduct or equal), standard weight wrought iron or steel piping, protected inside and out by a coat of zinc or enamel. It shall be delivered to the work in bundles of full length pipes, each length marked with the trade-mark of the manufacturer. It shall bend cold 90 degrees about a radius equal to ten diameters without signs of flaw or fracture in either pipe or enamel.

Installation.

Section 312. All conduit shall be carefully cleaned before and after erection, and all ends shall be reamed free from burrs, and inside surfaces shall be free from all imperfections liable to injure the cable.

Joints Watertight.

Section 313. All joints shall be made with standard couplings, well treated with red lead, and screwed up to make a watertight job.

Fibre Conduits, Quality, Laying, etc.

Section 314. All fibre conduit shall be made of impregnated fibre equal to that manufactured by the Fibre Conduit Company of Orangeburg, New York.

It shall be of uniform thickness, having walls of not less than one-quarter ($\frac{1}{4}$) inch and true cylindrical holes not less than two (2) inches in diameter. Lengths shall be not less than five (5) feet, and all ends shall be finished.

All joints shall be made by suitable finished sleeves fitting closely over the ends of the conduit and made watertight by making up with an approved bituminous compound.

After laying, all ducts shall provide a clear, true opening, free from obstructions and imperfections in any way injurious to the wires to be installed. All ducts shall be rodded and cleaned with an approved mandrel not less than one and three-quarter ($1\frac{3}{4}$) inches in diameter and eighteen (18) inches long.

Built in Concrete, etc.

Section 315. Conduits built into concrete or other parts of the structure shall be properly protected and supported, so that the same shall not be injured by the building operations.

Not Built in Concrete.

Section 316. Conduit not built into the structure shall be supported by approved pipe straps located not more than eight feet apart, or in any other manner designated by the Engineer, and they shall be kept boxed or otherwise suitably protected from injury.

Bends and Offsets.

Section 317. Bends and offsets may be made in the field if proper tools are used, but in no case shall deformed, split or crushed conduit be erected. Not more than two right angle bends shall be made between any two outlet boxes without special approval of the Engineer.

Measurement and Payment.

Section 318. Measurements for the above iron pipe or fibre conduits shall be per linear foot of single conduit placed in the work—in accordance with the requirements—and payment for the same shall be as herein stipulated in Schedule Item 32.

Outlet and Pull Boxes and Payment for Same.

Section 319. All outlet and pull boxes shall be made of cast iron, with openings threaded for the conduit ends, and conduits shall be screwed into these openings and made up with red lead to effect a watertight joint. Covers shall be of cast iron and watertight, and no other boxes or covers shall be used except under special permission of the Engineer. The price for each cast iron outlet box furnished and placed in the work shall be as herein stipulated in Schedule Item 33.

19—Drains and Pumps.

Railroad to be Drained.

Section 320. Every part of the Railroad, the stations and appurtenances connected therewith, must be arranged so far as possible that any water finding access thereto will be led away automatically to the City sewers.

Section 321. Where the Railroad is on an inclined gradient, and is constructed in dry, porous soil, the floor of the Railroad may be depended on to act as a conduit. At the bottom of the inclined gradient connections must be made with a sewer or with subdrains lying beneath the Railroad and draining into the sewers.

Subdrains.

Section 322. Along such parts of the work where the soil is not porous, or where the floor of the Railroad cannot, in the judgment of the Engineer, be used as a conduit, there shall be laid, beneath the rail level and on a continuous descending gradient, drain pipes of vitrified salt-glazed stoneware, of the quality described in these specifications for sewer pipe. These drain pipes shall be of such diameter not exceeding fifteen (15) inches, as the Engineer may direct, and there shall be one (1) such drain for each two (2) tracks. Each drain shall be laid in the concrete or directly in the soil with tight or open joints, as directed, and in such manner and in such position as, in the opinion of the Engineer, local circumstances require.

Connections and Cross Drains.

Section 323. Where drain pipes connect with the City sewers, the junction shall be protected by suitable traps, and back-pressure valves or gate valves where necessary, to prevent back rush of water or gas from the sewers. Connections with the Railroad shall be as necessity demands and all as directed by the Engineer. Cross drains to connect with the main drains will be placed at such places and in such manner as the Engineer shall direct; also vertical drains at the sides of the Railroad. These drains shall be of vitrified pipe or. of cast iron. as directed.

Broken Stone for Drainage.

Section 324. On the roof of the Railroad and at other points as may be directed or indicated on the plans, broken stone shall be placed for the purposes of drainage.

Sumps.

Section 325. At the low points of the grade of the Railroad where the same passes below the bottom of adjacent sewers there shall be constructed sumps connected with the subdrains or the floor of the Railroad. Such sumps must be watertight, with a capacity of not less than eight hundred (800) gallons each.

Pumps for Tunnel Drainage.

Section 326. Adjacent to each sump a suitable enclosure shall be provided in which two pumps shall be installed, each of which shall have ample capacity to remove all the water entering the sump at that point under ordinary conditions. These pumps shall each have a separate source of power, and shall be arranged to operate antomatically. Under this contract the Contractor will only furnish the pump or pumps required and set them in place as directed, including the necessary pipe and drainage connections between the sumps and sewers.

The pumps shall be of the capacity required by the Engineer.

Capacity.

Section 327. If in the opinion of the Engineer the service requires it, each of these pumps shall be able to remove from the sump eight hundred gallons per minute.

Delivery to Sewers, etc.

Section 328. The delivery of such pumps shall be into the City sewers, and all piping, valves, etc., in connection therewith, shall be installed as a part of this contract.

Payment for Drains, Broken Stone, Pumps, etc.

Section 329. All drains shall be measured in place and the actual net length as laid for each class of drain will be paid for as herein provided in Schedule Item 17. The prices therein provided for each class of pipe will include providing and laying the pipe and all specials of any nature whatsoever such as bends, tees, wyes, handholes, etc., and all materials necessary for jointing the same. Where back-pressure valves or gate valves are required the cost of setting the same will be included in the above, but the Contractor will be paid in addition the actual net cost of such valves plus ten (10) per cent.

Section 330. For broken stone for drainage, furnished and placed, Section 324, payment will be made as provided in Schedule Item 14.

Section 331. For pumps, Section 326, the Contractor will be paid as provided in Article XII. of the contract, not including, however, the pipe connections with sumps and sewers which pipe will be paid for as hereinbefore provided in Schedule Item 17.

Soil Pipes for Stations.

Section 332. It will be necessary to lay soil pipes in the floors and walls of the stations. These pipes are to be cast iron, "extra heavy." They will be placed in positions as shown on the plans and will be paid for as provided in Schedule Item 34.

20—SEWERS.

In Accordance With Plans and Specifications.

Section 333. All sewers and appurtenances shall be built of the materials, of the sizes and dimensions, on the lines and grades, at the depths, with the connections, and in the manner called for by these specifications and shown on the drawings.

Change of Location.

Section 334. If in the opinion of the Engineer, it is impracticable during the progress of the work to construct any sewers, manholes, or other appurtenances, according to the contract drawings, owing to the presence of unknown subsurface structures or other contingencies, the Contractor shall construct such sewers, manholes or appurtenances in the location given by and according to the directions of the Engineer.

General Clauses Apply.

Section 335. The general clauses in this contract relating to excavation, both in open trench and tunnel, backfilling, cement, mortar, masonry, waterproofing, piling, timber work of all kinds, care of streets and public places, maintenance of surface and subsurface structures, protection of persons and property, repaving or restoring of the surface of the street or other public places, responsibility of the Contractor, authority of the Engineer to examine and condemn materials, and the power of the Commission and the Engineer in all or any other respects to enforce this contract, apply to the construction and reconstruction of sewers, water mains or pavements, unless specifically amended or exempted, both along the route occupied by the Railroad and elsewhere.

No Claims for Damages.

Section 336. Should postponement or delay be occasioned by the precedence of paving or other contracts, which may be either let or executed by the Borough President, Commissioner of Water Supply, Gas and Electricity, or other heads of

departments, either before or after the execution of this contract, on the line of the work, no claims for damages therefor shall be made or allowed; nor shall any claim for damages be made or allowed in consequence of the street or the adjoining sewers not being in the condition contemplated by the parties at the time of making the contract, except that if the Contractor shall be delayed in the performance of his work by reason of the street or the adjoining sewers not being in such condition, an allowance of time may be given for the completion of the work as elsewhere provided in this contract.

Size of Trenches.

Section 337. The trenches for sewers and basin culverts both in earth and in rock, in streets along the route of the Railroad, shall have vertical sides and shall be not less than six inches wider than the greatest external width of the sewer or its foundation on the side farthest away from the subway; and in other streets the trenches shall have vertical sides, and shall be not less than six inches wider on each side than the greatest external diameter of the sewer, but shall be not less than three feet in width. They shall be excavated to the depth and to the form of the sewer or its foundation.

Limit of Trench Opening.

Section 338. Not more than one hundred (100) feet of trench in sewers off the line of the railroad shall be opened at any one time in advance of the sewer already completed, unless by permission of the Engineer, and for a distance specified.

Excavation Completed in Advance.

Section 339. The excavation of trenches shall be fully completed a sufficient distance in advance of the laying of the sewer, and the exposed end of the sewer shall in all cases be fully protected.

Trenches for Manholes and Receiving Basins.

Section 340. Where the foundation for a manhole or a receiving basin extends beyond the line of such manhole or receiving basin, the minimum excavation required in earth shall be to the lines of the smallest rectangle, enclosing the full dimensions of the exterior of the foundation, and shall have vertical sides to the surface, but it shall, in all cases, be not less than six inches larger than the greatest external dimension of the manhole or receiving basin. In rock excavation, the trench shall be six inches larger than the greatest external dimension of the manhole or receiving basin, or its foundation, and shall have vertical sides to the surface.

Foundations.

Section 341. Where the ground does not afford a sufficiently solid foundation, the trench shall be excavated to such increased depth as the Engineer may deem necessary, and this extra depth, and all other irregularities in the bottom of the trench, shall be filled up to the required level and form, with such material, and in such manner, as the Engineer shall direct. If so directed, piles shall be driven and a timber or reinforced concrete foundation shall be constructed, as elsewhere provided in these specifications, to support the sewer.

Inspection of Grades.

Section 342. When the trench is properly prepared, and before laying any sewer, the Contractor shall notify the Engineer, who will, thereupon, cause the grades for the sewer to be tested, and if correct the sewer shall then be laid in the presence of a duly authorized inspector, and no construction work shall be done in his absence.

Trenches to be Kept Free from Water.

Section 343. The trenches shall be kept entirely free from water while the foundation and the masonry are being constructed or the sewer laid. In no case shall water be allowed to flow over the invert or foundation or through the sewer until the mortar is thoroughly set.

Tunneling.

Section 344. When tunneling for sewers shall be deemed advisable, it shall be done in a manner approved by the Engineer.

Gutter and Passageway to be Kept Open.

Section 345. At all times, gutters shall be kept open for surface drainage, and the streets and sidewalks shall be kept clear and free for the passage of carts, wagons, carriages and street or steam railroad cars or pedestrians, and as otherwise provided in these specifications.

Crosswalk, Sidewalk and Roadway to be Kept Clear.

Section 346. Where any crosswalk or roadway is cut by the trench, it shall be temporarily replaced by a timber bridge with side railings, according to the direction and approval of the Engineer. The work shall at all times be conducted so as to cause as little inconvenience as practicable to the public.

Disposition of Paving Material.

Section 347. All curb, gutter, flagging, paving and macadam stones, necessary to be removed, which in the judgment of the Engineer are suitable to be used again, shall be stored in such places as the Engineer shall direct, or shall be removed as provided in these specifications; in all cases a passageway on the sidewalks and in the roadway shall be preserved free from needless obstructions.

Flow of Sewers to be Maintained.

Section 348. The Contractor shall provide for the flow of all sewers, drains and watercourses, interrupted during the progress of the work, and shall restore and make good all connections, and shall immediately cart away all offensive matter, in such manner and with such precautions as the Engineer may direct. All temporary house connections shall be made by closed iron pipes, with suitable provision for preventing leakage at joints. Wooden troughs for such connections will not be permitted.

Brick.

Section 349. In the construction of brick masonry none but the best quality of common brick burned hard entirely through, regular and uniform in shape and size and of compact texture, shall be used. They shall be culled as they are brought on the ground, and bats and bricks of improper quality are to be removed from the work. A limited number of bats may be used in manholes and closures, and in the outer ring of the sewers where more than two rings of bricks are required.

How Laid.

Section 350. The bricks shall be properly wet immediately before laying. Every brick is required to be laid in a full joint of mortar, made as described in these specifications, on its bed, end and side, at one operation. In no case is mortar to be slushed or grouted in afterward. The bricks shall be neatly and truly laid, every second course to line, and the points to be carefully struck on the inside.

Racked Back or Toothed.

Section 351. All brick work, as it progresses, shall be racked back in courses, and in no case will it be allowed to be toothed, unless by special permission from the Engineer.

Back or Stone Inverts.

Section 352. All inverts, or bottom curves, shall be formed from profiles accurately made according to the dimensions of the sewer, and correctly set according to the grades furnished. The masonry shall be allowed to set for twenty-four (24) hours before the arch is turned. Vitrified brick or granite paving blocks shall be used for the inner ring of the invert when required by the Engineer, and whenever so used they must be thoroughly jointed, so as to be watertight along the inner surface of the sewer. The last course of the invert masonry below the springing line shall be laid as headers.

Brick Arches.

Section 353. The arches or upper curves shall be formed on strong centres of correct form, according to the sizes and shapes required, and keyed with stretchers in full joints of mortar. The extrados of the arch shall be plastered with mortar one inch thick, mixed in the proportion of one part of cement to two parts of sand. The centres shall not be removed or withdrawn in less than thirty-six hours, or until the work is thoroughly set, and until the filling in of the arch is properly put into place to a depth which is at least one foot above the crown of the arch. The centres in all cases shall be struck and not drawn, so as not to crack or injure the work. Should any crack or settlement appear in the arch after the centres are removed, so much of the work as the Engineer may require shall be taken down immediately and replaced.

Spurs.

Section 354. Vitrified or iron sewer pipes or spurs, equal in every respect to those described elsewhere in these specifications, and of a size required by the Engineer, but not less than six inches interior diameter with hubs moulded for house connections, and of sufficient length to project at least four inches beyond the exterior of the

sewer, shall be built into the walls of brick sewers and at such an angle as indicated on the plan, or as the Engineer may direct.

How Built In.

Section 355. Spurs shall be built in wherever similar house connections exist in the present sewer which is to be reconstructed under this contract, but in no case shall the distance be more than twenty feet between spurs. In the case of the construction of new sewers where no sewers existed previously, except sewers under public parks or those crossing intersecting streets, they shall be built opposite each house, and where there are no houses, they shall be not more than fifteen feet apart on each side of the sewer or at such frequent intervals as local conditions may require. They shall be set so that their inner ends shall be flush with the inner face of the sewer, at such height in the walls as the Engineer may direct, and each pipe shall be sealed on the outside with an approved earthenware cover set in mortar.

Iron Chair Spurs.

Section 356. Where the sewers to be built under this contract will be at a depth greater than thirteen feet below the established grade of the street (or below the surface of the street where final grades have not been established), cast iron chair spurs, of the design shown on the drawings, not less than six inches in diameter and of the weight of extra heavy soil pipe, shall be used unless otherwise ordered by the Engineer. Where house drains are to be connected to these spurs, extra heavy soil pipe and fittings shall be used for the riser between the spur and the house drain. Where the spurs are provided for future connections, risers of extra heavy soil pipe shall be placed in each spur and shall be brought to a point thirteen feet below the established grade of the street, the end of which shall be sealed with an approved cover laid in cement mortar. The joints of this pipe shall be packed, leaded and caulked in accordance with these specifications for laying water mains.

Under Station Platforms.

Section 357. Wherever the sewer passes under a station platform or other structure, extra heavy soil pipe shall be laid from the spur to the outside of such station or other structure, brought up to a point thirteen feet below the established grade of the street, caulked and sealed, as provided above. All pipes passing under such structures shall be laid in concrete.

Concrete Sewers, Form, Dimensions and Materials.

Section 358. If, during the construction of the sewers, it is deemed advisable to interchange concrete and brick, the Contractor may, with the approval of the Engineer, build such sewers of either kind and quality herein specified.

Steel Bars Used if Ordered.

Section 359. Concrete sewers shall be reinforced with steel bars, if so indicated on the plans or directed by the Engineer.

Profiles and Inverted Centres for Inverts.

Section 360. Proper profiles for the concrete inverts shall be set up at the required distances, and the concrete for the bottom and invert of the sewer shall be deposited in place and rammed and worked down to the required shape. The concrete for the bottom and invert, if so directed, shall be placed in alternate lengths extending between every other pair of profiles, so that opportunity may be given to properly work the concrete in place.

Invert to be Protected.

Section 361. The concrete of the invert shall be protected during the progress of the work with planking, or by such other suitable methods as the Engineer shall direct and for so long a time as he may require.

Forms, Moulds, etc.

Section 362. Suitable forms or moulds, of the size and design to be approved by the Engineer, shall be provided by the Contractor to support the concrete of the side walls and roof while the same is being rammed into the permanent work.

Defective Work.

Section 363. If any voids, or irregular or defective work is discovered upon removing the forms or moulds, such voids or work shall be cut out and filled with a rich concrete or mortar mixed in such proportions and of such materials as provided elsewhere in these specifications.

Joints.

Section 364. No joints between different sections of the walls of a sewer shall, in any case, be a straight line, but shall always be stepped or toothed, so as to give a broken joint in the manner to be approved by the Engineer.

Spur Pipes, Branches, etc.

Section 365. In so far as they will be applicable to sewers constructed of concrete, the provisions and requirements for spurs, branches, etc., in brick sewers shall be understood to govern in such construction.

Vitrified Pipe Sewers—Quality of Pipe.

Section 366. Pipe sewers shall be built of vitrified, salt glazed stoneware pipe, with or without hub, as the Engineer may direct. The pipe shall be of the best quality, thoroughly and perfectly burnt, without warps, cracks or imperfections, well and smoothly glazed over the entire inner and outer surfaces and perfect in shape. The pipe shall be subject to all tests ordered in conformity with any requirements of the Bureau of Sewers, at any time previous to its being used.

Thickness.

Section 367. The size of the pipes shall be designated by their interior diameters. Each pipe shall be a true cylinder, and of even thickness throughout, according to the following schedule:

6-inch pipes shall be not less than ⅝ of an inch thick.
8-inch pipes shall be not less than ¾ of an inch thick.
10-inch pipes shall be not less than ⅞ of an inch thick.
12-inch pipes shall be not less than 1 inch thick.
15-inch pipes shall be not less than 1¼ inches thick.
18-inch pipes shall be not less than 1½ inches thick.
24-inch pipes shall be not less than 2 inches thick.
30-inch pipes shall be not less than 2½ inches thick.

Lengths.

Section 368. No pipe shall be less than 2 feet in length, and pipes of 12 inches, 15 inches and 18 inches in diameter shall be not less than 3 feet in length.

Curved and Split Pipes.

Section 369. When required, curved pipes shall be furnished and laid, curved to such a radius as may be required or as indicated on the plan of the work. No curved pipe shall exceed 3 feet in length. Split pipes shall be used when found necessary.

Hub and Spigot Pipe.

Section 370. In case the Engineer shall order hub and spigot pipe to be used, the hub shall have a depth of at least three (3) inches from its face to the shoulder of the pipe on which it is moulded, and shall have an interior diameter not less than one (1) nor more than two (2) inches greater than the exterior diameter of the pipe which is to be fitted into it.

Straight Pipe With Collars.

Section 371. In case the Engineer shall order pipe without hubs to be used, it shall be fitted with a collar of the same thickness as the pipe and not less than five inches wide. Each collar must have an internal diameter of not less than one-half inch nor more than one and one-half inches greater than the external diameter of the pipe to which it is to be fitted.

Spur Pipes.

Section 372. Pipes having spurs not less than six inches in diameter with hubs moulded thereon for house connections shall be furnished and laid at such points as indicated on the plan or as directed by the Engineer, and when not immediately used, they shall be sealed on the outside with approved vitrified earthenware covers set in mortar.

Risers.

Section 373. The provisions for risers on brick sewers shall also apply to pipe sewers.

Bends.

Section 374. Bends, siphons and special pipes shall be furnished and laid of the size and forms shown on the plans of the work, or as required.

Pipe Sewers, How Laid.

Section 375. All pipes shall be laid in concrete cradles of the required form and dimensions. The first layer of concrete shall be four inches thick, for the full width of the cradle, and after being thoroughly tamped shall be allowed to set for a period of not less than twenty-four hours. Upon the bed thus prepared, the pipe shall be laid true according to the lines and grades furnished. The ends of the pipes shall abut against each other and in such manner that there shall be no shoulder or unevenness of any kind along the bottom half of the sewer on the inside. Unless otherwise ordered, not less than fifteen feet of pipe shall be laid at any one time, in any one length of trench. The remainder of the concrete shall then be put in place and shall be exposed for at least twenty-four hours for inspection, as required for the bottom course.

Jointing Hub and Spigot Pipes.

Section 376. When hub and spigot pipes are used, the lower half of each hub shall be plastered on the inside with a layer of cement mortar mixed in the proportion of one part of cement to one part of sand and of sufficient thickness to bring the inner surface of the abutting pipes flush and even with the established flow line. After the pipes are fitted, the space between the inside of the upper half of each hub and the outside of the entering pipe shall be filled with cement mortar mixed as above specified, and the outside of the joint shall be thoroughly sealed with the same kind of mortar and the joints carefully wiped inside and outside.

Jointing Pipes Without Hubs.

Section 377. When pipe without hubs is used, a collar or ring shall be used at joints and shall lap equally the ends of each abutting pipe. Such collar or ring shall consist of not more than three pieces, the largest of which shall be placed at the bottom.

Spaces Between Pipes Uniform.

Section 378. The space between the ring and the pipes shall be as uniform as possible and shall be thoroughly filled with cement mortar mixed in the proportions specified for hub and spigot pipe. The joints shall be carefully wiped and pointed inside and outside and all mortar that may be left on the inside shall be removed and the inside of the pipe left clean and smooth throughout.

Iron Pipe Sewers.

Section 379. Sewers of iron pipe, of quality and laid in the manner described elsewhere in these specifications for the laying of water mains, shall be laid wherever indicated on the plans or at such places as the Engineer shall direct.

Special Castings.

Section 380. Wherever such pipes are laid under station platforms or through vaults, they shall, when required by the Engineer, be provided with special castings for manholes, which shall be fitted with a cover bolted on so as to make an airtight joint, according to the plans to be furnished by the Engineer.

Ventilators.

Section 381. Whenever, in the opinion of the Engineer, it becomes necessary to provide ventilation for sewers under station platforms or other structures, iron pipe shall be laid from the sewer to the surface of the street and fitted with proper gratings according to the plans to be furnished by the Engineer.

Connections.

Section 382. All existing sewers, culverts, drains and house connections intercepted by the proposed sewers, culverts or receiving basins shall be connected with the new work by proper curves and grades and in such manner as the Engineer shall direct; and all drains, basins or culverts rendered unnecessary or becoming disused by the work herein contemplated shall be filled in and made solid with good wholesome earth in the manner directed. Provision shall also be made for the connection of future sewers or basins by constructing brick spurs or inserting vitrified pipe at the points indicated on the contract drawings and at other points as the Engineer may direct. These connections shall be closed with bulkheads not less than eight inches in thickness and of the quality specified for brick masonry.

Fresh Work to be Protected.

Section 383. All fresh work shall be carefully protected from injury in every way. No wheeling or walking will be allowed on it and any portion injured must be relaid by the Contractor; no walking or working over the pipes after they are laid,

except as may be necessary in tamping the earth and refilling, will be allowed until there is at least two and one-half feet of earth over them.

Pipes to be Kept Clean.

Section 384. The interior of pipe sewers shall be carefully freed from all dirt, cement and superfluous material of every description as the work progresses, for which purpose a disc, mould or plate, attached to a rod sufficiently long to pass two joints from the end of the pipe last laid, shall be continuously worked through.

Exposed Ends of Pipes to be Protected.

Section 385. The exposed ends of pipe sewers shall, in all cases, be protected with a board or other stopper carefully fitted to the pipe, to prevent earth or other substances from washing in, and in no case shall brick or stone be used for that purpose.

Manholes.

Section 386. The masonry of manholes shall be carried up so that the top of the iron head when set shall be at the level of the established grade of the street at that point or to such height as the Engineer may direct, and from templates correctly made and set at top and bottom, between which not less than eight lines shall be drawn. Where manholes are not built to the established grade of the street, they shall be covered, when necessary, by selected bluestone slabs eight inches in thickness, to support the manhole heads. All joints shall be neatly struck and pointed on the inside. Each manhole shall be plastered thoroughly on the outside with cement mortar one inch in thickness, mixed in the proportion of one part of cement to two parts of sand.

Foundations.

Section 387. The foundations for manholes shall be of concrete or masonry of the kind indicated on the plans and shall be not less than twelve inches below the invert elevation of the sewer, except as otherwise indicated on the plan. When foundation additional to that indicated on the plan is required, it shall be built as directed by the Engineer.

Section 388. Sewer pipes shall be built in and trimmed, when necessary, so as to be flush with the inner face of the manhole, and an arch, laid in cement mortar, shall be turned over the pipe.

Vitrified Bricks or Granite Blocks.

Section 389. The invert shall be built of vitrified brick, granite blocks or concrete masonry, as indicated on the contract drawings.

Use of Bats.

Section 390. A reasonable number of bats not smaller than half bricks may be used in the construction of manholes or receiving basins, provided all interstices are thoroughly filled with mortar.

Steps.

Section 391. Standard steps of good quality of galvanized wrought iron, of the size, length and shape required for steps, shall be built into the interior sides of all manholes at a distance apart of not more than fifteen (15) inches vertically and they shall be so arranged that the lowest step shall be not more than two feet above the bench at the bottom of the manholes nor more than two feet above the invert of the sewer where there is no bench. Each manhole head shall be cast with a wrought iron step on the inside, when directed by the Engineer.

Bluestone.

Section 392. Hammer-dressed bluestone shall be furnished and laid of the form and thickness required as indicated on the plans or as otherwise directed.

Manhole Head and Cover.

Section 393. A cast iron manhole head and cover of the quality specified for cast iron, and except in special cases, of the pattern adopted by the President of the Borough in which the work is located, and in dimensions, weight and all other respects satisfactory to the Engineer shall be fitted on a bed of mortar to each of the above described manholes. Manhole heads and covers which do not conform to these specifications shall be at once removed from the work.

Perforations.

Section 394. Covers to be used on manholes in the street shall be perforated. Those used on sidewalk manholes shall be tight-fitting, without perforations.

Weights.

Section 395. Each manhole head and cover shall have its weight distinctly marked upon it with oil paint. The following shall be allowed as the minimum and maximum weights:

Street manhole head, 475 to 500 pounds.
Street manhole cover, 135 to 150 pounds.
Sidewalk manhole head, 300 to 310 pounds.
Sidewalk manhole cover, 100 to 110 pounds.

Noiseless Heads and Covers.

Section 396. When the pavement of the street is asphalt on wooden block, the manhole shall be fitted with a noiseless head and cover, to be approved by the Engineer, where new heads and covers are necessary.

Sealed Manhole Heads and Covers.

Section 397. All manholes in station platforms, vaults or other structures shall be provided with sealed manhole heads and covers according to the design indicated on the plans.

Emergency Manholes.

Section 398. Where a sewer crosses under the subway, emergency manholes shall be provided when directed by the Engineer and according to plans to be furnished by him.

Manholes to be Completed.

Section 399. Manholes shall in all cases be fully and completely built and fitted with their covers as the work progresses, and the sewers shall not be laid beyond or in advance of any uncompleted manhole.

Receiving Basins.

Section 400. Receiving basins shall be built as located on the plans or as the Engineer shall direct and in accordance with the plans to be furnished. Each portion of the basin shall be built of the size and materials designated on said drawings and shall be thoroughly plastered, both inside and outside, with cement mortar in the proportion of one part of cement to two parts of sand.

Foundations.

Section 401. The foundations for receiving basins shall be of concrete or masonry of the kind indicated on the plans and shall extend not less than twelve inches below the finished floor of the basin, except as otherwise indicated on the plans. When additional foundation is required, it shall be built as directed by the Engineer.

Stone Flooring.

Section 402. The flooring shall be of hammer-dressed North River bluestone flagging, not less than three inches thick, in not more than two pieces, and shall be well set in a full bed of mortar and rammed into place. The floor may be finished with cement mortar mixed in the proportion of one part of cement to one part of sand if so directed by the Engineer. The mortar shall be spread, while fresh, upon the concrete base and before the latter shall have reached its first set; it shall be in such quantity that after thorough manipulation it shall be one inch in thickness.

Head Stone and Gutter Stone.

Section 403. Where head stone and gutter stone are required they shall be of sound, durable granite of the dimensions indicated on the plan, hammer dressed to an even surface and cut to the satisfaction of the Engineer. Cast iron basin heads and gutter pieces of the design indicated on the plans shall be set instead of the above when required.

Cast-Iron Cover.

Section 404. A cast-iron cover of approved pattern weighing not less than eighty nor more than ninety-five pounds shall be fitted to the opening in the head stone.

Grate Bar.

Section 405. A grate bar made according to the plan shall be fastened solidly into the said head stone in the manner indicated.

Cast-Iron Trap.

Section 406. A cast-iron trap of the form and dimensions indicated on the plan free from imperfections, and properly coated with coal pitch varnish shall be furnished and built into place as directed by the Engineer.

Joints.

Section 407. The joints shall be tightly fitted with an oakum gasket or with cement mortar if so desired.

Iron Steps.

Section 408. Galvanized iron steps of the same design required for manholes shall be built into the walls.

Culvert Pipes.

Section 409. The culvert pipe for connections with sewers shall be 12-inch vitrified pipe unless otherwise indicated on the plan, and of the kind and quality previously described, and shall be laid, in all cases, in a concrete cradle of the form and dimensions required for pipe sewers in accordance with the directions of the Engineer. In case it becomes necessary to connect any basin already built, with the work to be constructed, so much of such culverts as in the opinion of the Engineer may be necessary shall be taken up and rebuilt or relaid with vitrified pipe, or brick as the case may be, in the manner described above and reconnected in a straight line from the basin to the sewer.

Flush Tanks.

Section 410. Automatic flush tanks of a type approved by the Engineer shall be built where indicated on the plans or where directed by the Engineer.

Waterproofing.

Section 411. Whenever, in the opinion of the Engineer, it is necessary to waterproof a sewer, chamber or receiving basin, or their appurtenances, it shall be done as indicated on the plans or as directed by the Engineer and in the manner described elsewhere in these specifications.

Mortar.

Section 412. All masonry shall be laid in Portland cement mortar of the quality described in these specifications. It shall be mixed in the proportion of one (1) part of cement to two (2) parts of sand, excepting as otherwise specially provided.

Concrete.

Section 413. All concrete for sewers shall be made in the proportions of one (1) part of cement to two and one-half (2½) parts of sand and four and one-half (4½) parts of stone of the quality described in these specifications.

Paving.

Section 414. On the completion of each section of one hundred feet of sewer, the sidewalks and roadways shall be restored as provided under the heading of "Street Surface and Park Surface Restored."

Permits for Connections.

Section 415. The Commissioner of Public Works shall have the right to connect any sewer or sewers with the sewers herein described or to grant permits to any person or persons to make connections therewith at any time before it is finally completed, and the Contractor shall not interfere with or place obstructions in the way of such person or persons as may be employed in building such new sewer or sewers or in making such connections. This is not to be construed, however, as permitting the introduction of storm water or sewerage into any sewer being constructed under this contract before its final completion.

Thoroughly Cleaned.

Section 416. During the progress of the work, and until the entire completion and final acceptance thereof, the sewers, drains, basins, culverts and connections shall be kept thoroughly cleaned throughout, and left clean, and the drainage of any old sewer that may be taken up or intercepted shall be provided for and taken care of by the Contractor, all at his own expense.

Payment for Sewers.

Section 417. Payment for sewers will be per lineal foot of sewer complete as herein provided in Schedule Items 37 to 74, both inclusive, except as hereinafter specifically provided. The price for each class of sewer is to include each and every item applicable thereto as herein given in Sections 333 to 416 of these specifications and as otherwise provided in the contract and as indicated on the plans; excepting as is hereinafter specially provided.

Excavations.

Section 418. In addition to the price per lineal foot for completed sewer, as above provided, excavation will be paid for at the prices herein stipulated in Schedule Items 2-A and 3-A (which prices shall include all the matters referred to in Section 107), on the basis of size of trench stipulated in Sections 337 and 340, excepting where the sewer is built by tunneling, in which case tunnel excavation will be paid for at the price herein stipulated in Schedule Item 5-A (which prices shall include all the matters referred to in Sections 117 and 120), on the basis of the net ordered lines of the sewer. Payment for street surface restored shall be as provided in Schedule Items 30-A or B.

Steel Beams and Reinforcing Rods.

Section 419. Where steel beams or reinforcing rods are required and ordered, such beams and rods will be paid for in addition to the price bid for the sewer and at the prices herein stipulated for furnishing and placing such material and all work incidental thereto, in Schedule Item 20 or 21.

Automatic Flush Tanks.

Section 420. Where automatic flush tanks are built as provided in Section 410 of the specifications they will be paid for as herein provided in Article XII of the contract.

Waterproofing.

Section 421. Where waterproofing is required and placed in accordance with Section 411 of the specifications it will be paid for at the prices herein stipulated for waterproofing, Schedule Item 15 or 16.

Siphons.

Section 422. Where inverted siphons passing under the subway structure are called for and built, they shall be considered as part of the regular subway construction from outside to outside of the sewer chambers or between points of departure from standard sewer construction, such limits being indicated on the plans; and payment for such siphons will be made in accordance with the various classes of work or material as are applicable thereto in the Schedule and at the prices therein stipulated for such items.

Cast-Iron Pipe Sewers, etc.

Section 424. All cast-iron pipe sewers wherever built, and the parts, within the limits of the Railroad, or as indicated on the plans, of all other sewers crossing over or under the Railroad, will be paid for in accordance with the various classes of work or material applicable thereto in the Schedule and at the prices stipulated therein for such classes of work or material.

House and Drainage Connections.

Section 425. The cost of the maintenance, support or construction of all house or other drainage connections made necessary by construction under Sections 422 and 424 will be included in the prices for the several classes of work and material entering into such construction.

21—Requirements for Pipes.

Generally.

Section 426. Whenever it is necessary to relay any water main, all new material required for the same shall be of the quality and laid in the manner specified below, and subject to the various clauses of these specifications applicable thereto.

Pipes to be Cylinders.

Section 427. The pipes shall be circular cylinders, with the inner and outer surfaces concentric, and of the full interior diameter required.

Hubs and Spigots.

Section 428. The hub or socket and the spigot end shall be shaped in exact conformity with the standards of the Department of Water Supply, to be furnished by the Commission, and will be tested by circular gauges.

Section 429. The seat or shoulder of the socket and the end of the spigot shall be straight and even, and at right angles to the axis of the pipe, so as to make a smooth, tight joint. Special care will be required in making the sockets and spigots

to conform to the drawings and all pipes will be rigorously inspected at these points. No pipe will be received whose eccentricity at either the spigot or socket ends, exceeds one-eighth (1/8) of an inch, or whose dimensions differ by more than one-eighth (1/8) of an inch from those required.

Section 430. The pipes shall be designated by dimensions of the interior diameter

Section 431. Bands, lugs, buttons, or ribs shall, if required, be cast on the pipes, of such forms and dimensions as the Engineer may direct.

Length of Pipe.

Section 432. The straight pipe shall be twelve (12) feet long, exclusive of hub; other pipe as may be directed.

Section 433. All straight pipes shall be straight in the direction of the axis of the cylinder.

Thickness and Weights.

Section 434. The thickness of the pipes, branches and special castings shall correspond with the standards of the Department of Water Supply. The weight for straight pipe shall be approximately as follows:

60-inch pipes, 12,835 pounds each.
48-inch pipes, 8,270 pounds each.
42-inch pipes, 6,860 pounds each.
36-inch pipes, 5,305 pounds each.
30-inch pipes, 3,940 pounds each.
24-inch pipes, 2,660 pounds each.
20-inch pipes, 2,005 pounds each.
16-inch pipes, 1,475 pounds each.
12-inch pipes, 1,015 pounds each.
8-inch pipes, 580 pounds each.
6-inch pipes, 415 pounds each.

High Pressure Fire System.

Section 435. For high-pressure fire system standard spigots and grooves—The weights for straight pipes, with lugs, shall be approximately as follows, in pounds per length:

	Of 3 ft.	Of 4 ft.	Of 6 ft.	Of 12 ft.
8-inch	355	420	550	935
12-inch	615	745	1,000	1,765
16-inch	1,005	1,215	1,635	2,905
20-inch	1,475	1,795	2,425	4,320
24-inch	2,105	2,585	3,535	6,385

All requirements as to weights, laying, tests, etc., shall be in strict accordance with the standard requirements of the Department of Water Supply, Gas and Electricity.

Section 436. The thickness of the metal of the pipes and special castings will be tested by calipers after the castings have been freed from sand and cleaned.

Variations in Thickness.

Section 437. No pipe will be received when the thickness of metal is less by more than one-twelfth (1-12) of an inch than the thickness required by the standards.

Underweight.

Section 438. No straight pipe or casting will be received which weighs less than the weights above mentioned by more than five (5) per cent., for pipes 16 inches or less in diameter, or more than four (4) per cent. for pipes more than 16 inches in diameter. No special casting will be received which weighs less than the standard weight by more than ten (10) per cent. for pipes 12 inches or less in diameter, and eight (8) per cent. for larger pipes.

Straight Pipe Cast Vertically.

Section 439. All straight pipes shall be cast vertically, and all pipes 12 inches or more in diameter shall be cast with the hub end down.

Section 440. All the castings shall be made in such molding sand or loam as will leave the surface clean and smooth.

Castings, How Marked.

Section 441. All the castings shall have the year in which they are cast, the running number of the castings of the same size and form, the letters D. W. S., and

the initials or name of the Contractor, and of the foundry where cast, cast on the outer side in raised letters of not less than two (2) inches in length and one-eighth (⅛) of an inch in relief, in such manner as the Engineer may designate; and in case any pipe shall be condemned, the letters D. W. S. shall be erased by the Contractor.

Quality of Cast Iron.

Section 442. The metal of which the castings are to be cast (which shall be remelted in a cupola or air-furnace) shall be pig-iron, made without any admixture of cinder-iron, or other inferior metal, and shall be of such character as to make a pipe strong, tough and of an even grain, entirely free from uncombined carbon when seen under the microscope, and such as will bear, satisfactorily, drilling and cutting, and shall have a tensile strength of at least sixteen thousand (16,000) pounds to the square inch.

Section 443. The castings shall be free from scoria, sand holes, air bubbles, and other defects and imperfections.

Castings to be Clean.

Section 444. The castings shall be perfectly cleaned and no lumps shall be left on the inner surface of the barrels or sockets, or on the outer surface of the spigot end. The castings shall be subject to hammer inspection. Iron-wire brushes shall be used, as well as softer brushes, to remove the loose dust. No acid or other liquid shall be used in cleaning the castings.

Pipes to be Coated.

Section 445. Every pipe, branch and special casting shall be carefully coated inside and out with coal pitch and oil. Every casting shall likewise be entirely free from rust when the coating is applied. If the casting cannot be dipped immediately after being cleaned, the surface shall be oiled with linseed oil, to preserve it until it is ready to be dipped. No casting shall be dipped after rust has set in.

Pitch.

Section 446. The coal-tar pitch shall be made from coal tar distilled until the naphtha is entirely removed and the material mixed with linseed oil so as to make a smooth, tough and tenacious coating. Pitch which becomes hard and brittle when cold will not answer for this use.

Section 447. Pitch of the proper quality having been obtained, it shall be carefully heated in a suitable vessel to a temperature of three hundred (300) degrees Fahrenheit, and shall be maintained at not less than this temperature during the time of dipping. The material will thicken and deteriorate after a number of pipes have been dipped; fresh pitch shall, therefore, be frequently added, and occasionally the vessel shall be entirely emptied of its old contents and refilled with fresh pitch.

Section 448. Every casting shall attain a temperature of three hundred (300) degrees Fahrenheit, before being removed from the vessel of hot pitch. It shall then be slowly removed and laid on skids to drip.

To be Inspected Before Dipping.

Section 449. No casting shall be dipped until the authorized inspector has examined it as to cleaning and rust, and subjected it thoroughly to the hammer test. It may then be dipped, after which it will be passed to the hydraulic press to meet the required water test. The proper coating shall be tough and tenacious when cold on the pipes, and not brittle or with any tendency to scale off.

Tests.

Section 450. The castings must be capable of sustaining a pressure, in the hydraulic press, of three hundred (300) pounds to a square inch, and any casting which shows any defect by leaking, sweating or otherwise, will be rejected. This test shall be made at the foundry, and at the expense of the Contractor.

Weighed and Marked.

Section 451. The castings shall be weighed, and the weight distinctly marked on the castings in white paint. The Contractor shall provide at the foundry where the pipes and castings are to be manufactured proper sealed scales and weights for weighing the castings, which shall be done at the expense of the Contractor, under the supervision of the Inspector.

Blocking and Wedges.

Section 452. Each pipe over eight (8) inches inside diameter, unless otherwise ordered, shall be placed on two (2) blocks and four (4) wedges of hemlock timber, the wedges to rest on the blocks and the pipe on the wedges.

Timber for Blocking.

Section 453. The blocks and wedges shall be of sound hemlock timber; 48 and 36-inch pipe shall be laid on blocks 4 feet long, 12 inches wide and 6 inches thick, with wedges 18 inches long, 6 inches wide, 4 inches thick on one end and ½ inch thick on the other; 30 and 24-inch pipe on blocks 3 feet long, 10 inches wide and 5 inches thick, with wedges 15 inches long, 5 inches wide and 3½ inches thick on one end and ½ inch thick on the other end; 12 and 20-inch pipe on blocks 2 feet long, 8 inches wide and 4 inches thick with wedges 12 inches long, 4 inches wide, 3 inches thick on one end and ½ inch thick on the other.

Joints.

Section 454. The spigot end of the pipe shall be inserted into the hub to within from one-fourth (¼) to one-eighth (⅛) of an inch of the full depth of the hub, and the space around the pipe shall be equalized so as to give as nearly as possible an equal space for the packing. The space between the pipe and the hub shall be packed with clean, sound jute packing yarn, free from tar, far enough to leave the proper space for lead. The remaining space shall then be filled by running it full of lead to a depth of four (4) inches, with a bead outside of the face of the hub large enough to allow for caulking, so that when the joint is properly caulked the lead will be flush with the hub of the pipe. After the joint shall have been run with lead, it shall be caulked by means of proper tools, so as to make a watertight joint

Lead.

Section 455. The lead to be used shall be of the best quality of pure, soft lead. and in every respect suitable for the purpose.

Notice of Interruption to be Given.

Section 456. In case it becomes necessary to cut any connection with any other main, house or hydrant, or in any way to interfere with the continuous and normal flow of water, due notice shall be sent at least forty-eight (48) hours in advance to the Engineer and to the Commissioner of Water Supply, and the Contractor shall, if so ordered, make a temporary by-pass or other arrangement to preserve the flow of water while breaking connections.

Connections Interfered With.

Section 457. All connections cut, interfered with or injured shall be restored under the directions of the Engineer, without delay and in accordance with the rules and regulations of the Department of Water Supply governing such matters, to a suitable condition as good as existed before commencing work.

Stopcocks, etc.

Section 458. Stopcocks, boxes, branches, curved pipe, and other specials according to the standards of the Department of Water Supply shall be set where necessary.

Section 459. For gas pipes, steam pipes, air pipes, mail tubes and any other pipes not herein enumerated, the standard weights and all other requirements shall be in accordance with the standard specifications and requirements of the several owners of such structures.

22—STREET SURFACE AND PARK SURFACE RESTORED.

Pavement to be Restored.

Section 460. As soon as the structure in any excavation or trench made within a street shall be completed and the trench backfilled, a temporary pavement shall be laid and maintained in a condition satisfactory to the Engineer; and after the earth shall have become, in the opinion of the Engineer, sufficiently settled, the Contractor shall proceed to restore the surface to a condition similar to, and equally as good as, that existing previous to the commencement of construction; except that the Contractor will not be required to permanently restore the pavement of roadways between curb lines, but shall provide a temporary roadway pavement as follows:

Temporary Roadway Pavement.

Section 461. Upon the backfill, placed and compacted as provided under the clauses relating to backfilling, shall be placed a layer of sand, about an inch and

a half in thickness, on which shall be laid a pavement of granite blocks carefully laid and rammed to the required finished grade of the street surface. The end and side joints shall be thoroughly filled with sand, and shall not exceed ¾ of an inch in thickness. The granite blocks required for this temporary pavement, if found in or under the original pavement, shall be stored at a suitable place until required for use. In case granite blocks are not found in or under the original pavement, they may be obtained by the Contractor, free of cost, from the Bureau of Highways at the corporation yards.

The Contractor shall maintain the temporary roadway pavement thus laid for a period not exceeding six months from the time of its completion in any one block or street intersection. During this period the Contractor shall, without requiring previous notice, readjust or relay any portion of the pavement wherever and whenever a straight edge 3 feet long, laid in any direction, shows a depression of more than ¾ inch.

All the requirements as to street surface restored, including temporary roadway pavements, shall apply to the trenches for sewers, pipes or other subsurface structures along or off the line of the Railroad. Within the limits of private property to be taken by the City for the extension of Irving Place, these requirements will not apply.

Other Sidewalks May be Laid.

Section 462. Nothing contained in these specifications shall be understood or construed as prohibiting the Contractor from making any arrangement with any property owner to lay another style of sidewalk, or other surface covering within curb lines, in place of the sidewalk or other surface covering taken up; in which case the Contractor shall file with the Commission a copy of his contract with such property owner, duly acknowledged in writing by both parties.

In case any property owner desires to lay a sidewalk, or other surface covering within curb lines, affected by this contract, different from the one removed, and shall notify the Commission in writing that he has failed to make satisfactory arrangements for such work with the Contractor, then the Commission, in its discretion, may direct the Contractor to finish and dress off the filling over his work to such grade as the Engineer may select, and further direct him to remove from the area to be restored all material of whatever nature not required to be relaid, and to permit another contractor to lay such sidewalk or other surface covering; in which case the liability of the Contractor under this contract shall cease, as far as that part of his work is concerned, whenever the Engineer shall report to the Commission that the instructions of the Commission have been complied with, exactly the same as if the Contractor had fully completed the restoration as hereinbefore provided.

Payment for Street Surface Restored.

Section 463. Payment for street surface restored will be made as provided in Schedule Item 30-A or B, which prices shall include the cost of restoring all curbs, manhole heads and covers, gratings, vault lights, etc., that formed a part of the original street surface.

Measurements.

Section 464. The measurement for payment for street surface restored will be to the net line of ordered excavation.

Outside of Net Lines.

Section 465. All other pavement outside of the net lines of ordered excavation, either along or off the line of the Railroad, that may have become damaged, directly or indirectly, as the result of the Contractor's operations, shall be restored by the Contractor at his own cost and expense to a condition similar to and equally good as that existing previous to the commencement of construction.

Parks and Parkways.

Section 466. All parks and parkways including trees, shrubbery, etc., as elsewhere provided in this contract and the specifications, are to be restored to the satisfaction of the Department of Parks.

Measurement.

Section 467. Measurements for park surface restored are to be to the net lines of ordered excavation.

Payment For.

Section 468. Payment for park surface restored will be made at the price provided in Schedule Item 31.

Outside of Net Lines.

Section 469. Any damage done outside of the net lines of ordered excavation in connection with the construction of the work to park surfaces or growths, under the jurisdiction of the Department of Parks, shall be restored to the satisfaction of the said Department, and at the Contractor's own cost and expense.

23—VAULT LIGHTS, GRATINGS AND HAND-RAILS.

Vault Lights.

Section 470. The roofs of the stations, where under sidewalks, parks or parkways, shall, to as great an extent as possible, consist of vault light construction. These lights shall be made with lenses, not exceeding three (3) inches in diameter, of strong glass set in cement; they shall be provided with non-slipping treads, buttons or other devices all of design approved by the Engineer; and shall be of sufficient strength to carry, when supported in a manner similar to that in which they are to be permanently set, an equally distributed load of at least five hundred (500) pounds per square foot without signs of failure, deformation or permanent set, when such test load is removed. The right is reserved to test at least one (1) frame or panel in every ten (10), as selected by the Engineer. Should the one selected fail, another will be selected by the Engineer; and if that fail, then the whole lot may be rejected. The vault lights must be set in place with cement, lead or other means to be absolutely waterproof. Any tests required shall be at the Contractor's expense.

Measurement and Payment.

Section 471. The area for payment for vault lights shall be to lines not exceeding one (1) foot outside of the inner faces of the supporting walls, and the price paid will be as provided in Schedule Item 29, which price shall include all material and work incidental to the completed vault lights in place.

Steel Gratings.

Section 472. Steel gratings shall be provided and placed over fan and other ventilating chambers, over stations and station approaches, at places shown on the plans, or at other places if required by the Engineer. They will be constructed as shown on the detailed plans for gratings.

Measurement and Payment.

Section 473. Gratings will be measured to the lines as constructed and payment therefor will be made as herein provided in Schedule Item 28, which price shall include the grating in place in the work, all frames and framing, and all incidental work.

Galvanized Iron Pipe Hand-Rails.

Section 474. Galvanized iron pipe hand-rails will be placed in the Railroad over the benches containing the ducts. They shall be securely fastened to the wall of the tunnel by means of expansion bolts, and as shown on the contract drawings. Measurements for payment will be per lineal foot of hand-rail in place in the work, complete, and at the price as stipulated in Schedule Item 27.

IV.—SECURITY TO BE FURNISHED BY CONTRACTOR.

Security by Contractor. Contractor's Bond.

Article 27. Simultaneously with the execution of this contract the Contractor shall give security for the performance of his obligation by filing with the Comptroller a bond in the form annexed hereto, entitled, "Form of Bond," executed by the Contractor and by two or more sureties to be corporations or persons approved by the Commission in the sum specified in the Invitation to Contractors for the Section embraced in this contract. In case any of the sureties upon the bond shall become insolvent or unable in the opinion of the Commission to pay promptly the amount of such bond to the extent to which such surety might be liable, then the Contractor within ten days after notice by the Commission to the Contractor shall, by supplemental bond or otherwise, substitute another and sufficient surety to be approved by the Commission in place of the surety so insolvent or unable. If the Contractor shall fail, within such ten days or such further time as the Commission may grant, to substitute another and sufficient surety, then the contractor shall, for all the purposes of this contract be deemed to be in default in the performance of his obligations hereunder and upon the said bond, and the Commission may terminate the contract or may bring any proper suit or proceeding against the Contractor and the sureties, or either of them, or may require to be deducted from any moneys then in, or thereafter coming into, the hands of the City and due to the Contractor

the amount for which the surety insolvent or unable as aforesaid shall have justified on the bond; and the moneys so deducted shall be held by the Comptroller as collateral security for the performance of the condition of the bond.

V.—Payments to Contractor.

Partial Payments.

Article 28. In order to assist the Contractor to prosecute the work advantageously, the Engineer shall, from time to time, as the work progresses, but not oftener than once a month, make in writing an estimate, such as in his opinion shall be just and fair, of the amount and value of the work done and materials incorporated in the work by the Contractor according to the terms of this contract (but it is understood that in making such estimates the Engineer shall not necessarily be governed by the unit prices contained in the Contractor's proposal), provided, however, that estimates may at any time be withheld or reduced, if, in the opinion of the Engineer, the work is not proceeding in accordance with the contract. The first such estimate shall be of the amount and value of the work done and materials incorporated in the work since the Contractor commenced the performance of this contract on his part. Every subsequent estimate except the final estimate shall be of the amount and value of the work done and materials incorporated in the work since the last preceding estimate was made, provided, however, that no such estimate shall be required to be made when, in the judgment of the Engineer, the total value of the work done and materials incorporated in the work since the last preceding estimate amounts to less than ten thousand dollars ($10,000). The Engineer shall further include accepted structural iron and steel delivered on the site of the work, but not incorporated in the work, at the rate of forty dollars ($40) per ton of two thousand pounds. But the quantity of such structural iron and steel included in any partial estimate shall not exceed the quantity of such material, as determined by the Engineer, required for the ensuing six months, and any material included in a partial estimate which may subsequently become unsatisfactory, shall be deducted from succeeding partial estimates. No materials not incorporated in the work, excepting such structural iron and steel, and none of the Contractor's plant shall be included in partial estimates.

Not by Strict Measurement.

Article 29. Such estimates shall not be required to be made by strict measurement, but they may be made by measurement or by estimation, or partly by one method and partly by the other, and it shall be sufficient if they are approximate only.

Vouchers.

Article 30. Upon each such estimate being made and certified in writing to the Commission, the Commission shall forthwith prepare and certify a voucher for ninety per cent. of the amount stated in such estimate or certificate to be the value of the work done and materials furnished, and the City shall within thirty (30) days after the date of the certification of such voucher by the Commission pay the same; provided, however, that the City may at all times reserve and retain from said partial payments, or any of them, in addition to the ten per cent. above mentioned to be retained and reserved, any sum or all sums which by the terms hereof, or of any law of the State of New York passed prior to the date hereof, it is or may be authorized to reserve or retain.

Final Estimate.

Article 31. Whenever, in the opinion of the Engineer, the Contractor shall have completely performed this contract on his part, the Engineer shall so certify, in writing, to the Commission, and in his certificate shall state, from actual measurements, the whole amount of work done by the Contractor, and also the value of such work under and according to the terms of this contract. On the expiration of ninety (90) days after the acceptance by the Commission of the work herein agreed to be done by the Contractor, and the filing of a certificate of the completion and acceptance of the work in the office of the Comptroller, signed by the Engineer and the Commission, the City shall pay to the Contractor the amount remaining after deducting from the amount or value stated in the last-mentioned certificate, all such sums as shall theretofore have been paid to the Contractor under any of the provisions of this contract, and also any sum or all such sums of money as by the terms hereof the City is or may be authorized to reserve or retain; provided, that nothing herein contained shall be construed to affect the right, hereby reserved, of the Commission to reject the whole or any portion of the aforesaid work, should the said certificate be found, or known to be, inconsistent with the terms of this contract, or otherwise improperly given. All prior certificates upon which partial payments may have been

made, being merely estimates, shall be subject to correction in the final certificate, which final certificate may be made without notice thereof to the Contractor, or of the measurements upon which it is based.

Interest in Case of Delayed Payments.

Article 32. If the payment of the amount due the Contractor on any voucher shall be delayed beyond the time stipulated in Article 30, in the case of partial payment, or Article 31, in the case of final payment, the City shall pay the Contractor interest on such amount at the rate of four and one-half (4½) per cent. per annum for the period of such delay; it being understood that such payments of interest, if any, are to be in lieu of any claim of the Contractor for alleged damages for breach of contract or otherwise in case of delayed payments. The term for which interest shall be paid shall be reckoned, in the case of a partial payment from the thirtieth day after the certification of such voucher by the Commission, and in the case of a final payment from the ninetieth day after the acceptance of the work by the Commission, to the date of payment of the voucher. The date of payment of a voucher shall be considered the day on which the voucher is ready for payment as evidenced by the records of the Department of Finance. If interest shall become due on any partial payment the amount thereof, as determined by the Commission, shall be added to a succeeding payment. If interest shall become due on a final payment it shall be paid on a supplementary voucher prepared by the Commission and forwarded to the Comptroller for payment in the usual manner.

No Estoppel.

Article 33. The City shall not, nor shall any Department or officer thereof, be precluded or estopped by any return or certificate made or given by the Commission, any Engineer, or other officer, agent or appointee thereof under any provision of this contract, from at any time either before or after the final completion and acceptance of the work and payment therefor pursuant to any such return or certificate, showing the true and correct amount, quality and character of the work done and materials furnished by the Contractor or any other person under this agreement, or from showing at any time that any such return or certificate is untrue and incorrect or improperly made in any particular, or that the work and materials, or any part thereof, do not in fact conform to the specifications; and the City shall not be precluded or estopped, notwithstanding any such return or certificate and payment in accordance therewith, from demanding and recovering from the Contractor such damages as it may sustain by reason of his failure to comply with this contract or the specifications.

No Waiver.

Article 34. Neither the acceptance of the Commission or its Engineer, or any of its employees, nor any order, measurement or certificate by the Engineer, nor any order by the Commission for payment of money, nor any payment for, nor acceptance of the whole or any part of the work by the Engineer or the Commission, nor any extension of time, nor any possession taken by the Commission, or its employees, shall operate as a waiver of any portion of this contract or of any power herein reserved to the Commission, or any right to damages herein provided; nor shall any waiver of any breach of this contract be held to be a waiver of any other or subsequent breach.

Final Payment to Terminate Liability of City.

Article 35. The acceptance by the Contractor of the last payment aforesaid shall be and shall operate as a release to the City, from all claim and liability to the Contractor for anything done or furnished for, or relating to, the work, or for any act or neglect of the Commission, the City or of any person relating to or affecting the work, except only the claim against the City for the remainder, if any there be, of the amounts kept or retained as provided in this contract.

Contractor's Claims for Damage. Statements of Damage to be Filed With Engineer.

Article 36. If the Contractor shall claim compensation for any damage sustained by reason of the acts of the Commission, or its agents, he shall, within ten days after the sustaining of such damage, make a written statement of the nature of the damage sustained to the Engineer. On or before the fifteenth day of the month succeeding that in which any such damage shall have been sustained, the Contractor shall file with the Engineer an itemized statement of the details and amount of such damage, and, unless such statement shall be made as thus required, his claim for compensation may be forfeited and invalidated, and he shall not be entitled to payment on account of any such damage.

Lien Law.

Article 37. If at any time before or within thirty days after the whole work agreed herein to be performed and all the labor and material herein agreed to be delivered have been performed or delivered or completed and accepted by the City any person or persons claiming to have performed any labor or furnished any material toward the performance or completion of this contract shall file with the Commission and with the Comptroller of the City any such notice as is described in the Lien Law, the City shall retain until the discharge thereof from moneys under its control so much of such moneys as shall be sufficient to satisfy and discharge the amount in such notice claimed to be due, together with the costs of any action or actions brought to enforce such lien created by the filing of such notice.

VI.—Contractor's Liability for Injuries to Persons or Property.

Contractor Approves Plans as Involving No Damage.

Article 38. The Contractor expressly admits and covenants to and with the City that the plans and specifications and other provisions of this contract, if the work be done without fault or negligence on the part of the Contractor, do not involve any danger to the foundations, walls or other parts of adjacent buildings or structures or to navigation; and the Contractor will at his own expense make good any damage that shall, in the course of construction, be done to any such foundations, walls or other parts of adjacent buildings or structures or to navigation. The liability of the Contractor under this covenant is absolute and is not dependent upon any question of negligence on his part, or on the part of his agents, servants or employees and the neglect of the Engineer to direct the Contractor to take any particular precautions or to refrain from doing any particular thing, shall not excuse the Contractor in case of any such damage. Where the work is required to be done by tunneling the same admission and covenant shall also apply to the foundations, walls and other parts of buildings and to any railroad track or structure, subway, street, conduit, pipe, sewer or other structure or surface over the tunnel. But this admission and covenant shall not apply to the foundations, walls or other parts of buildings or any part thereof acquired by the City and which the Engineer may determine should be razed.

Traffic to be Maintained.

Article 39. The Contractor shall, during the performance of the work, safely maintain the traffic on streets, avenues, highways, parks, waters or other public places as provided in the specifications, and shall take all necessary precautions to place proper guards for the prevention of accidents and put up and keep at night suitable and sufficient lights.

Indemnification for Accidents, etc.

Article 40. The Contractor shall be solely responsible for all physical injuries to persons or property occurring on account of and during the performance of the work hereunder, and shall indemnify and save harmless the City from liability upon any and all claims for damages on account of such injuries to persons or property, and from all costs and expenses in suits which may be brought against the City for such injuries to person or property; it being distinctly understood, stipulated and agreed that the Contractor shall be solely responsible and liable for and shall fully protect and indemnify the City against all claims for damages to persons or property occasioned by or resulting from blasting or other methods or processes in the work of construction whether such damages be attributable to negligence of the Contractor or his employees or otherwise.

Money Due the Contractor or May be Retained to Meet Claims.

Article 41. In case any claim shall be made by any person or corporation against the Contractor or the City for loss or damage to person or property as aforesaid, the amount of such claim or so much thereof as the Commission shall deem reasonable, shall, upon the requirement and in the discretion of the Commission, be retained by the Comptroller out of any moneys thereafter growing due to the Contractor hereunder (in addition to the other sums hereinbefore authorized to be so retained), as security for the payment of such claim or claims. If and when the liability of the City or the Contractor on such claim or claims shall have been established by a judgment of a court of competent jurisdiction, or shall have been admitted by the Contractor to be valid, the said claim or claims shall be paid from the amount so retained and the balance, if any, paid to the Contractor. Should there be any unsatisfied claims for injuries to persons or property at the time when the final estimate for the work is made and returned, the Engineer shall have the right to retain out of said final estimate a sum in his judgment sufficient to protect the City in regard

to all unsatisfied claims as aforesaid and in case the amount thus retained should be insufficient to pay the amount adjudicated to be due upon such claim the City may sue for and recover from the Contractor the amount or balance as a debt from the Contractor to the City. The Engineer may further, if in his judgment such a course is necessary, at the time of making the final estimate, and as a condition to making the same, require the Contractor to continue his bond or any part thereof, for a time not exceeding the time when such claims would be barred under the existing Statute of Limitations, as security against any claims then unsatisfied or not presented.

Examinations of Abutting Property.

Article 42. In order to safeguard the owners or tenants of abutting property and at the same time prevent unjust or fraudulent claims against the Contractor or the City in respect thereto, the Engineer shall cause a detailed examination of all adjacent or abutting property to be made before construction is begun. The owner, or tenant of each parcel or his or their duly authorized representative, shall be invited by a notice in writing delivered to a person apparently in charge of the premises, to be present, and the Contractor, or his duly authorized representative, shall attend and with the Engineer shall make such detailed examination. A complete record of the existing conditions of each parcel shall be made in triplicate, signed by the Engineer and the Contractor, and one copy shall be delivered to the owner, one to the Contractor and one shall be retained by the Commission. At such times as the Engineer may direct, and upon the completion of the work, or upon notice to the Engineer by the owner or tenant that physical injury has occurred, further examination shall be made and the findings recorded and filed as above.

Damage to Works During Construction.

Article 43. All risk of loss or damage to the works, or to any part thereof, or to any of the materials, tools, implements or other things used in doing the work, prior to final completion, is assumed and shall be borne by the Contractor, and any such loss or damage shall be made good by the Contractor at his own cost, and the construction shall be carried forward by him in accordance with this contract, without additional cost to the City by reason of such loss or damage.

VII.—CITY TO SECURE CONTRACTOR AGAINST INTERFERENCE BY INJUNCTIONS, TO ACQUIRE REAL ESTATE, ETC.

City's Assurances to Contractor of Right to Construct.

Article 44. The City hereby stipulates and covenants to and with the Contractor that the City will secure and assure to the Contractor so long as the Contractor shall perform the stipulations of this contract, the right to construct the railroad as prescribed in this contract free of all right, claim or other interference, whether by injunction, suit for damages or otherwise, on the part of any owners, abutting owner, or other person; but not including any interference, legal or otherwise, by patentees or persons claiming to be patentees of tools, methods or appliances.

Claims for Infringement of Patents.

Article 45. The Contractor shall hold himself responsible for any claims made against the City for any infringement of patents by the use of patented articles in the performance and completion of the work, or of any process connected with the work agreed to be performed under this contract, or of any materials used upon the said work; and shall save harmless and indemnify the City for all costs, expenses and damages which the City shall be obliged to pay by reason of any infringement of patents used in the performance and completion of the work.

Acquisition of Real Estate.

Article 46. The City will acquire all such real estate and rights of way or other rights, terms, franchises, easements and privileges therein which, in the opinion of the Commission, it shall be necessary to acquire or extinguish for the purpose of constructing the works free of interference or right of interference; provided, however, that this covenant shall not apply to or include any damages for physical injuries to property referred to in chapter 6 hereof, whether or not compensation for such damages be awarded in a condemnation proceeding. If compensation for any such damages shall be included in an award in condemnation proceedings the Contractor shall, upon demand, promptly reimburse the City for any payments made by it for such purposes.

VIII.—TIME FOR COMPLETION, DAMAGES FOR DELAY, ETC.

Commencement and Completion of Work.

Article 47. Time is of the essence of this contract. The Contractor shall begin actual work within sixty (60) days after the execution of this contract. The entire work covered by this contract shall be completed in all respects within forty-two (42) months from the date of the delivery of this contract.

Price to be Reduced for Delay.

Article 48. In the event of delay in completion of the works beyond the period herein prescribed, or beyond the period to which such time may be extended by resolution of the Commission for good cause shown, the City shall—whether the working force be increased as provided in the specifications or not—be paid damages for such delay. Inasmuch as the amount of such damages will be extremely difficult to ascertain, especially in view of the fact that the railroad herein contracted for is only a part of a complete system, the remainder of which is to be constructed under other contracts, it is hereby expressly agreed that damages shall be liquidated and paid by reducing the price to be paid the Contractor as follows: From the amounts which shall become payable to the Contractor after the expiration of the periods above limited (but not including the retained percentages from amounts theretofore certified to be due) there shall be deducted and retained by the City the following percentages: From the amount due for the first month after the expiration of such periods one (1) per centum thereof; from the amount due for the second month after the expiration of such periods two (2) per centum thereof; from the amount due for the third month after the expiration of such periods three (3) per centum thereof; from the amount due for the fourth month after the expiration of such periods four (4) per centum thereof; similarly from any amounts which may subsequently become due there shall be deducted a percentage, the rate of which shall equal the number of months which may have elapsed between the expiration of the periods above limited and the time when such payments shall become due. These amounts shall be deducted and retained by the City and are hereby agreed upon and determined as the measure of liquidated damages (and not as a penalty) to the City. But in case the Contractor shall be delayed by reason of any labor strike not caused or instituted or provoked by the Contractor, or by any subcontractor, agent or representative of the Contractor (which fact the Contractor shall prove to the satisfaction of the Commission), or in case the Contractor shall be delayed by any injunction or by any interference of public authority, and in case the Contractor cannot, notwithstanding such injunction or interference, with reasonable diligence make up for the delay so occasioned by speedier work when the Contractor shall not be so interfered with, then the said date for completion shall be extended by resolution of the Commission to a date later than the expiration of the said period by the amount of the time of such delay.

Commission May Intervene in Case of Injunction.

Article 49. But no injunction, strike or interference of public authority shall be ground for such extension, except if and from the time when the Contractor shall give the Commission notice of the injunction or other cause of delay, with copies of the injunction or other orders and of the papers upon which the same shall have been granted. The Commission and the City or either shall be accorded the right to intervene or become a party to any suit or proceeding in which any such injunction shall be obtained, and to move to dissolve the same or otherwise, as the Commission or City may deem proper. If necessary the Corporation Counsel or the Counsel of the Commission or both shall be authorized by the Contractor to appear, for that purpose, as counsel or attorneys for him.

Article 50. The time stipulated within which to complete the works is based upon the quantities of the various items entering into the work as stated in the form of proposal, which are given solely for the purpose of classifying bids. In case these quantities are exceeded or diminished then an extension or diminution of the term of this contract shall be made. It is, however, understood and agreed that in case an increase in any one item is balanced or offset by diminution of other items, no change in the term shall be made, and in any event the Engineer shall determine the amount of extension or diminution of time in respect of the relative increase or reduction in the quantities involved in the final completion.

Suspension of Work and Additional Time for Performance.

Article 51. The Commission reserves the right of temporarily suspending the execution of the whole or any part of the work herein contracted to be done, if it shall deem it for the interest of the City so to do, without compensation to the Contractor

for such suspension, other than extending the time for completing the work as much as it may have been delayed by such suspension.

Time for Completion to be Extended in Case of Delay in Acquiring Real Estate.

Article 52. In case the Contractor shall at any time give notice to the Commission that any real estate is necessary under this contract for any of the purposes specified above, which notice shall give a brief description of such real estate, the Commission shall (if it finds that such exists) begin and conduct with diligence, proceedings to acquire the real estate described; and in case the Commission shall fail to put the Contractor in possession of such real estate within three (3) months from the date of the delivery of such notice the Commission shall allow the Contractor so much additional time wherein to perform and complete this contract on his part as the Engineer shall certify in writing to be just, but no allowance by way of damages shall be made for such delay.

Extensions Not Cumulative.

Article 53. It is expressly understood, however, that the periods of extension referred to herein shall not be cumulative, but only the single period of delay giving the greatest extension shall be taken into consideration.

Permission to Complete Contract Not a Waiver.

Article 54. The permitting of the Contractor to go on and finish the work, or any part of it, after the time fixed for its completion, or after the date to which the time for completion may have been extended, or the making of partial payments to the Contractor after any such periods, shall in no wise operate as a waiver on the part of the City of any of its rights under this contract.

IX.—Remedies in Case of Contractor's Default.

Article 55. If the work to be done under this contract shall be abandoned by the Contractor, or if this contract shall be assigned, or the work sublet by him, otherwise than as herein specified, or if at any time the Engineer shall be of the opinion, and shall so certify in writing to the Commission that the performance of the contract is unnecessarily or unreasonably delayed, or that the Contractor is wilfully violating any of the provisions or covenants of this contract, or of the specifications, or is executing the same in bad faith or not in accordance with the terms thereof, or if the work be not fully completed within the time named in this contract for its completion, or within the time to which the completion of the contract may be extended by the Commission, the Commission may

(1) Notify the Contractor, by a written notice, to discontinue all work, or any part thereof, under this contract, and thereupon the Contractor shall discontinue the work, or such part thereof, and the Commission shall thereupon have the right to contract for the completion of the works in the manner prescribed by law, or to place such and so many persons as it may deem advisable, by contract or otherwise, to work, and complete the work herein described, or such part thereof, to take possession of and use any or all of the materials, plant, tools, equipment, supplies and property of every kind provided by the Contractor for the purpose of his work, and to procure other materials for the completion of the same, and to charge the expense of said labor and materials to the Contractor. The expense so charged shall be deducted and paid by the City out of such moneys as may be due or may at any time thereafter grow due to the Contractor under and by virtue of this contract, or any part thereof. And in case such expense shall exceed the amount which would have been payable under the contract if the same had been completed by the Contractor, he shall pay the amount of such excess to the City; and in case such expense shall be less than the amount which would have been payable under this contract if the same had been completed by the Contractor, he shall forfeit all claim to the difference; and when any particular part of the work is being carried on by the Commission, by contract or otherwise, under the provisions of this article of the contract, the Contractor shall continue the remainder of the work in conformity with the terms of this contract, and in such manner as in nowise to hinder or interfere with the persons or workmen employed, as above provided, by the Commission, by contract or otherwise, to do any part of the work, or to complete the same under the provisions of this article of the contract. And

Or Proceed Upon Bond.

(2) The City may also proceed as to the Commission shall seem proper upon the bond. And

Or May Bring Suit.

(3) The City may also bring any suit or proceeding for specific performance or for injunction or to recover damages or to obtain any relief or for any purpose proper under this contract.

X.—MISCELLANEOUS PROVISIONS.

Changes in the Contract.

Article 56. No correction or change in this contract shall be made except by written instrument duly authorized by the Commission and consented to by the Contractor and by the sureties upon his bond; but this provision shall not limit or affect the right to prescribe variations whether of construction or location of route as in this contract elsewhere provided.

Members of Commission Not Liable.

Article 57. No claim shall be made by the Contractor against any member of the Commission personally by reason of this contract or of any of its articles or provisions.

Contractor Not to Assign, Sublet, Etc.

Article 58. The Contractor shall not assign, transfer, convey, sublet or otherwise dispose of this contract or his right, title or interest in or to the same or any part thereof without the previous consent in writing of the Commission, and he shall not assign by power of attorney or otherwise any of the moneys to become due and payable under this contract unless by and with the like consent. If the Contractor shall without such previous written consent assign, transfer, convey, sublet or otherwise dispose of this contract or of his right, title or interest therein or any of the moneys to become due under this contract, to any other person, company or corporation, this contract may at the option of the Commission be revoked and annulled and the City shall thereupon be relieved and discharged from any and all liability and obligations growing out of the same to the Contractor and to his assignee or transferee; and no right under this contract or to any money to become due hereunder shall be asserted against the City in law or in equity by reason of any so-called assignment of this contract or any part thereof or of any moneys to grow due hereunder unless authorized as aforesaid by the written consent of the Commission; provided that nothing herein contained shall be construed to hinder, prevent or affect an assignment by the Contractor for the benefit of his creditors made pursuant to the statutes of the State of New York.

Provisions in Case Commission Ceases.

Article 59. In case the Commission shall cease to exist the Legislature may provide what public officer or officers shall exercise the powers and duties of the Commission under and by virtue of this contract; and in default of such provision, such powers and duties shall be deemed to be vested in the Mayor of the City. In case any officer or officers other than the Commission shall hereafter have the powers of the Commission or any of them, then the provisions of this contract shall be applicable to such officer or officers to the extent to which the powers of the Commission shall appertain to such officer or officers, and any official act or determination of such officer or officers or of this Commission shall be sufficient hereunder, anything herein to the contrary notwithstanding, if the same be done or had by lawful vote or resolution or in such manner as the Legislature may from time to time prescribe.

Labor Law.

Article 60. The Contractor agrees to comply with the provisions of the Labor Law, including section 3 thereof as re-enacted by chapter 36 of the Laws of 1909. The Contractor further agrees and stipulates that no laborer, workman or mechanic in the employ of the Contractor, subcontractor or other person doing or contracting to do the whole or a part of the work contemplated by this contract, shall be permitted or required to work more than eight hours in any one calendar day, except in cases of extraordinary emergency, caused by fire, flood or danger to life or property; and further, that the wages to be paid for a legal day's work as hereinbefore defined to all classes of such laborers, workmen or mechanics upon the work contemplated by this contract or upon any material to be used upon or in connection therewith, shall not be less than the prevailing rate for a day's work in the same trade or occupation in the Borough of the City, where the work hereby contemplated, about or in connection with which such labor is performed, is in its final or completed form to be situated, erected or used; and that each such laborer, workman or mechanic employed by the Contractor or by any subcontractor or other person on, about or upon the work contemplated by this contract, shall receive such wages herein provided for. This contract shall be void

and of no effect, unless the Contractor shall comply with the provisions of this section. In obedience to the requirements of section 14 of the Labor Law, it is further provided that if the provisions of the said section 14 are not complied with, this contract shall be void.

All Necessary Legal Provisions Deemed Inserted Herein.

Article 61. It is the intent and understanding of the parties to this agreement that each and every provision of law required to be inserted in this contract should be and is inserted herein. Furthermore, it is hereby stipulated that every such provision is to be deemed to be inserted herein; and if, through mistake or otherwise, any such provision is not inserted or is not inserted in correct form, then the contract shall forthwith, upon the application of either party, be amended by such insertion so as to comply strictly with the law, and without prejudice to the rights of either party hereunder.

Provision in Case of Unlawful Provision.

Article 62. If this contract contains any unlawful provision not an essential part of the general structure of the contract and which shall not appear to have been a controlling or very material inducement to the making thereof the same shall be deemed of no effect and shall, upon the application of either party, be struck from the contract without affecting the binding force of the contract as it shall remain after omitting such provision.

In witness whereof, this contract has been executed for The City of New York by the Public Service Commission for the First District under and by resolution duly adopted by the Commission and the seal of the Commission has been hereto affixed and attested by its Secretary and these presents have been signed by its Chairman; and the Contractor has caused its corporate seal to be hereto affixed and these presents to be executed by its proper officers the day and year first above written.

PUBLIC SERVICE COMMISSION FOR THE FIRST DISTRICT.

By…………………, Chairman.

Attest:

…………………, Secretary.

State of New York, County of New York, ss.:

On the ………. day of ……………, 1910, before me personally appeared William R. Willcox and Travis H. Whitney, to me known and known to me to be the said William R. Willcox, the Chairman, and the said Travis H. Whitney, the Secretary of the Public Service Commission for the First District; and the said William R. Willcox and Travis H. Whitney being by me duly sworn, did depose and say, each for himself and not the one for the other, the said William R. Willcox, that he resides in the Borough of Manhattan, in the City, County and State of New York, that he is the Chairman of the said Commission and that he subscribed his name to the foregoing contract by virtue of the authority thereof; and the said Travis H. Whitney, that he resides in the Borough of Brooklyn, in the County of Kings, City and State of New York, that he is the Secretary of the said Commission and that he subscribed his name thereto by like authority; and both the said William R. Willcox and Travis H. Whitney that they know the seal of the said Commission and that the same was affixed to the foregoing instrument by the authority of the said Commission and of a resolution duly adopted by the same.

State of New York, County of New York, ss.:

On this ………… day of ………………, 1910, before me personally came ……………………………………………………………………… to me known and known to me to be the individual.. described in and who executed the foregoing instrument, and ..he.. duly acknowledged to me that ..he.. executed the same.

State of New York, County of New York, ss.:

On this ……… day of ……., 1910, before me personally appeared ……., to me known, who, being by me first duly sworn, did depose and say: That he resided in …………, in the State of……..; that he is …….. of ……., the corporation described in and which executed the foregoing instrument; that he knew the corporate seal of said company; that one of the seals affixed to said contract was such corporate seal, and that it was affixed thereto by order of the Board of Directors of said Company, and that he signed his name thereto by like authority.

FORM OF CONTRACTOR'S BOND.

Route No. 5, Section No. 7.

Know All Men by These Presents, That …….. of ……., hereinafter called the Contractor, and ………… and …………, hereinafter called the Sureties, are

held and firmly bound unto The City of New York, hereinafter called the City, in the sum of .... dollars ($........), lawful money of the United States of America, to be paid to the City, for which payment well and truly to be made the Contractor and the Sureties do hereby bind themselves and their, and each of their, executors, administrators, successors and assigns firmly by these presents, as follows: The Contractor to be so held and bound for the full amount of the said sum of .... dollars ($........), and each of the said Sureties to be so held and bound only for a portion of said sum as follows:

The said ....
for the sum of..........................dollars ($........); the said ....
for the sum of..........................dollars ($........); the said ....
for the sum of..........................dollars ($........); the said ....
for the sum of..........................dollars ($........).

In Witness Whereof, The Contractor and the Sureties have hereunto set their hands and seals and such of them as are corporations have caused their respective seals to be hereto affixed and these presents to be attested by the proper officers, this .... day of ...., 1910.

Whereas, The City by the Public Service Commission for the First District (hereinafter called the Commission) is about to enter into a contract with the Contractor bearing even date herewith for the construction of that portion of a Rapid Transit Railroad known as Section 7 of Route 5, in ...., and extending from .... street to .... street, in the Borough of ...., in The City of New York, more particularly described in the said contract; and

Whereas, The City is about to enter into such contract with the Contractor upon the condition, and not otherwise, that this bond shall be given to the City, and upon the faith thereof, now therefore.

The condition of the foregoing obligation is such that if the Contractor shall fully perform the said contract, then this obligation shall be null and void, but else it shall remain in full force and virtue.

It is expressly agreed, between the City and the Sureties (and it is upon such agreement that the City accepts this bond) that the Sureties will and do waive any and every notice of default on the part of the Contractor; that they will and do permit the City to extend the time of the Contractor to make any payment or do any act; that no omission on the part of the City to give any notice of extension of time granted by or on behalf of the City shall be availed of by the Sureties or any of them as a defense upon this Bond; that the Sureties shall not set up or have any defense upon this bond by reason of any alteration of the said contract unless such alteration shall be represented by a formal written instrument duly executed between the City and the Contractor which shall have been duly authorized by a vote of the Commission; and that in case of such alteration, however made, the same shall be a defense to the Sureties only to the extent of the actual injury or damage caused to the Sureties by said alteration.*

ROUTE 5, SECTION 1, BATTERY PARK TO DEY STREET.

Contractor's Proposal for the Construction of a Portion of a Rapid Transit Railroad.

(Route 5, Section 1.)

Notice—Sums of money must be written in words and also in figures, except in the schedules. There must remain annexed hereto: Copy of invitation to contractors. Copy of form of contract. Copy of form of bond.

To the Public Service Commission for the First District:

1. The undersigned†...

.... do.. hereby, in pursuance of the invitation to contractors, a copy of which is attached hereto, propose according to the terms thereof to enter into a contract in the form

annexed hereto with The City of New York for the construction of section 1 of Route 5, and to furnish all necessary labor, materials, machinery, tools, apparatus and other means of construction and perform all the work mentioned in the said contract at the unit prices for the several items as given in the following Schedule of Unit Prices, or as otherwise provided in the form of contract. It is understood that the quantities of various items specified in the following schedule are given as a basis for the uniform comparison of bids and are not in any way guaranteed or represented as correct or intended to be relied on, and they shall not be taken as final and shall form no basis for any claim in case they do not correspond with the final measurements or quantities. It is further understood that the Commission reserves the right to increase or diminish or to omit entirely any of the quantities of items as therein stated:

---

*The execution of the bond must be duly proved before delivery in the form essential to proof to entitle a deed to record in the State of New York. Full affidavits of justification of sureties must be added.

†The bidder's name must be inserted here. If the bid is submitted by a corporation, the full legal title must be given here and a certified copy of the certificate of incorporation must be submitted, together with an affidavit showing the amount of stock paid in in cash and the names and addresses of the directors and principal officers. If the bid is submitted by a firm, the above blank must be filled up in the following form, "the firm of A. B. & Co., composed of A. B. C. D. etc." (giving the names of all the partners).

Schedule of Unit Prices.

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
1.	For earth excavation, above mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard........................	....	160,000	....
2.	For earth excavation, below mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard........................	....	143,000	....
2a.	For earth excavation, both above and below mean high water, for sewers and pipes, including the disposal of it, etc., per cubic yard........................	....	9,000	....
3.	For rock excavation (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard.........	....	61,000	....
4.	For underpinning buildings, including all incidental work and material, per lineal front foot of building underpinned as follows:			
	(a) For buildings less than seven stories in height, per front foot................	....	3,000	....
	(b) For buildings from seven to twelve stories in height, per front foot........	....	400	....
	(c) For buildings over twelve stories in height, per front foot..................	....	300	....
6.	For concrete masonry, in place, per cubic yard	....	70,500	....
7.	For protective concrete masonry in place, outside of waterproofing, per cubic yard.	....	10,300	....
8.	For rubble stone masonry in place, per cubic yard	....	2,300	....
9.	For brick masonry, in place, per cubic yard	....	100	....
10.	For hollow terra cotta brick masonry, in place, per cubic yard..................	....	770	....
12.	For timber piles, in place, and prepared, per lineal foot........................	....	5,000	....
13.	For timber foundations, placed and fastened, per thousand feet, B. M..........	....	2M	....
14.	For broken stone or gravel, in place, other than that used in concrete, per cubic yard	....	3,200	....
15.	For waterproofing, treated woven fabric, laid with pitch or asphaltum, in place, as follows:			
	(a) For 1-ply, per square yard...........	....	80,000	....
	(b) For 2-ply, per square yard...........	....	100	....
	(c) For 3-ply, per square yard...........	....	4,000	....

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
	(d) For 4-ply, per square foot...........	....	100	....
	(e) For 5-ply, per square yard...........	....	100	....
	(f) For 6-ply, per square yard...........	....	100	....
16.	For waterproofing, brick laid in asphalt mastic, in place, per cubic yard..........	....	12,200	....
17.	For vitrified or cast-iron drain pipe, in place, as follows:			
	(a) For 12-inch vitrified pipe, per lineal foot	....	100	....
	(b) For 10-inch vitrified pipe, per lineal foot	....	100	....
	(c) For 8-inch vitrified pipe, per lineal foot	....	2,430	....
	(d) For 6-inch vitrified pipe, per lineal foot	....	200	....
	(e) For 4-inch vitrified pipe, per lineal foot	....	100	....
	(f) For 8-inch cast-iron pipe, per lineal foot	....	....	....
	(g) For 6-inch cast-iron pipe, per lineal foot	....	100	....
	(h) For 4-inch cast-iron pipe, per lineal foot	....	1,800	....
18.	For tunnel ducts, in place, as required by Section 305 of the specifications, per duct foot	....	238,000	....
19.	For riveted steel, painted and erected, per ton of two thousand pounds...........	....	5,500	....
20.	For steel beams and shapes with connections, painted and erected, per ton of two thousand pounds	....	4,400	....
21.	For steel rods and bars built in concrete, per ton of two thousand pounds........	....	660	....
25.	For miscellaneous iron castings, other than tunnel lining, such as manhole heads and covers, gratings, etc.; but not including castings for sewer work or pipes; in place, per ton of two thousand pounds..	....	10	....
26.	For wire mesh in place, per pound........	....	10,600	....
27.	For one and one-half inch (1½ inch) galvanized iron pipe hand rail, in place, including expansion bolts, etc., per lineal foot	....	100	....
28.	For steel gratings for ventilation, in place, including frames, etc., per square foot..	....	9,000	....
29.	For vault lights, in place, per square foot..	....	4,500	....
30.	For street surface restored:			
	(a) Sidewalks, including curbs and all structures and growths therein or thereon, per square yard..................	....	7,140	....
	(b) For temporary repavement and maintenance of roadways, per square yard...	....	14,520	....
31.	For park surface restored (all classes), per square yard	....	20,800	....
32.	For wrought iron or fibre electric conduits, in place, in stations, as follows:			
	(a) For three-fourths inch (¾-inch) wrought iron, per lineal foot..........	....	18,900	....
	(b) For one and one-half inch (1½ inch) wrought iron, per lineal foot..........	....	3,230	....

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
	(c) for two inch (2 inch) wrought iron, per lineal foot	....	1,730	....
	(d) For two inch (2 inch) fibre, per lineal foot	....	6,600	....
33.	For cast-iron outlet boxes in place, in stations, each	....	1,030	....
34.	For six inch (6 inch) cast-iron pipe and fittings, including specials ("extra heavy"), in place in stations, per lineal foot	....	140	....
	SEWERS—ITEMS 37 TO 74.			
	Vitrified and Cast-Iron Pipe—Items 37 *to* 43.			
38.	For 15-inch vitrified pipe sewer, per lineal foot	....	1,250	....
39.	For 18-inch vitrified pipe sewer, per lineal foot	....	720	....
	Egg-Shaped Brick or Concrete Sewers—Items 44 *to* 51.			
45.	For 3 foot 6 inch by 2 foot 4 inch per lineal foot	....	*2,168	....
47.	For 4 foot by 2 foot 8 inch per lineal foot.	....	*452	....
	SURFACE AND SUBSURFACE STRUCTURES—ITEMS 75 AND 76.			
75.	For street surface railroads, including the support, reconstruction, rebuilding, etc., where necessary (but not including permanent masonry supports, if required and added, and not including additional vaults, if required and constructed in excess of the number existing), as follows:			
	(a) For electric railroads, per lineal foot of single track	....	5,500	....
	(b) For horse railroads, per lineal foot of single track	....	240	....
76.	For the temporary and permanent support and maintenance of elevated railroad structures, and all work incidental thereto, per column	....	120	....
	PIPES IN STREETS—ITEMS 77 TO 126.			
	For Work and Material as Called for by Section 71 *of the Specifications. Water and Gas Pipes—Items* 77 *to* 108. *Water Pipes—Items* 77 *to* 88.			
	For water pipes in place, as follows:			
78.	For 4-inch water pipe, per lineal foot	....	100	....
79.	For 6-inch water pipe, per lineal foot	....	760	....
82.	For 12-inch water pipe, per lineal foot	....	730	....
84.	For 20-inch water pipe, per lineal foot	....	680	....
	Gas Pipes—Items 89 *to* 99.			
	For gas pipes in place, as follows:			
90.	For 4-inch gas pipe, per lineal foot	....	280	....
91.	For 6-inch gas pipe, per lineal foot	....	610	....
96.	For 20-inch gas pipe, per lineal foot	....	90	....

*Balance remaining after deducting portion of sewer included in railroad construction under section 424 of the specifications.

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
	New Cast-Iron Hub and Spigot Water and Gas Pipe—Items 100 *and* 101.			
100.	For new cast-iron hub and spigot straight pipe delivered on the work, per ton of two thousand pounds	....	25	....
101.	For new cast-iron hub and spigot pipe, special castings, delivered on the work, per ton of two thousand pounds.......	....	6	....
	Steam Pipes, Air Pipes and Mail Tubes—Items 109 *to* 126. *Steam Pipes—Items* 109 *to* 120.			
	For steam pipe, in place, as follows:			
110.	For 8-inch steam pipe, per lineal foot....	....	30	....
113.	For 15-inch steam pipe, per lineal foot....	....	830	....
	New Steel-welded Flanged Steam Pipe Delivered on the Work, as Follows—Items 115 *to* 120.			
116.	For 8-inch steam pipe, per lineal foot....	....	30	....
119.	For 15-inch steam pipe, per lineal foot....	....	200	....
	DUCTS IN STREETS.			
	Electric Ducts and Conduits in Streets.			
	(Other than tunnel ducts and street railroad ducts which are provided for in Items 18 and 75-a.)			
127.	For electric ducts and conduits in place, as provided in Section 71-a of the specifications, per duct foot.................	....	45,900	....

(2) If this proposal is accepted, the undersigned will within ten days after delivery of notice, execute and deliver the contract with the City in the form aforesaid and at the same time will deliver to the Comptroller of The City of New York, pursuant to the terms of the said contract, a bond in the sum of five hundred thousand dollars ($500,000) in the form hereto annexed with the following named sureties, viz.:

(3) The Commission may cause any notice intended for the undersigned to be delivered at Room .... on the ...... floor of the building .... in the Borough of ...., in The City of New York. Such delivery shall be sufficient notice to the undersigned.

(4) At the time of delivering this proposal to the Commission the undersigned will separately deliver a certified check payable to the order of the Comptroller of The City of New York for the sum of fifteen thousand dollars ($15,000). If the Commission shall notify the undersigned that this contractor's proposal is accepted and that the proposed contract is consented to by the Board of Estimate and Apportionment, then if the undersigned shall fail within ten days thereafter or within such longer period as may be prescribed by the Commission to procure the above described bond to be duly executed and delivered; or if the undersigned shall fail to procure the contract to be duly executed and delivered as aforesaid, then the invitation to contractors and this contractor's proposal shall constitute a contract binding the undersigned to pay to the City the damages by it sustained by reason of such failure of the undersigned, as provided in said invitation to contractors. And the undersigned hereby assigns to the City the said sum so specially deposited by the delivery of such certified check, subject only to the condition that if this proposal shall not be accepted, or, if it shall be accepted and the undersigned shall within ten days after notice as aforesaid or any longer period prescribed by the Commission, execute the said contract and procure the said bond to be duly executed and delivered, then the amount of the said check so specially deposited shall be returned to the undersigned.

(5) A notice of acceptance of this proposal by the Commission addressed to the undersigned as aforesaid shall forthwith, at the option of the Commission, operate as against the undersigned as a complete making of a contract according to the form thereof as aforesaid, with the blanks therein contained filled in according to this proposal.

(6) There are no persons interested with the undersigned in this proposal, except*

(7) This proposal is made without any connection with any other person making a proposal or bid for the same purpose, and is in all respects fair and without collusion or fraud. No member of the Board of Aldermen, head of department, chief of bureau, deputy thereof or clerk therein, or other officer of The City of New York, or any member or employee of the Public Service Commission for the First District, is interested directly or indirectly, as contracting party, partner, stockholder, or otherwise in, or in the performance of, the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof.

Dated the ...., 1910.

Affidavit of Verification.

State of New York, City and County of New York, ss.:

...., being duly sworn, says: I am† the proposing contractor above named. I have read the foregoing proposal. The same is in all respects true.

Sworn to before me this .... day of ...., 1910.

ROUTE 5, SECTION 2, DEY STREET TO WALKER STREET.

Contractor's Proposal for the Construction of a Portion of a Rapid Transit Railroad.

(Route 5, Section 2.)

Notice—Sums of money must be written in words and also in figures, except in the schedules. There must remain annexed hereto: Copy of invitation to contractors. Copy of form of contract. Copy of form of bond.

To the Public Service Commission for the First District:

1. The undersigned‡..
.... do..
hereby, in pursuance of the Invitation to Contractors, a copy of which is attached hereto, propose according to the terms thereof to enter into a contract in the form annexed hereto with The City of New York for the construction of Section 2 of Route 5, and to furnish all necessary labor, materials, machinery, tools, apparatus and other means of construction and perform all the work mentioned in the said contract at the unit prices for the several items as given in the following Schedule of Unit Prices, or as otherwise provided in the form of contract. It is understood that the quantities of various items specified in the following schedule are given as a basis for the uniform comparison of bids and are not in any way guaranteed or represented as correct or intended to be relied on, and they shall not be taken as final and shall form no basis for any claim in case they do not correspond with the final measurements or quantities. It is further understood that the Commission reserves the right to increase or diminish or to omit entirely any of the quantities of items as therein stated:

---

*Here insert the names and addresses of all persons interested with the bidder. If there are no such persons strike out the word "except."

†If the bidder is an individual, do not fill this blank; if the bidder is a firm, here say, "a member of the firm of ...."; if a corporation, say, "the (President or other officer duly authorized) of the........ .... Company."

‡The bidder's name must be inserted here. If the bid is submitted by a corporation, the full legal title must be given here and a certified copy of the certificate of incorporation must be submitted, together with an affidavit showing the amount of stock paid in in cash and the names and addresses of the directors and principal officers. If the bid is submitted by a firm, the above blank must be filled up in the following form, "the firm of A. B. & Co., composed of A. B. C. D. etc." (giving the names of all the partners).

Schedule of Unit Prices.

(2) If this proposal is accepted, the undersigned will within ten days after delivery of notice, execute and deliver the contract with the City in the form aforesaid and at the same time will deliver to the Comptroller of The City of New York, pursuant to the terms of the said contract, a bond in the sum of six hundred thousand dollars ($600,000), in the form hereto annexed with the following named sureties, viz.:

....

....

....

....

(3) The Commission may cause any notice intended for the undersigned to be delivered at Room ...., on the .... floor of the building ...., in the Borough

of ...., in the City of New York. Such delivery shall be sufficient notice to the undersigned.

(4) At the time of delivering this proposal to the Commission the undersigned will separately deliver a certified check payable to the order of the Comptroller of The City of New York for the sum of fifteen thousand dollars ($15,000). If the Commission shall notify the undersigned that this Contractor's proposal is accepted and that the proposed contract is consented to by the Board of Estimate and Apportionment, then if the undersigned shall fail within ten days thereafter or within such longer period as may be prescribed by the Commission to procure the above described bond to be duly executed and delivered; or if the undersigned shall fail to procure the contract to be duly executed and delivered as aforesaid, then the Invitation to Contractors and this Contractor's Proposal shall constitute a contract binding the undersigned to pay the City the damages by it sustained by reason of such failure of the undersigned, as provided in said Invitation to Contractors. And the undersigned hereby assigns to the City the said sum so specially deposited by the delivery of such certified check, subject only to the condition that if this proposal shall not be accepted, or, if it shall be accepted and the undersigned shall within ten days after notice as aforesaid or any longer period prescribed by the Commission, execute the said contract and procure the said bond to be duly executed and delivered, then the amount of the said check so specially deposited shall be returned to the undersigned.

(5) A notice of acceptance of this proposal by the Commission addressed to the undersigned as aforesaid shall forthwith, at the option of the Commission, operate as against the undersigned as a complete making of a contract according to the form thereof as aforesaid, with the blanks therein contained filled in according to this proposal.

(6) There are no persons interested with the undersigned in this proposal except*

(7) This proposal is made without any connection with any other person making a proposal or bid for the same purpose, and is in all respects fair and without collusion or fraud. No member of the Board of Aldermen, head of department, chief of bureau, deputy thereof or clerk therein, or other officer of The City of New York, or any member or employee of the Public Service Commission for the First District is interested directly or indirectly, as contracting party, partner, stockholder, or otherwise in, or in the performance of, the Contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof.

Dated the ...., 1910.

the proposing Contractor above named. I have read the foregoing proposal. The same is in all respects true.

Sworn to before me this .... day of ...., 1910.

ROUTE 5, SECTION 2-A, WALKER STREET TO HOWARD STREET.

Contractor's Proposal for the Construction of a Portion of a Rapid Transit Railroad.

(Route 5, Section 2-A.)

Notice—Sums of money must be written in words and also in figures, except in the schedules. There must remain annexed hereto: Copy of invitation to Contractors. Copy of form of contract. Copy of form of bond.

To the Public Service Commission for the First District:

1. The undersigned‡..
.... do..
hereby, in pursuance of the Invitation to Contractors, a copy of which is attached

---

*Here insert the names and addresses of all persons interested with the bidder. If there are no such persons strike out the word "except."

†If the bidder is an individual, do not fill this blank; if the bidder is a firm, here say, "a member of the firm of ...."; if a corporation, say "the (President or other officer duly authorized) of the .... Company."

‡The bidder's name must be inserted here. If the bid is submitted by a corporation, the full legal title must be given here and a certified copy of the certificate of incorporation must be submitted, together with an affidavit showing the amount of stock paid in in cash and the names and addresses of the directors and principal officers. If the bid is submitted by a firm, the above blank must be filled up in the following form, "the firm of A. B. & Co., composed of A. B. C. D. etc." (giving the names of all the partners).

hereto, propose according to the terms thereof to enter into a contract in the form annexed hereto with The City of New York for the construction of Section 2-A of Route 5, and to furnish all necessary labor, materials, machinery, tools, apparatus and other means of construction and perform all the work mentioned in the said contract at the unit prices for the several items as given in the following Schedule of Unit Prices, or as otherwise provided in the form of contract. It is understood that the quantities of various items specified in the following schedule are given as a basis for the uniform comparison of bids and are not in any way guaranteed or represented as correct or intended to be relied on, and they shall not be taken as final and shall form no basis for any claim in case they do not correspond with the final measurements or quantities. It is further understood that the Commission reserves the right to increase or diminish or to omit entirely any of the quantities of items as therein stated:

Schedule of Unit Prices.

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
1.	For earth excavation, above mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard....................	....	28,070	....

(2) If this proposal is accepted, the undersigned will within ten days after delivery of notice, execute and deliver the contract with the City in the form aforesaid and at the same time will deliver to the Comptroller of The City of New York pursuant to the terms of the said contract a bond in the sum of three hundred thousand dollars ($300,000) in the form hereto annexed with the following named Sureties, viz.:

....
....
....
....

(3) The Commission may cause any notice intended for the undersigned to be delivered at Room No. .... on the .... floor of the building No. .... in the Borough of .... in The City of New York. Such delivery shall be sufficient notice to the undersigned.

(4) At the time of delivering this proposal to the Commission the undersigned will separately deliver a certified check payable to the order of the Comptroller of The City of New York for the sum of ten thousand dollars ($10,000). If the Commission shall notify the undersigned that this Contractor's Proposal is accepted and that the proposed contract is consented to by the Board of Estimate and Apportionment, then if the undersigned shall fail within ten days thereafter or within such longer period as may be prescribed by the Commission to procure the above described bond to be duly executed and delivered; or if the undersigned shall fail to procure the contract to be duly executed and delivered as aforesaid, then the Invitation to Contractors and this Contractor's Proposal shall constitute a contract binding the undersigned to pay to the City the damages by it sustained by reason of such failure of the undersigned as provided in said Invitation to Contractors. And the undersigned hereby assigns to the City the said sum so specially deposited by the delivery of such certified check, subject only to the condition that if this Proposal shall not be accepted, or, if it shall be accepted and the undersigned shall within ten days after notice as aforesaid or any longer period prescribed by the Commission, execute the said contract and procure the said bond to be duly executed and delivered, then the amount of the said check so specially deposited shall be returned to the undersigned.

(5) A notice of acceptance of this Proposal by the Commission addressed to the undersigned as aforesaid shall forthwith, at the option of the Commission, operate

as against the undersigned as a complete making of a contract according to the form thereof as aforesaid, with the blanks therein contained filled in according to this Proposal.

(6) There are no persons interested with the undersigned in this Proposal except*

(7) This Proposal is made without any connection with any other person making a proposal or bid for the same purpose, and is in all respects fair and without collusion or fraud. No member of the Board of Aldermen, head of department, chief of bureau, deputy thereof or clerk therein, or other officer of The City of New York, or any member or employee of the Public Service Commission for the First District is interested directly or indirectly, as contracting party, partner, stockholder, or otherwise in, or in the performance of, the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof.

State of New York, City and County of New York, ss.:

.... being duly sworn, says: I am†.. the proposing Contractor above named. I have read the foregoing proposal. The same is in all respects true.

Sworn to before me this............ day of ...., 1910.

ROUTE 5, SECTION 4, BLEECKER STREET TO 14TH STREET.

Contractor's Proposal for the Construction of a Portion of a Rapid Transit Railroad.

(Route 5, Section 4.)

Notice—Sums of money must be written in words and also in figures, except in the schedules. There must remain annexed hereto: Copy of Invitation to Contractors. Copy of form of contract. Copy of form of bond.

To the Public Service Commission for the First District:

1. The undersigned‡.. do.. hereby, in pursuance of the Invitation to Contractors, a copy of which is attached hereto, propose according to the terms thereof to enter into a contract in the form annexed hereto with The City of New York for the construction of Section 4 of Route 5, and to furnish all necessary labor, materials, machinery, tools, apparatus and other means of construction and perform all the work mentioned in the said contract at the unit prices for the several items as given in the following Schedule of Unit Prices, or as otherwise provided in the form of contract. It is understood that the quantities of various items specified in the following schedule are given as a basis for the uniform comparison of bids, and are not in any way guaranteed or represented as correct or intended to be relied on, and they shall not be taken as final and shall form no basis for any claim in case they do not correspond with the final measurements or quantities. It is further understood that the Commission reserves the right to increase or diminish or to omit entirely any of the quantities of items as therein stated:

---

*Here insert the names and addresses of all persons interested with the bidder. If there are no such persons strike out the word "except."

†If the bidder is an individual, do not fill this blank; if the bidder is a firm, here say, "a member of the firm of.."; if a corporation, say "the (President or other officer duly authorized) of the........ .... Company."

‡The bidder's name must be inserted here. If the bid is submitted by a corporation, the full legal title must be given here and a certified copy of the certificate of incorporation must be submitted, together with an affidavit showing the amount of stock paid in in cash and the names and addresses of the directors and principal officers. If the bid is submitted by a firm, the above blank must be filled up in the following form, "the firm of A. B. & Co., composed of A. B. C. D. etc." (giving the names of all the partners).

Schedule of Unit Prices.

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
1.	For earth excavation, above mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard....................	....	181,400	....
2.	For earth excavation, below mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard.......................	....	14,100	....
2a.	For earth excavation, both above and below mean high water, for sewers and pipes, including the disposal of it, etc., per cubic yard.......................	....	9,000	....
3.	For rock excavation (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard........	....	25,700	....
4.	For underpinning buildings, including all incidental work and material per lineal front foot of building underpinned, as follows:			
	(a) For buildings less than seven stories in height, per front foot................	....	2,100	....
	(b) For buildings from seven to twelve stories in height, per front foot........	....	1,600	....

	New Cast-iron Hub and Spigot Water and Gas Pipe—Items 100 *and* 101.			
100.	For new cast-iron hub and spigot straight pipe delivered on the work, per ton of two thousand pounds..................	....	20	....
101.	For new cast-iron hub and spigot pipe, special castings, delivered on the work, per ton of two thousand pounds.......	....	5	....
	DUCTS IN STREETS.			
	Electric Ducts and Conduits in Streets.			
	(Other than tunnel ducts and street railroad ducts which are provided for in Items 18 and 75-a).			
127.	For electric ducts and conduits in place, as provided in Section 71-a of the specifications, per duct foot...............	....	86,000	....

(2) If this proposal is accepted, the undersigned will within ten days after delivery of notice, execute and deliver the contract with the City in the form aforesaid and at the same time will deliver to the Comptroller of The City of New York pursuant to the terms of the said contract a bond in the sum of three hundred thousand dollars ($300,000) in the form hereto annexed with the following named Sureties, viz.:...

....

....

....

....

(3) The Commission may cause any notice intended for the undersigned to be delivered at Room No...............on the...................floor of the building No........................in the Borough of.............................. in the City of New York. Such delivery shall be sufficient notice to the undersigned.

(4) At the time of delivering this proposal to the Commission the undersigned will separately deliver a certified check payable to the order of the Comptroller of The City of New York for the sum of ten thousand dollars ($10,000). If the Commission shall notify the undersigned that this Contractor's Proposal is accepted and that the proposed contract is consented to by the Board of Estimate and Apportionment, then if the undersigned shall fail within ten days thereafter or within such longer period as may be prescribed by the Commission to procure the above described bond to be duly executed and delivered; or if the undersigned shall fail to procure the contract to be duly executed and delivered as aforesaid, then the Invitation to Contractors and this Contractor's Proposal shall constitute a contract binding the undersigned to pay to the City the damages by it sustained by reason of such failure of the undersigned, as provided in said Invitation to Contractors. And the undersigned hereby assigns to the City the said sum so specially deposited by the delivery of such certified check, subject only to the condition that if this Proposal shall not be accepted, or, if it shall be accepted and the undersigned shall within ten days after notice as aforesaid or any longer period prescribed by the Commission, execute the said contract and procure the said bond to be duly executed and delivered, then the amount of the said check so specially deposited shall be returned to the undersigned.

(5) A notice of acceptance of this Proposal by the Commission addressed to the undersigned as aforesaid shall forthwith, at the option of the Commission operate as against the undersigned as a complete making of a contract according to the form thereof as aforesaid, with the blanks therein contained filled in according to this Proposal.

(6) There are no persons interested with the undersigned in this Proposal, except*

(7) This Proposal is made without any connection with any other person making a proposal or bid for the same purpose, and is in all respects fair and without collusion or fraud. No member of the Board of Aldermen, head of department, chief of bureau, deputy thereof or clerk therein, or other officer of The City of New York, or any member or employee of the Public Service Commission for the First District is interested directly or indirectly, as contracting party, partner, stockholder, or otherwise in, or in the performance of the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof.

Dated, the ...., 1910.

Affidavit of Verification.

State of New York, City and County of New York, ss.:

.............................., being duly sworn, says: I am†.................. the proposing Contractor above named. I have read the foregoing proposal. The same is in all respects true.

Sworn to before me this ...... day of ...., 1910.

ROUTE 5, SECTION 6, 26TH STREET TO 40TH STREET.

Contractor's Proposal for the Construction of a Portion of a Rapid Transit Railroad.

(Route 5, Section 6.)

Notice—Sums of money must be written in words and also in figures, except in the schedules. There must remain annexed hereto: Copy of Invitation to Contractors. Copy of Form of Contract. Copy of Form of Bond.

To the Public Service Commission for the First District:

1. The undersigned‡.. .... do .. hereby, in pursuance of the Invitation to Contractors, a copy of which is attached hereto, propose according to the terms thereof to enter into a contract in the form annexed hereto with The City of New York for the construction of Section 6 of Route 5, and to furnish all necessary labor, materials, machinery, tools, apparatus and other means of construction and perform all the work mentioned in the said contract at the unit prices for the several items as given in the following Schedule of Unit Prices, or as otherwise provided in the form of contract. It is understood that the quantities of various items specified in the following schedule are given as a basis for the uniform comparison of bids and are not in any way guaranteed or represented as correct or intended to be relied on, and they shall not be taken as final and shall form no basis for any claim in case they do not correspond with the final measurements or quantities. It is further understood that the Commission reserves the right to increase or diminish or to omit entirely any of the quantities of items as therein stated:

---

*Here insert the names and addresses of all persons interested with the bidder. If there are no such persons strike out the word "except."

†If the bidder is an individual, do not fill this blank; if the bidder is a firm, here say, "a member of the firm of ...."; if a corporation, say, "the (President or other officer duly authorized) of the.......................Company."

‡The bidder's name must be inserted here. If the bid is submitted by a corporation, the full legal title must be given here and a certified copy of the certificate of incorporation must be submitted, together with an affidavit showing the amount of stock paid in in cash and the names and addresses of the directors and principal officers. If the bid is submitted by a firm, the above blank must be filled up in the following form, "the firm of A. B. & Co., composed of A. B. C. D., etc." (giving the names of all the partners).

Schedule of Unit Prices.

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
1.	For earth excavation above mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard....................	....	73,000	....
2.	For earth excavation, below mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard	....	500	....
2a.	For earth excavation, both above and below mean high water, for sewers and pipes, including the disposal of it, etc., per cubic yard	....	37,000	....
3.	For rock excavation (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard......	....	116,200	....
3a.	For rock excavation for sewers and pipes, including the disposal of it, etc., per cubic yard	....	27,000	....
4.	For underpinning buildings, including all incidental work and material, per lineal front foot of building underpinned, as follows:			
	(a) For buildings less than seven stories in height, per front foot...............	....	340	....
	(b) For buildings from seven to twelve stories in height, per front foot........	....	30	....
	(c) For buildings over twelve stories in height, per front foot	....	....	....

(2) If this proposal is accepted, the undersigned will, within ten days after delivery of notice, execute and deliver the contract with the City in the form aforesaid and at the same time will deliver to the Comptroller of The City of New York pursuant to the terms of the said contract a bond in the sum of three hundred and fifty thousand dollars ($350,000) in the form hereto annexed, with the following named Sureties, viz.:

....

....

....

....

(3) The Commission may cause any notice intended for the undersigned to be delivered at Room No. .... on the ...... floor of the building No. .... in the Borough of .... in The City of New York. Such delivery shall be sufficient notice to the undersigned.

(4) At the time of delivering this proposal to the Commission the undersigned will separately deliver a certified check payable to the order of the Comptroller of The City of New York for the sum of ten thousand dollars ($10,000). If the Commission shall notify the undersigned that this Contractor's Proposal is accepted and that the proposed contract is consented to by the Board of Estimate and Apportionment, then if the undersigned shall fail within ten days thereafter or within such longer period as may be prescribed by the Commission to procure the above described bond to be duly executed and delivered; or if the undersigned shall fail to procure the contract to be duly executed and delivered as aforesaid, then the Invitation to Contractors and this Contractor's Proposal shall constitute a contract binding the undersigned to pay to the City the damages by it sustained by reason of such failure of the undersigned, as provided in said Invitation to Contractors. And the undersigned hereby assigns to the City the said sum so specially deposited by the delivery of such certified check, subject only to the condition that if this Proposal shall not be accepted, or, if it shall be accepted and the undersigned shall within ten days after notice as aforesaid or any longer period prescribed by the Commission, execute the said con-

tract and procure the said bond to be duly executed and delivered, then the amount of the said check so specially deposited shall be returned to the undersigned.

(5) A notice of acceptance of this Proposal by the Commission addressed to the undersigned as aforesaid shall forthwith, at the option of the Commission, operate as against the undersigned as a complete making of a contract according to the form thereof as aforesaid, with the blanks therein contained filled in according to this Proposal.

(6) There are no persons interested with the undersigned in this Proposal, except*

(7) This Proposal is made without any connection with any other person making a proposal or bid for the same purpose, and is in all respects fair and without collusion or fraud. No member of the Board of Aldermen, head of department, chief of bureau, deputy thereof or clerk therein, or other officer of The City of New York, or any member or employee of the Public Service Commission for the First District is interested directly or indirectly, as contracting party, partner, stockholder, or otherwise in, or in the performance of, the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof.

Schedule of Unit Prices.

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
1.	For earth excavation above mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard........................	....	125,600	....
2a.	For earth excavation, both above and below mean high water, for sewers and pipes, including the disposal of it, etc., per cubic yard	....	6,300	....
3.	For rock excavation (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard................	....	221,000	....
3a.	For rock excavation, for sewers and pipes, including the disposal of it, etc., per cubic yard	....	5,800	....
4.	For underpinning buildings, including all incidental work and material, per lineal front foot of building underpinned, as follows:			
	(a) For buildings less than seven stories in height, per front foot................	....	1,284	....
	(b) For buildings from seven to twelve stories in height, per front foot.........	....	145	....
	(c) For buildings over twelve stories in height, per front foot..................	....	....	....
5.	For tunnel excavation (except tunneling for sewers), including disposal of material, timbering, etc., per cubic yard.....	....	17,700	....
5a.	For tunnel excavation for sewers and pipes, including the disposal of material, timber, etc., per cubic yard.....................	....	565	....
6.	For concrete masonry, in place, per cubic yard	....	54,200	....
7.	For protective concrete masonry in place outside of waterproofing, per cubic yard.	....	1,240	....
8.	For rubble stone masonry in place, per cubic yard	....	3,200	....
9.	For brick masonry, in place, per cubic yard.	....	800	....
10.	For hollow terra cotta brick masonry, in place, per cubic yard..................	....	230	....
11.	For grout of Portland cement, per barrel of Portland cement used................	....	500	....
14.	For broken stone or gravel, in place, other than that used in concrete, per cubic yard	....	2,250	....
15.	For waterproofing, treated woven fabric, laid with pitch or asphaltum, in place, as follows:			
	(a) For 1-ply, per square yard...........	....	5,535	....
	(b) For 2-ply, per square yard...........	....	100	....
	(c) For 3-ply, per square yard...........	....	10,840	....
	(d) For 4-ply, per square yard...........	....	100	....
	(e) For 5-ply, per square yard...........	....	100	....
	(f) For 6-ply, per square yard...........	....	100	....
16.	For waterproofing, brick laid in asphalt mastic, in place, per cubic yard..........	....	1,020	....
17.	For vitrified or cast-iron drain pipe, in place, as follows:			
	(a) For 12-inch vitrified pipe, per lineal foot	....	100	....

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
	(b) For 10-inch vitrified pipe, per lineal foot	....	100	....
	(c) For 8-inch vitrified pipe, per lineal foot	....	6,500	....
	(d) For 6-inch vitrified pipe, per lineal foot	....	200	....
	(e) For 4-inch vitrified pipe, per lineal foot	....	100	....
	(f) For 8-inch cast-iron pipe, per lineal foot	....	....	....
	(g) For 6-inch cast-iron pipe, per lineal foot	....	100	....
	(h) For 4-inch cast-iron pipe, per lineal foot	....	8,570	....
18.	For tunnel ducts, in place, as required by section 305 of the specifications, per duct foot	....	609,000	....
19.	For riveted steel, painted and erected, per ton of two thousand pounds............	....	4,390	....
20.	For steel beams and shapes with connections, painted and erected, per ton of two thousand pounds	....	3,650	....
21.	For steel rods and bars built in concrete, per ton of two thousand pounds.........	....	380	....
24.	For cast-iron columns erected and painted, per ton of two thousand pounds.........	....	52	....
25.	For miscellaneous iron castings, other than tunnel lining, such as manhole heads and covers, gratings, etc.; but not including castings for sewer work or pipes; in place, per ton of two thousand pounds...	....	18	....
26.	For wire mesh, in place, per pound........	....	5,900	....
27.	For one and one half inch (1½-inch.) galvanized iron pipe hand rail, in place, including expansion bolts, etc., per lineal foot	....	9,783	....
28.	For steel gratings for ventilation, in place, including frames, etc., per square foot...	....	10,100	....
29.	For vault lights, in place, per square foot..	....	8,150	....
30.	For street surface restored:			
	(a) Sidewalks including curbs and all structures and growths therein and thereon, per square yard................	....	9,970	....
	(b) For temporary repavement and maintenance of roadways, per square yard...	....	15,430	....
32.	For wrought-iron or fibre electric conduits, in place, in stations, as follows:			
	(a) For three-fourths inch (¾-inch) wrought-iron, per lineal foot..........	....	23,100	....
	(b) For one and one-half inch (1½-inch) wrought-iron, per lineal foot..........	....	1,070	....
	(c) For two-inch (2-inch) wrought-iron per lineal foot......................	....	575	....
	(d) For two-inch (2-inch) fibre, per lineal foot	....	6,610	....
33.	For cast-iron outlet boxes in place in stations, each	....	994	....
34.	For six-inch (6-inch) cast-iron pipe and fittings. including specials ("extra heavy"), in place in stations, per lineal foot	....	440	....

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
	SEWERS—ITEMS 37 TO 74.			
	Vitrified and Cast Iron Pipe—Items 37 to 43.			
38.	For 15-inch vitrified pipe sewer, per lineal foot	....	2,887	....
39.	For 18-inch vitrified pipe sewer, per lineal foot	....	830	....
	Egg-Shaped Brick or Concrete Sewers—Items 44 to 51.			
45.	For 3 feet 6 inches by 2 feet 4 inches, per lineal foot	....	1,044	....
47.	For 4 feet 0 inches x 2 feet 8 inches per lineal foot	....	806	....
	Circular Sewers—Brick or Concrete or Reinforced Concrete—Items 52 to 66.			
53.	For 4 feet 0 inches per lineal foot	....	300	....
58.	For 5 feet 6 inches, in tunnel, per lineal foot	....	257	....
	SURFACE AND SUBSURFACE STRUCTURES—ITEMS 75 AND 76.			
75.	For street surface railroads, including the support, reconstruction, rebuilding, etc., where necessary (but not including permanent masonry supports, if required and added, and not including additional vaults, if required and constructed in excess of the number existing), as follows:			
	(a) For electric railroads, per lineal foot of single track	....	7,192	....
	(b) For horse railroads, per lineal foot of single track	....	....	....
76.	For the temporary and permanent support and maintenance of elevated railroad structures, and all work incidental thereto, per column	....	4	....
	PIPES IN STREETS—ITEMS 77 TO 126.			
	For Work and Material as Called for by Section 71 of the Specifications.			
	Water and Gas Pipes—Items 77 to 108.			
	Water Pipes—Items 77 to 88.			
	For water pipes in place, as follows:			
78.	For 4-inch water pipe, per lineal foot	....	100	....
79.	For 6-inch water pipe, per lineal foot	....	800	....
82.	For 12-inch water pipe, per lineal foot	....	340	....
84.	For 20-inch water pipe, per lineal foot	....	700	....
86.	For 30-inch water pipe, per lineal foot	....	140	....
	Gas Pipes—Items 89 to 99.			
	For gas pipes in place, as follows:			
90.	For 4-inch gas pipe, per lineal foot	....	360	....
91.	For 6-inch gas pipe, per lineal foot	....	200	....
92.	For 8-inch gas pipe, per lineal foot	....	540	....
94.	For 12-inch gas pipe, per lineal foot	....	270	....
95.	For 16-inch gas pipe, per lineal foot	....	470	....
96.	For 20-inch gas pipe, per lineal foot	....	180	....

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
	New Cast-iron Hub and Spigot Water and Gas Pipe—Items 100 *and* 101.			
100.	For new cast-iron hub and spigot straight pipe delivered on the work, per ton of two thousand pounds	....	40	....
101.	For new cast-iron hub and spigot pipe, special castings, delivered on the work, per ton of two thousand pounds........	....	10	....
	Air Pipes—Items 121 *to* 124.			
	For air pipe in place, as follows:			
121.	For 6-inch air pipe, per lineal foot........	....	130	....
122.	For 8-inch air pipe, per lineal foot........	....	500	....
123.	For new 6-inch air pipe, delivered on the work, per lineal foot..................	....	30	....
124.	For new 8-inch air pipe delivered on the work, per lineal foot.................	....	100	....
	Mail Tubes—Items 125 *and* 126.			
125.	For 8-inch mail tube in place, per lineal foot	....	1,900	....
126.	For new 8-inch mail tube, delivered on the work, per ton of two thousand pounds..	....	10	....
	DUCTS IN STREETS			
	Electric Ducts and Conduits in Streets.			
	(Other than tunnel ducts and street railroad ducts which are provided for in Items 18 and 75-a).			
127.	For electric ducts and conduits in place, as provided in Section 71a of the specifications, per duct foot.................	....	106,000	....

(2) If this proposal is accepted, the undersigned will within ten days after delivery of notice, execute and deliver the contract with the City in the form aforesaid and at the same time will deliver to the Comptroller of The City of New York pursuant to the terms of the said contract a bond in the sum of three hundred and fifty thousand dollars ($350,000) in the form hereto annexed with the following named Sureties, viz.:

....

....

....

....

(3) The Commission may cause any notice intended for the undersigned to be delivered at Room No. .... on the .... floor of the building No. .... in the Borough of.......................... in the City of New York. Such delivery shall be sufficient notice to the undersigned.

(4) At the time of delivering this proposal to the Commission the undersigned will separately deliver a certified check payable to the order of the Comptroller of The City of New York for the sum of ten thousand dollars ($10,000). If the Commission shall notify the undersigned that this Contractor's Proposal is accepted and that the proposed contract is consented to by the Board of Estimate and Apportionment, then if the undersigned shall fail within ten days thereafter or within such longer period as may be prescribed by the Commission to procure the above described bond to be duly executed and delivered; or if the undersigned shall fail to procure the contract to be duly executed and delivered as aforesaid, then the Invitation to Contractors and this Contractor's Proposal shall constitute a contract binding the undersigned to pay to the City the damages by it sustained by reason of such failure of the undersigned, as provided in said Invitation to Contractors. And the undersigned hereby assigns to the City the said sum so specially deposited by the delivery of such certified check, subject only to the condition that if this Proposal shall not be accepted, or, if it shall be accepted and the undersigned shall within ten days after notice as aforesaid or any

longer period prescribed by the Commission, execute the said contract and procure the said bond to be duly executed and delivered, then the amount of the said check so specially desposited shall be returned to the undersigned.

(5) A notice of acceptance of this Proposal by the Commission addressed to the undersigned as aforesaid shall forthwith, at the option of the Commission, operate as against the undersigned as a complete making of a contract according to the form thereof as aforesaid, with the blanks therein contained filled in according to this Proposal.

(6) There are no persons interested with the undersigned in this Proposal, except*

(7) This Proposal is made without any connection with any other person making a proposal or bid for the same purpose, and is in all respects fair and without collusion or fraud. No member of the Board of Aldermen, head of department, chief of bureau, deputy thereof or clerk therein, or other officer of The City of New York, or any member or employee of the Public Service Commission for the First District is interested directly or indirectly, as contracting party, partner, stockholder, or otherwise in, or in the performance of, the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof.

Dated the ...., 1910.

Affidavit of Verification.

State of New York, City and County of New York, ss.:

....being duly sworn, says: I am†............ the proposing Contractor above named. I have read the foregoing proposal. The same is in all respects true.

Sworn to before me this .... day of ...., 1910.

ROUTE 5, SECTION 8, 53D STREET TO 67TH STREET.

Contractor's Proposal for the Construction of a Portion of a Rapid Transit Railroad.

(Route 5, Section 8.)

Notice—Sums of money must be written in words and also in figures, except in the schedules. There must remain annexed hereto: Copy of invitation to Contractors. Copy of form of contract. Copy of form of bond.

To the Public Service Commission for the First District:

1. The undersigned‡.. .... do.. hereby, in pursuance of the Invitation to Contractors, a copy of which is attached hereto, propose according to the terms thereof to enter into a contract in the form annexed hereto with The City of New York for the construction of Section 8 of Route 5, and to furnish all necessary labor, materials, machinery, tools, apparatus and other means of construction and perform all the work mentioned in the said contract at the unit prices for the several items as given in the following Schedule of Unit Prices, or as otherwise provided in the form of contract. It is understood that the quantities of various items specified in the following schedule are given as a basis for the uniform comparison of bids, and are not in any way guaranteed or represented as correct or intended to be relied on, and they shall not be taken as final and shall form no basis for any claim in case they do not correspond with the final measurements or quantities. It is further understood that the Commission reserves the right to increase or diminish or to omit entirely any of the quantities of items as therein stated:

*Here insert the names and addresses of all persons interested with the bidder. If there are no such persons strike out the word "except."

Affidavit of Verification.

State of New York, City and County of New York, ss.:

.............................., being duly sworn, says: I am† .... the proposing Contractor above named. I have read the foregoing proposal. The same is in all respects true.

Sworn to before me this .... day of ...., 1910.

ROUTE 5, SECTION 9, 67TH STREET TO 79TH STREET.

Contractor's Proposal for the Construction of a Portion of a Rapid Transit Railroad.

(Route 5, Section 9.)

Notice—Sums of money must be written in words and also in figures, except in the schedules. There must remain annexed hereto: Copy of invitation to Contractors. Copy of form of contract. Copy of form of bond.

To the Public Service Commission for the First District:

1. The undersigned‡.. .... do .. hereby, in pursuance of the Invitation to Contractors, a copy of which is attached hereto, propose according to the terms thereof to enter into a contract in the form annexed hereto with The City of New York for the construction of Section 9 of Route 5, and to furnish all necessary labor, materials, machinery, tools, apparatus and other means of construction and perform all the work mentioned in the said contract at the unit prices for the several items as given in the following Schedule of Unit Prices, or as otherwise provided in the form of contract. It is understood that the quantities of various items specified in the following schedule are given as a basis for the uniform comparison of bids and are not in any way guaranteed or represented as correct or intended to be relied on, and they shall not be taken as final and shall form no basis for any claim in case they do not correspond with the final measurements or quantities. It is further understood that the Commission reserves the right to increase or diminish or to omit entirely any of the quantities of items as therein stated:

Schedule of Unit Prices.

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder Amount.
1.	For earth excavation, above mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard	....	101,100	....
2a.	For earth excavation, both above and below mean high water, for sewers and pipes, including the disposal of it, etc., per cubic yard	....	18,000	....
3.	For rock excavation (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard..........	....	48,400	....
3a.	For rock excavation for sewers and pipes, including the disposal of it, etc., per cubic yard	....	500	....

---

†If the bidder is an individual, do not fill this blank; if the bidder is a firm, here say, "a member of the firm of ...."; if a corporation, say "the (President or other officer duly authorized) of the .... Company."

‡The bidder's name must be inserted here. If the bid is submitted by a corporation, the full legal title must be given here and a certified copy of the certificate of incorporation must be submitted, together with an affidavit showing the amount of stock paid in in cash and the names and addresses of the directors and principal officers. If the bid is submitted by a firm, the above blank must be filled up in the following form, "the firm of A. B. & Co., composed of A. B. C. D. etc." (giving the names of all the partners).

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
4.	For underpinning buildings, including all incidental work and material, per lineal front foot of building underpinned, as follows:			
	(a) For buildings less than seven stories in height, per front foot...............	....	350	....
	(b) For buildings from seven to twelve stories in height, per front foot........	....	....	....
	(c) For buildings over twelve stories in height, per front foot..................	....	....	....
5.	For tunnel excavation, including disposal of material, timbering, etc., per cubic yard	....	60,900	....
6.	For concrete masonry in place, per cubic yard	....	36,360	....
7.	For protective concrete masonry in place outside of waterproofing, per cubic yard..	....	900	....
8.	For rubble stone masonry in place, per cubic yard	....	4,650	....
9.	For brick, masonry, in place, per cubic yard	....	2,740	....
10.	For hollow terra cotta brick masonry, in place, per cubic yard...................	....	525	....
11.	For grout of Portland cement, per barrel of Portland cement used..............	....	2,000	....
14.	For broken stone or gravel, in place, other than that used in concrete, per cubic yard	....	1,300	....
15.	For waterproofing, treated woven fabric, laid with pitch or asphaltum, in place, as follows:			
	(a) For 1-ply, per square yard...........	....	4,860	....
	(b) For 2-ply, per square yard...........	....	100	....
	(c) For 3-ply, per square yard...........	....	7,950	....
	(d) For 4-ply, per square yard...........	....	100	....
	(e) For 5-ply, per square yard...........	....	100	....
	(f) For 6-ply, per square yard...........	....	100	....
16.	For waterproofing, brick laid in asphalt mastic, in place, per cubic yard........	....	824	....
17.	For vitrified or cast-iron drain pipe, in place, as follows:			
	(a) For 12-inch vitrified pipe, per lineal foot	....	100	....
	(b) For 10-inch vitrified pipe, per lineal foot	....	100	....
	(c) For 8-inch vitrified pipe, per lineal foot	....	6,490	....
	(d) For 6-inch vitrified pipe, per lineal foot	....	200	....
	(e) For 4-inch vitrified pipe, per lineal foot	....	100	....
	(f) For 8-inch cast-iron pipe, per lineal foot	....	....	....
	(g) For 6-inch cast-iron pipe, per lineal foot	....	100	....
	(h) For 4-inch cast-iron pipe, per lineal foot	....	8,540	....
18.	For tunnel ducts, in place, as required by Section 305 of the specifications, per duct foot	....	491,400	....

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
19.	For riveted steel, painted and erected, per ton of two thousand pounds............	....	994	....
20.	For steel beams and shapes with connections, painted and erected, per ton of two thousand pounds	....	695	....
21.	For steel rods and bars built in concrete,, per ton of two thousand pounds..	....	1,017	....
24.	For cast-iron columns erected and painted, per ton of two thousand pounds.........	....	52	....
25.	For miscellaneous iron castings, other than tunnel lining, such as manhole heads and covers, gratings, etc.; but not including castings for sewer work or pipes; in place, per ton of two thousand pounds	....	5	....
26.	For wire mesh, in place, per pound.......	....	1,300	....
27.	For one and one-half-inch (1½-inch) galvanized iron pipe hand rail, in place, including expansion bolts, etc., per lineal foot	....	10,520	....
28.	For steel gratings for ventilation, in place, including frames, etc., per square foot	....	5,580	....
29.	For vault lights, in place, per square foot	....	2,620	....
30.	For street surface restored:			
	(a) Sidewalks including curbs and all structures and growths therein and thereon, per square yard...............	....	4,790	....
	(b) For temporary repavement and maintenance of roadways, per square yard..	....	15,760	....
32.	For wrought-iron or fibre electric conduits, in place, in stations, as follows:			
	(a) For three-fourths-inch (¾-inch) wrought-iron, per lineal foot...........	....	14,045	....
	(b) For one and one-half inch (1½-inch) wrought-iron, per lineal foot...........	....	478	....
	(c) For two-inch (2-inch) wrought-iron per lineal foot	....	256	....
	(d) For two-inch (2-inch) fibre, per lineal foot	....	4,400	....
33.	For cast-iron outlet boxes in place, in stations, each	....	612	....
34.	For six-inch (6-inch) cast-iron pipe and fittings, including specials ("extra heavy"), in place, in stations, per lineal foot	....	300	....
	SEWERS—ITEMS 37 TO 74.			
	Vitrified and Cast Iron Pipe—Items 37 to 43.			
38.	For 15-inch vitrified pipe sewer, per lineal foot	....	2,800	....
39.	For 18-inch vitrified pipe sewer, per lineal foot	....	530	....
42.	For cast-iron sewer pipe (straight pipe), in place in the work, per ton of two thousand pounds	....	12	....

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
	Egg-Shaped Brick or Concrete Sewers—Items 44 to 51.			
45.	For 3 feet 6 inches by 2 feet 4 inches per lineal foot	....	1,250	....
	Circular Sewers—Brick or Concrete or Reinforced Concrete—Items 52 to 66.			
60.	For 6 feet 0 inch per lineal foot..........	....	1,200	....
62.	For 6 feet 6 inches per lineal foot........	....	240	....
	SURFACE AND SUBSURFACE STRUCTURES—ITEMS 75 AND 76.			
75.	For street surface railroads, including the support, reconstruction, rebuilding, etc., where necessary (but not including permanent masonry supports (if required and added and not including additional vaults if required and constructed in excess of the number existing), as follows:			
	(a) For electric railroads, per lineal foot of single track........................	....	6,196	....
	(b) For horse railroads, per lineal foot of single track........................	....	....	....
	PIPES IN STREETS—ITEMS 77 TO 126.			
	For Work and Material as Called for by Section 71 of the Specifications.			
	Water and Gas Pipes—Items 77 to 108.			
	Water Pipes—Items 77 to 88.			
	For water pipes in place, as follows:			
78.	For 4-inch water pipe, per lineal foot....	....	100	....
79.	For 6-inch water pipe, per lineal foot....	....	330	....
82.	For 12-inch water pipe, per lineal foot....	....	1,050	....
83.	For 16-inch water pipe, per lineal feet....	....	100	....
	Gas Pipes—Items 89 to 99.			
	For gas pipes in place, as follows:			
90.	For 4-inch gas pipe, per lineal foot......	....	330	....
91.	For 6-inch gas pipe, per lineal foot......	....	1,200	....
92.	For 8-inch gas pipe, per lineal foot......	....	280	....
94.	For 12-inch gas pipe, per lineal foot......	....	290	....
96.	For 20-inch gas pipe, per lineal foot......	....	530	....
	New Cast-Iron Hub and Spigot Water and Gas Pipe—Items 100 and 101.			
100.	For new cast-iron hub and spigot straight pipe delivered on the work, per ton of two thousand pounds	....	30	....
101.	For new cast-iron hub and spigot pipe, special castings, delivered on the work, per ton of two thousand pounds.......	....	8	....
	Air Pipes—Items 121 to 124.			
	For air pipe in place, as follows:			
122.	For 8-inch air pipe, per linear foot......	....	410	....
124.	For new 8-inch air pipe, delivered on the work, per linear foot.................	....	100	....

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
	DUCTS IN STREETS. *Electric Ducts and Conduits in Streets.* (Other than tunnel ducts and street railroad ducts, which are provided for in Items 18 and 75-a.)			
127.	For electric ducts and conduits in place, as provided in Section 71-a of the specifications, per duct foot................	....	170,000	....

(2) If this proposal is accepted, the undersigned will, within ten days after delivery of notice, execute and deliver the contract with the City in the form aforesaid and at the same time will deliver to the Comptroller of The City of New York, pursuant to the terms of the said contract, a bond in the sum of three hundred thousand dollars ($300,000), in the form hereto annexed, with the following named Sureties, viz.:

....

....

....

....

(3) The Commission may cause any notice intended for the undersigned to be delivered at Room No.........., on the...... floor of the building No............. in the Borough of.............., in The City of New York. Such delivery shall be sufficient notice to the undersigned.

(4) At the time of delivering this proposal to the Commission the undersigned will separately deliver a certified check payable to the order of the Comptroller of The City of New York for the sum of ten thousand dollars ($10,000). If the Commission shall notify the undersigned that the Contractor's Proposal is accepted and that the proposed contract is consented to by the Board of Estimate and Apportionment, then, if the undersigned shall fail within ten days thereafter or within such longer period as may be prescribed by the Commission, to procure the above described bond to be duly executed and delivered; or if the undersigned shall fail to procure the contract to be duly executed and delivered as aforesaid, then the Invitation to Contractors and this Contractor's Proposal shall constitute a contract binding the undersigned to pay to the City the damages by it sustained by reason of such failure of the undersigned, as provided in said Invitation to Contractors. And the undersigned hereby assigns to the City the said sum so specially deposited by the delivery of such certified check, subject only to the condition that if this Proposal shall not be accepted, or, if it shall be accepted and the undersigned shall within ten days after notice as aforesaid or any longer period prescribed by the Commission, execute the said contract and procure the said bond to be duly executed and delivered, then the amount of the said check so specially deposited shall be returned to the undersigned.

(5) A notice of acceptance of this Proposal by the Commission addressed to the undersigned as aforesaid shall forthwith, at the option of the Commission, operate as against the undersigned as a complete making of a contract according to the form thereof as aforesaid, with the blanks therein contained filled in according to this Proposal.

(6) There are no persons interested with the undersigned in this Proposal. except*

(7) This proposal is made without any connection with any other person making a proposal or bid for the same purpose, and is in all respects fair and without collusion or fraud. No member of the Board of Aldermen, head of department, chief of bureau, deputy thereof or clerk therein, or other officer of The City of New York, or any member or employee of the Public Service Commission for the First District is interested directly or indirectly, as contracting party, partner, stockholder, or otherwise in, or in the performance of, the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof.

Dated the.........................., 1910.

ROUTE 5, SECTION 11, 93RD STREET TO 106TH STREET.

Contractor's Proposal for the Construction of a Portion of a Rapid Transit Railroad.

(Route 5, Section 11.)

Notice—Sums of money must be written in words and also in figures, except in the schedules. There must remain annexed hereto: Copy of Invitation to Contractors. Copy of form of contract. Copy of form of bond.

To the Public Service Commission for the First District:

1. The undersigned†..

.... do.. hereby, in pursuance of the Invitation to Contractors, a copy of which is attached hereto, propose according to the terms thereof to enter into a contract in the form annexed hereto with the City of New York for the construction of Section 11 of Route 5, and to furnish all necessary labor, materials, machinery, tools, apparatus and other means of construction and perform all the work mentioned in the said contract at the unit prices for the several items as given in the following Schedule of Unit Prices or as otherwise provided in the form of contract. It is understood that the quantities of various items specified in the following schedule are given as a basis for the uniform comparison of bids and are not in any way guaranteed or represented as correct or intended to be relied on, and they shall not be taken as final and shall form no basis for any claim in case they do not correspond with the final measurements or quantities. It is further understood that the Commission reserves the right to increase or diminish or to omit entirely any of the quantities of items as therein stated:

Schedule of Unit Prices.

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
1..	For earth excavation, above mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard......................	....	52,100	....
2.	For earth excavation, below mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard......................	....	22,700	....
2-a.	For earth excavation, both above and below mean high water, for sewers and pipes, including the disposal of it, etc., per cubic yard......................	....	3,600	....
3.	For rock excavation (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard..........	....	81,300	....
3-a.	For rock excavation, for sewers and pipes, including the disposal of it, etc., per cubic yard	....	1,900	....
4.	For underpinning buildings, including all incidental work and material, per lineal front foot of building underpinned as follows:			
	(a) For buildings less than seven stories in height, per front foot.............	....	2,300	....
	(b) For buildings from seven to twelve stories in height, per front foot........	....	....	....

---

†The bidder's name must be inserted here. If the bid is submitted by a corporation, the full legal title must be given here and a certified copy of the certificate of incorporation must be submitted, together with an affidavit showing the amount of stock paid in in cash and the names and addresses of the directors and principal officers. If the bid is submitted by a firm, the above blank must be filled up in the following form, "the firm of A. B. & Co., composed of A. B. C. D. etc." (giving the names of all the partners).

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.

delivered at Room No................on the..................floor of the building No....................in the Borough of..............................in the City of New York. Such delivery shall be sufficient notice to the undersigned.

(4) At the time of delivering this proposal to the Commission the undersigned will separately deliver a certified check payable to the order of the Comptroller of The City of New York for the sum of ten thousand dollars ($10,000). If the Commission shall notify the undersigned that this Contractor's Proposal is accepted and that the proposed contract is consented to by the Board of Estimate and Apportionment, then if the undersigned shall fail within ten days thereafter or within such longer period as may be prescribed by the Commission to procure the above described bond to be duly executed and delivered; or if the undersigned shall fail to procure the contract to be duly executed and delivered as aforesaid, then the Invitation to Contractors and this Contractor's Proposal shall constitute a contract binding the undersigned to pay to the City the damages by it sustained by reason of such failure of the undersigned as provided in said Invitation to Contractors. And the undersigned hereby assigns to the City the said sum so specially deposited by the delivery of such certified check, subject only to the condition that if this Proposal shall not be accepted, or, if it shall be accepted and the undersigned shall within ten days after notice as aforesaid or any longer period prescribed by the Commission, execute the said contract and procure the said bond to be duly executed and delivered, then the amount of the said check so specially deposited shall be returned to the undersigned.

(5) A notice of acceptance of this Proposal by the Commission addressed to the undersigned as aforesaid shall forthwith, at the option of the Commission operate as against the undersigned as a complete making of a contract according to the form thereof as aforesaid, with the blanks therein contained filled in accordance to this Proposal.

(6) There are no persons interested with the undersigned in this Proposal, except*

(7) This Proposal is made without any connection with any other person making a proposal or bid for the same purpose, and is in all respects fair and without collusion or fraud. No member of the Board of Aldermen, head of department, chief of bureau, deputy thereof or clerk therein, or other officer of The City of New York, or any member or employee of the Public Service Commission for the First District is interested directly or indirectly, as contracting party, partner, stockholder, or otherwise in, or in the performance of, the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof.

(2) If this proposal is accepted, the undersigned will within ten days after delivery of notice, execute and deliver the contract with the City in the form aforesaid and at the same time will deliver to the Comptroller of The City of New York pursuant to the terms of the said contract a bond in the sum of four hundred thousand dollars ($400,000) in the form hereto annexed with the following named Sureties, viz.:

....
....
....
....

(3) The Commission may cause any notice intended for the undersigned to be delivered at Room No..................on the................floor in the building No.....................in the Borough of..........................in the City of New York. Such delivery shall be sufficient notice to the undersigned.

(4) At the time of delivering this proposal to the Commission the undersigned will separately deliver a certified check payable to the order of the Comptroller of The City of New York for the sum of twelve thousand five hundred dollars ($12,500). If the Commission shall notify the undersigned that this Contractor's Proposal is accepted and that the proposed contract is consented to by the Board of Estimate and Apportionment, then if the undersigned shall fail within ten days thereafter or within such longer period as may be prescribed by the Commission to procure the above described bond to be duly executed and delivered; or if the undersigned shall fail to procure the contract to be duly executed and delivered as aforesaid, then the Invitation to Contractors and this Contractor's Proposal shall constitute a contract binding the undersigned to pay to the City the damages by it sustained by reason of such failure of the undersigned, as provided in said Invitation to Contractors. And the undersigned hereby assigns to the City the said sum so specially deposited by the delivery of such certified check, subject only to the condition that if this Proposal shall not be accepted, or, if it shall be accepted and the undersigned shall within ten days after notice as aforesaid or any longer period prescribed by the Commission, execute the said contract and procure the said bond to be duly executed and delivered, then the amount of the said check so specially deposited shall be returned to the undersigned.

(5) A notice of acceptance of this Proposal by the Commission addressed to the undersigned as aforesaid shall forthwith, at the option of the Commission, operate as against the undersigned as a complete making of a contract according to the form thereof as aforesaid, with the blanks therein contained filled in according to this Proposal.

(6) There are no persons interested with the undersigned in this Proposal, except*

(7) This Proposal is made without any connection with any other person making a proposal or bid for the same purpose, and is in all respects fair and without collusion or fraud. No member of the Board of Aldermen, head of department, chief of bureau, deputy thereof or clerk therein, or other officer of The City of New York, or any member or employee of the Public Service Commission for the First District is interested directly or indirectly, as contracting party, partner, stockholder, or otherwise in, or in the performance of the contract, or in the supplies, work or business to which it relates. or in any portion of the profits thereof.

Dated the.., 1910.

Affidavit of Verification.

Contractor's Proposal for the Construction of a Portion of a Rapid Transit Railroad.

(Route 5, Section 13.)

Notice—Sums of money must be written in words and also in figures, except in the schedules. There must remain annexed hereto: Copy of Invitation to Contractors. Copy of form of contract. Copy of form of bond.

To the Public Service Commission for the First District:

1. The undersigned†..
....do..

---

*Here insert the names and addresses of all persons interested with the bidder. If there are no such persons strike out the word "except."

‡If the bidder is an individual, do not fill this blank; if the bidder is a firm, here say, "a member of the firm of.."; if a corporation, say "the (President or other officer duly authorized) of the..........
....Company."

†The bidder's name must be inserted here. If the bid is submitted by a corporation, the full legal title must be given here and a certified copy of the certificate of incorporation must be submitted, together with an affidavit showing the amount of stock paid in in cash and the names and addresses of the directors and principal officers. If the bid is submitted by a firm, the above blank must be filled up in the following form, "the firm of A. B. & Co., composed of A. B. C. D. etc." (giving the names of all the partners).

hereby, in pursuance of the Invitation to Contractors, a copy of which is attached hereto, propose according to the terms thereof to enter into a contract in the form annexed hereto with The City of New York for the construction of Section 13 of Route 5, and to furnish all necessary labor, materials, machinery, tools, apparatus and other means of construction and perform all the work mentioned in the said contract at the unit prices for the several items as given in the following Schedule of Unit Prices, or as otherwise provided in the form of contract. It is understood that the quantities of various items specified in the following schedule are given as a basis for the uniform comparison of bids and are not in any way guaranteed or represented as correct or intended to be relied on, and they shall not be taken as final and shall form no basis for any claim in case they do not correspond with the final measurements or quantities. It is further understood that the Commission reserves the right to increase or diminish or to omit entirely any of the quantities of items as therein stated:

Schedule of Unit Prices.

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
1.	For earth excavation, above mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard....................	....	79,320	....
2.	For earth excavation, below mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard....................	....	51,360	....
2-a.	For earth excavation, both above and below mean high water, for sewers and pipes, including the disposal of it, etc., per cubic yard......................	....	2,400	....
3.	For rock excavation (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard......	....	207,460	....
3-a.	For rock excavation for sewers and pipes, including the disposal of it, etc., per cubic yard	....	260	....
4.	For underpinning buildings, including all incidental work and material, per lineal front foot of building underpinned as follows:			
	(a) For buildings less than seven stories in height, per front foot..............	....	3,300	....
	(b) For buildings from seven to twelve stories in height, per front foot........	....	95	....
	(c) For buildings over twelve stories in height, per front foot..................	....	....	....
6.	For concrete masonry, in place, per cubic yard	....	50,215	....
7.	For protective concrete masonry in place outside of waterproofing, per cubic yard.	....	3,570	....
8.	For rubble stone masonry in place, per cubic yard	....	1,200	....
9.	For brick masonry, in place, per cubic yard	....	100	....
10.	For hollow terra cotta brick masonry, in place, per cubic yard	....	450	....
12.	For timber piles, in place, and prepared, per lineal foot	....	1,000	....
13.	For timber foundations, placed and fastened, per thousand feet B. M.......	....	2M	....
14.	For broken stone or gravel, in place, other than that used in concrete, per cubic yard	....	2,800	....

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
15.	For waterproofing, treated woven fabric, laid with pitch or asphaltum, in place, as follows:			
	(a) For 1-ply, per square yard..........	....	27,360	....
	(b) For 2-ply, per square yard..........	....	100	....
	(c) For 3-ply, per square yard..........	....	3,190	....

	(e) For 5-ply, per square yard..........	....	100	....
	(f) For 6-ply, per square yard..........	....	590	....
16.	For waterproofing, brick laid in asphalt mastic, in place, per cubic yard........	....	4,660	....
17.	For vitrified or cast-iron drain pipe, in place, as follows:			
	(a) For 12-inch vitrified pipe, per lineal foot	....	1,102	....
	(b) For 10-inch vitrified pipe, per lineal foot	....	100	....
	(c) For 8-inch vitrified pipe, per lineal foot	....	3,060	....
	(d) For 6-inch vitrified pipe, per lineal foot	....	200	....
	(e) For 4-inch vitrified pipe, per lineal foot	....	100	....
	(f) For 8-inch cast-iron pipe, per lineal foot	....	....	....
	(g) For 6-inch cast-iron pipe, per lineal foot	....	100	....
	(h) For 4-inch cast-iron pipe, per lineal foot	....	6,790	....
18.	For tunnel ducts, in place, as required by Section 305 of the specifications, per duct foot	....	291,770	....
19.	For riveted steel, painted and erected, per ton of two thousand pounds........	....	5,585	....
20.	For steel beams and shapes with connections, painted and erected, per ton of two thousand pounds	....	3,905	....
21.	For steel rods and bars built in concrete, per ton of two thousand pounds.......	....	90	....
25.	For miscellaneous iron castings, other than tunnel lining, such as manhole heads and covers, gratings, etc., but not including castings for sewer work or pipes; in place, per ton of two thousand pounds..	....	12	....
26.	For wire mesh, in place, per pound......	....	21,320	....
27.	For one and one-half-inch (1½-inch) galvanized iron pipe hand rail, in place, including expansion bolts, etc., per lineal foot	....	6,260	....
28.	For steel gratings for ventilation, in place, including frames, etc., per square foot..	....	5,220	....
29.	For vault lights, in place, per square foot	....	3,960	....
30.	For street surface restored:			
	(a) Sidewalks including curbs and all structures and growths therein and thereon, per square yard..............	....	8,940	....
	(b) For temporary repavement and maintenance of roadways, per square yard..	....	14,730	....

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
32.	For wrought-iron or fibre electric conduits, in place, in stations, as follows:			
	(a) For three-fourths inch (¾-inch) wrought-iron, per lineal foot...........	....	4,770	....
	(b) For one and one-half-inch (1½-inch) wrought-iron, per lineal foot...........	....	820	....
	(c) For two-inch (2-inch) wrought-iron, per lineal foot	....	410	....
	(d) For two-inch (2-inch) fibre, per lineal foot	....	4,320	....
33.	For cast-iron outlet boxes in place in stations, each	....	480	....
34.	For six-inch (6-inch) cast-iron pipe and fittings, including specials ("extra heavy"), in place in stations, per lineal foot	....	245	....
	SEWERS—ITEMS 37 TO 74.			
	Vitrified and Cast Iron Pipe—Items 37 to 43.			
38.	For 15-inch vitrified pipe sewer, per lineal foot	....	*514	....
39.	For 18-inch vitrified pipe sewer, per lineal foot	....	*270	....
42.	For cast-iron sewer pipe (straight pipe) in place in the work, per ton of two thousand pounds	....	10	....
	Egg-Shaped Brick or Concrete Sewers—Items 44 to 51.			
45.	For 3 feet 6 inches by 2 feet 4 inches, per lineal foot	....	*677	....
	SURFACE AND SUBSURFACE STRUCTURES—ITEMS 75 AND 76.			
75.	For street surface railroads, including the support, reconstruction, rebuilding, etc., where necessary (but not including permanent masonry supports, if required and added, and not including vaults, if required and constructed in excess of the number existing), as follows:			
	(a) For electric railroads, per lineal foot of single track	....	5,980	....
	(b) For horse railroads, per lineal foot of single track.......................	....	....	....
	PIPES IN STREETS—ITEMS 77 TO 126.			
	For Work and Material as Called for by Section 71 of the Specifications.			
	Water and Gas Pipes—Items 77 to 108. *Water Pipes—Items 77 to 88.*			
	For water pipes in place, as follows:			
78.	For 4-inch water pipe, per lineal foot....	....	100	....
79.	For 6-inch water pipe, per lineal foot....	....	1,670	....
82.	For 12-inch water pipe, per lineal foot....	....	1,420	....
84.	For 20-inch water pipe, per lineal foot....	....	120	....
87.	For 36-inch water pipe, per lineal foot....	....	120	....

*Balance remaining after deducting portion of sewer included in Railroad construction and under section 424 of the specifications.

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
	Gas Pipes—Items 89 *to* 99.			
	For gas pipes in place, as follows:			
89.	For 3-inch gas pipe, per lineal foot......	....	170	....
90.	For 4-inch gas pipe, per lineal foot......	....	860	....
91.	For 6-inch gas pipe, per lineal foot......	....	3,430	....
92	For 8-inch gas pipe, per lineal foot......	....	2,370	....
93.	For 10-inch gas pipe, per lineal foot......	....	230	....
94.	For 12-inch gas pipe, per lineal foot......	....	120	....
	New Cast-Iron Hub and Spigot Water and Gas Pipe—Items 100 *and* 101.			
100.	For new cast-iron hub and spigot straight pipe delivered on the work, per ton of two thousand pounds	....	53	....
101.	For new cast-iron hub and spigot pipe, special castings, delivered on the work, per ton of two thousand pounds........	....	13	....
	Air Pipes—Items 121 *to* 124.			
	For air pipe in place, as follows:			
122.	For 8-inch air pipe, per lineal foot......	....	210	....
	Mail Tubes—Items 125 *and* 126.			
125.	For 8-inch mail tube in place, per lineal foot	....	1,200	....
126.	For new 8-inch mail tube, delivered on the work, per ton of two thousand pounds..	....	6	....
	DUCTS IN STREETS.			
	Electric Ducts and Conduits in Streets.			
	(Other than tunnel ducts and street railroad ducts which are provided for in Items 18 and 75-a.)			
127.	For electric ducts and conduits in place, as provided in Section 71a of the specifications, per duct foot	....	63,000	....

(2) If this proposal is accepted, the undersigned will within ten days after delivery of notice, execute and deliver the contract with the City in the form aforesaid and at the same time will deliver to the Comptroller of The City of New York pursuant to the terms of the said contract a bond in the sum of four hundred thousand dollars ($400,000) in the form hereto annexed with the following named Sureties, viz.:

....

....

....

....

(3) The Commission may cause any notice intended for the undersigned to be delivered at Room No......., on the........floor of the building No............, in the Borough of............, in The City of New York. Such delivery shall be sufficient notice to the undersigned.

(4) At the time of delivering this proposal to the Commission the undersigned will separately deliver a certified check payable to the order of the Comptroller of The City of New York for the sum of twelve thousand five hundred dollars ($12,500). If the Commission shall notify the undersigned that this Contractor's Proposal is accepted and that the proposed contract is consented to by the Board of Estimate and Apportionment, then if the undersigned shall fail within ten days thereafter or within

such longer period as may be prescribed by the Commission to procure the above described bond to be duly executed and delivered; or if the undersigned shall fail to procure the contract to be duly executed and delivered as aforesaid, then the Invitation to Contractors and this Contractor's Proposal shall constitute a contract binding the undersigned to pay to the City the damages by it sustained by reason of such failure of the undersigned, as provided in said Invitation to Contractors. And the undersigned hereby assigns to the City the said sum so specially deposited by the delivery of such certified check, subject only to the condition that if this Proposal shall not be accepted, or, if it shall be accepted and the undersigned shall within ten days after notice as aforesaid or any longer period prescribed by the Commission, execute the said contract and procure the said bond to be duly executed and delivered, then the amount of the said check so specially deposited shall be returned to the undersigned.

(5) A notice of acceptance of this Proposal by the Commission addressed to the undersigned as aforesaid shall forthwith, at the option of the Commission, operate as against the undersigned as a complete making of a contract according to the form thereof as aforesaid, with the blanks therein contained filled in according to this Proposal.

(6) There are no persons interested with the undersigned in this Proposal, except*

(7) This Proposal is made without any connection with any other person making a proposal or bid for the same purpose, and is in all respects fair and without collusion or fraud. No member of the Board of Aldermen, head of department, chief of bureau, deputy thereof or clerk therein, or other officer of The City of New York, or any member or employee of the Public Service Commission for the First District is interested directly or indirectly, as contracting party, partner, stockholder, or otherwise in, or in the performance of, the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof.

(5) A notice of acceptance of this Proposal by the Commission addressed to the undersigned as aforesaid shall forthwith, at the option of the Commission, operate as against the undersigned as a complete making of a contract according to the form thereof as aforesaid, with the blanks therein contained filled in according to this Proposal.

(6) There are no persons interested with the undersigned in this Proposal, except*

(7) This Proposal is made without any connection with any other person making a proposal or bid for the same purpose, and is in all respects fair and without collusion or fraud. No member of the Board of Aldermen, head of department, chief of bureau, deputy thereof or clerk therein, or other officer of The City of New York, or any member or employee of the Public Service Commission for the First District is interested directly or indirectly, as contracting party, partner, stockholder, or otherwise in, or in the performance of, the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof.

Dated the.............................., 1910.

Affidavit of Verification.

State of New York, City and County of New York, ss.:

....being duly sworn, says: I am‡.. the proposing Contractor above named. I have read the foregoing proposal. The same is in all respects true.

Sworn to before me this.............day of................, 1910.

---

*Here insert the names and addresses of all persons interested with the bidder. If there are no such persons strike out the word "except."

‡If the bidder is an individual, do not fill this blank; if the bidder is a firm, here say, "a member of the firm of..."; if a corporation, say, "the (President or other officer duly authorized) of the.................... ....Company."

ROUTE 5, SECTION 14, 129TH STREET TO MOTT AVENUE, TYPE K.

Contractor's Proposal for the Construction of a Portion of a Rapid Transit Railroad.

(Route 5. Section 14.)

Notice—Sums of money must be written in words and also in figures, except in schedules. There must remain annexed hereto: Copy of Invitation to Contractors. Copy of form of contract. Copy of form of bond.

To the Public Service Commission for the First District:

1. The undersigned* .... do... hereby, in pursuance of the Invitation to Contractors, a copy of which is attached hereto, propose according to the terms thereof to enter into a contract in the form annexed hereto with The City of New York for the construction of Section 14 of Route 5, in accordance with the type of tunnel construction designated "K," and to furnish all necessary labor, materials, machinery, tools, apparatus and other means of construction and perform all the work mentioned in the said contract at the unit prices for the several items as given in the following Schedule of Unit Prices, or as otherwise provided in the form of contract. It is understood that the quantities of various items specified in the following schedule are given as a basis for the uniform comparison of bids and are not in any way guaranteed or represented as correct or intended to be relied on, and they shall not be taken as final and shall form no basis for any claim in case they do not correspond with the final measurements or quantities. It is further understood that the Commission reserves the right to increase or diminish or to omit entirely any of the quantities of items as therein stated:

Type K—Schedule of Unit Prices.

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
	TUNNEL TUBES.			
†36.	For tube tunnel under Harlem River as per type "K," per lineal foot of four-track tube complete	....	1,080	....
	APPROACHES.			
1.	For earth excavation, above mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard........................	....	49,510	....
2.	For earth excavation, below mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard........................	....	156,100	....
2a.	For earth excavation, both above and below mean high water, for sewers and pipes, including the disposal of it, etc., per cubic yard......................	....	1,565	....
3.	For rock excavation (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard.......	....	27,620	....
4.	For underpinning buildings, including all incidental work and material, per lineal front foot of building underpinned as follows:			
	(a) For buildings less than seven stories in height, per front foot.................	....	850	....

---

*The bidder's name must be inserted here. If the bid is submitted by a corporation, the full legal title must be given here and a certified copy of the certificate of incorporation must be submitted, together with an affidavit showing the amount of stock paid in in cash and the names and addresses of the directors and principal officers. If the bid is submitted by a firm, the above blank must be filled up in the following form, "the firm of A. B. & Co., composed of A. B. C. D. etc." (giving the names of all the partners).

†See note under Item 12 of Approaches

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.

(2) If this proposal is accepted, the undersigned will within ten days after delivery of notice, execute and deliver the contract with the City in the form aforesaid, and at the same time will deliver to the Comptroller of The City of New York, pursuant to the terms of the said contract, a bond in the sum of five hundred thousand dollars ($500,000) in the form hereto annexed with the following named Sureties, viz.:

....

....

....

....

(3) The Commission may cause any notice intended for the undersigned to be delivered at Room.........on the...........floor of the building.................in the Borough of..................in The City of New York. Such delivery shall be sufficient notice to the undersigned.

(4) At the time of delivering this proposal to the Commission the undersigned will separately deliver a certified check payable to the order of the Comptroller of The City of New York for the sum of fifteen thousand dollars ($15,000). If the Commission shall notify the undersigned that this Contractor's Proposal is accepted, and that the proposed contract is consented to by the Board of Estimate and Apportionment, then if the undersigned shall fail within ten days thereafter or within such longer period as may be prescribed by the Commission to procure the above described bond to be duly executed and delivered; or if the undersigned shall fail to procure the contract to be duly executed and delivered as aforesaid, then the Invitation to Contractors and this Contractor's Proposal shall constitute a contract binding the undersigned to pay to the City the damages by it sustained by reason of such failure of the undersigned as provided in said Invitation to Contractors. And the undersigned hereby assigns to the City the said sum so specially deposited by the delivery of such certified check, subject only to the condition that if this Proposal shall not be accepted, or, if it shall be accepted and the undersigned shall within ten days after notice as aforesaid or any longer period prescribed by the Commission, execute the said contract and procure the said bond to be duly executed and delivered, then the amount of the said check so specially deposited shall be returned to the undersigned.

(5) A notice of acceptance of this Proposal by the Commission addressed to the undersigned as aforesaid shall forthwith, at the option of the Commission, operate as against the undersigned as a complete making of a contract according to the form thereof as aforesaid, with the blanks therein contained filled in according to this Proposal.

(6) There are no persons interested with the undersigned in this Proposal, except*

(7) This Proposal is made without any connection with any other person making a proposal or bid for the same purpose, and is in all respects fair and without collusion or fraud. No member of the Board of Aldermen, head of department, chief of bureau, deputy thereof or clerk therein, or other officer of The City of New York, or any member or employee of the Public Service Commission for the First District is interested directly or indirectly, as contracting party, partner, stockholder, or otherwise in, or in the performance of, the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof.

Dated the..............................., 1910.

Affidavit of Verification

State of New York, City and County of New York, ss.:

.... being duly sworn, says: I am†.. the proposing Contractor above named. I have read the foregoing proposal. The same is in all respects true.

Sworn to before me this............day of................., 1910.

ROUTE 5, SECTION 15, MOTT AVENUE TO 157TH STREET AND TO ALEXANDER AVENUE.

Contractor's Proposal for the Construction of a Portion of a Rapid Transit Railroad.

(Route 5, Section 15.)

Notice—Sums of money must be written in words and also in figures, except in the schedules. There must remain annexed hereto: Copy of Invitation to Contractors. Copy of form of contract. Copy of form of bond.

To the Public Service Commission for the First District:

1. The undersigned‡..

do... hereby, in pursuance of the Invitation to Contractors, a copy of which is attached hereto, propose according to the terms thereof to enter into a contract in the form annexed hereto with The City of New York for the construction of Section 15 of Route 5, and to furnish all necessary labor, materials, machinery, tools, apparatus and other means of construction and perform all the work mentioned in the said contract at the unit prices for the several items as given in the following Schedule of Unit Prices, or as otherwise provided in the form of contract. It is understood that the quantities of various items specified in the following schedule are given as a basis for the uniform comparison of bids, and are not in any way guaranteed or represented as correct or intended to be relied on, and they shall not be taken as final, and shall form no basis for any claim in case they do not correspond with the final measurements or quantities. It is further understood that the Commission reserves the right to increase or diminish or to omit entirely any of the quantities of items as therein stated:

Schedule of Unit Prices.

(2) If this proposal is accepted, the undersigned will within ten days after delivery of notice, execute and deliver the contract with the City in the form aforesaid, and at the same time will deliver to the Comptroller of The City of New York, pursuant to the terms of said contract, a bond in the sum of five hundred thousand dollars ($500,000) in the form hereto annexed with the following named Sureties, viz.:

....

....

....

....

(3) The Commission may cause any notice intended for the undersigned to be delivered at Room No........, on the.......floor of the building No..............in the Borough of................, in The City of New York. Such delivery shall be sufficient notice to the undersigned.

(4) At the time of delivering this proposal to the Commission the undersigned will separately deliver a certified check payable to the order of the Comptroller of The City of New York for the sum of fifteen thousand dollars ($15,000). If the Commission shall notify the undersigned that this Contractor's Proposal is accepted, and that the proposed contract is consented to by the Board of Estimate and Apportionment, then if the undersigned shall fail within ten days thereafter or within such longer period as may be prescribed by the Commission to procure the above described bond to be duly executed and delivered; or if the undersigned shall fail to procure the contract to be duly executed and delivered as aforesaid, then the Invitation to Contractors and this Contractor's Proposal shall constitute a contract binding the undersigned to pay to the City the damages by it sustained by reason of such failure of the undersigned, as provided in said Invitation to Contractors. And the undersigned hereby assigns to the City the sum so specially deposited by the delivery of such certified check, subject only to the condition that if this Proposal shall not be accepted, or, if it shall be accepted and the undersigned shall within ten days after notice as aforesaid or any longer period prescribed by the Commission, execute the said con-

tract and procure the said bond to be duly executed and delivered, then the amount of the said check so specially deposited shall be returned to the undersigned.

(5) A notice of acceptance of this proposal by the Commission addressed to the undersigned as aforesaid shall forthwith, at the option of the Commission, operate as against the undersigned as a complete making of a contract according to the form thereof as aforesaid, with the blanks therein contained filled in according to this Proposal.

(6) There are no persons interested with the undersigned in this Proposal, except*

(7) This proposal is made without any connection with any other person making a proposal or bid for the same purpose, and is in all respects fair and without collusion or fraud. No member of the Board of Aldermen, head of department, chief of bureau, deputy thereof or clerk therein, or other officer of The City of New York, or any member or employee of the Public Service Commission for the First District is interested directly or indirectly, as contracting party, partner, stockholder, or otherwise in, or in the performance of, the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof.

Dated the............................ 1910.

Affidavit of Verification.

State of New York, City and County of New York, ss.:

....being duly sworn, says: I am†.. the proposing Contractor above named. I have read the foregoing proposal. The same is in all respects true.

Sworn to before me this............day of............, 1910.

SECTION 8. FROM EAST 53D STREET, UNDER LEXINGTON AVENUE TO EAST 67TH STREET. CONTRACTOR: THE BRADLEY CONTRACTING COMPANY. AMOUNT, $3,369,484.20.

State of New York, Public Service Commission for the First District, Tribune Building, 154 Nassau Street, New York, July 5, 1911.

To the Board of Estimate and Apportionment of The City of New York:

The Public Service Commission for the First District herewith transmits to you for your consent, as required by law, a proposed contract between The City of New York and Bradley Contracting Company for the construction at the public expense of Section 8 of Route 5, being that portion of the proposed Lexington Avenue Rapid Transit Railroad which extends under Lexington avenue, from East 53d street to East 67th street, in the Borough of Manhattan.

The Public Service Commission for the First District further requests your honorable Board to consent to the said contract herewith transmitted and to prescribe a limit to the amount of bonds available to meet the requirements of the said contract, to wit, the sum of three million three hundred and sixty-nine thousand four hundred and eighty-four dollars and twenty cents ($3,369,484.20); and also to direct the Comptroller of The City of New York to issue the bonds of said City at such a rate of interest as the Commissioners of the Sinking Fund of said City may prescribe for the purpose of providing the necessary means for construction at the public expense of the said portion of such railroad.

And the Public Service Commission for the First District does hereby, pursuant to section 45 of the Greater New York Charter, make request for the authorization of such corporate stock for the full amount sufficient to pay the entire estimated expense of executing such contract, to wit, the sum of three million three hundred and sixty-nine thousand four hundred and eighty-four dollars and twenty cents ($3,369,484.20).

In witness whereof the Public Service Commission for the First District has

caused its official seal to be hereto affixed and attested by its Secretary and these presents to be signed by its Chairman this 5th day of July, 1911.

---

*Here insert the names and addresses of all persons interested with the bidder. If there are no such persons strike out the word "except."

†If the bidder is an individual, do not fill this blank; if the bidder is a firm, here say, "a member of the firm of.."; if a corporation, say, "the (President or other officer duly authorized) of the...Company."

PUBLIC SERVICE COMMISSION FOR THE FIRST DISTRICT, by W. R. WILLCOX, Chairman. [SEAL]

Attest: TRAVIS H. WHITNEY, Secretary.

Route 5, Section 8.

After consideration of the bids on Section 8 of Route 5, the following resolution was duly moved and seconded:

Resolved, That this Commission hereby accepts the proposal of Bradley Contracting Company, dated October 27, 1910, for the construction of Section 8 of Route 5, being that portion of the proposed Lexington Avenue Rapid Transit Railroad, which extends under Lexington avenue, from East 53d street to East 67th street, in the Borough of Manhattan, the aggregate of the unit prices in the proposal amounting to three million and three hundred and sixty-nine thousand four hundred and eighty-four dollars and twenty cents ($3,369,484.20).

Resolved, That the Chairman and the Secretary be and they hereby are authorized on behalf of the Commission to execute a contract in the form attached to the said proposal and to deliver the same if and when consented to by the Board of Estimate and Apportionment and upon compliance by the said Bradley Contracting Company with the requirements of the invitation to bidders attached to the said proposal.

Resolved, That the Chairman and Secretary be and they hereby are authorized and directed to request the Board of Estimate and Apportionment to consent to the said contract and to prescribe a limit to the amount of bonds available to meet the requirements of the said contract, to wit: The sum of three million three hundred and sixty-nine thousand four hundred and eighty-four dollars and twenty cents ($3,369,484.20); and also to request the said Board of Estimate and Apportionment to direct the Comptroller of The City of New York to issue the bonds of said City at such a rate of interest as the Board of Commissioners of the Sinking Fund of said City may prescribe for the purpose of providing the necessary means for construction at the public expense of the said portion of such railroad; and also to make request for the authorization of bonds for the full amount sufficient to pay the entire estimated expense of executing such contract, to wit: The sum of three million three hundred and sixty-nine thousand four hundred and eighty-four dollars and twenty cents ($3,369,484.20).

Resolved, That the Secretary give notice to the said Bradley Contracting Company that its proposal has been accepted and the contract awarded to it by this Commission, subject to its being consented to by the Board of Estimate and Apportionment as required by law.

Resolved, That it be referred to Counsel to the Commission to inquire into the sufficiency of the sureties proposed to be given by the said Bradley Contracting Company, and in case the sureties named in the proposal of the said Bradley Contracting Company, or any of them, are not approved by the Commission, then to inquire into the sufficiency of any other or substitute sureties and in behalf of the Commission to do any such act as may be necessary and incidental to the furnishing of a proper bond.

Ayes—Commissioners Willcox, McCarroll, Maltbie, Eustis, Cram.

Nays—None.

Carried.

State of New York, County of New York, ss.:

I, Travis H. Whitney, Secretary of the Public Service Commission for the First District, do hereby certify that I have compared the above with the original adopted by said Commission on July 5, 1911, and that it is a correct transcript therefrom and of the whole of the original.

In testimony whereof, I have hereunto subscribed my hand and affixed the seal of the Commission this 5th day of July, 1911.

[SEAL] TRAVIS H. WHITNEY, Secretary.

INVITATION TO CONTRACTORS.

Parts of Lexington Avenue Route.

The City of New York, acting by the Public Service Commission for the First District (hereinafter called "the Commission") invites proposals to construct portions of a proposed rapid transit railroad in the Boroughs of Manhattan and The Bronx in The City of New York. Proposals may be submitted separately for any one or more of the separate sections of which such railroad consists as hereinafter stated.

The points within the City between which the said several parts are to run and the route or routes to be followed are briefly as follows:

Lexington Avenue Route.

(Route No. 5.)

Section 1 begins under Battery Park and extends thence under Battery place, Greenwich street, Trinity place and Church street to a point about 80 feet north of the centre line of Dey street; with a station in Battery Park, a station at Rector street and a station at Cortlandt and Dey streets.

Section 2 begins at the end of Section 1 and extends thence under Church street, private property, Vesey street, private property, and Broadway to a point under Broadway about 110 feet north of the centre line of Walker street; with a station at Murray and Warren streets.

Section 2-A begins at the end of Section 2 and extends thence under Broadway to a point about on the northerly building line of Howard street. This section includes the Canal street station and also the portion of the Canal street subway lying thereunder.

Section 3 begins at the end of Section 2-A and extends thence under Broadway to a point about midway between Houston and Bleecker streets; with a station at Prince street.

Section 4 begins at the end of Section 3 and extends thence under Broadway, private property and the several cross streets to a point under private property at the southerly line of East 14th street and Irving place; with a station at Astor place and East 8th street.

Section 5 begins at the end of Section 4 and extends thence under Irving place, Gramercy Park and Lexington avenue to a point about 140 feet north of the centre line of East 26th street; with a station at East 14th and East 15th streets and a station at East 23d street.

Section 6 begins at the end of Section 5 and extends thence under Lexington avenue to about the centre line of East 40th street; with a station at East 27th and East 28th streets and a station at East 34th street.

Section 7 begins at the end of Section 6 and extends thence under Lexington avenue to a point about 50 feet north of the centre line of East 53d street; with a station at East 42d and 43d streets and a station at East 51st street.

Section 8 begins at the end of Section 7 and extends thence under Lexington avenue to a point about 50 feet north of the centre line of East 67th street; with a station at East 58th and East 59th streets.

Section 9 begins at the end of Section 8 and extends thence under Lexington avenue to a point about 70 feet south of the centre line of East 79th street; with a station at East 68th and East 69th streets and a station at East 77th street.

Section 10 begins at the end of Section 9 and extends thence under Lexington avenue to a point about 50 feet south of the centre line of East 93d street; with a station at East 86th street.

Section 11 begins at the end of Section 10 and extends thence under Lexington avenue to a point about 70 feet south of the centre line of East 106th street; with a station at East 96th street and a station at East 102d and East 103d streets.

Section 12 begins at the end of Section 11 and extends thence under Lexington avenue to a point about 115 feet south of the centre line of East 118th street; with a station at East 110th and East 111th streets and a station at East 116th street.

Section 13 begins at the end of Section 12 and extends thence under Lexington avenue to a point about 120 feet south of the centre line of East 129th street; with a station at East 125th street.

Section 14 begins at the end of Section 13 and extends thence under Lexington avenue, private property and the Harlem River to a point in private property in the Borough of The Bronx, thence under private property and Park avenue to East 135th street. Here the line divides into two branches. The west branch begins at about the centre line of East 135th street and extends thence under private property to a point in private property a distance of about 655 feet from the centre line of East 135th street and about 50 feet west of the centre line of Mott avenue. The east branch extends under Park avenue and partly under private property to about the intersection of the easterly line of Mott avenue with the westerly line of Park avenue.

Section 15. This section consists of two branches. The west branch begins at the end of the west branch of Section 14 and extends thence under East 138th street, private property and Mott avenue, Franz Sigel Park, private property and the several cross streets to a point in private property on the easterly side of River avenue about 120 feet south of the south line of East 157th street; with a station at East 138th street and East 149th street. (The portion of this section north of East 151st street is part of the River Avenue Route adopted by the Commission

on the 16th day of June, 1908.) The east branch begins at the end of the east branch of Section 14 and extends thence under Park avenue, private property, Canal Street West and East 138th street to a point in East 138th street about 150 feet easterly of the centre line of Alexander avenue, with a station between 3d and Alexander avenues.

The general plan of construction calls for a subsurface railroad having two tracks between Battery Park and Chambers street in Manhattan, and four tracks from Chambers street, in Manhattan, to 135th street and Park avenue, in the Bronx, with the branches in The Bronx having in the main three tracks each. Turnouts, cross-overs, connections, sidings, loops, etc., will be constructed, all of which are more particularly indicated on the contract drawings.

For Section 14 two plans, designated Type H and Type K, respectively, have been prepared. The bidders for such section may submit a proposal for either or both of such types. After a comparison of the bids the Commission will determine which of such plans shall be adopted.

Bidders for the several sections will not be required to do the station finish work, nor to provide or lay tracks, ties or ballast.

The work of construction under the contract shall include the construction of all necessary sewers and connections, along the route of the railroad; also the necessary support, maintenance, readjustment and reconstruction of vaults adjacent to buildings, pipes, tubes, conduits, subways or other subsurface structures; the support and care, including underpinning where necessary, of all buildings, monuments, surface, subsurface and elevated railroads and other structures, etc., affected by or interfered with during the construction of the work; also the restoration of the sidewalks and the temporary paving and maintenance of roadways.

The method of construction will be partly by trench excavation (under cover, unless otherwise specified in the form of contract or permitted by the Commission), and partly by tunnel, as set forth in the forms of contract.

Bidders must examine the form of contract, specifications, maps and plans; must visit the location of the work and inform themselves of the present conditions along the line thereof and make their own estimates of the facilities and difficulties attending the execution of the proposed work.

A fuller description of the work to be done is set forth, and other requirements, provisions, details and specifications are stated, in the printed form of contract and in the contract drawings therein referred to. Printed copies of the forms of contract, bond and contractor's proposal, may be had on application at the office of the Commission, 154 Nassau street, Borough of Manhattan, City of New York. The contract drawings may be inspected at the same office, and copies thereof may be purchased by prospective bidders by payment of five dollars ($5) for the contract drawings for each section. The printed form of contract and the contract drawings are to be deemed a part of this invitation.

The Commission is informed by the Department of Docks and Ferries that docks and bulkheads along the East River may be available for dumping purposes. Information in regard thereto may be obtained by any intending bidder upon inquiry at the office of the Commission.

Partial payments to the Contractor will be made monthly as the work proceeds, as provided in the form of contract.

The Contractor for any section or sections will be required to complete the work as soon as practicable and within the time hereinafter prescribed for such completion.

Sealed bids or proposals will be received at the office of the Commission at 154 Nassau street, Borough of Manhattan, City of New York, until the 27th day of October, 1910, at twelve (12) o'clock noon, at which time, or at a later date to be fixed by the Commission, the proposals will be publicly opened.

Proposals must be in the form prescribed by the Commission, copies of which may be obtained at the office of the Commission.

A statement, based upon the estimate of the Engineer, of the quantities of the various classes of the work and of the nature and extent as near as practicable of the work required for each section, is to be found in the schedules forming a part of the form of Contractor's Proposal. The quantities given in such schedules are approximate only, being given as a basis for the uniform comparison of bids and no claim is to be made against the City on account of any excess or deficiency, absolute or relative, in the same, except as provided in the specifications and form of contract.

All proposals must, when submitted, be enclosed in a sealed envelope endorsed: "*Proposal for Constructing Rapid Transit Railroad—Route* 5, *Section* —*," and must be delivered to the Commission or its Secretary; and in the presence of the person submitting the proposal, it will be deposited in a sealed box in which all proposals will be deposited. No proposal will be received or deposited unless accompanied by a separate certified check for each section bid upon, drawn upon a national or state bank or trust company having its principal office in The City of New York, satisfactory to the Commission and payable to the order of the Comptroller of The City of New York for the amount herein specified for the section for which a proposal is made. Such check must not be enclosed in the envelope containing the proposal.

The Unit Prices must not be improperly balanced, and any bid which the Commission considers detrimental to the City's interests may be rejected.

No proposal, after it shall have been deposited with the Commission, will be allowed to be withdrawn for any reason whatever.

The award of the contract or contracts will be made by the Commission as soon as practicable after the opening of the proposals.

Bidders whose proposals are otherwise satisfactory, in case the sureties named by them are not approved by the Commission, may substitute in their proposals the names of other sureties approved by the Commission, but such substitution must be made within five days after notice of disapproval, unless this period is extended by the Commission.

A bidder whose proposal shall be accepted shall, in person or by duly authorized representative, attend at the said office of the Commission within ten days after the delivery of a notice by the Commission that his proposal is accepted and that the contract is consented to by the Board of Estimate and Apportionment, and such bidder shall then deliver a contract in the form referred to, duly executed and with its execution duly proved.

At the time of the delivery of the contract, the Contractor will be required to furnish security to the City by giving a bond for the amount hereinafter stated. The Contractor's bond must be in the form annexed to the form of contract.

In addition and as further security to the City, ten (10) per cent. of the amount certified from time to time to be due to the Contractor will be retained until the work is fully completed and accepted.

Schedule Indicating Time Allowed for Completion, the Amount of Bond and the Amount of Certified Check for Each of the Several Sections.

Route 5.	Time for Completion, Months.	Amount of Bond.	Amount of Certified Check.
Section 1	42	$500,000 00	$15,000 00
Section 2	42	600.000 00	15,000 00
Section 2A	42	250,000 00	10,000 00
Section 3	42	300,000 00	10,000 00
Section 4	36	300,000 00	10,000 00
Section 5	42	300,000 00	10,000 00
Section 6	42	350,000 00	10,000 00
Section 7	42	350,000 00	10,000 00
Section 8	42	300,000 00	10,000 00
Section 9	42	300.000 00	10,000 00
Section 10	42	300,000 00	10.000 00
Section 11	42	300,000 00	10,000 00
Section 12	42	400,000 00	12,500 00
Section 13	42	400,000 00	12,500 00
Section 14	42	500,000 00	15,000 00
Section 15	42	500,000 00	15,000 00

In case of failure or neglect to execute and deliver the contract or to execute and deliver the required bond, such bidder will, at the option of the Commission, be deemed either to have made the contract or to have abandoned the contract. In the latter case, the Commission will give notice thereof to such defaulting bidder, and the Commission may thereupon proceed to make another contract with such, if any, of the original bidders, as, in the opinion of the Commission, it will be to the best interests of the City to contract with, or may by new advertisement invite further

proposals. The defaulting bidder shall thereupon be liable to the City for all loss and damage by it sustained, including the excess, if any, of the amount it shall pay any other Contractor over the amount of the bid of such defaulting bidder.

---

*To be filled in with the Section number for which the proposal is made.

If the Commission shall give notice to any bidder that his or its proposal is accepted and that the contract is consented to by the Board of Estimate and Apportionment, and if the bidder shall fail within ten days thereafter or within such further period, if any, as may be prescribed by the Commission, to execute and deliver the contract and to execute and deliver the bond with sureties, then this Invitation to Contractors and proposal accepted as aforesaid shall be a contract binding the bidder to pay to the City the damage by it sustained by reason of such failure, and in such case the bidder shall, by the terms of the proposal, absolutely assign to the City the ownership of the check accompanying his or its proposal as a payment on account of such damages.

All such deposits made by bidders whose proposals shall not be accepted by the Commission will be returned to the person or persons making the same within five days after the contract shall be executed and delivered. The deposit of the successful bidder will be returned when the contract is executed and its provisions as to security are complied with.

The right to reject any and all bids is reserved.

New York, September 1, 1910.

PUBLIC SERVICE COMMISSION FOR THE FIRST DISTRICT, by WILLIAM R. WILLCOX, Chairman; TRAVIS H. WHITNEY, Secretary.

RAPID TRANSIT RAILROAD.

Contract, Route 5, *Section* 8.

Agreement, made this............day of................., 1910, between The City of New York, hereinafter called the City, acting by the Public Service Commission for the First District, hereinafter called the Commission, party of the first part, and Bradley Contracting Company of.......... hereinafter called the Contractor, party of the second part.

Whereas, The Commission in behalf of the City by due advertisement, pursuant to law, has invited contractors to submit to the Commission proposals for making this contract; and

Whereas, The Contractor has thereupon duly submitted to the Commission a proposal, which has been accepted; and

Whereas, The Board of Estimate and Apportionment of The City of New York has consented to this contract;

Now, therefore, in consideration of the mutual covenants and agreements hereinafter contained, and under the authority of chapter 4 of the Laws of 1891, entitled, "An Act to provide for Rapid Transit Railways in Cities of over One Million Inhabitants," and of the various acts amending the same, the parties do hereby, the City for itself and its successors and the Contractor for itself, its successors and assigns, agree each with the other as follows:

I.—GENERAL PROVISIONS AND DEFINITIONS.

Outline of Contract.

Article 1. The Contractor agrees to construct the part hereinafter described of a Rapid Transit Railroad, with its appurtenances. The City agrees to pay to the Contractor the sums of money hereinafter mentioned at the times and in the manner and upon the terms and conditions hereinafter set forth.

Brief Description of Works.

Article 2. The Railroad to be constructed under this contract forms a part of a certain route adopted by the Board of Rapid Transit Railroad Commissioners for The City of New York on May 12, 1905, and which, as modified, is known as the Lexington Avenue Route—or Route No. 5. The part to be constructed under this contract consists of

Section 8—53*d Street to* 67*th Street.*

8. Beginning at a point 50 feet north of the centre line of 53d street, thence under Lexington avenue to a point about 50 feet north of the centre line of 67th street; with a station at East 58th and 59th streets.

The precise location of the tracks, and the dimensions and other characteristics of the Railroad are more fully stated in the specifications forming a part of this contract, and in the detailed drawings and plans hereinafter mentioned.

Statutes Incorporated Herein.

Article 3. This contract is made pursuant to the Rapid Transit Act, which is to be deemed a part hereof as if it were incorporated herein.

Marginal Notes, etc.

Article 4. Titles, headings, running headlines and marginal notes are printed hereon merely for convenience and shall not be deemed to be any part of this contract for any purpose whatever.

Definitions of Words.

Article 5. The following words and expressions used in this contract shall, except where by the context it is clear that another meaning is intended, be construed as follows:

"City."

(1) The word "City" to mean The City of New York, and any other corporation or division of government to which the ownership, rights, powers and privileges of The City of New York, under the Rapid Transit Act, shall hereafter come, belong or appertain.

"Commission."

(2) The word "Commission" to mean the Public Service Commission for the First District, and any other board, body, commission, official or officials, to which or to whom the powers now belonging to the said Commission in respect to the location, construction, equipment, maintenance and operation of Rapid Transit Railroads under the provisions of the Rapid Transit Act shall, by virtue of any act or acts, hereafter pass or be held to appertain.

"Contractor."

(3) The word "Contractor" to mean the party of the second part to this contract, and its successors, and any and every person or corporation who or which shall at any time be liable in the place or for the party of the second part to perform any obligations under this contract assumed by the said party of the second part. For convenience the Contractor is hereinafter referred to as if the Contractor were an individual. The word "he" shall, as the sense may require, include "it," "she" and "they;" the word "him" shall include "her," "it" and "them;" and the word "his" shall include "its," "her" and "their."

"Comptroller."

(4) The word "Comptroller" to mean the Comptroller of The City of New York, and the officer or board to whom or to which his powers now existing under the Rapid Transit Act shall come to appertain.

"Engineer."

(5) The word "Engineer" to mean the Chief Engineer of the Commission or his duly authorized representative and any successor or successors duly appointed or any deputy or substitute for him who shall be appointed by the Commission or by its authority.

"Rapid Transit Act."

(6) The words "Rapid Transit Act" to mean chapter 4 of the Laws of 1891 as amended by chapters 102 and 556 of the Laws of 1892, chapters 528 and 752 of the Laws of 1894, chapter 519 of the Laws of 1895, chapter 729 of the Laws of 1896, chapter 616 of the Laws of 1900, chapter 587 of the Laws of 1901, chapters 533, 542, 544 and 584 of the Laws of 1902, chapters 562 and 564 of the Laws of 1904, chapters 599 and 631 of the Laws of 1905, chapters 472, 606 and 607 of the Laws of 1906, chapter 429 of the Laws of 1907, chapter 498 of the Laws of 1909, and chapters 205, 504, 505 and 506 of the Laws of 1910, or as heretofore otherwise amended.

"Railroad."

(7) The word "Railroad" to mean the part which the Contractor agrees by this contract to build, together with the station or stations to be built in conjunction therewith, and all appurtenances thereto which are to be constructed or provided by the Contractor.

"The Works."

(8) The words "the Works" to mean all of the matters and things herein agreed to be furnished or done by or on the part of the Contractor.

"New York."

(9) The words "New York" to mean The City of New York according to its boundaries at the date of this contract.

"Daily Newspaper."

(10) The words "daily newspaper" to mean any paper regularly published in New York on every day or every day except Sundays and holidays.

"Notice." "Direction."

(11) The word "notice" to mean a written notice. The word "direction" to mean a written direction.

Wherever in the specifications or upon the drawings the words "directed," "required," "permitted," "ordered," "designated," "prescribed" or words of like import are used, it shall be understood that the direction, requirement, permission, order, designation or prescription of the Engineer is intended, and similarly the words "approved," "acceptable," "satisfactory" or words of like import shall mean approved by or acceptable or satisfactory to the Engineer.

Legal Address of Contractor. Address May be Changed. Service Upon Contractor Personally.

Article 6. The address given in the bid or proposal, upon which this contract is founded, is hereby designated as the place where all notices, directions and other communications to the Contractor shall be certified, mailed or delivered. The delivering at the above-named place or depositing in a post-paid wrapper directed to the above place, in any post office box regularly maintained by the Post Office Department, of any notice, letter or other communication to the Contractor, shall be deemed sufficient service thereof upon the Contractor. Such address may be changed at any time by an instrument in writing executed and acknowledged by the Contractor and delivered to the Commission. Nothing herein contained shall be deemed to preclude or render inoperative the service of any notice, direction or other communication upon the Contractor personally.

Contractor Responsible for Acts of Subcontractor's Employees.

Article 7. If the Contractor shall cause any part of this contract to be performed by a subcontractor, the provisions of this contract shall apply to such subcontractor and his officers, agents and employees in all respects, as if he and they were employees of the Contractor; and the Contractor shall not be in any manner thereby discharged from his obligations and liabilities hereunder, but shall be liable hereunder for all acts and negligence of the subcontractor, his officers, agents and employees as if they were employees of the Contractor. The employees of the subcontractor shall be subject to the same provisions hereof as employees of the Contractor; and the work or materials furnished by the subcontractor shall be subject to the provisions hereof, as if furnished directly by the Contractor.

Commission May Disapprove Subcontractors.

Article 8. The Contractor, before making any subcontract of the work, shall state in writing to the Commission the name of the proposed subcontractor, the portion of the work which such subcontractor is to do or the materials which such subcontractor is to furnish, the place of business of such subcontractor and such other information as the Commission may require. The Commission shall have the right to require the Contractor not to award any subcontract to a person, firm or corporation disapproved by the Commission.

II.—WORK TO BE DONE, PRICE, ETC.

Work to be Done.

Article 9. The Contractor shall do all the work and furnish all the materials, plants, tools and appliances necessary or proper for performing and completing the work of constructing the railroad in the manner and within the time hereinafter specified. He shall complete the railroad and do all the work and furnish all labor and materials in and about the construction of the railroad to the satisfaction of the Commission and in accordance with this contract and the specifications and drawings herein mentioned at the prices herein agreed upon and fixed therefor; provided, however, the said contract drawings may from time to time be altered or modified as hereinafter provided.

Construction Includes Sewer and Other Incidentals.

Article 10. In order to construct the railroad it will be necessary to take up and relay the sidewalk pavement or other surface material, and to lay and maintain a temporary pavement in the roadway, to protect, support and maintain during construction all buildings and other structures, including their foundations, and all elevated and surface and subsurface railroads, water mains, gas pipes, electric subways, poles and wires, pneumatic tubes, steam pipes, vaults, including vaults of abutting property, and other surface, subsurface and overhead structures, together with their necessary connections, as the same may be met with along the route; to build sewers both along the route and other streets; to make or remake the necessary manholes, catch basins

and other sewer connections therewith; to move, alter, readjust or rebuild water mains, gas pipes, electric subways, pneumatic tubes, steam pipes, vaults, including vaults of abutting property, and other subsurface structures, together with their necessary connections; and to do all such additional and incidental work as may be necessary for the completion of the railroad and the reconstruction and restoration of the street pavements or other surfaces (except as herein provided in respect of temporary pavements for roadways), adjacent to the route of the railroad and which may have been directly or indirectly disturbed or injured by the Contractor in the progress of the work of construction, to as useful and good a condition as existed before construction shall have been begun. All such work of every description, including underpinning wherever necessary, of all buildings or structures of whatsoever nature, monuments, elevated railroads and surface and subsurface railroads affected by or interfered with during the construction of the railroad, is part of the work which is included in this contract and which the Contractor agrees to perform for the prices herein agreed upon.

Prices.

Article 11. The City will pay and the Contractor shall receive in full compensation for furnishing the necessary plant and all the materials and labor, and for performing and completing all the work which is necessary or proper to be furnished or performed in order to complete the railroad (including all incidental work) and also for all loss or damage arising out of the nature of the work aforesaid, or from the action of the elements or from any unforeseen obstruction or difficulty encountered in the prosecution of the work, and for all risks of any description connected with the work, and for all expenses incurred by or in consequence of the suspension or discontinuance of the work as herein specified, the following prices, to wit:

Schedule of Unit Prices.

Item 1. For earth excavation above mean high water (except excavation for sewers and pipes), including the disposal of it, etc., the sum of three dollars and fifty cents ($3.50) per cubic yard.

Item 2-A. For earth excavation, both above and below mean high water, for sewers and pipes, including the disposal of it, etc., the sum of five dollars ($5.00) per cubic yard.

Item 3. For rock excavation (except excavation for sewers and pipes), including the disposal of it, etc., the sum of five dollars ($5) per cubic yard.

Item 3-A. For rock excavation for sewers and pipes, including the disposal of it, etc., the sum of six dollars ($6) per cubic yard.

Item 4. For underpinning buildings, including all incidental work and material, as follows:

(a) For buildings less than seven (7) stories in height the sum of one hundred and fifty dollars ($150) per linear front foot of building underpinned.

Item 5. For tunnel excavation (except tunneling for sewers), including the disposal of material, timbering, etc., the sum of nine dollars ($9) per cubic yard.

Item 6. For concrete masonry, in place, the sum of ten dollars ($10) per cubic yard.

Item 7. For protective concrete masonry, in place, outside of waterproofing, the sum of eight dollars ($8) per cubic yard.

Item 8. For rubble stone masonry, in place, the sum of eight dollars ($8) per cubic yard.

Item 9. For brick masonry, in place, the sum of fifteen dollars ($15) per cubic yard.

Item 10. For hollow terra cotta brick masonry, in place, the sum of fifteen dollars ($15) per cubic yard.

Item 11. For grout of Portland cement, the sum of four dollars and fifty cents ($4.50) per barrel of Portland cement used.

Item 14. For broken stone or gravel, in place, other than that used in concrete, the sum of two dollars and fifty cents ($2.50) per cubic yard.

Item 15. For waterproofing, treated woven fabric, laid with pitch or asphaltum, in place, as follows:

(a) For one-ply, the sum of seventy-five cents ($0.75) per square yard.

(b) For two-ply, the sum of one dollar ($1) per square yard.

(c) For three-ply, the sum of one dollar and fifty cents ($1.50) per square yard.

(d) For four-ply, the sum of one dollar and seventy-five cents ($1.75) per square yard.

(e) For five-ply, the sum of two dollars ($2) per square yard.

(f) For six-ply, the sum of two dollars and fifty cents ($2.50) per square yard.

Item 16. For waterproofing, brick laid in asphalt mastic, in place, the sum of thirty dollars ($30) per cubic yard.

Item 17. For vitrified or cast iron drain pipe, in place, as follows:

(a) For twelve (12) inch vitrified pipe, the sum of one dollar and seventy-five cents ($1.75) per linear foot.

(b) For ten (10) inch vitrified pipe, the sum of one dollar and fifty cents ($1.50) per linear foot.

(c) For eight (8) inch vitrified pipe, the sum of one dollar and twenty-five cents ($1.25) per linear foot.

(d) For six (6) inch vitrified pipe, the sum of one dollar ($1) per linear foot.

(e) For four (4) inch vitrified pipe, the sum of seventy-five cents ($0.75) per linear foot.

(g) For six (6) inch cast iron pipe, the sum of one dollar and fifty cents ($1.50) per linear foot.

(h) For four (4) inch cast iron pipe, the sum of one dollar ($1) per linear foot.

Item 18. For tunnel ducts in place as required by section 305 of the specifications, the sum of fifteen cents ($0.15) per duct foot.

Item 19—For riveted steel, painted and erected, the sum of ninety dollars ($90) per ton of two thousand pounds.

Item 20. For steel beams and shapes with connections, painted and erected, the sum of eighty dollars ($80) per ton of two thousand pounds.

Item 21. For steel rods and bars built in concrete, the sum of sixty-five dollars ($65) per ton of two thousand pounds.

Item 25. For miscellaneous iron castings, other than tunnel lining, such as manhole heads and covers, gratings, etc., but not including castings for sewer work or pipes, in place, the sum of seventy-five dollars ($75) per ton of two thousand pounds.

Item 26. For wire mesh, in place, the sum of ten cents ($0.10) per pound.

Item 27. For one and one-half (1½) inch galvanized iron pipe hand-rail, in place, including expansion bolts, etc., the sum of one dollar and twenty-five cents ($1.25) per linear foot.

Item 28. For steel gratings, for ventilation, in place, including frames, etc., the sum of two dollars and fifty cents ($2.50) per square foot.

Item 29. For vault lights, in place, the sum of two dollars ($2) per square foot.

Item 30. For street surface restored:

(a) For street surface, except roadways, the sum of three dollars ($3) per square yard.

(b) For temporary restoration and maintenance of roadways, the sum of three dollars ($3) per square yard.

Item 32. For wrought-iron or fibre electric conduits, in place, in stations as follows:

(a) For three-fourths (¾) inch wrought-iron conduits, the sum of thirty cents ($0.30) per linear foot.

(b) For one and one-half (1½) inch wrought-iron conduits the sum of forty-five cents ($0.45) per linear foot.

(c) For two (2) inch wrought-iron conduits the sum of sixty cents ($0.60) per linear foot.

(d) For two (2) inch fibre conduits the sum of fifteen cents ($0.15) per linear foot.

Item 33. For cast-iron outlet boxes, in place, in stations, the sum of one dollar ($1) each.

Item 34. For six (6) inch cast-iron pipe and fittings including specials "extra heavy" in place, in stations, the sum of two dollars and fifty cents ($2.50) per linear foot.

SEWERS—ITEMS 37 TO 74.

Vitrified and Cast-iron Pipe—Items 37 *to* 43.

Item 38. For fifteen (15) inch vitrified pipe sewer, the sum of six dollars ($6) per linear foot.

Item 39. For eighteen (18) inch vitrified pipe sewer, the sum of seven dollars ($7) per linear foot.

Egg-shaped Brick or Concrete Sewers—Items 44 *to* 51.

Item 45. For 3 feet 6 inches by 2 feet 4 inches, the sum of fifteen ($15.00) dollars per linear foot.

Item 47. For 4 feet by 2 feet 8 inches, the sum of sixteen ($16.00) dollars per linear foot.

Circular Sewers—Brick or Concrete or Reinforced Concrete—Items 52 *to* 66.

Item 59. For 5 feet 9 inches, the sum of twenty-four ($24.00) dollars per linear foot.

Item 60. For 6 feet, the sum of twenty-five ($25.00) dollars per linear foot.

Item 63. For seven feet, the sum of thirty-two ($32.00) dollars per linear foot.

Item 65. For 8 feet 9 inches, the sum of thirty-eight ($38.00) dollars per linear foot.

SURFACE AND SUBSURFACE STRUCTURES—ITEMS 75 AND 76.

Item 75. For street surface railroads, including the support, reconstruction, rebuilding, etc., where necessary (but not including permanent masonry supports, if required and added, and not including additional vaults, if required and constructed, in excess of the number existing), as follows:

(a) For electric railroads, the sum of eighteen dollars ($18) per linear foot of single track.

PIPES IN STREETS—ITEMS 77 TO 126.

For Work and Material as Called for by Section 71 *of the Specifications.*

Water and Gas Pipes—Items 77 *to* 108.

Water Pipes—Items 77 *to* 88.

For water pipes in place, as follows:

Item 78. For 4-inch water pipe, the sum of one dollar and twenty-five cents ($1.25) per linear foot.

Item 79. For 6-inch water pipe, the sum of one dollar and fifty cents ($1.50) per linear foot.

Item 84. For 20-inch water pipe, the sum of three ($3.00) dollars per linear foot.

Gas Pipes—Items 89 *to* 99.

For gas pipes in place, as follows:

Item 90. For 4-inch gas pipe, the sum of one dollar ($1) per linear foot.

Item 91. For 6-inch gas pipe, the sum of one dollar and twenty-five cents ($1.25) per linear foot.

Item 92. For 8-inch gas pipe, the sum of one dollar and fifty cents ($1.50) per linear foot.

Item 95. For 16-inch gas pipe, the sum of two dollars and twenty-five cents ($2.25) per linear foot.

Item 96. For 20-inch gas pipe, the sum of two dollars and fifty cents ($2.50) per linear foot.

Item 98. For 30-inch gas pipe, the sum of three dollars and fifty cents ($3.50) per linear foot.

New Cast-Iron Hub and Spigot Water and Gas Pipe.

Items 100 *and* 101.

Item 100. For new cast-iron hub and spigot straight pipe delivered on the work, the sum of forty dollars ($40) per ton of 2,000 pounds.

Item 101. For new cast-iron hub and spigot pipe, special castings, delivered on the work the sum of seventy dollars ($70) per ton of two thousand pounds.

Air Pipes—Items 121 *to* 124.

For air pipe in place, as follows:

Item 122. For 8-inch air pipe, the sum of two dollars ($2.00) per linear foot.

New *Air Pipe Delivered on the Work—Items* 123 *and* 124.

Item 124. For new 8-inch air pipe, delivered on the work, the sum of two dollars ($2.00) per linear foot.

DUCTS IN STREETS.

Electric Ducts and Conduits in Streets.

(Other than tunnel ducts and street railroad ducts which are provided for in Items 18 and 75-a.)

Item 127. For electric ducts and conduits in place, as provided in section 71-a of the Specifications, the sum of twenty-five cents ($0.25) per duct foot.

Work Not Susceptible of Classification.

Article 12. In case any work or materials shall be required to be done or furnished in or about the works—whether specified herein or indicated on the plans or not—which are not susceptible of classification under the Schedule of Unit Prices, the Contractor shall and will if ordered by the Engineer do and perform such work and furnish such materials at and for the actual and necessary net cost in money to the Contractor for labor and for material, where new material is used, and in addition thereto ten per centum (10%) of such net cost for the use of tools and plant, superintendence and all other expenses incidental to the performance of such work and the furnishing of such material, and the Contractor shall have no further claim in excess of the above, but this method of payment shall not apply to the performance of any work or the furnishing of any material which in part or in whole is susceptible of classification under such schedule, which work or material shall be paid for in part or in whole, as the case may be, at the unit price given in such schedule, except as otherwise herein expressly provided.

In case any work or material shall be required to be done or furnished under the provisions of this article, for cost plus ten per centum (10%), the Contractor shall at the end of each day during the progress thereof furnish to the Engineer daily time slips showing the name and number of each workman employed thereon, the number of hours employed thereon, the character of work he is doing and the wages paid or to be paid to him and also a daily memorandum of the material delivered on the work showing the amount and character of such material, from whom purchased and the amount paid or to be paid therefor. If required, the Contractor shall produce any books, vouchers, records or memorandum showing the work and materials actually paid for and the actual prices therefor.

Quantities Approximate Only.

Article 13. It is expressly understood and agreed that the quantities of the various classes of work to be done and materials to be furnished under this contract, specified in the Contractor's Proposal, are approximate and only for the purpose of comparing, on a uniform basis, the bids offered for the works under this contract; and neither the City, nor the Commission, nor any member of the Commission, is to be held responsible that any of the said estimated quantities shall, by reason of inaccuracies, or changes in the works, be found even approximately correct in the construction of the works; and the Contractor shall make no claim for anticipated profit, or for loss of profit, because of a difference between the quantities of the various classes of work actually done or materials actually delivered, and the estimated quantities stated in the Contractor's Proposal.

Right of Commission to Amplify Plans.

Article 14. The Commission shall have the right, during the progress of the work, to amplify the plans, to add explanatory specifications and to furnish additional specifications and drawings.

Plans May be Modified.

Article 15. The Commission further reserves the right to change the location and to alter, in any way it may deem necessary for the public interest, the drawings aforesaid, in part or altogether, at any time during the progress of the work, without constituting grounds for any claim by the Contractor for payment or allowance for damages

or extra service other than is provided for items of the different classes of construction shown in the schedule, or where not susceptible of classification, then as otherwise provided herein.

Contractor Bound to Complete in Best Manner.

Article 16. The Contractor shall complete the entire work in accordance with the specifications and contract drawings and according to the other provisions of this contract and within the times specified in this contract, in the most workmanlike manner and with the highest regard to the safety of life and property and according to the lines, levels and directions given by the Engineer, for the prices herein agreed upon.

Best Materials, Machinery, Tools, etc., to be Used.

Article 17. The Contractor shall furnish of the best description all materials, machinery, implements, tools and labor necessary to construct and put in complete working order all work covered by the specifications, contract drawings and provisions of this contract, including all additional specifications, drawings and details issued or required as herein provided for the prices hereinbefore agreed upon.

Contractor Has Examined Location, Plans, etc.

Article 18. The Contractor hereby represents that prior to the execution of this contract he has examined in detail on the ground the location mentioned herein and indicated on the plans, and that he has fully examined the plans and has read each and every clause and section of this contract and the specifications and has had full opportunity to consider the same and make necessary investigations relating thereto; and he agrees that he will not make any claim for, or have any right to, damages or an extension of time for completion of the works, or any other concession, because of any misinterpretation or misunderstanding of this contract or the specifications or of the plans, or because of any lack of information.

No Acceptance to Obviate the Necessity for Sound Work, etc.

Article 19. No acceptance of any part of the works or of materials therefor shall relieve the Contractor of his obligation to furnish sound material and perform sound work, whether with respect to such part or to any part of the works.

Inspection.

Article 20. The Commission contemplates, and the Contractor hereby approves, the most thorough and minute inspection by the Commission and its Engineer, and by their representatives or subordinates of all work and materials and of the manufacture or preparation of such materials from the beginning of construction to the final completion of the works. It is the intention of the Commission that its Engineer shall draw the attention of the Contractor to all errors or variations from the requirements of this contract or other defects in workmanship or materials. But it is expressly agreed that no omission on the part of the Commission or its Engineer or any officer, member or subordinate of the Commission to point out such errors, variations or defects shall give the Contractor any right or claim against the City or shall in any way relieve the Contractor from his obligations according to the terms of this contract.

Contractor to Afford Facilities for Inspection.

Article 21. The Contractor shall at all times give to the Commission and its members, to the Engineer and his assistants and subordinates, and any person designated by the Commission or its Chairman, all facilities, whether necessary or convenient, for inspecting the materials to be furnished and the work to be done under this contract. The members of the Commission, the Engineer and all employees of the Commission bearing his authorization or the authorization of the Commission or its Chairman, shall be admitted at any time summarily and without delay to any part of the works or to inspection of materials at any place or stage of their manufacture, preparation, shipment or delivery.

Engineer to be Furnished Facilities.

Article 22. The Engineer shall be furnished with every reasonable facility for ascertaining whether the work is in accordance with the requirements and intention of this contract, even to the extent of uncovering or taking down portions of finished work. Should the work thus exposed or examined prove satisfactory, the uncovering or taking down and the replacing of the covering or the making good of the parts removed shall be paid for at the contract prices for the class of work done; but should the work exposed or examined prove unsatisfactory, such uncovering, taking down, replacing and making good shall be at the expense of the Contractor.

Inspection Not to Relieve Contractor of Obligations.

Article 23. The inspection of the work shall not relieve the Contractor of any of his obligations to fulfill his contract as herein prescribed, and defective work shall be made good and unsuitable materials will be rejected, nothwithstanding that such work and materials have been previously overlooked by the Engineer and accepted or estimated for payment. If the work, or any part thereof, shall be found defective before the final acceptance of the whole work, the Contractor shall forthwith make good such defect, in a manner satisfactory to the Engineer, and if any material brought upon the ground for use in the work, or selected for the same, shall be condemned by the Engineer as unsuitable or not in conformity with the specifications, the Contractor shall forthwith remove such materials.

Engineer's Determination to be Final and Conclusive Upon Contractor.

Article 24. To prevent disputes and litigations, the Engineer shall in all cases determine the amount, quality, acceptability and fitness of the several kinds of work and materials which are to be paid for under this contract; shall determine all questions in relation to the works and the construction thereof, and shall in all cases determine every question which may arise relative to the fulfillment of this contract on the part of the Contractor. His determination and estimate shall be final and conclusive upon the Contractor, and in case any question shall arise between the parties hereto, touching this contract, such determination and estimate shall be a condition precedent to the right of the Contractor to receive any money under this contract.

Engineer to Explain.

Article 25. The Engineer shall make all necessary explanations as to the meaning and intention of the specifications, shall give all orders and directions contemplated therein or thereby and in every case in which a difficult or unforeseen condition shall arise in the performance of the work required by this contract.

Other Contractors.

During the progress of the work it will be necessary for other contractors and persons to do work in or about the construction or equipment of the railroad. The Contractor shall afford such other contractors or persons such facilities as the Engineer may require.

Differences Between Contractor and Other Contractors.

Any differences or conflicts which may arise between the Contractor and other contractors of the Commission in regard to their work shall be adjusted and determined by the Engineer.

Substitute for Chief Engineer.

Article 26. Any engineer substituted by the Commission in place of the Chief Engineer during his absence, illness or inability or when the Commission shall so determine, shall, during his official connection, have all the power and authority of the Chief Engineer, and in all respects be recognized as such Chief Engineer.

III.—SPECIFICATIONS.

Specifications and Drawings Subject to Requirement of Railroad of Highest Class. Where Text of Contract Doubtful, Best Materials and Workmanship Required.

Section 1. The specifications and contract drawings hereinafter mentioned and taken in connection with the other provisions of this contract. are intended by the Commission to be full and comprehensive, and to show all the work required to be done. But in a work of this magnitude it is impossible either in advance to show all details, or precisely to forecast all exigencies The specifications and contract drawings are to be taken, therefore, as indicating the amount of work, its nature and the method of construction so far as the same are now distinctly apprehended. The Railroad is intended to be constructed for actual use and operation as an interurban railroad of the highest class, adapted to the necessities of the people of New York, in the best manner, according to the best rules and usages of railroad construction, and in the event of any doubt as to the meaning of any portion or portions of the specifications or contract drawings, or of the text of the contract, the same shall be interpreted as calling for the best construction, both as to materials and workmanship, capable of being supplied or applied under the then existing local conditions. All the clauses of the specifications, and all the parts of the contract drawings, are, therefore, to be understood, construed and interpreted as intending to produce the results hereinbefore stated.

To Construct in Accordance With Specifications.

Section 2. The Contractor shall construct and complete the Railroad strictly in accordance with the requirements of these specifications; if, in the specifications or contract, any detail or other matter or thing requisite be not mentioned, nevertheless the same is deemed to be included and the Contractor hereby undertakes to do the same as part of the work hereunder, at the unit prices for each class of work where applicable or as provided in Article XII. of the contract.

Maps and Drawings.

Section 3. The contract plans referred to in the contract and specifications bear date June 15, 1910, are each countersigned by the Engineer, are stamped with the seal of the Commission, bear the general title:

Route No. 5.

Contract Drawing No. ....

and are designated or numbered as follows:

For Section 8. Route No. 5.

Drawings as follows:

General Notes; Maps and Profile; Nos. A10, B18, B19, B101, B102, C1 to C11, inclusive, C1003, C1008, C1009, C1011, C1012, C1013, C401, C1032.

Plans and Contract Drawings.

Section 4. The sections and dimensions shown on the contract drawings are typical sections and dimensions which should be applicable to the greater part of the work. Where, however, changes are deemed necessary they may be ordered under Article XV. of the contract and the Engineer shall issue such plans and specifications as may be necessary.

Supplementary Drawings.

Section 5. In addition to the contract drawings already mentioned, the Commission has had prepared a set of maps and plans, bearing the same seal and general title as the contract drawings, but designated as supplementary drawings. These supplementary drawings exhibit certain information which the Commission has received from its Engineer of the nature of the soil underlying portions of the route, the nature and position of elevated and surface railways, water mains, gas and other pipes, sewers, electric subways, manholes, hydrants, catch basins and other surface and subsurface structures.

Supplementary Drawings May be Examined.

Section 6. These supplementary drawings, for each section of the work, can be seen at the office of the Engineer, also samples of material taken in connection with test borings. They are exhibited to the Contractor without any guarantee on the part of the Commission as to their completeness or correctness. The Contractor may have copies (blue prints) of these drawings for one or more of the sections, for such aid, if any, as may be derived from them, on the payment of the cost of printing.

In Case of Difficulties Not Indicated on Supplementary Drawings.

Section 7. If, upon opening the streets, by tunneling or otherwise, difficulties of any nature be encountered which are not indicated or suggested by the supplementary drawings, or by the samples of the test borings, or if additional surface or subsurface structures or obstructions be discovered or found of different size or in different positions or of different nature from those shown on the supplementary drawings, or if in any way such supplementary drawings be found erroneous, the Contractor shall take every necessary or proper precaution to overcome the unforeseen difficulty, and is to support, maintain, protect, remove, adjust or readjust, as the case may be, the additional or different surface or subsurface structures according to the direction of the Engineer, and as provided in this contract and these specifications.

Specifications Not Exclusive.

Section 8. It is expressly understood that the specifications do not include all requirements, but are requirements in addition to those heretofore or elsewhere given or provided in this contract. The specifications and other provisions of this contract, and the contract drawings, are intended to be explanatory of each other. Should, however, any discrepancy appear or any misunderstanding arise as to the import of anything contained in either, the explanation of the Engineer shall be final and conclusive.

Section 9. These specifications are grouped in subdivisions as follows:

1. Description of the Work. 2. General Clauses. 3. Manner of Prosecution and Maintenance of Traffic. 4. Street Railroad Tracks, Mains and other Surface or Subsurface Structures. 5. Excavation. 6. Tunneling. 7. Backfilling. 8. Piling and Timbering. 9. Cement. 10. Mortar. 11. Masonry. 12. Concrete. 13. Brick Masonry. 14. Stone Masonry. 15. Waterproofing. 16. Steel and Iron. 17. Painting. 18. Ducts and Conduits. 19. Drains and Pumps. 20. Sewers. 21. Requirements for Pipes. 22. Street Surface and Park Surface Restored. 23. Vault Lights, Gratings and Hand-rails.

1—Brief Description of the Work.

General Nature.

Section 10. The Rapid Transit Railroad which is hereinbefore described is to be an underground railroad or subway, the general details of construction and the location of the various tracks, junctions, grades, etc., being indicated more particularly on the contract drawings.

Stations to be Constructed.

Section 11. Stations are to be constructed at such places as are indicated on the plans, but station finish work is not included in the work to be done under this contract. Station construction must, however, be kept so advanced that station finish contractors can complete their work coincidently with the completion of the Railroad.

Surface and Subsurface Structures.

Section 12. In addition to the construction of the Railroad, it will be necessary to do various incidental work which is generally referred to in Article X hereof.

Ventilating Chambers and Gratings.

Section 13. In order to provide for a frequent renewal of air in the Railroad, chambers for the installation of necessary ventilating devices shall be built at the sides of the Railroad and in connection therewith. These chambers shall be generally of the form and dimensions as shown on the plans, varying somewhat with the requirements of local conditions. They will be so arranged that the air will discharge through gratings placed generally in the sidewalks in the roofs of the chambers. If, owing to local conditions, it becomes necessary to lead the air to gratings or other outlets away from the chambers, suitable air-ways, ducts or flues shall be constructed.

The chambers will be built at the places and as indicated on the plans.

Section 14. Other openings with gratings will be built at or over the stations, for the purpose of admitting air to the Railroad.

Section 15. The chambers will be provided with suitable doors or openings, and with ladders reaching to the street for use as exits in case of emergency.

2—General Clauses.

Prevention of Water Percolation.

Section 16. It is the very essence of these specifications to secure a railroad structure underground which shall be free from the percolation of ground or outside water. The mixing and placing of the concrete and the placing and protection of the waterproofing shall be with this end in view.

Best Quality of Work.

Section 17. All materials and workmanship must be of the best class in every respect, and the Engineer is to be the sole judge of their quality and efficiency.

Rapidity and Safety.

Section 18. All the work shall be prosecuted in the manner, according to local conditions, best calculated to promote rapidity in construction, to secure safety to life and property and to reduce to the minimum any interference with abutting property and the public travel. Decking of the streets, paving, or other surface work affecting, or affected by, street traffic shall be prosecuted during such hours as will reduce such interference to a minimum. Night work shall be conducted, in accordance with the directions of the Engineer, so that annoyances to occupants of abutting property shall be reduced to a minimum, and the Engineer may, if in his judgment conditions so require, direct that night work be omitted.

Contract Section Part of System.

Section 19. The contract section embraced in this contract is one of a number of contract sections forming part of an extensive rapid transit railroad system,

which the interests of the City imperatively require should be completed and put in operation without delay. If the Contractor shall fail so to prosecute his work that, in the judgment of the Engineer, it shall not be reasonablly probable that the work will be completed within the time limited, the Contractor, if directed by the Commission, shall increase the number of shifts and the number of men in each shift as may be necessary to insure the completion of the work within the time required by this contract, or within the shortest possible time thereafter.

Emergencies.

Section 20. In case of emergencies involving danger to life or property, continuous work with an increased force may be ordered by the Engineer for such time as may be necessary.

Permits.

Section 21. No work shall be begun until the Commission shall issue to the Contractor a permit authorizing him to proceed. No permits for excavation will be issued until the Contractor has given satisfactory assurance to the Engineer that the material needed for construction has been acquired and is available. Such permits are to be in such form and to cover such portions of the work as the Commission shall prescribe.

When to be Filed with Borough President.

Section 22. Before any opening is made in the surface of a street. a copy of the permit issued by the Commission shall have been filed with the Borough President not less than five days, unless the Engineer shall expressly direct work to begin within a less period.

Notice Regarding Commencement of Work.

Section 23. Before commencing work on any part of the route, whether on the Railroad or on the sewers lying off the line of the Railroad, the Contractor shall give notice in writing to the Engineer at least one (1) week in advance of his intention to commence such operations; and before commencing manufacture, or resuming manufacture, if the same has been suspended, of any article called for by these specifications, notice shall be given to the Engineer in writing at least one (1) week in advance, with the name and address of the maker and the amount and description of the material to be manufactured.

Shafts and Dumping Platforms.

Section 24. Plans showing the proposed location, and proposed methods of construction, of shafts, dumping platforms, etc., shall be submitted to the Engineer and receive his approval before permits will be granted for such plant and appliances to be constructed and put in operation.

Ordinances and Regulations.

Section 25. In all operations connected with the Works, all ordinances of the City, and of the Board of Health. so far as they may be valid and operative with respect thereto, and all laws of this State which are now applicable to and control or limit in any way the actions of those engaged in the work or affecting the materials belonging to them, shall be respected and strictly complied with, and the Contractor shall further strictly comply with all applicable Federal, State and Municipal regulations regarding the transportation in and around the City and Harbor of materials used in, or in connection with, the work.

Requirements of Borough President, etc., to be Observed.

Section 26. Whenever the construction of the Works under the provisions of this contract shall interfere with, disturb or endanger any sewer, water pipe, gas pipe, or other duly authorized subsurface structure, the work of construction at such points shall be conducted in accordance with the reasonable requirements of the Borough President or the Commissioner of Water Supply, Gas and Electricity or other officer or local authority having the care of and the jurisdiction or control over such subsurface structures so interfered with, disturbed or endangered.

Building and Water Permits; Shut-offs for Water Pipes, etc.

Section 27. The Contractor shall procure all permits necessary or requisite for the underpinning of buildings and the reconstruction thereof; he shall, at his own cost, provide for the water supply necessary for his work and he shall bear the cost of the service of inspectors required by any municipal department or other public authority in or about the execution of the work other than the inspectors or the employees of the Commission. He shall bear the expense absolutely necessary in the bagging of gas pipes where it is necessary to cut off the supply of same and

of the shutting off and restoration of the flow in water mains where such work applies to the maintenance and support thereof as provided in section 70 of the specifications.

Storage on Cross Streets.

Section 29. No material of any nature shall be stored along the streets occupied by the Railroad in Manhattan or on 138th street, in The Bronx. On cross streets adjacent to the work, only such material may be stored as may be necessary, in case of an emergency, to sheet or to support the excavation; or a reasonable amount of such structural material as may be absolutely necessary to avoid delay in construction may be stored; such material must not be allowed to accumulate, but must be replenished from day to day. The amount to be so allowed shall be determined by the Engineer.

Material Stored.

Section 30. Excavated sand, gravel or stone that in the judgment of the Engineer is suitable for use in mortar, concrete, or masonry, also structural and other material to be used in the work, may be stored in such locations and for such periods as are approved by the Engineer.

Approval of Engineer Revocable.

Section 31. In any case material may only be so stored with the approval of the Engineer, revocable at any time; and if so ordered, such material shall be removed immediately on receipt of the order, or within a period of time to be therein stated.

Access to Fire Hydrants.

Section 32. Wherever the work is being carried on, free access must be given to every fire hydrant and fire alarm box, and when required hydrants shall be extended by suitable tube or piping to an accessible point as approved by the Engineer, and to the satisfaction of the Chief of the Fire Department. Materials must not be piled at any time or place within ten (10) feet of any fire hydrant or fire alarm box; and where materials are unavoidably piled or placed in the vicinity of a fire hydrant or fire alarm box, and to such height as to obscure a sight of the same, the position of such hydrant or fire alarm box shall be indicated by suitable signals, both day and night.

Work to be Cleared.

Section 33. At his own expense and as directed from time to time by the Engineer, the Contractor is to clear the work, streets and all public places occupied by him of all refuse and rubbish that may accumulate from any source whatever and leave them in a neat condition.

Assistance to be Rendered to Owners of Buildings.

Section 34. Where access to any adjacent property is temporary cut off, owing to the occupancy of the street by the Contractor, he must, at his own cost. tender every assistance to the owner or occupant in handling such materials of any description, including all material to be removed by the Department of Street Cleaning, that has to be taken to or removed from such property; such material shall be taken to or from the nearest accessible point that in the opinion of the Engineer is convenient for handling.

Waste Material.

Section 35. Waste material of any character will under no conditions be permitted to remain on the streets, but must immediately on its becoming unfit for use in the work be carted away and disposed of by the Contractor as hereinbefore provided; nor shall such materials be allowed to accumulate in the trenches.

Conveniences for Men.

Section 36. Necessary conveniences, properly secluded from public observation, shall be constructed and maintained by the Contractor at his own expense, wherever needed for the use of the Contractor's employees, to the satisfaction of the Engineer and the sanitary authorities.

Fences.

Section 37. Wherever necessary the Contractor shall erect and maintain at his own expense fences for the protection of adjoining property and of the adjoining public places.

Advertisements Forbidden.

Section 38. The using of fences and buildings during construction for advertising purposes, other than the name and address of the Contractor, is forbidden; all temporary buildings and fences erected by the Contractor shall be neat in appearance and shall be painted as directed by the Engineer.

Barricades.

Section 39. Barricades and bridges shall be erected by the Contractor at his own cost, for the protection of the work or use of the public; they shall be substantial in character and neat in appearance.

Detailed Drawings.

Section 40. The Engineer will prepare and furnish to the Contractor, from time to time as required, drawings and plans amplifying such details of the contract drawings as may be necessary, and drawings and plans necessary to show the adjustment and reconstruction of all surface and subsurface structures wherever the reconstruction of the same is necessitated by the construction of the railroad. These plans must be strictly followed, unless local conditions should develop, during construction, suggesting changes, when, with the approval of the Engineer, such changes may be permitted.

Working and Shop Drawings.

Section 41. The Contractor shall make all working or shop drawings which may be required in addition to the contract drawings, or in addition to such other drawings as the Commission may issue in amplification of such contract drawings. as explained above. All working or shop drawings shall be submitted in duplicate to the Engineer for his approval, which approval shall be indicated by his countersigning one set of such working or shop drawings and returning the same to the Contractor. Should the working or shop drawings be not approved by the Engineer, then the Engineer shall return one set of such working or shop drawings, with the necessary corrections and changes indicated thereon; and the Contractor must make such corrections and changes, and again submit plans in duplicate for the approval of the Engineer; and no work called for by said working or shop drawings shall be done until the approval of the Engineer be obtained, which must be given or refused within ten (10) working days after delivery to him at his office of such plans in duplicate.

Lines and Grades.

Section 42. During the progress of the work the Commission will give, through the Engineer, to the Contractor, suitable points, marks or benches, indicating the line and grade of the Railroad and of the sewers; such points or bench marks to be established at such intervals as the Engineer deems necessary for the Contractor to be able to perform his work. The principal lines and grades are to be given by the Engineer, who may change them from time to time as may be authorized and directed by the Commission. The stakes and marks given by the Engineer shall be carefully preserved by the Contractor, who shall give to the Engineer all necessary assistance and facilities for establishing benches and plugs for making measurements.

Notice, How Given.

Section 43. When the Contractor is absent from any part of the work where it may be necessary to give instructions, orders will be given by the Engineer to, and shall be received and promptly obeyed by, the superintendent or overseer of the Contractor, who may have charge of the particular work in relation to which the orders are given, and a confirmation in writing of such orders will be given to the Contractor by the Engineer if so requested.

Imperfect Work.

Section 44. Any imperfect construction which may be discovered before the final acceptance of the work, shall be corrected immediately on the requirement of the Engineer and at the Contractor's expense, notwithstanding that it may have been overlooked by the proper inspector.

Damaged Work to be Replaced.

Section 45. All work of whatever kind which during its progress and before its final acceptance shall become damaged from any cause, so much of it as may be objectionable shall be broken up or removed and be replaced by good and sound work at the Contractor's expense.

Condemned Materials to be Removed.

Section 46. If any material brought on the ground for use in the work or selected for the same shall be condemned by the Engineer as unsuitable or not in conformity with the specifications, the Contractor shall forthwith remove such materials as may be directed by the Engineer.

Competent Men.

Section 47. The Contractor shall employ only competent, skillful and faithful men to do the work. Whenever the Engineer shall notify the Contractor in writing that in his opinion any man on the work is incompetent, unfaithful or disorderly, such man shall be discharged from the work and shall not again be employed on it.

3—MANNER OF PROSECUTION AND MAINTENANCE OF TRAFFIC.

Access to Buildings, etc.

Section 48. No building shall, without the consent of the occupant, and after notice to the Engineer, be deprived of means of access thereto; and, where streets are open suitable bridges shall be built and maintained, at the Contractor's expense, to permit owners and occupants to reach their premises. Where necessary, proper and easy means for passengers to reach or leave street cars shall be maintained.

Wharves and Docks.

Section 50. For that portion of the route adjoining wharves and docks the work must be so prosecuted as to permit free access to neighboring wharves and docks.

Contiguous Contract Sections.

Section 50-a. On the division line of contiguous contract sections, the Engineer will decide any matters in the details of construction within a limit of ten feet on either side of the line where the work of contractors may be in conflict, and direct which of the contractors shall complete the details of construction within such limits.

Other Portions of the Route.

Section 51. Generally the Contractor will be permitted to conduct its work in the most expeditious manner possible, having due regard for the safety of persons and property and facilities for traffic and under such instructions as the Engineer may give from time to time.

Facilities for Travel.

Section 52. All necessary facilities are to be furnished by the Contractor for the benefit of street travel, both in longitudinal and cross streets.

Decking of Streets and Sidewalks.

Section 53. In order to provide the minimum interference with traffic and the minimum inconvenience to abutting property owners, during the construction of the Railroad, on all parts of the work when the excavation is in trench the streets and sidewalks shall, except as hereinafter specifically provided, be substantially decked or covered over, and every precaution must be taken to keep traffic free from interruption.

Street Intersections.

Section 61. The street intersections, except in cases where open trench excavation without cover is permitted, shall be kept at all times open for traffic for their full width. The street intersections in cases where open trench excavation without cover is permitted must be kept at all times open to traffic for at least one-half the width of the cross roadway, except that cross roadways in which surface railroads are located shall be kept at all times open to traffic for their full width.

Where portions of a street intersection are opened the same shall be substantially and neatly bridged for foot traffic. In all cases the Contractor shall at all times keep all the street crossings on the lines of the sidewalks in a clean and neat condition, bridging gutters and low places where water might collect.

Close Observance of Above Requirements.

Section 62. The Commission will insist upon the close observance of the above requirements, and no departure therefrom will be allowed, excepting upon the written permission of the Commission.

Openings for Ventilation.

Section 63. Wherever the excavations are decked, where gas pipes are maintained in service or where gases are liable to accumulate, suitable openings shall be provided for proper ventilation, or the Contractor may maintain services by temporary mains above the street decking.

Temporary Pipes, etc.

Section 64. Temporary pipes, if laid above the street or sidewalk surfaces, shall be neatly and substantially placed, and in a manner to cause the minimum of inconvenience to the abutting property owners and to the public.

In General.

Section 65. In general, work will, as provided herein, be carried on under covered roadways. In exceptional cases, however, where rock is within a few feet of the street or sidewalk surface, it may be impracticable to operate drills while the street is covered, until a sufficient depth of excavation has been obtained. In such cases such latitude will be allowed the Contractor as may prove absolutely necessary for the execution of its contract, and as the Engineer with the approval of the Commission may deem advisable, after a thorough understanding of the exact conditions and necessities has been determined.

4—Street Railroad Tracks, Mains and Other Surface or Subsurface Structures.

Notice to be Given.

Section 66. Notice is to be given by the Contractor to all companies and the proper City officials, owning or having charge of surface or subsurface structures along any part of the work. of his intention to commence operations along such part of the route, at least one (1) week in advance, and the Contractor shall file with the Engineer at the same time a copy of said notice; and he shall co-operate with the proper officers or officials in charge of such structures and shall furnish them with all reasonable facilities to inspect the methods of caring for their property.

Plans Furnished.

Section 67. In the rearrangement of subsurface structures requiring removal and relaying or reconstruction due to interference with the railroad structure a tentative plan will be made by the Engineer, which will be submitted to the parties interested; if any reasonable changes are then requested by any of the said parties within ten days after the submission of the tentative plan, such changes will then be made, if, in the judgment of the Engineer they will best conserve the interest of all parties concerned; a further plan will then be made which, on the approval of the Engineer, will be final.

Reconstruction or Relaying, etc.

Section 68. Whenever it becomes necessary to cut, move, change, or reconstruct any surface or subsurface structures, or connections therewith, such work shall be done according to the reasonable satisfaction of the owners of such pipes or other structures.

Reasonable Dispatch.

Section 69. All work of reconstruction or alteration shall be done with reasonable dispatch, and facilities are to be provided so that said work will interfere as little as possible with the practical working and use of such structures.

Maintenance, Support, etc.

Section 70. The Contractor shall at all times, by suitable bridging or other supports, maintain and support in an entirely safe condition for the usual service and to the reasonable satisfaction of the owners, all surface and subsurface structures encountered during the prosecution of his work. All surface and subsurface structures and surfaces of whatever character along the line of the work shall be protected from injury, but should any injury occur the Contractor shall fully restore such surface or subsurface structures or surfaces to as good a condition as existed before the injury was done. All the above, including also all changes of surface or subsurface structures made by the Contractor for his own convenience in executing his work, shall be done at the Contractor's own expense and included in the prices stipulated in the schedule for excavation except as otherwise herein specifically provided.

Necessary Permanent Changes of Pipes.

Section 71. Changes of water, gas, steam or other pipes made necessary because of physical interference with the railroad structure, and requiring the removal, relaying or reconstruction of such pipes and their appurtenances in other than the original position, will be paid for at the prices stipulated in Schedule Items 77 to 99, Items 102 to 106, Items 109 to 114, Items 121 and 122, and Item 125. These prices are per linear foot of pipe laid including all work, labor and material incidental to such laying, excepting that:

(1) If new pipes have to be provided and are ordered by the Engineer, such new pipes will be paid for in addition to the price paid for laying, etc., at the prices stipulated in Schedule Items 100 and 101, Items 107 and 108, Items 115 to 120, Items 123 and 124, and Item 126, which prices are to cover the cost of the new pipes delivered on the work.

(2) If the pipes in their new locations are outside of the ordered net lines for excavation for the railroad structure, necessitating additional excavation and restora-

tion of street surface, such excavation will be paid for at the prices stipulated in Schedule Items 2-A and 3-A (which prices shall include all the matters referred to in Section 107), and for restoration of street surface, Item 30-A and B, but only to the net lines ordered by the Engineer for excavation for such pipe work.

Necessary Permanent Changes of Electric Conduits and Ducts.

Section 71-a. Changes of electric conduits or ducts and their appurtenances found in the streets (other than street railway ducts, payment for which is provided for in Schedule Item 75-A), made necessary because of physical interference with the railroad structure, and requiring the removal, relaying or reconstruction in other than the original position, will be paid for at the price stipulated in Schedule Item 127. The price per duct foot as provided in Schedule Item 127 is to include the cost of all ducts in place; of all manholes, vaults, service boxes and their appurtenances; of drawing cables and providing new cables where necessary; of the proper restoration of all services that may be affected by the changes in the duct lines; of such excavation and restoration of street surface as may be necessitated by the changes in the duct lines, and all other work and material incidental to and necessary for the completed duct lines.

Surface and Elevated Railroads.

Section 72. The Contractor shall maintain and support, in a manner that will cause the minimum interference with traffic, all surface, subsurface and elevated railroads along the line of or crossing the line of the work.

Surface Railroads.

Section 73. The Contractor shall maintain and support, both temporarily and permanently, in a safe condition all street surface railroads (including steam railroads), including ducts, cables and all other appurtenances of such railroads; he shall rebuild either in their original or in new locations all parts of such surface railroads, including ducts, cables and all other appurtenances of such railroads, whose reconstruction or rebuilding may be necessitated by the construction of the work. Payment therefor will be at the rates specified in the Schedule for electric railroad, Item 75-A, or for horse railroad, Item 75-B, which prices will include the cost of all work incidental thereto. Where permanent masonry supports are required and added, and where additional vaults in excess of the number existing are required and constructed to give equivalent facilities, they will be paid for at the prices given in the Schedule for the several classes of work or material applicable thereto.

Elevated Railroads.

Section 74. The Contractor shall maintain and support both temporarily and permanently in a safe condition all elevated railroad structures. Payment therefor will be at the rate specified in Schedule Item 76, which price will include the cost of all incidental work, including the reconstruction and building where necessary of all column foundations and parts of column foundations lying without the net lines of the subway structure.

Subsurface Railroads.

Section 75. The Contractor shall support and maintain both temporarily and permanently in a safe condition all subsurface railroads and their appurtenances. Payment therefor shall be deemed included in the prices for excavation, Schedule Items 1, 2 and 3.

Facilities to be Given to Make Extensions.

Section 76. In the event of the owners or the City desiring to make any alteration or extension to their structures, or do any work to or in connection with surface or subsurface structures owned by them or it, at the time the work under this contract is in progress, the Contractor shall give said owners or the City all reasonable opportunity to perform such work; provided such work or alteration for the benefit solely of the owners of subsurface structures does not cause the Contractor any serious loss or delay, as shall be determined by the Commission.

Parks and Parkways, Trees, etc.

Section 77. In any park or parkway, or where any grass plots or trees exist along any street occupied by the Contractor, proper precautions must be taken to protect from injury all such trees or grass plots. For every tree removed, injured or destroyed, the Contractor shall set out a new thrifty tree of the same kind as the tree removed, injured or destroyed, and not less than fifteen (15) feet in height and not less than three and one-half (3½) inches in diameter measured two feet above the surface of the ground, and in such position as the Commissioner of Parks shall indicate. All roads, cross-paths, grass plots, shrubbery and other plants

removed or affected by the construction of the railroad, shall be restored as soon as possible to as good a condition as existed before the commencement of the work.

Replanting Under Direction of Park Commissioner.

Section 78. In replanting trees and the replanting of grass plots the Contractor must be governed by the reasonable requirements of the Commissioner of Parks or by other authorities specially charged with the care of these trees or grass plots, and the nature and depth of the soil to be placed therein must be approved by such authorities and by the Commission.

Payments, How Made.

Section 79. Payment for all work covered by Sections 77 and 78 shall be included in the prices paid for Park or Street Surface Restored, Schedule Items 31 or 30.

5—Excavation.

Width of Excavation.

Section 80. Special care must be taken to avoid damage wherever excavation under cover is being done or where open excavation is permitted. The width of such excavation shall not exceed the width actually necessary, in the opinion of the Engineer, for the proper prosecution of the work. All excavations shall be of such width, in addition to that of the railroad, as shall be necessary in the opinion of the Engineer for the proper and expeditious progress of the work, and to permit the laying and readjusting of all sewers, mains, subways and other subsurface structures encountered along the route and contiguous to the railroad.

Depth of Trenches.

Section 81. Trenches shall be excavated to such depth, both in soft ground and in rock, as may be necessary to permit the laying of such concrete bed or special foundation as may be deemed necessary by the Engineer.

Sides to be Secured.

Section 82. The sides of the excavations shall be secured against slips by suitable sheet piling or sheeting, held in place by braces, shores or walling timbers, special precautions being taken where there is additional pressure, due to the presence of buildings or other structures. Where a movement of the ground might cause the settlement of an adjacent building, the sheeting must be started, if near the building, before the elevation of the bottom of the foundation of the building is reached; if away from the building, at such depth of the excavation as the Engineer may permit; and the excavation must not be made in advance of or below the bottom of the sheeting.

Filling Back of Sheeting.

Section 83. Sheeting shall be driven wherever possible, but when it is placed against the sides of the excavation, the spaces or voids back of the sheeting must be immediately and carefully filled with suitable material to prevent as far as possible the natural ground back of the sheeting from moving.

Buildings Underpinned.

Section 84. To secure adjacent ground or the buildings thereon, or to prevent bringing an unusual pressure on the structure when completed, the Contractor shall secure the sides of the excavation by suitable timbering, and shall safely and permanently underpin adjacent buildings. As part of this obligation the Contractor shall use such methods of construction or underpinning, pneumatic or otherwise, as special conditions may require and the Engineer shall approve.

Payment For.

Section 86. Where underpinning of a building is necessary and the work is done as provided in Section 84, payment will be made to the Contractor as, and at the price, provided in Schedule Item 4. The classification as to the number of stories has reference to the number of stories above the surface of the street.

Sheeting.

Section 87. No payment shall be made to the Contractor for sheeting left in the ground or in the work, unless the Engineer shall in writing require it to be left in, in which case payment shall be made to the Contractor for the sheeting so left in as measured by the Engineer, and at one-half the current market price for new material of the same grade, character and dimensions, and without any allowance or payment for placing the same or the expense thereof. This section applies only to the sheeting in trench work.

Timber for Temporary Purposes.

Section 88. All timber used for sheeting, shoring, bracing, decking or other temporary purposes, shall be sound and free from any defects that may impair its strength. It shall be provided, placed and removed at the Contractor's own cost and expense. The top or wearing surface of all decking used for carriageways shall be of hard yellow pine, sound, straight and free from all shakes, and large loose knots. All sheeting and timber used temporarily shall be put in place by skilled mechanics, keyed tight by wedges where necessary, and so arranged as to be withdrawn readily without endangering the adjoining soil.

Vaults of Abutting Property.

Section 89. The cost of the removal, where necessary, of all walls or other parts of vaults of abutting property along the line of the railroad that are within the ordered net lines of excavation is to be included in earth excavation as provided in Section 102, but the restoration of all such walls or other parts of vaults within the ordered net lines of excavation will be paid for at the unit prices specified in the Schedule applicable to the several classes of work and material involved in such restoration.

The above is not to be construed, however, as applicable to any work beyond the ordered net lines of excavation, which shall be at the Contractor's own cost and expense.

Vaults Disturbed.

Section 90. Wherever vaults are broken through or otherwise disturbed, the Contractor shall, at his own cost and expense, erect a temporary partition on or about the building line, or as directed, that will afford proper protection to the owner or occupant of the adjoining premises.

Rock.

Section 91. Ledge rock in place, and boulders within the ordered line of excavation requiring blasting, will be considered as rock excavation.

Preparations for Rock Measurement.

Section 92. Whenever rock is encountered in the trench, it shall be stripped of earth in sections of not less than 20 feet; and the engineer in charge shall be duly notified, in order that he may measure or cross-section the same.

Blasting.

Section 93. Whenever rock or material requiring blasting is encountered in any trench or tunnel, all necessary precautions must be exercised by the Contractor, as required by the ordinances of the City relative to blasting. Explosives shall be used only of such character and strength as may be permitted by the Commission, and the right is reserved for the Engineer to direct that in special cases ordinary blasting powder only, in small charges, shall be used. Blasting shall not be done between the hours of 11 p. m. and 7 a. m. without the express permission of the Engineer, and under such restrictions as he may impose.

Storage of Explosives.

Section 94. No larger quantity of explosives shall be kept on the line of the work than will be actually required for the twelve (12) hours of work next ensuing, and it shall be kept under lock, the key to which is to be only in the hands of the foreman or other equally trustworthy person. The amount of explosives kept in any one place shall not exceed the limit permitted by any ordinance of the City, or as may be determined by the Commission. Caps and exploders shall not be kept in the same place with dynamite and other explosives. During freezing weather, special precautions shall be taken as to the care and manipulation of dynamite.

Near Pipes and Mains.

Section 95. Whenever any pipe or main is encountered in or alongside of the trench, right is reserved to direct that all rock within five (5) feet of the same shall be removed by means other than blasting.

General Precautions in Blasting.

Section 96. In rock excavation in the trenches for the railroad the work must be so regulated as to avoid, as far as possible, shattering the rock beyond the established line for excavation.

Blasting.

Section 97. Generally the central portion of the excavation must, when directed by the Engineer, be kept some distance in advance of the excavation near the sides,

and if the rock, owing to its general character and structure, has a tendency to break large, or the strike and dip of the stratification indicate a liability to slip or slide into the excavation, the Contractor must place the drill holes at close intervals on the established lines for excavation, in order to avoid excessive excavation and to preserve the established lines thereof.

Pumping.

Section 98. Whenever water is encountered in trenches, the same shall be removed by bailing or pumping, great care being taken when pumping that the surrounding particles of soil be not disturbed or removed. If necessary to prevent such disturbance, the pumping must be done by a series of driven wells whose points are protected by fine wire cloths, the rate of flow at each well being made so slow as not to remove the particles of soil; or the pumping must be done by other means approved by the Engineer. The delivery from all pumps shall be conducted into the adjacent sewers, and the delivery pipes shall be so arranged as to be readily inspected at all times to ascertain if the water is free from particles of soil.

Carts to be Tight.

Section 99. All carts, buckets or other vehicles used by the Contractor for the removal of material, shall be tight and so arranged and so loaded as not to spill over. Whenever a cart, bucket or other vehicle so used is leaky or unsuitable, it shall be immediately withdrawn from the work on notification by the Engineer, or his duly qualified assistant, in charge of that portion of the work.

Removed Expeditiously.

Section 100. Excavated material shall be removed expeditiously and disposed of, in any place selected by the Contractor, subject to the ordinances and regulations of the City authorities governing the disposal of such material, and the regulations of the United States Government as to the disposal or dumping of material in and about or near the Harbor of New York.

When Excavated Material May be Taken by the City.

Section 101. If at any time during the course of construction the City shall desire for City purposes any part of the material excavated, and the cost of such disposal shall not exceed the cost to the Contractor of the method in which he is then disposing of it, the Commission may order such material dumped or turned over to the City at a point designated without cost to the City.

Earth Excavation, Definition of.

Section 102. Earth excavation includes the excavation of all materials of whatever nature encountered in the trenches, excepting ledge rock in place and boulders requiring blasting.

Excavation in Trenches, How Measured.

Section 103. The net outside width of the railroad structure, as ordered and indicated on the plans, and the depth, also as ordered and as indicated on the plans, will govern as to width and depth in the measurements for payment for excavation. No deduction from the volume of excavation determined as above, will be made on account of basements or cellars in property acquired by the City for the construction of the railroad or on account of vault space or of spaces occupied by pipes and other subsurface structures.

No Allowance Outside of Ordered Net Lines.

Section 104. There will be no measurement or allowance made nor money paid for excavation outside (below or wider than) the net measurement lines as above indicated, or in rock excavation, for irregularities of surface; and no allowance shall be made for any excess excavation caused by slips or slides. It is understood and agreed that for all such matters the Contractor has estimated and allowed in the unit prices of the schedule.

Change of Street Grade.

Section 105. Where the contract drawings indicate that the grade of any street is to be raised the Contractor shall fill in the street to the changed grade as required and such work shall be measured and paid for at the price stipulated for earth excavation, Schedule Item 1.

Payment for Excavation.

Section 106. Excavation shall be paid for at the price or prices given in Schedule Items 1 and 2 for excavation in earth and Item 3 for excavation in rock.

Prices for Excavation to Include.

Section 107. The prices herein stipulated for excavation, Schedule Items 1, 2 and 3, are to include the cost of the disposal of the materials excavated, of backfilling, of all decking and bridging, of all sheeting and bracing, and of maintaining and supporting of trenches during and after excavation, of all pumping or bailing, and of the maintenance, support, etc., of all surface and subsurface structures of whatever nature, payment for the maintenance and support of which is not herein elsewhere specifically provided for.

6—TUNNELING.

How Lined.

Section 108. All tunnels shall be lined with steel or cast iron and concrete, or with concrete or brick masonry.

Where tunnels are lined with concrete or brick work without metal tubes, proper provisions shall be made for keeping the tunnels dry by the use of drains, and by other methods as elsewhere provided.

Packing.

Section 109. The space between the extrados of the arch or back of the sidewalls and the rock or other materials of excavation, shall be filled with concrete to a height of two feet above the spring line of the arch—above this concrete the space shall be filled with dry masonry packing. Similarly in the tunnel floor, if concrete is used, all loose muck shall, if directed by the Engineer, be removed to the solid rock and the space filled in with concrete up to the bottom line of the section ordered by the Engineer for tunnel excavation and concrete. All such concrete or other packing, being outside of the net section line for excavation as ordered by the Engineer, shall be at the sole expense of the Contractor.

Grout.

Section 110. After the tunnel lining and packing is in place, if required by the Engineer, a grout, consisting of one (1) part fine, clean and sharp sand and one (1) part Portland cement, shall be pumped in under pressure, from time to time behind the masonry, so as to completely fill all the voids. Where tunnels are made by the use of a shield, similar grout shall be pumped in to completely fill the space left by the tail piece of the shield as soon as the shield is moved forward.

Payment for Grout.

Section 111. Where grout is ordered and used, it shall be paid for at the price herein provided, Schedule Item 11.

Lines for Excavation.

Section 112. The tunnel, at any place, is to be excavated to the line of the cross-section ordered by the Engineer for that place.

No Payment for Excavation Beyond Ordered Lines.

Section 113. All loose or shaky rock, whose fall or settlement might, in the judgment of the Engineer, produce an unequal or concentrated pressure on the masonry, shall be removed, and the space refilled with such class of masonry as the Engineer may require and as provided in Section 109, but no payment will be made for any excavation outside of the cross-section of the tunnel excavation ordered by the Engineer, as provided in Section 112.

Blasting.

Section 114. Drilling and blasting must be conducted with all possible care and in such a manner as not to shatter the roof and sides outside of the section lines, as ordered by the Engineer, nor endanger adjoining property.

Drains.

Section 115. All seams carrying water shall be carefully drained, as specified under the clauses relating to drainage.

Precautions Against Settlement.

Section 116. The Contractor must take every precaution, and such precautions as the Engineer may direct, by suitable shields, timbering, lagging or other supports, to prevent any settlement or movement of surrounding ground. Such timber as cannot be drawn without endangering the work or the ground above, shall be left in place and thoroughly surrounded by masonry and grouted.

Timbering.

Section 117. Timbering shall be used wherever necessary to support the materials or to secure the safety of the work or workmen. It will be at the sole expense of the Contractor and included in the contract price for tunnel excavation, Schedule Item 5. Wherever practicable it shall be removed before the concrete lining or concrete or other packing is placed.

Compressed Air.

Section 118. If for the work under the Harlem River and for the approaches thereto or elsewhere on the work a method is adopted requiring the use of compressed air, a plant must be provided of sufficient capacity to insure at all times and under all conditions an ample supply of air to prosecute the work with safety and dispatch, and proper air locks shall be built with safety locks, in addition to provide for the escape of workmen at time of accident.

Methods to be Approved.

Section 119. All methods of tunneling shall be subject to the approval of the Engineer, and be changed from time to time, if, in his judgment, the local conditions so require, and during construction approved methods of ventilation and lighting shall be used.

Tunneling, Payment For.

Section 120. The price per cubic yard, stipulated herein, Schedule Item 5, for tunnel excavation, is to cover all expense due to the presence of quicksand or other soft material, rotten rock, boulders, etc.; the cost of all pumping and bailing; of all timbering, and removal of same; of removing all excavated material; of all ventilation and lighting; and of all other work incident to the excavation of the tunnel. Any expense that may arise from loose or shaky rock or from falls or cave-ins, or from any unexpected obstacles, shall be borne by the Contractor. In earth sections the tunnel excavation must be large enough to permit building the masonry to the full required thickness, clear of such timbering and lagging as it may be necessary to build in. As a fair provision for such contingencies, it is assumed that the excavation will extend an average distance of one (1) foot outside the net line in the roof and sides and six (6) inches below the net line in the floor, and measurements for payment in tunnel excavation in earth will be made to those lines. It is distinctly understood, however, that no such allowances or any other allowance in tunnel excavation will be made in connection with timbering in tunnel excavation in rock.

Chambers, Drains, etc.

Section 121. Excavations for chambers, for skewbacks of arches, for sump holes, drains or for any other purpose in the tunnel, are to be measured according to the lines of the cross-sections determined by the Engineer, and paid for by the cubic yard as tunnel excavation.

Additional Enlargement.

Section 122. If after the excavation has been made of a certain size by direction of the Engineer, he is of opinion that the nature of the rock or other material is such that the form and dimensions of the masonry for which said excavation was intended must be increased, he may order an enlargement of the excavation for the purpose of building masonry of greater thickness, and the Contractor is to make such enlargement, which is to be measured according to the lines given by the Engineer, and paid for at the price per cubic yard stipulated in the schedule for tunnel excavation.

7—Backfilling.

Quality of Material. How Placed.

Section 128. The trenches at the sides of and over the top of the subway and wherever backfilling is necessary, shall be backfilled with sand, gravel or other good clean earth, free from perishable material and from stones exceeding six (6) inches in diameter, and not containing in any place a proportion of stone of or below that size exceeding one (1) part of stone to five (5) parts of earth. The filling shall be compacted by flooding with water or, in cases where flooding with water is not practicable it shall be compacted by ramming in layers, not exceeding six inches in depth.

Subsurface Structures. Frozen Material Not Permitted.

Section 129. Whenever pipes, sewers or other subsurface structures are met with, the filling must be carefully packed, rammed and tamped under such subsurface structures, using special tools for the purpose. No filling of trenches with frozen earth will in any case be permitted, nor will any filling be permitted over frozen material.

Sheeting Removed.

Section 130. As fast as the work of filling permits, sheeting and other timber supporting the sides of the excavation shall be carefully withdrawn, or shall be left in place, as may be directed by the Engineer, and the spaces left by the removal of such material carefully back-filled.

How Paid For.

Section 131. The cost of backfilling is to be included in the prices paid for earth and rock excavation, Schedule Items 1, 2, 2-A, 3 and 3-A.

8—PILING AND TIMBERING.

Piles.

Section 132. If in the judgment of the Engineer the ground is of such a character as to require piling, the Contractor shall drive such piles as the Engineer directs. The piles shall be of good sound pine or spruce, straight and free from shakes; they shall be not less than twelve (12) inches in diameter at the butt end, or less than six (6) inches in diameter at the point, and shall be driven to the satisfaction of the Engineer and by means of a steam hammer driver if so required by him. If necessary the points of the piles shall be protected by proper shoes, and the butts by rings or caps. Piles shall not be spliced unless permitted by the Engineer, and then in such manner as he directs. Piles shall be carefully cut off to the grade given by the Engineer.

Piles Driven in Required Location.

Section 133. Piles shall be driven in the position and manner and to the depth ordered; if driven in a wrong position or injured in any way by driving they must be withdrawn and replaced by others. After being driven they shall be cut off to a true plane for proper adjustment with capping timber or masonry.

Payment for Timber Piles.

Section 134. The price herein stipulated to be paid, per linear foot of timber piles, Schedule Item 12, is to cover the cost of furnishing, driving and preparing the piles ready for the capping timbers or masonry, and the portion cut off and removed will not be included in the length measured for payment. No test piles, guide piles, or piles other than those that are a part of the finished foundation and are included within the net width of the finished foundation will be paid for.

Concrete Piles.

Section 135. If in the judgment of the Engineer special conditions so require, piles of reinforced concrete of an approved form of construction shall be used.

Payment for Piles Other Than Timber Piles.

Section 136. Payment for piles other than timber piles will be as provided in Article XII. of the contract.

Grillage.

Section 137. Timber grillage foundations shall be built if so directed by the Engineer.

Foundation Timber.

Section 138. All foundation timber shall be of pine or spruce, or other timber permitted by the Engineer, sound and free from shakes. It shall be of such dimensions, and laid in such manner, as the special plans to be issued shall require, and held in place by spikes or good seasoned oak or locust treenails.

Foundation Timber, Measurement and Payment.

Section 139. No wastage is to be allowed for, and the estimate of the quantities of foundation timber used will be based on the amount ordered by the Engineer and placed according to his direction. Payment for foundation timber will be as provided in Schedule Item 13.

9—CEMENT.

Portland Cement.

Section 140. All cement used in the work shall be true Portland cement, by which is meant the finely pulverized product, resulting from the calcination to incipient fusion of a properly proportioned intimate mixture of argillaceous and calcareous earths or rocks, to which no addition greater than three (3) per cent. has been made subsequent to calcination.

Brand to be Approved.

Section 141. Before any cement is furnished, the brand shall receive the approval of the Engineer. Cement, to be acceptable, shall be of a well-known brand which has been in successful use for large engineering works in America for at least five (5) years, and which has an established reputation for uniform character. Preference will be given to cements which, by their records, show a tendency to maintain high strength of mortar with increased age.

Inspection.

Section 142. Cement shall be subject to inspection at the place of manufacture or on the work, and to such tests as may be ordered by the Engineer. The Engineer or his representatives shall have access at all times and places to inspect the methods of manufacture, storage and protection, and shall have liberty to inspect the daily laboratory records of tests and analyses at the cement works.

Tests.

Section 143. In general, tests will conform to the methods recommended by the Committee on Uniform Tests of Cement of the American Society of Civil Engineers. Unless otherwise directed, samples will be taken at the place of manufacture by a representative of the Engineer, and sent to the Commission's laboratory, where the tests will be made. If required, tests will be made on the individual samples, without intermixing.

Specific Gravity and Color.

Section 144. The cement shall have a specific gravity of not less than 3.10 nor more than 3.25 after being thoroughly dried at a temperature of 212 degrees Fahr. The color shall be uniform, bluish gray, free from yellow or brown particles.

Chemical Analysis.

Section 145. Chemical analyses of cement made from time to time shall show a reasonably uniform composition. Cement shall not contain more than 1.75 per cent. of sulphuric anhydride (SO_3) nor more than 4 per cent. of magnesia (MgO).

Fineness.

Section 146. The fineness of the cement shall be such that it shall leave by weight a residue of not more than eight (8) per cent. on a No. 100, and not more than twenty-five (25) per cent. on a No. 200 sieve; the wires of the sieves being respectively 0.0045 inch and 0.0024 inch in diameter.

Time of Setting.

Section 147. It shall not develop initial set in less than thirty (30) minutes unless a more quickly-setting cement is specifically required, and shall develop hard set in not less than one (1) hour nor more than ten (10) hours.

Soundness.

Section 148. Pats of neat cement, after remaining one (1) day in moist air, shall be kept in air or water of normal temperature for at least twenty-eight (28) days, or shall be exposed to an atmosphere of steam, above boiling water, in a loosely closed vessel for at least five (5) hours; and the separate parts under any of these conditions, shall remain hard without any indications of checking, cracking, distortion, disintegration or blotching.

Tensile Strength.

Section 149. Neat cement briquettes shall have at the end of one (1) day in moist air a breaking strength, per square inch of sectional area, of not less than one hundred and fifty (150) pounds; at the end of seven (7) days—one (1) day in air, six (6) days in water—of not less than five hundred (500) pounds; and at the end of twenty-eight (28) days—one (1) day in air, twenty-seven (27) days in water—of not less than six hundred (600) pounds. The strength at twenty-eight (28) days shall not be less than that at seven (7) days.

Mortar Briquettes.

Mortar briquettes, composed of one (1) part of cement and three (3) parts of standard Ottawa sand, by weight, shall have at the end of seven (7) days—one (1) day in air, six (6) days in water—a breaking strength, per square inch of sectional area, of not less than two hundred (200) pounds; and at the end of twenty-eight (28) days—one (1) day in air, twenty-seven (27) days in water—of not less than three hundred (300) pounds. The strength at twenty-eight (28) days shall show an increase of not less than fifty (50) pounds over the strength at seven (7) days.

Long-time Tests.

Section 150. Tests will be made from time to time extending over longer periods than twenty-eight (28) days. If such tests show a tendency to unsoundness or unusual reduction in strength with increased age, the Engineer shall have the right to prohibit further use of that brand and to require that another brand be substituted.

Storage During Tests.

Section 151. All cement shall be held in storage to allow ample time for tests to be made before the cement is required for use in the work.

How Contained.

Section 152. Cement shall be packed and delivered in canvas sacks or other strong, well-made packages, plainly marked with the manufacturer's brand, and sealed in an approved manner. The weights of such packages shall be uniform.

Methods of Storing.

Section 153. The Contractor shall at all times keep in store on the work, or at some point convenient thereto, an abundant supply of cement, so as to guard against possible shortage. It shall be stored in a weather-tight building, with a tight floor a proper distance above the ground, and with sufficient floor space to admit of storing each lot of cement, of not more than two hundred (200) barrels, or its equivalent, separately, so as to facilitate identification of each individual lot in case of necessity for further tests or rejection. Cement that has become partially set or otherwise damaged shall not be used.

10—MORTAR.

Cement and Sand. Mixing.

Section 154. All mortar shall be prepared from accepted cement and clean, sharp sand, approved by the Engineer. These ingredients shall be thoroughly mixed dry in the proportions as specified below; water shall then be added, so as to produce a stiff paste. Water used in mortar, grout or concrete must be clean, fresh water, no salt water being permitted. The mortar shall be freshly mixed for the work on hand, in proper boxes made for that purpose, and no mortar shall be used that has stood beyond such limit of time as may be determined by the Engineer.

How Measured.

Section 155. For purposes of mixture, three hundred and seventy-five (375) pounds of Portland cement shall be estimated at three and one-half (3½) cubic feet of volume. The proportional parts of sand and stone or gravel shall be by volume as cast into the measuring box. The proportions for brick and stone masonry shall be one (1) part cement to two (2) parts sand; for pointing, one (1) part cement and one (1) part sand; for concrete masonry, as specified under the head of concrete; and for other classes of work, as directed by the Engineer; for grout, one (1) part of cement to one (1) part of fine sand.

11—MASONRY.

Laid in Portland Cement.

Section 156. All masonry, except as otherwise specified, shall be laid in Portland cement mortar, and shall be built of the forms and dimensions shown on the plans, or as directed by the Engineer from time to time; and the system of joining or bonding ordered by the Engineer shall be strictly followed.

Water Not to Interfere With.

Section 157. Care must be taken that no water shall interfere with the proper laying of masonry in any of its parts.

Freezing Weather.

Section 158. During freezing weather such masonry only shall be built whose construction, in the judgment of the Engineer, can not be postponed, except at the cost of delaying the work. The Contractor shall provide such appliances as are necessary for heating the water and the materials used in the masonry according to the specific instructions of the Engineer.

Protected in Freezing Weather.

Section 159. During freezing weather all masonry shall be protected by a suitable covering of salt hay, canvas, tarpaulin or by such material or in such ways as may be necessary to insure it against freezing.

Hot Weather.

Section 160. During hot weather all masonry, especially concrete, shall be kept wet by sprinkling and properly covered until it has become thoroughly set and hardened.

Pointing.

Section 161. Unless otherwise permitted, every joint that is to be pointed shall be raked out, within two days after being laid, to a depth of at least two inches.

Section 162. Pointing of the face joints of masonry shall be thoroughly made with cement mortar mixed in the proportion of one (1) part of cement to one (1) part of sand, except where otherwise specially provided.

Section 163. No pointing shall be done in freezing weather, and masonry laid between December 1 and April 1 shall not be pointed until permitted by the Engineer.

Defective Masonry.

Section 164. Any masonry which is found to be defective from any cause whatsoever, before the final completion and acceptance of the work, must be removed and properly rebuilt, or if damaged during such time must be properly repaired.

Stone Cleaned.

Section 165. All stone before being laid shall be thoroughly cleaned and washed if so directed by the Engineer.

12—CONCRETE.

How Composed.

Section 166. The concrete shall be composed of gravel or broken stone, or a mixture of both, free from all dust and dirt, and mixed together with the proportion of mortar specified below.

Sand.

Section 167. Sand for concrete shall be of the kind herein specified for mortar.

Stone.

Section 168. Stone for concrete shall be sound, clean gravel, or sound, hard, broken limestone, or trap rock, or a mixture of such gravel and broken stone may be used.

Sizes of Stone.

Section 169. Broken stone or gravel for concrete shall be graded from fine to coarse, and that which is all of one size, or practically so, shall not be used. It shall be screened or washed so as to remove all dust, and it shall contain no pieces that will pass through a hole three-eighths (⅜) inch in diameter, and no pieces that will not pass through a hole one and one-half (1½) inches in diameter. Broken stone or gravel for concrete, graded as above, but between three-eighths (⅜) and three-fourths (¾) inch in diameter, may be required and used in special parts of the work.

Rubble Concrete.

Section 170. In concrete, where the thickness is thirty (30) inches or more, if permitted by the Engineer, the Contractor may embed in the same pieces of sound stone whose greatest diameter does not exceed twelve (12) inches and whose least diameter or thickness is not less than three-quarters (¾) of the greatest diameter. These stones shall be set by hand in the concrete as the layers are being rammed, and so placed that each stone is completely and perfectly embedded. No two (2) stones shall be within six (6) inches of each other and no stones within four (4) inches of an exposed face, nor shall any such stone be placed nearer than six (6) inches to any metal built in the concrete for reinforcing the same.

Proportions.

Section 171. The proportions of cement, sand and stone (or gravel) used in making concrete shall be as follows:

Section 172. Concrete in floor, sidewalls and roof one (1) part of cement, two (2) parts of sand and four (4) parts of stone. Concrete for tube tunnels under the Harlem River will be as indicated on the plans.

Section 173. Protective concrete outside of waterproofing lines on sides and roof, one (1) part of cement, four (4) parts of sand and eight (8) parts of stone.

Mixing by Machine.

Section 174. Whenever practicable, concrete shall be machine mixed. A rotary machine of a pattern approved by the Engineer, and mixing only one batch at a time, shall be used.

Mixing by Hand.

Section 175. When concrete is mixed by hand the stone or gravel shall be spread on a platform in a bed about six (6) inches thick, and shall be thoroughly wet. Sand shall be spread on a platform and the requisite portion of cement spread on the sand. After thoroughly mixing the latter, the dry mixture thus formed shall be spread evenly over the bed of stone wet, as above, and the whole turned over until thoroughly mixed, but not less than two (2) turnings on the mixing board shall be allowed in any case, water being added as necessary. Care shall be taken to keep the bed of concrete wet and avoid piling.

How Laid.

Section 176. Concrete shall be placed immediately after mixing in layers of such thickness as may be directed by the Engineer, and shall be thoroughly compacted throughout the mass by ramming or spading, special tamping bars or tools being used as approved by the Engineer. The amount of water used in making the concrete shall be as approved by the Engineer. If a small amount of water has been used in mixing, ramming shall be continued until the water flushes to the surface; as a rule, however, concrete shall be placed wet.

Made Smooth to Receive Waterproofing.

Section 177. Concrete to which waterproofing is to be applied shall be made smooth at the time of laying and shall be carefully protected from injury by barricades or otherwise, if necessary, until thoroughly set.

Time for Hardening.

Section 178. Concrete shall be allowed to set for twelve (12) hours, or more, if so directed, before any work shall be laid upon it; and no walking over or working upon it shall be allowed while it is setting. Concrete shall not be flooded with water before being thoroughly set.

Rock Surface to be Cleaned.

Section 179. Before laying concrete on rock surfaces the latter shall be swept clean of all debris and dirt, and when laid on earth the earth shall be rammed as directed before placing the concrete.

Surface Rough for Bonding.

Section 180. Wherever a section of concrete is necessarily left unfinished, leaving a surface which will be hard set before additional concrete is laid, the surface shall be left rough to form a bond with the new work; and if deemed necessary by the Engineer, the points shall be reinforced with steel bars or dowls, to be furnished by the Contractor.

Joints Cleaned.

Section 181. In all cases of joints of old with new work the old surfaces shall be thoroughly cleaned and wet, and a coating of mortar or cement shall be applied, if required, before placing the concrete.

Forms.

Section 182. Suitable forms shall be provided by the Contractor to support the concrete while being placed in the walls or roofs. These forms shall be immediately replaced by new ones as soon as they commence to lose their proper shape. Before being used they shall be carefully cleaned of cement and dirt in order to provide a perfectly smooth face to the exposed surface of the concrete. The forms shall be made of wood, kept carefully planed; or made of metal sufficiently thick to retain their shape without the use of wood.

Section 183. No forms made of wood, and covered with iron will be permitted.

Section 184. The forms, if made of wood, shall be made of boards with tight joints, tongued and grooved, if required by the Engineer.

Precautions in Placing.

Section 185. Every precaution shall be taken in placing or assembling the forms to do so in such a manner that when removed, after the concrete has been placed, the faces of the concrete that are to remain exposed shall present a smooth and even surface.

Forms, How Set. Forms Removed. Surface Irregularities Corrected. Defective Work Replaced.

Section 186. The forms shall be set true to line, firmly secured, and be so tight as not to allow water in the mortar to escape; they shall be thoroughly wet before

placing the concrete and shall be removed as soon after the concrete has been placed as in the judgment of the Engineer may be done with safety to the work. Immediately on the removal thereof the faces that will remain exposed shall be carefully examined and any irregularities of the surface corrected; projections shall be removed and voids filled with mortar. If, however, the voids are such as to indicate an excessive loss of mortar, portions of the concrete shall be cut out to the fullness of such defects and the space refilled with a rich concrete or mortar in such proportions and in such manner as the Engineer may direct.

Reinforcement Steel.

Section 187. Where reinforcement steel or wire mesh is used, efficient means shall be provided to maintain it in the exact position it is to occupy in the completed work, and to prevent it from becoming dislodged, or moved in any manner, when concrete is placed.

Surfaces Not to be Painted.

Section 188. The exposed faces of the concrete, excepting within station limits, shall be left with the natural cement finish; therefore, immediately following the removal of the forms, followed by the removal of the projections and the filling of voids, as provided above, these entire surfaces shall be rubbed down in such a manner, approved by the Engineer, as will leave a smooth and even surface, the object in view being to obtain a generally smooth finished surface with uniformity in color.

Impervious to Water.

Section 189. It is intended to obtain concrete impervious to water; the concrete shall be mixed and deposited with this end in view, and on the roof of the Railroad, if waterproofing is not used, the top surface of the concrete shall be carefully troweled as may be directed in order to add to its imperviousness.

Concrete, How Measured and Paid For.

Section 190. Concrete masonry shall be measured in place in the work to the prescribed net lines ordered by the Engineer and shall be paid for at the prices in Schedule Items 6 and 7; which prices are to include the cost of all scaffolding, centres, forms, etc., and removing the same, and all work incidental thereto.

Backing or Filling Concrete, Not Paid For.

Section 191. No concrete backing or filling outside of the ordered net lines of excavation will be paid for.

(For Concrete in Sewers, see Sewers.)

13—BRICK MASONRY.

Quality.

Section 192. Bricks for masonry shall be of the best quality common bricks, burned hard entirely through, regular and uniform in shape and size and of compact texture.

Hollow Terra Cotta Blocks.

Section 193. Hollow terra cotta blocks or bricks may be required in station work, on the outside of walls of the structure or at such other places as the Engineer may direct. They shall be of the best porous terra cotta as approved by the Engineer, and shall be laid in such manner as hereinafter specified or as the Engineer may direct.

How Laid.

Section 194. All brick masonry shall be laid in mortar of the quality above described, except that in exposed locations coloring matter may be added, if required by the Engineer. The bricks shall be laid to line with joints in the face work (except in stations) not exceeding one-quarter (¼) of an inch in the beds, and three-eighths (⅜) of an inch on ends; the bricks to be thoroughly wet before laying and to be completely embedded in mortar under the bottom and on the sides and ends at one operation, care being taken to have every joint full of mortar.

All exterior surfaces shall be smooth and regular.

Cleaned.

Section 195. The inside faces of all arches and other exposed parts shall have all the mortar scraped off and washed clean immediately after the centres have been struck, and shall be pointed and left in neat condition.

No "Bats" or Culls.

Section 196. All bricks of whatever nature shall be carefully culled and, if necessary, gauged before laying, at the expense of the Contractor. No "bats" shall be used except in large masses of brickwork, where a moderate proportion, to be determined by the Engineer, may be used, but nothing smaller than half bricks.

Racked or Toothed.

Section 197. All unfinished work shall be racked or toothed, as directed by the Engineer, and before new work is joined to it the faces of the brick in the old work must be scraped entirely clean, scrubbed with a stiff brush and be well moistened.

Special Bricks.

Section 198. Where necessary to make a neat joint in connection with steel framework, or at corners, curves, or other similar places, special bricks of proper shape shall be furnished and used. All centres and forms shall be made to fit the curves of the work; they shall be put up and removed in a manner satisfactory to the Engineer.

Measurements and Payments.

Section 199. Brick masonry shall be measured to the lines indicated and shown on the plans and as ordered by the Engineer and shall be paid for as herein stipulated in Schedule Item 9, for common brick masonry, and Item 10 for hollow terra cotta brick or tile masonry; these prices are to include the cost of all scaffolding, forms, centres, etc., and the removal of the same, of all plastering and pointing, and of all other work incidental thereto.

14—STONE MASONRY.

Rubble Stone Masonry, Where Used.

Section 200. Rubble stone masonry will be used for supporting the street railroads over the roof of the Railroad where permanent supports are required, or at such other places as the Engineer may require.

How Laid.

Section 201. Rubble stone masonry shall be made of sound, clean stone of suitable size, quality and shape for the work in hand and shall be laid in mortar mixed in the proportion of one (1) part of cement to three (3) parts of sand. All beds and joints shall be well filled with mortar and the work must be thoroughly bonded.

Measurements and Payments.

Section 202. Rubble stone masonry shall be measured in place in the work and to the lines ordered by the Engineer, and it shall be paid for as herein stipulated under Schedule Item 8.

Other Masonry.

Section 203. In case, during the progress of the work, stone masonry of a different class than that specified above shall become necessary and shall be required by the Engineer, the same shall be constructed according to specifications applicable to the best work of such class, and it shall be paid for as provided in Article 12 of the contract.

15—WATERPROOFING.

General Limits of Waterproofing.

Section 204. In general, waterproofing of the structure will be limited to the roof and sidewalls at the stations, and to those surfaces near ground water or mean high water if ground water level is found for any reason to be below mean high water. At other places free drainage shall be provided by pipe drains, hollow tile or broken stone.

Protecting Masonry.

Section 205. The protecting masonry shall be hollow terra cotta blocks, common brick or concrete, laid and paid for as herein elsewhere provided, and shall not be less than four inches in thickness.

Laid Against Sheeting.

Section 206. In places where permanent sheeting is placed at the waterproofing line, the waterproofing, if permitted by the Engineer, may be applied against the sheeting.

Surfaces to be Made Smooth.

Section 207. All surfaces to which waterproofing is to be applied shall be made as smooth as possible; on these surfaces there shall be spread either hot melted pitch or asphaltum in a thick layer of uniform thickness; on this layer of pitch or asphaltum shall be laid a treated woven fabric of such material as may be approved by the Engineer; this process shall be repeated until such number of layers as may be required by the Engineer have been placed and a final coat of pitch or asphaltum shall then be applied.

Definition of Term "Ply."

Section 208. The term "ply" as used in these specifications shall mean a layer of treated woven fabric, both sides of which shall be coated with pitch or asphaltum at the time of laying.

Number of "Ply."

Section 209. The number of plies of waterproofing on the sides at stations shall in no case be less than three (3), except as hereinafter provided where brick laid in asphalt mastic is used.

Brick in Asphalt Mastic.

Section 210. Over the roof of the structure within station limits and over the tracks passing through the stations within said limits, also on the sides and bottom of the structure below a line of two (2) feet above ground water, or if ground water is below mean high water level, then two (2) feet above mean high water, one (1) ply of waterproofing, as described above, shall be used with one or more layers of brick laid in asphalt mastic; the number of layers of bricks to be determined by the Engineer.

In any case where brick laid in asphalt mastic is not used, the number of plies shall be as local conditions require and as directed by the Engineer.

Quality of Brick.

Section 211. The quality of brick shall be the same as provided in the specifications under the head of Brick Masonry. The brick shall be properly dried and shall be heated before laying.

Measurements and Payments.

Section 212. Brick in asphalt mastic will be measured in place to the lines ordered by the Engineer, and will be paid for at the price herein stipulated, Schedule Item 16.

Section 213. Six (6) plies of waterproofing may be substituted for brick in asphalt mastic, if approved by the Engineer, and will be paid for as provided for fabric waterproofing.

Asphalt Mastic.

Section 214. Asphalt mastic shall contain one-third (1-3) pure bitumen, the other ingredients to be sand and lime dust or cement, in proportions governed by local requirements and weather conditions.

Leaks Stopped.

Section 215. Any masonry that is found to leak at any time prior to the completion of the work and final acceptance thereof by the Commission shall be cut out and the leak stopped, at the sole expense of the Contractor.

Quality of Pitch.

Section 216. Pitch shall consist of either coal-tar or natural asphalt as the Engineer shall elect; it must be delivered on the work in packages that are plainly marked with the manufacturer's brand, and indicating the grade and quality of the material.

Coal-tar Pitch.

Section 217. The coal-tar pitch shall be straight-run pitch containing not less than twenty-five (25) per centum and not more than thirty-two (32) per centum of free carbon, which will soften at approximately 70° F., and melt at 100° F., being a grade in which distillate oils distilled therefrom shall have a specific gravity of 1.05.

Quality of Asphalt.

Section 218. The asphalt used shall be the best grade of Bermudez, lake or other natural asphalt, subject to the approval of the Engineer, and shall comply with the following requirements:

The asphalt shall contain in its refined state not less than ninety-five (95) per cent. of natural bitumen soluble in rectified carbon bisulphide or in chloroform. The remaining ingredients shall be such as not to exert an injurious effect on the work. Not less than two-thirds (2-3) of the total bitumen shall be soluble in petroleum

naphtha of seventy (70) degrees Baume or in acetone. The asphalt shall not lose more than four (4) per cent. of its weight when maintained for ten (10) hours at a temperature of three hundred (300) degrees Fahrenheit.

Woven Fabric for Waterproofing.

Section 219. The fabric to be used shall be a woven fabric which shall have been treated with pitch or asphaltum before being brought on the work. The fabric and the material used in its treatment shall be approved by the Engineer.

Concrete to Be Dry.

Section 220. All concrete shall be dry before waterproofing is attached. If, in the judgment of the Engineer, it is impracticable to have the concrete dry, then there shall be first laid a layer of the treated fabric, on the upper surface of which is to be spread the first layer of pitch or asphaltum; the said layer of fabric shall then be counted as one of the required plies.

Each layer of pitch or asphaltum fluxed as directed by the Engineer must completely and entirely cover the surface on which it is spread without cracks or blowholes.

Fabric for Waterproofing to Be Carefully Laid.

Section 221. The fabric must be rolled out into the pitch or asphaltum while the latter is still hot, and pressed against it so as to insure its being completely stuck over its entire surface, great care being taken that all joints are well broken by overlapping, and that the ends of the rolls of the bottom layers are carried up on the inside of the layers on the sides, and those of the roof down on the outside of the layers on the sides so as to secure a full lap of at least one (1) foot. Especial care must be taken with this detail.

Section 222. When the finishing layer of concrete is laid over or next to the waterproofing material, care must be taken not to break, tear or injure in any way the outer surface of the pitch or asphaltum.

Skilled Labor to Be Employed.

Section 223. None but competent men, especially skilled in work of this kind, shall be employed to lay the waterproofing.

Measurements and Payments.

Section 224. Measurements will be made on the basis of actual area covered by the number of plies ordered, no account being taken of laps, and the waterproofing will be paid for as herein stipulated, Schedule Item 15.

16—STEEL AND IRON.

Open Hearth Process.

Section 225. Steel shall be made in open hearth furnace.

Chemical and Physical Properties.

Section 226. The chemical and physical properties of finished material shall conform to the following limits:

Properties	Structural Steel.	Carbon Rivet Steel.	Steel Castings.
Phos. (Max.)	.04%	.04%	.05%
Sulph. "	.05%	.04%	.05%
Mn. "	.60%	.60%	.80%
Si. "	.10%	.10%	.35%
Ult. Str.	60000±4000	50000±4000	65000±(Min.)
Yield Point	55% Ult.	55% Ult.	35000±(Min.)
Elongation	$\frac{1500000}{\text{Ult. Str.}}$	$\frac{1500000}{\text{Ult. Str.}}$	20% in 2"
Fracture	Silky.	Silky.	Fine granular.
Cold Bend	180° flat.	180° flat.	120° (d.=3+.)

Yield Point.

Section 227. The yield point shall be that strain, beyond which the elongation ceases to be proportional to the weight imposed, and may be indicated by drop of beam. The speed of testing shall be governed by the inspector.

Finish.

Section 228. Sufficient discard shall be made to insure sound material free from piping or excessive segregation. The material shall be finished straight and smooth, and shall be free from all seams or other defects. Any imperfection which may develop during the progress of the work will be sufficient cause for rejection.

Steel Castings.

Section 229. Steel castings shall be true to pattern and free from injurious imperfections.

Standard Test Pieces.

Section 230. The tensile strength, yield point and ductility of the material shall be determined from a standard test piece of not more than two (2) inches in width, and about one-half (½) square inch in sectional area, cut from a full sized bar, with sides turned or planed parallel so as to give a uniform minimum section for at least nine (9) inches. Whenever practicable the two sides of the test piece shall be left as they come from the rolls, but the finish on opposite sides shall be alike in this respect.

Specimens for Bending.

Section 231. Specimens for bending shall be cut from the material as rolled.

Rivet Rods.

Section 232. Rivet rods shall be tested as rolled.

Steel Castings.

Section 233. For steel castings the test piece shall be turned to a uniform minimum section of one-half (½) inch diameter, for a length of at least two and one-half (2½) inches. Specimens for bending shall be one (1) inch by one-half (½) inch in section.

Ductility Elongation.

Section 234. In determining the ductility, the elongation shall be measured after breaking on an original length as specified, in which length shall occur the curve of reduction each side of the point of fracture.

Where Taken From.

Section 235. For rollers the specimens shall be cut from the finished bar so that the centre of the specimen shall be one inch from the outside of the bar.

Section 236. For steel castings the specimens shall be cut from coupons cast on some portion of a casting from each melt, and shall be annealed with the casting before it is cut off.

Treatment of Test Specimens.

Section 237. The material from which test specimens are cut shall receive the same treatment as the material which it represents in the finished structure.

Number of Tests.

Section 238. At least one tensile and one bending test shall be made from each melt of steel as rolled. In case steel differing three-eighths (⅜) inch or more in thickness is rolled from one melt, a test shall be made from the thickest and from the thinnest material rolled.

Variation in Weight.

Section 239. A variation in weight of any piece of steel of two and one-half (2½) per centum from that specified, shall be sufficient cause for rejection, except in case of sheared plates exceeding one hundred (100) inches in width, where the variation may be five (5) per centum.

Material Marked.

Section 240. Each finished piece of steel shall be marked with the melt number, excepting that bars for reinforcing concrete shall be bundled and the melt number stamped on a metal tag attached to each bundle.

WROUGHT IRON.

Double Rolled.

Section 241. All wrought iron shall be double rolled, and no scrap used in its manufacture. It shall be thoroughly welded in rolling, shall be tough, ductile, and fibrous, and shall be finished straight and smooth. It shall be uniform in quality and free from surface defects.

Method of Testing.

Section 242. The methods specified for testing rolled steel shall apply generally to wrought iron. It shall show by the standard test piece an ultimate strength of fifty thousand (50,000) lbs. per square inch, and a yield point of twenty-six thousand (26,000) lbs. per square inch. It shall bend one hundred and thirty-five (135) degrees with inner radius not to exceed twice the thickness of the piece tested. When nicked and bent the fracture shall show at least ninety (90) per centum fibrous.

CAST IRON.

True to Pattern Tests.

Section 243. All castings shall be true to pattern, out of wind and free from injurious imperfections. They shall be of a good quality of tough gray iron made by the cupola process. Sample test pieces, cylindrical in shape, one and one-quarter (1¼) inches in diameter, and fifteen (15) inches long, cast under the same circumstances as those which attended the casting of the full-sized piece, shall sustain at the centre, when resting upon two dull knife edges twelve (12) inches apart, a load of three thousand (3,000) lbs. with a deflection of at least one-tenth (1/10) of an inch before rupture.

WORKMANSHIP.

Quality.

Section 244 All workmanship shall be first class. All parts exposed to view shall be neatly finished. All nuts on the finished structure shall be hexagonal.

Rods Deformed Sections.

Section 245. Rods and bars to be used for reinforcing concrete shall be deformed as approved by the Engineer; plain bars will not be used.

Bent Rods and Bars.

Section 246. Bent rods and bars and other bent material shall be bent hot and annealed, except that obtuse bends in material less than one square inch section may be made cold when permitted by the Engineer. The bending shall be done before the material is delivered on the work. Except in special cases, all bends shall be made uniformly to template.

Material Straightened in Shop.

Section 247. All material shall be straightened in the shop before being worked in any way.

Holes Accurately Spaced.

Section 248. All holes shall be accurately spaced and punched. Unfair holes shall be reamed to exact match; drifting to enlarge the holes will not be allowed. Poor matching of holes will be cause for rejection.

Size of Punch.

Section 249. In punching, the diameter of the punch shall not exceed by more than one-sixteenth (1/16) of an inch, the diameter of the rivet to be used, and the diameter of the die shall be as small as may be required to punch a clean hole. When the materials to be sub-punched and reamed, a punch of diameter three-sixteenths (3/16) of an inch smaller than specified above shall be used, and all reaming shall be done after the material is assembled, with twist drills of one-sixteenth (1/16) of an inch greater diameter than the rivet to be used.

Sub-punching and Drilling.

Section 250. All material over seven-eighths (⅞) of an inch thick shall be drilled from the solid. Material over five-eighths (⅝) of an inch and not exceeding seven-eighths (⅞) of an inch in thickness shall be sub-punched and reamed. All other material may be direct punched.

Sheared Edges.

Section 251. Sheared edges of material exceeding five-eighths (⅝) of an inch in thickness, to be used in main members shall be planed at least one-eighth (⅛) of an inch.

Burrs Removed.

Section 252. All burrs shall be removed, and the members shall have all parts firmly drawn together with bolts before reaming or riveting is commenced.

Riveting.

Section 253. Rivets when driven shall completely fill the holes, and shall be machine driven wherever possible. They shall have full concentric heads or they shall

be countersunk when so required. Rivet heads shall not be flattened to less than half the diameter of the rivet on the line of the shank unless countersunk.

Use of Bolts.

Section 254. Generally the use of bolts instead of rivets will not be permitted, but when used in special cases the holes shall be reamed parallel, and the bolts turned to a driving fit.

Templates.

Section 255. All holes for field rivets, excepting those in connections of lateral and sway bracing, shall be sub-punched and accurately drilled to an iron template, or reamed and match marked while the connecting parts are temporarily assembled in the shop. In case of splices of upper chords or other compression members, the abutting members shall be brought to a forcible contact.

Finished Members.

Section 256. Finished members shall be true and free from kinks, twists, or open joints. Ends of floor beams and stringers shall be finished square and true.

Rods Upset.

Section 257. Rods and bars which are to receive a thread shall be properly upset. Where threads are cut on steel, they shall be properly filleted.

Annealing.

Section 258. Steel, except in minor details, which has been partially heated, shall be properly annealed. All steel castings shall be annealed.

Abutting Surfaces Faced.

Section 259. All abutting surfaces, except flanges of plate girders, shall be neatly planed or faced perpendicular to the direction of the strain, so as to insure even bearings.

Stiffeners.

Section 260. Stiffeners of plate girders shall fit neatly against the flange angles. Web splice plates and fillers under stiffeners shall be cut to fit within one-eighth (⅛) of an inch of flange angles.

Pins and Rollers.

Section 261. Pins and rollers shall be turned accurately to a gauge, and shall be of full size throughout. All pin-holes shall be bored truly and at right angles to the axes of the members to be connected, and shall fit the pins with a play not exceeding one thirty-second (1/32) of an inch.

Bed Plates Planed.

Section 262. Bed plates shall be planed. The bottom of the shoes shall be planed exactly parallel to the centre line unless otherwise shown. The cutting of the planing tool shall be in the direction of expansion.

Details Boxed.

Section 263. Nuts, bolts, rivets and other details shall be boxed.

Weight Marked.

Section 264. The weight of every piece and box shall be plainly marked upon it.

Inspection.

Section 265. Free access and information shall be given by the Contractor for a thorough inspection of material and workmanship, with proper office facilities.

Mill Orders in Triplicate.

Section 266. The Engineer shall be furnished copies in triplicate of all mill orders, and no material shall be rolled nor work done before the Engineer has been notified so that he may arrange for the Inspector.

Contractor Responsible.

Section 267. The Inspector shall make detailed reports of his inspection to the Engineer and may notify the Contractor of any defects in the material or workmanship, but all acceptances made by him shall be considered temporary, and his inspection shall in no way relieve the Contractor of full responsibility for the character and accuracy of the work until its completion and final acceptance by the Engineer.

Errors in Plans.

Section 268. The Contractor shall be responsible for all errors which can be discovered by checking or examining the plans.

Chemical Analysis.

Section 269. Chemical determination of the percentage of carbon, phosphorus, sulphur and manganese shall be made by the manufacturer from a test ingot, so taken, during the casting of each melt of steel, as to fairly represent the melt. Two copies of such analysis shall be furnished to the Engineer or his Inspector.

Check Analysis.

Section 270. Check analysis shall be made, at the discretion of the Engineer, of the finished material, on drillings from pieces selected by the Inspector from parts suspected of being most highly segregated. These analyses shall not show a variation above the ladle analysis of more than twenty-five (25) per centum for phosphorus, nor more than fifty (50) per centum for sulphur. The analyses shall be made by a chemist designated by the Engineer.

Contractor to Make Tests.

Section 271. The Contractor shall furnish, without extra charge, such standard test pieces as may be necessary to determine the uniform quality of the material and also the use of a reliable testing machine, with necessary labor for testing.

Inspector's Office.

Section 272. The Contractor shall furnish for the use of the Inspector a suitably equipped office at the mills and at the shops.

Loading and Shipping.

Section 273. All parts shall be carefully loaded and protected from injuries during transportation by such means as will be satisfactory to the Inspector. After delivery of materials at the work the Contractor will be required to store the same on skids at least twelve (12) inches above the ground and to keep the same in good condition. Any piece showing injurious effects of rough handling at any stage until the final acceptance of the work may be rejected.

Payments for Steel and Cast Iron.

Section 274. The prices to be paid for steel and cast iron are as herein provided in Schedule Items 19, 20, 21, 22, 23 and 24. These prices include the cost of material delivered and erected in the work, with the exception of Item 23, the placing of which is provided for in Item 22. These prices are to include also the cost of all necessary cleaning and painting (where painting is required) and of all other incidental work. The quantity of metal to be paid for shall be the number of pounds actually placed in accordance with the drawings or orders.

Miscellaneous Castings.

Section 275. For other castings, not included in the above and not including castings for sewer work or pipes, payment will be made as provided in Schedule Item 25.

Wire Mesh.

Section 276. Wire mesh, of a character and weight to be approved by the Engineer, is to be furnished and placed around the lower flanges of the roof girders, and at other places as may be required, in order to hold the concrete in place.

Wire Mesh, Payment For.

Section 277. Wire mesh, wherever used, will be paid for as stipulated in Schedule Item 26, which price is to include the material in place and all work necessary and incidental thereto.

17—Painting.

Section 278. All metal work, excepting as otherwise herein provided, shall be painted with three coats of paint, including the shop coat, of kind and quality approved by the Engineer. Lead or carbon paint will generally be required.

Shop Coat.

Section 279. All iron shall be scraped free from scale, and receive one coat of red lead paint as herein specified before leaving the shops. All surfaces which come

in contact or are enclosed shall be painted before being assembled. All turned or faced surfaces shall receive a coat of white lead and tallow before leaving the shops.

Quality of Red Lead.

Section 280. The red lead shall be strictly pure, and shall contain at least 80 per cent. of "true lead" ($Pb_3 O_4$). The color shall be a clean, pure tint. The red lead shall be of the fineness that when washed with water through a No. 19 silk bolting cloth, not more than 1 per cent. shall be left on the screen.

Quality of Linseed Oil.

Section 281. The linseed oil must be absolutely pure, fully aged and ripened, well settled oil. It shall be perfectly clear on receipt, and after heating to 212° Fahr. on a current of hydrogen, shall not show a deposit of foots nor a loss of over 0.4 per cent. for raw oil, nor over 0.2 per cent. for boiled oil. The specific gravity at 60° Fahr. for raw oil shall be between 0.932 and 0.937, and for boiled oil between 0.936 and 0.940.

Original Packages.

Section 282. All material shall be delivered, inspected and sampled in original packages.

Proportions in Mixture.

Section 283. Red lead paint shall be mixed in the proportion of 500 pounds of red lead to 5½ gallons of boiled linseed oil, and 11 gallons of raw linseed oil.

Damaged Shop Coat to be Renewed.

Section 284. Where the shop coat has become damaged before or after erection, through any cause whatever, it shall be renewed with the same kind of paint as originally used, such renewal to be considered only as a part of the original shop coat. If the Engineer so directs, on members or parts of members buried in concrete the shop coat will be omitted.

Structural Steel and Rods.

Section 285. Structural steel and rods to be embedded in concrete shall be protected from the weather before being put in place, and shall be cleaned and scales removed but not painted before being incased in the concrete.

Second Coat Carbon Paint.

Section 286. The second coat of paint shall be a carbon paint approved by the Engineer. It shall be applied after erection, but not until the metal has been cleaned from dirt or other objectionable matter that may be found thereon.

Metal to be Cleaned After Erection.

Section 287. After erection the metal shall be thoroughly cleaned of all dirt, rust or scales by stiff wire brushes or sand blasts, as directed, and afterward dusted and thoroughly and evenly painted as described above. No paint shall be applied until the cleaning has been passed upon by an Inspector.

Section 288. Between stations the exposed members shall be given a third coat, which shall be a carbon paint of a color and quality approved by the Engineer.

Third Coat, When Applied.

Section 289. The third or finishing coat shall be applied to all exposed surfaces of the metal after its erection, and after a completion of the masonry or other work; it shall be applied at such time after such completion and before the final acceptance of the work as in the judgment of the Engineer may be advisable. The several field coats shall be sufficiently tinted to be distinctive.

Surfaces in Contact.

Section 290. Surfaces of exposed members inaccessible after erecting, shall be cleaned and painted before erecting.

Recesses, etc.

Section 291. All recesses that might contain water, or through which water could enter, must be filled with thick paint or a waterproof cement of ground skins before receiving final painting.

Section 292. All surfaces so close together as to prevent the insertion of a brush, must be painted thoroughly by using a piece of cloth. if necessary.

Rainy or Freezing Weather.

Section 293. No painting in rainy or freezing weather or on wet surfaces will be permitted.

Payments.

Section 294. Payment for painting is included in the prices for steel and iron.

18—DUCTS AND CONDUITS.

Vitrified Ducts—Quality and Size.

Section 295. The ducts to contain cables for transmitting electricity shall be manufactured of the best clay, thoroughly mixed, burnt and vitrified, sound in all respects, straight and free from soft spots, stones, cracks or blisters liable to impair their strength or durability; in lengths generally of from eighteen (18) to thirty-six (36) inches, shorter lengths shall only be used as directed; generally in four-way form with circular holes, the least diameter to be three and one-half (3½) inches; one, two or three-way ducts shall be used in special cases as determined by the Engineer. The interior surface of the holes to be smooth and clear of warts, tits, pits or blisters, which may tend to injure the electric cable in pulling the same through the duct. The ends to be cut smooth and at right angles to the axis of the duct and beveled on inside for three-quarters (¾) of an inch.

Thickness of Ducts.

Section 296. The outside walls and webs of four-way ducts to be three-quarters (¾) of an inch thick; the outside dimensions of ducts to be not less than nine and one-quarter (9¼) nor more than ten (10) inches, and constructed square on outer lines; the dimensions of single, two-way or three-way ducts shall be consistent with the above.

Ends Combed.

Section 297. The ends of ducts to be combed with two (2) sets of three (3) combings each, each combing to have a width of one-quarter (¼) of an inch and a depth of one-sixteenth (1/16) of an inch.

Glaze.

Section 298. The inside and outside of ducts to be thoroughly glazed in the most approved manner with good salt glaze.

Inspection.

Section 299. All ducts to be subject to inspection, both at the place of manufacture and on the work. All rejected ducts to be promptly removed by the Contractor at his expense.

How Laid.

Section 300. The ducts shall be laid in beds of cement mortar about one-quarter (¼) of an inch in thickness, with broken joints and with full bearing. Two (2) strips of thick unbleached muslin six (6) inches wide, and coated with neat cement mortar, shall be used to wrap each joint, the ends of the wrap to lap six (6) inches. The muslin shall be not less than 56 by 60 count, weight not less than four (4) ounces to the yard and width thirty-six (36) inches. In laying the ducts care must be taken to close abutting joints so that practically the end of ducts shall be in contact on all sides. Where ducts are laid on curves, the wraps must be doubled if required, to protect the openings between the ends of the ducts on the outer line of the duct and to exclude all mortar from duct openings.

Mandrels.

Section 301. The ducts shall be laid with a linked mandrel of the length and diameter to be prescribed, the same accurately fitting the duct openings, the mandrel to be left in each duct until the next succeeding duct is laid.

Dowel Pins.

Section 302. The ducts shall be laid with dowel pins, at least two pins on the opposite sides horizontally.

Laid to Line.

Section 303. The ducts shall be so laid that the centre of the holes shall be true to line and grade.

To be Rodded.

Section 304. After the ducts are laid, and sufficient time is given to allow the mortar in beds to partially set, they shall be rodded; all mortar or other foreign matter must be cleaned from the duct openings, leaving a clear and smooth opening.

If obstructions are found in rodding the ducts which cannot be removed by cleaners, so as to give a clear and smooth opening of three and one-half (3½) inches in all duct openings, the ducts shall be removed and relaid; all ducts, during construction and after being rodded, shall be plugged with suitable plugs, to be furnished by the Contractor. If wooden plugs are used they shall be immersed in water for at least eight (8) hours before being put in place.

Measurement and Payment for Vitrified Ducts.

Section 305. Tunnel ducts shall be paid for per duct foot in place at the price herein stipulated for tunnel ducts, Schedule Item 18, which price shall include the cost of furnishing, laying, rodding and all the material and work incidental thereto. The tunnel ducts to be provided under Schedule Item 18, shall include only those intended solely for the purpose of the operation of the Railroad.

Duct Manholes.

Section 306. Duct manholes shall be built at the sides of the railroad in connection therewith and as indicated on the plans. These manholes shall be generally at intervals of about three hundred feet, and shall be on either or both sides of the Railroad, as necessary, in accordance with the location of the duct lines. They may vary in form as may be necessary to accommodate the work to local conditions.

Duct Manholes at Stations.

Section 307. Duct manholes will be built at the ends of the stations to provide for the passage of the ducts under the station platforms, and if found necessary on account of the lengths of stations, additional manholes will be constructed under the platforms.

Section 308. At manholes the ducts will be laid to conform to the special conditions.

Section 309. In all work where iron pipe or fibre conduits are installed for a part of their length in the structure and for another part as open construction, the ends of such runs shall be carried outside of said structure as open construction and shall terminate in outlet or junction boxes located by the Engineer.

Section 310. The iron pipe or fibre conduits required by section 309 will be built mainly in the walls, roofs or other parts of the stations; portions, however, of the runs will be left exposed, to be covered later by the station finish work.

Quality of Iron Pipe Conduit.

Section 311. All iron conduit used for any purpose in connection with the work herein shall be of the best grade (Galvaduct or equal), standard weight wrought iron or steel piping, protected inside and out by a coat of zinc or enamel. It shall be delivered to the work in bundles of full length pipes, each length marked with the trade-mark of the manufacturer. It shall bend cold 90 degrees about a radius equal to ten diameters without signs of flaw or fracture in either pipe or enamel.

Installation.

Section 312. All conduit shall be carefully cleaned before and after erection, and all ends shall be reamed free from burrs, and inside surfaces shall be free from all imperfections liable to injure the cable.

Joints Watertight.

Section 313. All joints shall be made with standard couplings, well treated with red lead, and screwed up to make a watertight job.

Fibre Conduits, Quality, Laying, etc.

Section 314. All fibre conduit shall be made of impregnated fibre equal to that manufactured by the Fibre Conduit Company of Orangeburg, New York.

It shall be of uniform thickness, having walls of not less than one-quarter (¼) inch and true cylindrical holes not less than two (2) inches in diameter. Lengths shall be not less than five (5) feet, and all ends shall be finished.

All joints shall be made by suitable finished sleeves fitting closely over the ends of the conduit and made watertight by making up with an approved bituminous compound.

After laying, all ducts shall provide a clear, true opening, free from obstructions and imperfections in any way injurious to the wires to be installed. All ducts shall be rodded and cleaned with an approved mandrel not less than one and three-quarter (1¾) inches in diameter and eighteen (18) inches long.

Built in Concrete, etc.

Section 315. Conduits built into concrete or other parts of the structure shall be properly protected and supported, so that the same shall not be injured by the building operations.

Not Built in Concrete.

Section 316. Conduit not built into the structure shall be supported by approved pipe straps located not more than eight feet apart, or in any other manner designated by the Engineer, and they shall be kept boxed or otherwise suitably protected from injury.

Bends and Offsets.

Section 317. Bends and offsets may be made in the field if proper tools are used, but in no case shall deformed, split or crushed conduit be erected. Not more than two right angle bends shall be made between any two outlet boxes without special approval of the Engineer.

Measurement and Payment.

Section 318. Measurements for the above iron pipe or fibre conduits shall be per linear foot of single conduit placed in the work—in accordance with the requirements—and payment for the same shall be as herein stipulated in Schedule Item 32.

Outlet and Pull Boxes and Payment for Same.

Section 319. All outlet and pull boxes shall be made of cast iron, with openings threaded for the conduit ends, and conduits shall be screwed into these openings and made up with red lead to effect a watertight joint. Covers shall be of cast iron and watertight, and no other boxes or covers shall be used except under special permission of the Engineer. The price for each cast iron outlet box furnished and placed in the work shall be as herein stipulated in Schedule Item 33.

19—DRAINS AND PUMPS.

Railroad to be Drained.

Section 320. Every part of the Railroad, the stations and appurtenances connected therewith, must be arranged so far as possible that any water finding access thereto will be led away automatically to the City sewers.

Section 321. Where the Railroad is on an inclined gradient, and is constructed in dry, porous soil, the floor of the Railroad may be depended on to act as a conduit. At the bottom of the inclined gradient connections must be made with a sewer or with subdrains lying beneath the Railroad and draining into the sewers.

Subdrains.

Section 322. Along such parts of the work where the soil is not porous, or where the floor of the Railroad cannot, in the judgment of the Engineer, be used as a conduit, there shall be laid, beneath the rail level and on a continuous descending gradient, drain pipes of vitrified salt-glazed stoneware, of the quality described in these specifications for sewer pipe. These drain pipes shall be of such diameter not exceeding fifteen (15) inches, as the Engineer may direct, and there shall be one (1) such drain for each two (2) tracks. Each drain shall be laid in the concrete or directly in the soil with tight or open joints, as directed, and in such manner and in such position as, in the opinion of the Engineer, local circumstances require.

Connections and Cross Drains.

Section 323. Where drain pipes connect with the City sewers, the junction shall be protected by suitable traps, and back-pressure valves or gate valves where necessary, to prevent back rush of water or gas from the sewers. Connections with the Railroad shall be as necessity demands and all as directed by the Engineer. Cross drains to connect with the main drains will be placed at such places and in such manner as the Engineer shall direct; also vertical drains at the sides of the Railroad. These drains shall be of vitrified pipe or of cast iron. as directed.

Broken Stone for Drainage.

Section 324. On the roof of the Railroad and at other points as may be directed or indicated on the plans, broken stone shall be placed for the purposes of drainage.

Sumps.

Section 325. At the low points of the grade of the Railroad where the same passes below the bottom of adjacent sewers there shall be constructed sumps connected with the subdrains or the floor of the Railroad. Such sumps must be watertight, with a capacity of not less than eight hundred (800) gallons each.

Pumps for Tunnel Drainage.

Section 326. Adjacent to each sump a suitable enclosure shall be provided in which two pumps shall be installed, each of which shall have ample capacity to remove all the water entering the sump at that point under ordinary conditions. These pumps shall each have a separate source of power, and shall be arranged to operate antomatically. Under this contract the Contractor will only furnish the pump or pumps required and set them in place as directed, including the necessary pipe and drainage connections between the sumps and sewers.

The pumps shall be of the capacity required by the Engineer.

Capacity.

Section 327. If in the opinion of the Engineer the service requires it, each of these pumps shall be able to remove from the sump eight hundred gallons per minute.

Delivery to Sewers, etc.

Section 328. The delivery of such pumps shall be into the City sewers, and all piping, valves, etc., in connection therewith, shall be installed as a part of this contract.

Payment for Drains, Broken Stone, Pumps, etc.

Section 329. All drains shall be measured in place and the actual net length as laid for each class of drain will be paid for as herein provided in Schedule Item 17. The prices therein provided for each class of pipe will include providing and laying the pipe and all specials of any nature whatsoever such as bends, tees, wyes, handholes, etc., and all materials necessary for jointing the same. Where back-pressure valves or gate valves are required the cost of setting the same will be included in the above, but the Contractor will be paid in addition the actual net cost of such valves plus ten (10) per cent.

Section 330. For broken stone for drainage, furnished and placed, Section 324, payment will be made as provided in Schedule Item 14.

Section 331. For pumps, Section 326, the Contractor will be paid as provided in Article XII. of the contract, not including, however, the pipe connections with sumps and sewers which pipe will be paid for as hereinbefore provided in Schedule Item 17.

Soil Pipes for Stations.

Section 332. It will be necessary to lay soil pipes in the floors and walls of the stations. These pipes are to be cast iron, "extra heavy." They will be placed in positions as shown on the plans and will be paid for as provided in Schedule Item 34.

20—SEWERS.

In Accordance With Plans and Specifications.

Section 333. All sewers and appurtenances shall be built of the materials, of the sizes and dimensions, on the lines and grades, at the depths, with the connections, and in the manner called for by these specifications and shown on the drawings.

Change of Location.

Section 334. If in the opinion of the Engineer, it is impracticable during the progress of the work to construct any sewers, manholes, or other appurtenances, according to the contract drawings, owing to the presence of unknown subsurface structures or other contingencies, the Contractor shall construct such sewers, manholes or appurtenances in the location given by and according to the directions of the Engineer.

General Clauses Apply.

Section 335. The general clauses in this contract relating to excavation, both in open trench and tunnel, backfilling, cement, mortar, masonry, waterproofing, piling, timber work of all kinds, care of streets and public places, maintenance of surface and subsurface structures, protection of persons and property, repaving or restoring of the surface of the street or other public places, responsibility of the Contractor, authority of the Engineer to examine and condemn materials, and the power of the Commission and the Engineer in all or any other respects to enforce this contract, apply to the construction and reconstruction of sewers, water mains or pavements, unless specifically amended or exempted, both along the route occupied by the Railroad and elsewhere.

No Claims for Damages.

Section 336. Should postponement or delay be occasioned by the precedence of paving or other contracts, which may be either let or executed by the Borough President, Commissioner of Water Supply, Gas and Electricity, or other heads of

departments, either before or after the execution of this contract, on the line of the work, no claims for damages therefor shall be made or allowed; nor shall any claim for damages be made or allowed in consequence of the street or the adjoining sewers not being in the condition contemplated by the parties at the time of making the contract, except that if the Contractor shall be delayed in the performance of his work by reason of the street or the adjoining sewers not being in such condition, an allowance of time may be given for the completion of the work as elsewhere provided in this contract.

Size of Trenches.

Section 337. The trenches for sewers and basin culverts both in earth and in rock, in streets along the route of the Railroad, shall have vertical sides and shall be not less than six inches wider than the greatest external width of the sewer or its foundation on the side farthest away from the subway; and in other streets the trenches shall have vertical sides, and shall be not less than six inches wider on each side than the greatest external diameter of the sewer, but shall be not less than three feet in width. They shall be excavated to the depth and to the form of the sewer or its foundation.

Limit of Trench Opening.

Section 338. Not more than one hundred (100) feet of trench in sewers off the line of the railroad shall be opened at any one time in advance of the sewer already completed, unless by permission of the Engineer, and for a distance specified.

Excavation Completed in Advance.

Section 339. The excavation of trenches shall be fully completed a sufficient distance in advance of the laying of the sewer, and the exposed end of the sewer shall in all cases be fully protected.

Trenches for Manholes and Receiving Basins.

Section 340. Where the foundation for a manhole or a receiving basin extends beyond the line of such manhole or receiving basin, the minimum excavation required in earth shall be to the lines of the smallest rectangle, enclosing the full dimensions of the exterior of the foundation, and shall have vertical sides to the surface, but it shall, in all cases, be not less than six inches larger than the greatest external dimension of the manhole or receiving basin. In rock excavation, the trench shall be six inches larger than the greatest external dimension of the manhole or receiving basin, or its foundation, and shall have vertical sides to the surface.

Foundations.

Section 341. Where the ground does not afford a sufficiently solid foundation, the trench shall be excavated to such increased depth as the Engineer may deem necessary, and this extra depth, and all other irregularities in the bottom of the trench, shall be filled up to the required level and form, with such material, and in such manner, as the Engineer shall direct. If so directed, piles shall be driven and a timber or reinforced concrete foundation shall be constructed, as elsewhere provided in these specifications, to support the sewer.

Inspection of Grades.

Section 342. When the trench is properly prepared, and before laying any sewer, the Contractor shall notify the Engineer, who will, thereupon, cause the grades for the sewer to be tested, and if correct the sewer shall then be laid in the presence of a duly authorized inspector, and no construction work shall be done in his absence.

Trenches to be Kept Free from Water.

Section 343. The trenches shall be kept entirely free from water while the foundation and the masonry are being constructed or the sewer laid. In no case shall water be allowed to flow over the invert or foundation or through the sewer until the mortar is thoroughly set.

Tunneling.

Section 344. When tunneling for sewers shall be deemed advisable, it shall be done in a manner approved by the Engineer.

Gutter and Passageway to be Kept Open.

Section 345. At all times, gutters shall be kept open for surface drainage, and the streets and sidewalks shall be kept clear and free for the passage of carts, wagons, carriages and street or steam railroad cars or pedestrians, and as otherwise provided in these specifications.

Crosswalk, Sidewalk and Roadway to be Kept Clear.

Section 346. Where any crosswalk or roadway is cut by the trench, it shall be temporarily replaced by a timber bridge with side railings, according to the direction and approval of the Engineer. The work shall at all times be conducted so as to cause as little inconvenience as practicable to the public.

Disposition of Paving Material.

Section 347. All curb, gutter, flagging, paving and macadam stones, necessary to be removed, which in the judgment of the Engineer are suitable to be used again, shall be stored in such places as the Engineer shall direct, or shall be removed as provided in these specifications; in all cases a passageway on the sidewalks and in the roadway shall be preserved free from needless obstructions.

Flow of Sewers to be Maintained.

Section 348. The Contractor shall provide for the flow of all sewers, drains and watercourses, interrupted during the progress of the work, and shall restore and make good all connections, and shall immediately cart away all offensive matter, in such manner and with such precautions as the Engineer may direct. All temporary house connections shall be made by closed iron pipes, with suitable provision for preventing leakage at joints. Wooden troughs for such connections will not be permitted.

Brick.

Section 349. In the construction of brick masonry none but the best quality of common brick burned hard entirely through, regular and uniform in shape and size and of compact texture, shall be used. They shall be culled as they are brought on the ground, and bats and bricks of improper quality are to be removed from the work. A limited number of bats may be used in manholes and closures, and in the outer ring of the sewers where more than two rings of bricks are required.

How Laid.

Section 350. The bricks shall be properly wet immediately before laying. Every brick is required to be laid in a full joint of mortar, made as described in these specifications, on its bed, end and side, at one operation. In no case is mortar to be slushed or grouted in afterward. The bricks shall be neatly and truly laid, every second course to line, and the points to be carefully struck on the inside.

Racked Back or Toothed.

Section 351. All brick work, as it progresses, shall be racked back in courses, and in no case will it be allowed to be toothed, unless by special permission from the Engineer.

Back or Stone Inverts.

Section 352. All inverts, or bottom curves, shall be formed from profiles accurately made according to the dimensions of the sewer, and correctly set according to the grades furnished. The masonry shall be allowed to set for twenty-four (24) hours before the arch is turned. Vitrified brick or granite paving blocks shall be used for the inner ring of the invert when required by the Engineer, and whenever so used they must be thoroughly jointed, so as to be watertight along the inner surface of the sewer. The last course of the invert masonry below the springing line shall be laid as headers.

Brick Arches.

Section 353. The arches or upper curves shall be formed on strong centres of correct form, according to the sizes and shapes required, and keyed with stretchers in full joints of mortar. The extrados of the arch shall be plastered with mortar one inch thick, mixed in the proportion of one part of cement to two parts of sand. The centres shall not be removed or withdrawn in less than thirty-six hours, or until the work is thoroughly set, and until the filling in of the arch is properly put into place to a depth which is at least one foot above the crown of the arch. The centres in all cases shall be struck and not drawn, so as not to crack or injure the work. Should any crack or settlement appear in the arch after the centres are removed, so much of the work as the Engineer may require shall be taken down immediately and replaced.

Spurs.

Section 354. Vitrified or iron sewer pipes or spurs, equal in every respect to those described elsewhere in these specifications, and of a size required by the Engineer, but not less than six inches interior diameter with hubs moulded for house connections, and of sufficient length to project at least four inches beyond the exterior of the

sewer, shall be built into the walls of brick sewers and at such an angle as indicated on the plan, or as the Engineer may direct.

How Built In.

Section 355. Spurs shall be built in wherever similar house connections exist in the present sewer which is to be reconstructed under this contract, but in no case shall the distance be more than twenty feet between spurs. In the case of the construction of new sewers where no sewers existed previously, except sewers under public parks or those crossing intersecting streets, they shall be built opposite each house, and where there are no houses, they shall be not more than fifteen feet apart on each side of the sewer or at such frequent intervals as local conditions may require. They shall be set so that their inner ends shall be flush with the inner face of the sewer, at such height in the walls as the Engineer may direct, and each pipe shall be sealed on the outside with an approved earthenware cover set in mortar.

Iron Chair Spurs.

Section 356. Where the sewers to be built under this contract will be at a depth greater than thirteen feet below the established grade of the street (or below the surface of the street where final grades have not been established), cast iron chair spurs, of the design shown on the drawings, not less than six inches in diameter and of the weight of extra heavy soil pipe, shall be used unless otherwise ordered by the Engineer. Where house drains are to be connected to these spurs, extra heavy soil pipe and fittings shall be used for the riser between the spur and the house drain. Where the spurs are provided for future connections, risers of extra heavy soil pipe shall be placed in each spur and shall be brought to a point thirteen feet below the established grade of the street, the end of which shall be sealed with an approved cover laid in cement mortar. The joints of this pipe shall be packed, leaded and caulked in accordance with these specifications for laying water mains.

Under Station Platforms.

Section 357. Wherever the sewer passes under a station platform or other structure, extra heavy soil pipe shall be laid from the spur to the outside of such station or other structure, brought up to a point thirteen feet below the established grade of the street, caulked and sealed, as provided above. All pipes passing under such structures shall be laid in concrete.

Concrete Sewers, Form, Dimensions and Materials.

Section 358. If, during the construction of the sewers, it is deemed advisable to interchange concrete and brick, the Contractor may, with the approval of the Engineer, build such sewers of either kind and quality herein specified.

Steel Bars Used if Ordered.

Section 359. Concrete sewers shall be reinforced with steel bars, if so indicated on the plans or directed by the Engineer.

Profiles and Inverted Centres for Inverts.

Section 360. Proper profiles for the concrete inverts shall be set up at the required distances, and the concrete for the bottom and invert of the sewer shall be deposited in place and rammed and worked down to the required shape. The concrete for the bottom and invert, if so directed, shall be placed in alternate lengths extending between every other pair of profiles, so that opportunity may be given to properly work the concrete in place.

Invert to be Protected.

Section 361. The concrete of the invert shall be protected during the progress of the work with planking, or by such other suitable methods as the Engineer shall direct and for so long a time as he may require.

Forms, Moulds, etc.

Section 362. Suitable forms or moulds, of the size and design to be approved by the Engineer, shall be provided by the Contractor to support the concrete of the side walls and roof while the same is being rammed into the permanent work.

Defective Work.

Section 363. If any voids, or irregular or defective work is discovered upon removing the forms or moulds, such voids or work shall be cut out and filled with a rich concrete or mortar mixed in such proportions and of such materials as provided elsewhere in these specifications.

Joints.

Section 364. No joints between different sections of the walls of a sewer shall, in any case, be a straight line, but shall always be stepped or toothed, so as to give a broken joint in the manner to be approved by the Engineer.

Spur Pipes, Branches, etc.

Section 365. In so far as they will be applicable to sewers constructed of concrete, the provisions and requirements for spurs, branches, etc., in brick sewers shall be understood to govern in such construction.

Vitrified Pipe Sewers—Quality of Pipe.

Section 366. Pipe sewers shall be built of vitrified, salt glazed stoneware pipe, with or without hub, as the Engineer may direct. The pipe shall be of the best quality, thoroughly and perfectly burnt, without warps, cracks or imperfections, well and smoothly glazed over the entire inner and outer surfaces and perfect in shape. The pipe shall be subject to all tests ordered in conformity with any requirements of the Bureau of Sewers, at any time previous to its being used.

Thickness.

Section 367. The size of the pipes shall be designated by their interior diameters. Each pipe shall be a true cylinder, and of even thickness throughout, according to the following schedule:

6-inch pipes shall be not less than ⅝ of an inch thick.
8-inch pipes shall be not less than ¾ of an inch thick.
10-inch pipes shall be not less than ⅞ of an inch thick.
12-inch pipes shall be not less than 1 inch thick.
15-inch pipes shall be not less than 1¼ inches thick.
18-inch pipes shall be not less than 1½ inches thick.
24-inch pipes shall be not less than 2 inches thick.
30-inch pipes shall be not less than 2½ inches thick.

Lengths.

Section 368. No pipe shall be less than 2 feet in length, and pipes of 12 inches, 15 inches and 18 inches in diameter shall be not less than 3 feet in length.

Curved and Split Pipes.

Section 369. When required, curved pipes shall be furnished and laid, curved to such a radius as may be required or as indicated on the plan of the work. No curved pipe shall exceed 3 feet in length. Split pipes shall be used when found necessary.

Hub and Spigot Pipe.

Section 370. In case the Engineer shall order hub and spigot pipe to be used, the hub shall have a depth of at least three (3) inches from its face to the shoulder of the pipe on which it is moulded, and shall have an interior diameter not less than one (1) nor more than two (2) inches greater than the exterior diameter of the pipe which is to be fitted into it.

Straight Pipe With Collars.

Section 371. In case the Engineer shall order pipe without hubs to be used, it shall be fitted with a collar of the same thickness as the pipe and not less than five inches wide. Each collar must have an internal diameter of not less than one-half inch nor more than one and one-half inches greater than the external diameter of the pipe to which it is to be fitted.

Spur Pipes.

Section 372. Pipes having spurs not less than six inches in diameter with hubs moulded thereon for house connections shall be furnished and laid at such points as indicated on the plan or as directed by the Engineer, and when not immediately used, they shall be sealed on the outside with approved vitrified earthenware covers set in mortar.

Risers.

Section 373. The provisions for risers on brick sewers shall also apply to pipe sewers.

Bends.

Section 374. Bends, siphons and special pipes shall be furnished and laid of the size and forms shown on the plans of the work, or as required.

Pipe Sewers, How Laid.

Section 375. All pipes shall be laid in concrete cradles of the required form and dimensions. The first layer of concrete shall be four inches thick, for the full width of the cradle, and after being thoroughly tamped shall be allowed to set for a period of not less than twenty-four hours. Upon the bed thus prepared, the pipe shall be laid true according to the lines and grades furnished. The ends of the pipes shall abut against each other and in such manner that there shall be no shoulder or unevenness of any kind along the bottom half of the sewer on the inside. Unless otherwise ordered, not less than fifteen feet of pipe shall be laid at any one time, in any one length of trench. The remainder of the concrete shall then be put in place and shall be exposed for at least twenty-four hours for inspection, as required for the bottom course.

Jointing Hub and Spigot Pipes.

Section 376. When hub and spigot pipes are used, the lower half of each hub shall be plastered on the inside with a layer of cement mortar mixed in the proportion of one part of cement to one part of sand and of sufficient thickness to bring the inner surface of the abutting pipes flush and even with the established flow line. After the pipes are fitted, the space between the inside of the upper half of each hub and the outside of the entering pipe shall be filled with cement mortar mixed as above specified, and the outside of the joint shall be thoroughly sealed with the same kind of mortar and the joints carefully wiped inside and outside.

Jointing Pipes Without Hubs.

Section 377. When pipe without hubs is used, a collar or ring shall be used at joints and shall lap equally the ends of each abutting pipe. Such collar or ring shall consist of not more than three pieces, the largest of which shall be placed at the bottom.

Spaces Between Pipes Uniform.

Section 378. The space between the ring and the pipes shall be as uniform as possible and shall be thoroughly filled with cement mortar mixed in the proportions specified for hub and spigot pipe. The joints shall be carefully wiped and pointed inside and outside and all mortar that may be left on the inside shall be removed and the inside of the pipe left clean and smooth throughout.

Iron Pipe Sewers.

Section 379. Sewers of iron pipe, of quality and laid in the manner described elsewhere in these specifications for the laying of water mains, shall be laid wherever indicated on the plans or at such places as the Engineer shall direct.

Special Castings.

Section 380. Wherever such pipes are laid under station platforms or through vaults, they shall, when required by the Engineer, be provided with special castings for manholes, which shall be fitted with a cover bolted on so as to make an airtight joint, according to the plans to be furnished by the Engineer.

Ventilators.

Section 381. Whenever, in the opinion of the Engineer, it becomes necessary to provide ventilation for sewers under station platforms or other structures, iron pipe shall be laid from the sewer to the surface of the street and fitted with proper gratings according to the plans to be furnished by the Engineer.

Connections.

Section 382. All existing sewers, culverts, drains and house connections intercepted by the proposed sewers, culverts or receiving basins shall be connected with the new work by proper curves and grades and in such manner as the Engineer shall direct; and all drains, basins or culverts rendered unnecessary or becoming disused by the work herein contemplated shall be filled in and made solid with good wholesome earth in the manner directed. Provision shall also be made for the connection of future sewers or basins by constructing brick spurs or inserting vitrified pipe at the points indicated on the contract drawings and at other points as the Engineer may direct. These connections shall be closed with bulkheads not less than eight inches in thickness and of the quality specified for brick masonry.

Fresh Work to be Protected.

Section 383. All fresh work shall be carefully protected from injury in every way. No wheeling or walking will be allowed on it and any portion injured must be relaid by the Contractor; no walking or working over the pipes after they are laid,

except as may be necessary in tamping the earth and refilling, will be allowed until there is at least two and one-half feet of earth over them.

Pipes to be Kept Clean.

Section 384. The interior of pipe sewers shall be carefully freed from all dirt, cement and superfluous material of every description as the work progresses, for which purpose a disc, mould or plate, attached to a rod sufficiently long to pass two joints from the end of the pipe last laid, shall be continuously worked through.

Exposed Ends of Pipes to be Protected.

Section 385. The exposed ends of pipe sewers shall, in all cases, be protected with a board or other stopper carefully fitted to the pipe, to prevent earth or other substances from washing in, and in no case shall brick or stone be used for that purpose.

Manholes.
